For ways that are decisive and tricks that are enchanting, Paris' foremost designers are peculiar. Their inexhaustible and delightful ingenuity —coupled with good taste—is, as much as anything else, the guilt that lures style hunters Parisward, laden with hard-earned dollars. These they are ready to exchange for new ideas that may be exploited in numberless ways and womankind is perpetually capitivated by delightful surprises in French garments.

For instance the cape, pure and simple, entered the modes in Paris this spring and met with a generous welcome. Immediately it became less simple, joined forces with other wraps, was sophisticated and learned to dissemble. Very Parisian are the two beautiful wraps from Lelong, shown in the sketch, which have the style of capes but prove to be cape-coats. If we were to catch a glimpse of the lady at the left, which gave only a back view, it would seem that she wore a black and gold silk mousseline cape over a black satin frock, but if she happens to turn toward us she will disclose a black satin coat with cape attachment. The upper portion is made of black mousseline, embroidered in gold over a gold tissue foundation, and the coat of plain black satin. It would be hard to produce a more beautiful or useful coat for evening wear.

The pretty, springtime wrap, of violet wool, approaching on the smart figure at the right, leads us to expect another simple cape with a collar brightened by embroidery in red. But the back view leaves us in doubt—it appears to be a coat dissembling as a cape when one meets it face to face. These wraps and many other garments reveal that the cape has invaded once dotted the crossroads of almost every New England town. Arrangements have been completed for the purchase of the little district school building on the Gardner-Winchendon road. This building was erected in 1801 and is believed to be the oldest authentic little schoolhouse in New England.

Besides being a little schoolhouse, it has the added authenticity of still being painted red. No one knows when the last coat of paint was applied to its hand-hewn clapboards, but beyond a few shabby places on the weather side, the outside of the building still is in a fine state of preservation.

The inside of the school is today just as it was when the last class marched out in the years immediately following the new century and the states. The old-fashioned pulpit-like rostrum used by the district pedagogues still stands in one corner. The old-fashioned desks, much carved with initials and cryptic insignia are there and a homily drawn pencil-mark in another corner indicates the bounds within which unruly pupils were confined.

The "dunce's" bench still stands firmly against the wall near the master's desk and a tall in the wall still holds a bunch of frazzled witch hazel switches tied by a thong.

The spot has long been a mecca of many pleasure parties and reunions of former pupils, though of recent years the number of visitors has greatly decreased.

In line with Mr. Ford's enthusiasm for restoring and preserving the historic relics of a bygone day is his equally strong interest in the revival of the dances of our grandfathers. Not only is he practicing them himself, but pupils of the Dearborn (Mich.) high school also are given free instruction in the dances that were in vogue a week. How many of you older readers remember the fisherman's hornpipe, speed the plow, St. Patrick's day in the morning, French four, Scotch reel, Hull's victory, firemen's dance, and the Spanish dance? All of these and scores of these good old dances are no longer mysteries, and he is doing his bit toward popularizing them, and with a view to exterminating the tango and jazz dance if people like it, but rather looking toward having young and old dance together, thus making the dance more fun for all.

It is not definitely known just what started Mr. Ford off on this terpsichorean tangent. Possibly it was that verses in Ecclesiastes—for Mr. Ford is a student of the Bible:

"To everything there is a season, and a time to every purpose under the sun; a time to weep and a time to laugh; a time to mourn and a time to dance."

Some time ago, so the story goes, a dancing master in Worcester, Mass., one Benjamin B. Lovett, received a telephone call late in the evening.

"This is Mrs. Barker at Wayside Inn speaking." Mrs. Barker is the principal hostess at the inn and took dancing lessons from Lovett fifteen years ago.

"Mr. Henry Ford," she said, "wants to know if you will come up here tomorrow morning for a talk with him at ten o'clock."

The dancing teacher, after he hung up the receiver, began to think over the engagement he had made and wonder what it was all about. Lovett hild been teaching modern dancing. He felt that Ford had no interest in the ballroom concerts of the Twentieth century, and Lovett was rather shaky, he found, when he came to think back on the old-time maneuvers.

He went over what books he had, ironed out the wrinkles of memory, and when he stepped out of Wayside Inn the next morning he felt capable for whatever examination might come.

Mr. and Mrs. Ford were in the ballroom of the inn when the professor arrived, and the manufacturer's first shot left Lovett gasping.

"Do you know the ripple?" Mr. Ford asked.

"Why, I caught him the first time," he said, turning to Mrs. Ford.

Early the next morning Lovett got out his notebooks and went hunting that strange wood bird, the ripple. He rode out to Massachusetts. He went into New Hampshire. There, then, he happened to turn toward Maine and the states. The old-fashioned pulpit-like rostrum used by the country pedagogues still stands in one corner. The old-fashioned desks, much carved with initials and cryptic insignia are there and a homily drawn pencil-mark in another corner indicates the bounds within which unruly pupils were confined.

The "dunce's" bench still stands firmly against the wall near the master's desk and a tall in the wall still holds a bunch of frazzled witch hazel switches tied by a thong.

The spot has long been a mecca of many pleasure parties and reunions of former pupils, though of recent years the number of visitors has greatly decreased.

In line with Mr. Ford's enthusiasm for restoring and preserving the historic relics of a bygone day is his equally strong interest in the revival of the dances of our grandfathers. Not only is he practicing them himself, but pupils of the Dearborn (Mich.) high school also are given free instruction in the dances that were in vogue a week. How many of you older readers remember the fisherman's hornpipe, speed the plow, St. Patrick's day in the morning, French four, Scotch reel, Hull's victory, firemen's dance, and the Spanish dance? All of these and scores of these good old dances are no longer mysteries, and he is doing his bit toward popularizing them, and with a view to exterminating the tango and jazz dance if people like it, but rather looking toward having young and old dance together, thus making the dance more fun for all.

It is not definitely known just what started Mr. Ford off on this terpsichorean tangent. Possibly it was that verses in Ecclesiastes—for Mr. Ford is a student of the Bible:

"To everything there is a season, and a time to every purpose under the sun; a time to weep and a time to laugh; a time to mourn and a time to dance."

Some time ago, so the story goes, a dancing master in Worcester, Mass., one Benjamin B. Lovett, received a telephone call late in the evening.

"This is Mrs. Barker at Wayside Inn speaking." Mrs. Barker is the principal hostess at the inn and took dancing lessons from Lovett fifteen years ago.

"Mr. Henry Ford," she said, "wants to know if you will come up here tomorrow morning for a talk with him at ten o'clock."

The dancing teacher, after he hung up the receiver, began to think over the engagement he had made and wonder what it was all about. Lovett hild been teaching modern dancing. He felt that Ford had no interest in the ballroom concerts of the Twentieth century, and Lovett was rather shaky, he found, when he came to think back on the old-time maneuvers.

He went over what books he had, ironed out the wrinkles of memory, and when he stepped out of Wayside Inn the next morning he felt capable for whatever examination might come.

Mr. and Mrs. Ford were in the ballroom of the inn when the professor arrived, and the manufacturer's first shot left Lovett gasping.

"Do you know the ripple?" Mr. Ford asked.

"Why, I caught him the first time," he said, turning to Mrs. Ford.

Early the next morning Lovett got out his notebooks and went hunting that strange wood bird, the ripple. He rode out to Massachusetts. He went into New Hampshire. There, then, he happened to turn toward Maine and the states. He crossed another state line. He came to Burlington, Vt.

The first woman he met, a dancing mistress, nodded when he asked if she knew the ripple. She said she had taught it ten years before.

"Have you the calls?" asked Lovett, eagerly.

"No, I haven't," she said. "They're out to my cottage, and that's twenty miles away."

"My car is right here. We can make you out there," suggested Lovett.

"That's not home," said the woman. "The cottage is on an island, and the road is torn up. You couldn't get over it now except by walking."

The next twenty miles continued in much the sad vein. The next man visited offered the key to the problem.

"I don't know. The ripple is what we call the Newport down East."

Lovett went back to Ford till primed and full of ripples. A few months later the dancing master sold out his five dancing halls and went to Dearborn as Mr. Ford's private dancing teacher.

The old-fashioned dances cannot be executed to the music of the saxophone. Mr. Ford prefers old-fashioned music, believing that jazz lacks rhythm. "All dancing and all music must have rhythm," he declared, "and the jazz music hasn't got rhythm." Recently he invited A. Mellie Dunham, the seventy-one-year-old violinist and champion of the old-time fiddlers, to play at a barn dance in Detroit.

A Ford dance book is in course of preparation, containing all the figures, and also a history of dancing. In this it will be pointed out that the nitro-modern dance begins and ends with a single couple and that the group spirit of fun is absent. It is further quoted as saying:

"This characteristic of the modern commercial dance is determined by commercial considerations. The older forms of dancing require room. Even in cities, especially in cabarets, is expensive. Hence a form of dancing has been encouraged that enables the largest possible number of paying couples to dance together in the smallest possible space.

"The result is that in the modern method the movement of the dance is mostly above the feet. Demonstration of the dance by the protectors of public morals has usually been occasioned by the importation of dances which are foreign to the expressional needs of our people. There have been imported into the United States of recent years dances that originated in the African Congo, dances from the gypsies of the South American jungles, and dances from the bot-blooded races of southern Europe."

The Dearborn dance manual will make no claim to the personal authorship of Mr. Ford, but it will give expression, it is understood, to the manufacturer's sentiments on the subject. For it appears to be no secret in Dearborn, and wherever Mr. Ford has intrigue friends, that his latest search is, "On with the dance!" and that he lives up to it at every seasonable opportunity, firmly convinced that dancing of a national or racially American character is capable of being developed into an invaluable instrument for social righteousness.

Time for Mr. Blank to Assert Himself

Being the husband of a prominent woman isn't the easiest role in the world to fill. No matter how proud recently had been covering many meetings where the speaker was a prominent clubwoman, Mrs. Blank. The importance of Mrs. Blank as a public figure was duly impressed on her mind as one of the things to be remembered. One day a man called up to give notice of a meeting.

"Mr. Blank will be the speaker," he said.

"You mean Mrs. Blank," corrected the reporter.

"I mean Mr. Blank," in firmer tones.

"There is no Mr. Blank. It's Mrs.," informed the reporter from the superior knowledge of her few weeks' experience. She could almost feel the shock of indignation at the other end of the line.

"I am Mr. Blank," the voice thundered, "and I am going to give the talk."—Indianapolis News.

High University Honor

When Lt. D. is conferred upon a man it indicates that he has a profound knowledge of the laws of his profession, or that department of knowledge in which he is working, and Lt. M. is the oldest, highest and most valuable university degree and is conferred only on such as have made themselves very eminent by their skill, learning and original work. It is seldom conferred before the recipient is fifty years of age. LL. D. is usually conferred as an honorary degree, but Shurtleff, Chicago, and McGill propose to confer it upon the completion of required work and examinations in any of the higher departments of knowledge. LL. D. is sometimes conferred as a third degree in line with Lit. D. and Lit. M. with work in law schools.

The Wayside Inn

Henry Ford's Restoration of Famous New England Landmark

THAT historic structure, the Wayside Inn, built in 1686, and famous as the setting selected by Henry Wadsworth Longfellow for his "Tales," has again changed hands, Henry Ford, the latest buyer, and he has announced his intention of maintaining the old landmark located at South Sudbury, Massachusetts, as a museum open to the public.

Henry Ford, generally consigned to be one of the world's ten most famous living men, has a taste for old institutions, and a conviction that "nothing good ever passes off the earth, whether it is a quadrille or an engineering device."

Sixty-six years after the Pilgrims landed, a family of some importance by the name of Howe erected this ancient building as a residence. Some years later they lost their fortune and were forced to turn their home into an inn. For about 200 years it remained the property of the family, the last of the race, Squire Lyman Howe, being the "Landlord" of the "Tales."

George Washington and Lafayette, it is recorded, were guests at the inn. To the Continental troops during the Revolutionary war it was well known, for, being on the main highway to Boston, it was situated for its purpose.

Longfellow was a frequent visitor at the inn, and three of his close friends, Prof. Daniel Treadwell, the "Theologian," and T. W. Parsons, translator of Dante, the "Poet," and Luigi Monti, professor of Italian at Harvard, and later United States consul in Palermo, the "Sicilian" of the "Tales," were in the habit of spending their summer evenings there. It is not of record, however, that Longfellow saw them there, but in a letter dated October 30, 1862, shortly after he had begun to write the "Tales," he informed the writer with his publisher, James T. Fields.

Thus, with a picture of the Wayside Inn fresh in his mind, he wrote:

As ancient is this hostelry
As any in the land may be.
Built in the old colonial time,
When men lived in a grander way,
With ampler hospitality;
Now somewhat fallen into decay,
With weather stains upon the wall
And stairways worn, and crazy doors
And creaking and uneven floors,
And chimneys huge and tiled and tall.

After the death of Squire Lyman Howe, the place passed into various hands, and finally was purchased by Edward R. Lemon, who restored it and instituted a series of antiques, some of which originally were the property of the Howes, but had been scattered. It was from Mr. Lemon, the present, that Mr. Ford bought it.

The swinging sign that formerly hung over the front door of the old hostelry, and was found in a Wellesley (Mass.) hayloft and is to be presented to Mr. Ford. Within Thein, a treasure trove of the relics of a bygone day, and the old-fashioned dances that were once the delight of a former generation.

As the sun sat silently eyeing her she glanced about with interest. "Where's Aunt Mary, should I transact the business with her?"

The Gloom-man roused. "That's the trouble, she's inserted the advertisement in a moment of inspiration, then received a telegram from home saying Bobby was down with the mumps, and away she sped, telling me to be sure to select the right applicant. Molly always was the kind of a sister to get a fellow into a mess."

Bub brightened. "Never mind, your decision is what counts, let's proceed. I read the advertisement and went down to the Tribune office bright and early to await developments. I walked until I heard your man inquire for 'K 238,' and followed him here. Personal interview always desirable.

"If you likes me and I likes you, and we both like about the same," she hastened, "the question before the house is, are you respectable? I'm in for a good, decent time, diversion if you please, Bub's name for three months. He said I could do anything respectable. If I'd keep out of debt and not marry.

"Could you make it a hundred a month?" she asked suddenly. "I had it. I never could earn that much. Could you make it a three months' engagement? Would you for the sake of respectability call for me and take me home each day?"

As the man was still silent she beamed persuasively, "Am I the rejuvenator?"

"You interest me," declared the Gloom-man, "and I'm especially in hope. Yes, I'll meet your terms. It is your due to know what sin ple is. I was engaged to be married to the sweetest woman on earth, so I thought, and on the eve before our four. I'm broken, nothing interests me." He added savagely, "You'll hate me for it for it's weak."

"No," she answered softly, "I like you because you care. Don't get cold feet, I couldn't marry you if I would. Let's go see the ball game. I want to see the Cubs win. Oh, I say, we'll just be chums and die! I'll not have to count the cois we can have the time of our lives. I'm going home, call for me soon."

He followed her to the library door and she turned a pale face through it. "I'm sorry about my slang if you care. Dad says no one would guess the money he's spent on my college polish. Say, when I have on an evening gown you can't guess what a polished lady I become. I'm going to call you Cousin Gloom. He's a cousin of mine," she trilled.

The Gloom-man caught her hand, "You are good for the darned."

She quickly discarded his hand. "None of the clasp stuff, just a good time. Only I'm not responsible, I'm bump."

The ball game was over. Bub had proved his automobile she quietly took the wheel.

"Bub," exclaimed the Gloom-man, almost with enthusiasm, "let's dine this evening, clothes and all, at the Biscayne gardens?"

For a moment she seemed embarrassed, then grinned. "Hats, it's a cinch. I'm hired by the day. We'll go."

They were waiting for the ordered dinner in the served, dainty glitter of lights, the bewitching music, and the buzzing voices, enveloped them. Bub was demure, transformed; the Gloom-man could not account for the change.

"Bub, do you believe in dual personality? I believe between the two of you I will rejuvenate." And the man almost smiled.

"No," she replied, "not dual, just different." With a merry laugh of be-

Kill Tapeworms in Farm Fowls

Powder Obtained From Indian Plant Found to Be Quite Satisfactory.

(Prepared by the United States Department of Agriculture.)

Kamala, a brownish powder obtained from a plant in India and long used there as a drug, has been found satisfactory for removing tapeworms from poultry. This announcement is made by the United States Department of Agriculture as a result of experiments carried on by Dr. Maurice C. Hall and Dr. J. E. Shillinger of the zoological division, bureau of animal industry.

Cause Disturbances.

Tapeworms cause serious disturbances in chickens, turkeys and other poultry, the injuries ranging from unthriftiness to conditions simulating paralysis, due to deficient diet, sometimes resulting in death. Up to the present time no satisfactory treatment had been known, and Mr. Brown for a remedy has been insistent and has considered the most urgent in that the life histories of so many tapeworms are unknown that satisfactory preventive measures cannot be recommended as yet. Moreover, so far as life histories are known they involve such intermediate hosts as flies, earthworms, slugs, and similar animals which are present in every difficult to control under farm conditions. The need of such a drug as kamala is therefore apparent.

The drug was tried out on 120 chickens and turkeys, counts being made daily of the tapeworms removed, the birds finally being killed to determine whether any of the parasites were left. The result indicated that a dose of one gram for a chicken removed all the worms in approximately 19 cases out of 20, a much better result than has been secured with any other drug. The dose for turkeys seems to be about twice.

Way to Administer.

The investigators say the best method of administering kamala is to give individual dosing with pills, but that the use of capsules is also satisfactory. Flock dosing by the administration of the drug in feed is much less satisfactory. The dosing of individual birds is easily accomplished and fasting and purgatives do not appear to be important. At the present time it may not be possible to obtain kamala at all drug stores, but it is expected that within a short time manufacturers will have it on the market in convenient form. A moderate charge for the kamala itself for treatment of chickens is less than one cent per bird.

Destructive Attacks of Cutworms on Tomatoes

Among the most important insect enemies of the tomato are cutworms and fallow bugs, according to the United States Department of Agriculture. These smooth, plump, gray or brownish caterpillars attack the young tomato plants both in the plant bed and when set in the field, usually cutting them off near the surface of the ground. One cutworm can destroy many more plants in a single night than it can devour. By reason of their destructive attacks resetting is frequently necessary.

The best control measure is the use of what is termed poisoned bait, made as follows:

To one peck of dry bran, add four ounces of white arsenic or paris green and thoroughly mix. Then add two quarts of cheap molasses diluted with enough water to make a crumbly, wet mash. Allow the mash to stand for several hours and then scatter it thinly about the base of the plants late in the evening. Make applications as long as the cutworms are active and damaging the plants. In the control of cutworms it is a good plan to apply the poisoned bait before the crop is set out or before it appears above ground. Appl

GROWING GAS TAX

Some idea of the importance of the automobile as a revenue producer as well as business product may be gained from the statement made by the bureau of public roads of the Department of Agriculture to the effect that nearly $150,000,000 was paid by automobile users in 1925 in the way of gasoline taxes.

The amount collected is a gain of eighty-three per cent over the total of 1924, proving that the gasoline tax idea is growing in favor with the various state governments, and that the use of the automobile is steadily on the increase.

Of the amount of tax collected from gasoline sales, approximately $102,000,000 was used in rebuilding and repairing roads, by state highway commissions, $32,000,000 was used for county and local roads, $217,000 for cost of collection and $1,160,000 for other public expenditures.

Gasoline taxes were collected in all states except Illinois, Massachusetts, New Jersey and New York, which has the gas tax is becoming well nigh universal in the United States.

It is anticipated that there will be a big increase in the collection in 1926 over the previous year.

Half-way Economy—"Household economy is bound to fail if its one-sided," said Congresswoman Mary Norton of New Jersey. "A Jersey City man found such fault with the household expenses that at last his wife said: 'The only other retrenchment I can see is to get rid of the cook. Do you think we could get along without a cook John?'

"Yes, I think we could,' John answered gloomily. He mused a moment, frowning. Then he said: 'Yes, if the worst comes to the worst, you can do the cooking and I can get my meals at a restaurant.' "—Pittsburg Chronicle.

PROVING PRACTICAL

The principal of protection has certainly been a great blessing for American industries, all of which have been built up under its influence. Without protection America would still be an agricultural country and not a world power with a hundred and fifteen million prosperous citizens.

And a great many people are coming to believe that if we expect to have a merchant marine to protect us in time of war from the enemy, and to protect us in time of peace from foreign shipping monopolies, we ought to do something toward offering protection to our American shipping as well as our American industries.

These advocates of the extension of the system of protection to our merchant marine cite the case of our ships engaged in domestic trade. These domestic ships of ours are receiving full protection for the reason that foreign ships are barred from participating in our purely American trade. And American domestic shipping is flourishing like the green bay tree.

For as a result of this protection great lines of shipping have grown up between our coast cities, and on the Great Lakes, as well as between ports in the United States and Alaska, Hiwaii and Porto Rico. Every American is proud of these great domestic shipping lines, but comparatively few of us stop to think that they are made possible only by applying the system of protection.

On the other hand our foreign shipping has not flourished. It disappeared from the seas following the Civil war and it took the necessities of the great World War and an expenditure of billions of dollars of the taxpayers' money to put the flag back on the seas. And now that the flag is back it is taxing the ingenuity of the government to keep it there.

Why wouldn't it be advisable to consider some form of protection for our foreign as well as our domestic shipping? It is no coincidence that one languishes without protection and the other flourishes with it. The American Economist aptly sums up the theory of the protectionist as follows:

"Through our jealous retention of protection for our ships in coastwise trade, a vent for the activities of millions of tons of American-built and owned ships is found in the coast-to-coast trade of the United States via the Panama Canal. During January, for example, $2,103,368 was collected in tolls, and a few months have shown tolls exceeding $2,000,000. For the seven months ending with January tolls have totaled $13,062,523, and increase of about $200,000 over the corresponding period of the previous fiscal year. The United States benefits greatly through the protection accorded to its ships in domestic trade and so do our shipbuilders and ship owners. Protection would do the same for our ships in foreign trade."

Became Popular—"Who is the Sheriff of Crimson Gulch?" "I am," answered Cactus Joe. "But you never pay any attention to these lawbreakers." "Of course. That's how I made myself popular and got to be sheriff."—Washington Star.

Here is another pretty sane view on the War debt settlement uttered by Senator William M. Butler, of Massachusetts, who is also chairman of the Republican National Committee:

"The War Debt settlements now before the senate, are just and equitable, as proposed, and are based upon the capacity of each country to pay. If they are not approved what shall we do? Abandon them, or secure them by force? That is the question. We do not want the horrors of war. These debts have great bearing, not only upon us but upon generations to follow. We can be tolerant and helpful to those countries less fortunate than ours."

COMMENT

—Senator Robinson of Arkansas, says we ought to lower our tariff and buy European goods so that Europe could pay its debts. In other words, he wants us to furnish Europe with the money to pay us, at the expense of American manufacturers and working men.

—New York City is all worked up because somebody has put cocoanut oil in the city's cream supply. But considering the other, and denatured alcohol they take with their hootch, why should they worry about a little cocoanut oil inthei r cream?

—The Houston Post-Dispatch calls daylight saving "a Republican scheme." There may be something in this, for Benjamin Franklin, who invented the plan, was a notorious Republican.—Boston Transcript

—The Supreme Court of Arkansas held that a locomotive must sound its whistle when it approaches a dog. Of course if the dog responds the locomotive must wag itsbender.—Detroit News.

—The Slogan of the Daughters of the American Revolution, "Better to prepare and prevent than to repair and repent," is a good one for pacifists to ponder.—Cincinnati Inquirer.

—A Kentucky doctor announces a cure of measles. They seem to have a successful serum now for nearly everything except the itch for public office.

—It is said that France's internal debt absorbs 60 per cent of the national revenue. But up to this time the foreign debt hasn't worried her budget to any appreciable extent.

—It looks as if banditry in New York and Chicago will have to be dismissed from the roster of crimes and recognized as an industry and regulated.—Boston Post-Dispatch.

—The snow, which loses its beautiful whiteness soon after reaching the earth' can be used to symbolize human life in general.—Sioux City Tribune.

—Frau Einstein says that her husband never explained his theory of relativity to her. Does he think that a woman cannot keep a secret?—Boston Globe.

—The trouble with the flapper craze is, that when you see one coming down the street you can't tell whether it is a real flapper or a synthetic one.

Fruit-Fed Puppies

Fruit-fed puppies are the latest, a British veterinarian having proved, to his own satisfaction at least, that puppies brought up on a diet which includes oranges, apples and bananas make better and bigger dogs than those that have known only the usual dog foods.

No Chance for Argument

"I lead a dog's life," said a big-town husband, in a fit with his wife. "Right you are," said she, "You cause in the house with muddy feet, get a comfortable place near the fire and wait to be fed."—Clipper's Weekly.

Old Wedding Custom

One hundred pounds of sugar was the curious wedding present the British Grocers' company gave Miss Marjorie Pollock at her marriage. The gift was a revival of an old custom lapsed since 1534.

In the "Good Old Days"

In the days of female prize fights, an English woman was reported to have floored her Jewish opponent 70 times, and after an hour and twenty minutes of fighting was declared the conqueror.

Notice School Officers

State bonus will be given as in former years. All districts meeting the requirements will receive this money. Application for blanks should be made to the Commissioner of Schools.

PACIFISM AND COMMUNISM

There are a great many professional pacifists in America who are also apologists for Soviet Russia. They are going to have a hard time reconciling their consciences to the fact that it is the refusal of the Red government to take part in any disarmament conference which more than anything else is going to make the Geneva conference for the limitation of armaments a practical failure.

Says the Paris Temps on the subject: "Is it possible to conceive of a reduction of armaments by the European powers while revolutionary Russia, which has by no means renounced her dreams of a universal revolution, remains armed to the teeth? The abstention of Russia risks ruining in advance all such projects, or at least removes all value from decisions in principle which might be taken relative to the limitation of armament."

The preliminary meeting is going to be held at Geneva on May 18th, and the best prediction of the result now is that it will be nil so far as practical disarmament is concerned. According to best estimates in Paris the Russian reds now have a well trained army of a million man. It is enforced by military leaders who had their schooling under the czar and who are skilled in their profession. It is the object of communism to overthrow capitalistic government wherever possible. With this constant threat in view no European government, within the sphere of Russian military influence, is going to consent to disarmament so long as a million armed men remain in Russia. To do so would be to commit suicide.

In the meantime these pacifists in our own country who have shown a fondness in the past for sovietism, ought to do a lot of tall thinking.

RAYMOND T. BAKER

Raymond T. Baker, former director of the mint, dropped a hint recently that he might seek the Democratic nomination for senator from Nevada.

EARLY CHRISTIANS MILITANT

If Christians in the beginning had been pacifists there would have been no Christian religion declares the National Republic in commenting on Edward Rok's lament to the effect that so many "militant" hymns are sung in the churches.

Edward Rok laments the use in America, and especially in American churches, of songs that speak of battle. Deprives of the repetition of the "Battle Hymn of the Republic," and hymns such as "Onward Christian Soldiers" and "The Son of God Goes Forth to war." He believes it inconsistent for Christians to be fighting men. If Christians had been pacifists from the beginning there would now be no Christian religion. All Europe would have been as completely Moslem as were eastern Europe and southern Spain centuries ago but for the fact that there were warriors in Christendom. In a world of strife-non-resistance means extinction.

Confucius taught a pacifist philosophy, and centuries ago it was accepted by China's teeming millions. It might be assumed from this that the career of China had been peaceful, yet in no other area of similar size in all the world have so many people met death by violence and nowhere else have men suffered more from oppression. Peace has been purchased in China at the price both of safety and of justice.

The Chinese passively accept oppression; therefore they have been oppressed. They have not formed the habit of fighting for their rights; therefore their rights have been ignored. Government has been by the strong; the armed. Military chieftains ravaged the land, because the people have never learned to resist.

Government has for centuries been notoriously corrupt and unjust, because the Chinese have been taught stoical submission to evil. And yet China is not a symbol of progress, and the level of human welfare is lower there, perhaps, than anywhere else in the world.

THE THEATRE

VALENTINO IN "COBRA"

Rudolph Valentino selected an excellent cast to support him in "Cobra," the modern drama in which he will appear at the Palace Theatre, beginning Tuesday, May 4th. The star himself appears as an Italian Count who comes to America to enter business.

Nita Naldi, plays the part of the cobra woman—the woman with the same fascination which the cobra holds over its victims. Gertrude Olmsted, who "got started in pictures when she won an Elks beauty contest in Chicago and has been climbing rapidly up the film ladder ever since, has the best part of her career in the type she has chosen for her role. She appears as a blonde, in sharp contrast to Miss Naldi's brunette beauty.

Casson Ferguson, who will be remembered for his great performance of the young attorney in Pauline Frederick's "Madame X" returns to the screen after an absence of a year in the role of the star's best friend.

Three other beautiful women are in the cast—Eileen Percy, Claire de Lorez, and Laska Winters. Hector Sarno, Rose Rosanova, Lillian Langdon and Henry Barrows complete the list.

"Cobra" was adapted to the screen by Anthony Coldeway from Mortis Gest's successful Broadway play and was directed by Joseph Henabery. It was produced by Valentino independently under the Ritz-Carlton banner and distributed through Paramount.

"ONE YEAR TO LIVE"

M. C. Levee, producer of "One Year to Live," the First National film which will be shown at the Palace Theatre, was once the author of the statement that mere money can never make a good picture.

Thus, when Levee required a background for his story of Parisian theatrical life, he did not order Director Irving Cummings to do the expected thing. He did not send him and his company to Paris and Monte Carlo, the locales the story. He did not decree that barrels of money be spilled recklessly just for the sake of spilling it.

Levee not only did the economical but the sensible thing of dispatching a photographer to these part, instructing him to send back no more and no less than pictures and films of the places, interior and exterior, that he wanted.

Immediately upon the receipt of the stills and films, Levee assigned a crew of 350 men, headed by several master builders, to duplicate the scenes. This required two weeks, instead of the two months, the best minimum time, that it would have taken the company to go to France and back. Moreover, he was patriotic in keeping his producing activities in America.

And instead of relying upon popular conception of what Paris' theatrical districts and Monte Carlo's casinos and cafes looked like, Levee got exact and up-to-date replicas.

This is perhaps the first instance in the production of a photoplay that a photographer was this used. Joe Goodrich was the man.

Aileen Pringle and Antonio Moreno head the big cast of "One Year to Live." —Saturday and Sunday.

But He Doesn't Think So.

The world could easily get along without the man who never makes a mistake.

"We Serve Michigan"

What Co-operation Is Accomplishing

THE American shipping public since the war period has come to realize a certain responsibility devolving upon it beyond the mere payment of the authorized charges for the transportation service performed.

There is, for instance, the requirement of the prompt loading and unloading of the railroad equipment on the part of consignors and consignees, respectively.

There is the obligation on the shipper of early advice of car requirements to enable the railroads to "mobilize" equipment.

THESE two requirements enter largely and eventually into the cost of steam railroad transportation and they are dependent upon the good-will directly manifested by the shippers and altogether beyond the control of the railroads.

Recognition of these factors has brought about the organization of the Shippers Regional Advisory Boards and enables the country to get more service from the equipment of the American railroads.

THIS is entirely voluntary service on the part of the shippers and is a unique page in the history of business. It has also been a profitable expedient, a lesson in co-operation gained from the world war, a phase in the onward march of the times, which Judge E. H. Gary, of the United States Steel Corporation, recently described as the application of the Golden Rule in business, a condition that was inconceivable twenty-five years ago.

It is a manifestation of a quiet but certain revolution in American business thought which is gradually progressing towards the finest ideals, and incidentally tending to the greater well-being of our people and making for greater material returns.

THE Michigan Railroad Association is keeping step with the shippers and heartily seconding those ideals of an enlightened business opinion and appreciates that this policy is as important to the stabilizing of business as are the operations of the Federal Reserve Bank System in its particular branch of public economy. In fact, it is the identical application of that principle to transportation. Michigan industry has much to gain through the policy of the Shippers' Regional Advisory Boards.

MICHIGAN RAILROAD ASSOCIATION

NEW PALACE THEATRE
Attractions for Coming Week

Saturday and Sunday.

Aileen Pringle and Antonio Moreno in "One Year to Live." If you had one year to live what would you do? One sensational year of fun and frolic—one year to drink all the wine of life. Stupendous production! A Parisian Follies! A French Carnival! The spirit of the gayest capital is caught here.

Also a good comedy, "Elsie of New York." Another Educational picture, "Beyond the Microscope," will show you the wonders the naked eye can not see.

Tuesday and Wednesday

Rudolph Valentino in "Cobra." Valentino in a fine roll as a young Italian nobleman who can't escape the lure of a beautiful woman. A strictly modern story of temptestuous love, stirring drama and touching sacrifice. With Nita Naldi as the cobra woman—lady of love.

Also a Fox News Reel. Travel the world with the News Reels. The very best form of travel.

Congregational Church

Rev. B. G. Mattson, D.D., Minister

10:30 Morning worship with sermon by the pastor on "Prison Houses of the Soul."

Sunday School at 12:00.

Young People's meetings at 6:30.

Beginning with the month of May the regular evening service will be discontinued. Special meetings may be held from time to time as may be announced. It is planned to hold a monthly church meeting for social, business and worship on Thursdays to be announced.

A number of units are being formed in the Sunday School of the National Prohibition Guards. We expect to observe Mothers Day with a special program on Sunday, May 9th.

Baptist Church

Rev. Herman Runs, D. D.
—) Pastor (—

The annual letter to the Grand Traverse Baptist Association will be submitted to the church at the morning service. The past year has been one of great success. Financially, socially and spiritually the victories have been many, and the church will send its greetings to the Association with profound gratitude to Him who has given us our every blessing.

The services next Sunday will be of the usual character—preaching at 10:30 a. m. and at 7:30 p. m. Bible School at 12:00 m., and B. Y. P. U. at 6:30.

The Grand Traverse Association of which the local church is a member will meet with the Parr Memorial Church in Petoskey Thursday and Friday. Pastor Burns is to give the annual sermon, and other members of the church have places on the program. It is hoped that a large delegation will go from here.

The church is saddened again by the death of brother William Sanford who passed away in Detroit the fore part of the week. He has been a great sufferer for several months. We will remember pleasantly his visit here last summer. The family will have the sympathy of the church in their sorrow.

A cordial invitation is extended to all who have no other regular place of worship to join with us. A hearty welcome to all such to worship with us.

Methodist Church.

C. E. Pollock, Pastor.

The pastor will preach at both services of public worship next Sunday. The morning preaching service is at 10:30. The hour of the evening worship changes with May 1st, and is at 7:30 next Sunday. The Epworth League meets at 6:30 next Sunday evening.

"Yet"—Morning sermon subject next Sunday.

"Les Miserables"—Evening sermon subject next Sunday.

The evening service always has unusual features of interest and thought. Always something doing. Bring your friends and be sure they will hear a message and be well repaid for their efforts.

Sunday School meets at 12 o'clock each Sunday. A class and a welcome for each person who cares to study the most important matters of thought.

Mid-week service Thursday at seven thirty o'clock p. m.

A MUSICAL SURPRISE

Charlevoix's Band has Prepared an Evenings Supreme Entertainment

....A CONCERT....

will be given, where for the first time you will hear music on which the boys have practiced for months.

Charlevoix Needs a Band---A Good One.

With an active summer season in prospect, a band will be a strong attraction for the city. The proceeds of this concert will go to purchase needed band equipment—to make the band best in Northern Michigan.

This unusually Pleasing Program will have Vocal and Instrumental features, as well as Band Music for every taste

The Entertainment Feature of the Season. Don't Miss It!

Palace Theatre — **May 13th**
Admission, 50c & 25c — 8 o'Clock

Charlevoix Sitting on the World!

Every week now, we hear of more Charlevoix land selling at higher and higher prices.

Things certainly look good!

Charlevoix Real Estate has suddenly become a Real Investment.

And never again will it sell for such low prices.

Tel. 113 :: CHARLEVOIX

—— PERSONALS ——

John M. Shields of Petoskey, was a business visitor here last Monday.

Publisher C. E. Kimball of the Northern Michigan Magazine, Petoskey, was a visitor in this city Monday.

Members of the local I. O. O. F. and Rebekahs attended services in a body, at the M. E. Church last Sunday.

Attorney Clair C. Coulter motored up from Detroit, Wednesday and will spend the week end with friends here.

C. E. Heller returned from Pontiac last Friday after spending about two weeks away from his usual duties.

Miss Helen Armstrong, of Chicago, is spending a few days with her parents, Dr. and Mrs. R. B. Armstrong.

Ulysses McCann came up from Benton Harbor and spent the week-end with relatives and friends in this city.

Richard Finucen came up from Northville late last week, spent a short time in the city and returned the next day.

Rev. William Eldridge and family left for Sturgis, Mich., last Tuesday, where they will make their home in the future.

Theodore B. Gravelin, who has been working in Detroit for the past four months, returned to his home here last Friday.

Mr. C. A. Barry, of the Barry-Meech Company, spent one or two days here early this week looking after business interests.

Dr. Charles McCann and wife of Grayling, were guests at the home of their parents, Mr. and Mrs. John McCann, 102 East Hurlbut avenue.

Harold McCann, who is employed in the fishing industry, with his boss for operations at White Lake, spent Sunday with his family here.

Dr. F. F. McMillan and family motored over and spent the week-end with relatives at Indian River, returning to Charlevoix early this week.

Miss Maggie Colter who spent the winter with her nephew, Clarence Bowman, in East Jordan, returned to her home in this city last Tuesday.

John C. Gallagher, of Green Bay, Wisconsin, arrived here Tuesday, stopping over on his way to his former home, St. James, for a short visit.

Floyd Iletts has taken a position with H. R. Fowler and will hereafter act as chief salesman for the Hudson and Essex cars in this territory for the Fowler agency.

The Wahwahtaysee Camp Fire Girls will hold a baked goods sale Saturday, May 1st, at the salesroom of the Charlevoix Hardware Company. The young ladies will appreciate your patronage.

Harold LaChance, a nephew of Captain John N. Chambers, arrived here from Chicago a few days ago and will assit on the S. S. James E. Sanford with his uncle during the season of navigation.

Mr. and Mrs Harrison Bedford are once more Charlevoix residents after spending some months on a motor trip as far south as the Gulf of Mexico. They arrived home last Thursday afternoon.

The many friends of Captain and Mrs. C. O. Wilber will be pleased to learn that they returned to Charlevoix from their winter's sojourn in Chicago and reopened their Dixon Avenue residence last Tuesday.

Commencing Monday, May 3rd the banks of this city will close at 2:30 o'clock every day except Saturday, closing hour three o'clock. Charlevoix State Savings Bank and Charlevoix County Bank.

Owen McCauley who has been in Detroit for the winter, has been here for a day or two awaiting an opportunity to proceed to his post of duty, Head Light Keeper on Beaver Island during the season of navigation.

Mr. and Mrs. Frank M. Glassford, winter visitors in Florida and other southern points, returned to Charlevoix last Thursday, making their trip via the auto route, and are again occupying their Dixon avenue residence.

Navigation between Mackinac Island and St. Ignace has been open several days. The first trip between these two points by steamship was negotiated safely last Thursday by the steamer Elva, a ship that covers the route regularly during the season.

Due to lower lake levels considerable work will be done both at Mackinaw City and St. Ignace this spring in order to obtain sufficient depth of water for the car ferry "Wawatam" to land at her warf without grounding. Contracts have been made for this improvement and the work will proceed at once.

A major operation was performed for Mrs. Louis Bourisaw at the Charlevoix hospital last Friday. Reports from the hospital are very encouraging as to her physical condition at this time and contains the information that satisfactory improvement is made in her case and that complete recovery is just a matter of time.

The government ship Fulmar was taken from her winter quarters last Tuesday and later tied up at the wharf of the Charlevoix Lumber Company where the ship is being outfitted and placed in condition for service with the opening of the season of navigation. Captain S. M. Rose will be in command the same as last year.

Mrs. A. L. Coulter, who has been visiting friends in central and southern Michigan for several weeks, returned recently and is at her cottage, 602 Park Avenue.

Sunday, May 9th, will be appropriately observed by various church organizations throughout the land. All such are arranging special programs to be carried out on the day designated. In addition to the organization work a more extensive observance will be made in millions of homes as fitting remembrance of mothers living and mothers gone. Nor will this be solely confined to mothers—fathers also will come in for their full share of reverence and love.

Albert Cook was a business visitor in Petoskey early this week and while there was given a physical examination at the request of the Standard Oil Company, by whom he was employed prior to an illness that developed nearly one years ago. The report of the medical examiner met with the approval of the Company and as a result Mr. Cook will re-enter their service next Saturday, May 1st, making for a most satisfactory arrangement from Mr. Cook's viewpoint, also from that of the Company, otherwise Mr. Cook would continue as during the past year, on the retired list.

Captain Donnellan made a trip to St. James Tuesday with his airplane, but due to a dense fog that hung over the landing field at St. James' station was unable to effect a successful landing and was obliged to return with his mail shipment. Wednesday morning he again took to the air from the Charlevoix field, making a successful flight to St. James and a few minutes after making his start safely landed at St. James and was making the delivery of mail that had been delayed twenty-four hours on account of weather condition the day previous.

The S. S. James E. Sanford tied up at the Wilbur wharf last Tuesday morning where she took on a heavy freight cargo, mainly for St. James business houses. The ship has been thoroughly overhauled, her hull repainted in white and green, stack red and black all making for a nifty bright appearance for her first trip over the Charlevoix-St. James route. This will be made at the earliest opportunity and this cannot come too soon to satisfy her new owners and operators, nor for patrons of the line, particularly those residing at the St. James end of the route.

Captain F. F. Russell and crew of the steamship J. B. John, for some days past have been patiently marking time, anxiously awaiting the chance to leave winter quarters in the Charlevoix harbor and commence operations for the season. A heavy field of ice completely locks Little Traverse Bay, and it is on this water where the J. B. John proceeds to take on her outbound cargo. It will probably be a few days before the ship can reach her point for loading. However, she is a big, heavy powerful ship capable of bucking heavy ice and at the same time make some forward progress even when handicapped, but present ice conditions in Little Traverse Bay are out of the ordinary and an effort to make the trip until the ice formation becomes less solid would be taking desperate chances. Be that as it may when the order comes to sail the J. B. John will be on the way as she is prepared to start on short notice.

—DRESS MAKING. — Fashionable dress making by Miss Nellie Guild, Charlevoix, phone 7012-F21. 49-tf

Mrs. S. A. Correll returned last Friday from an extended visit to Muskegon.

Mrs. William M. Coulter, of Rochester, Mich., is visiting her sister, Mrs. Willard A. Smith, 208 Park Ave., and other relatives and friends in this city.

Mr. and Mrs. George Wantz, of Indianapolis arrived here Wednesday morning in response to a message calling attention to the illness of Doctor Armstrong, father of Mrs. Wantz.

Mrs. James McCann entered the Charlevoix Hospital Wednesday suffering from appendicitis. Later in the day the patient was operated on and the offending member removed. From present indications the operation was a complete success. This Thursday morning Mrs. McCann is resting comfortably and has every appearance of making quick recovery.

Mr. George W. Dennis reports having received from the sale of pork and pigs the sum of $250 00 within the past ten months at his farm on the Norwood road. This total amount given was produced from sale of pigs and pork raised from a single brood sow and at an expense for feeding of approximately $30, showing a net profit of $200 which Mr. Dennis concludes is a record for this region.

Last Sunday the boys and girls of the local Sunday Schools were invited to enroll as National Prohibition Guards Seventeen companies and one hundred forty-one enrollments have been recorded to date. This patriotic organization is sponsored by the Woman's Christian Temperance Union and enlistments of young people from nine to twenty-one years of age is sought to promote law observance.

Friday evening, May 7th, Grand Master Hanson of East Tawas, and Grand Secretary Fred A. Rogers of Lansing, will be guests of Round Lake Lodge No. 293 in this city. Others in attendance will be members of the I. O. O. F. from Horton's Bay, Boyne City and East Jordan. A special meeting with a special program for the evening will be of more than ordinary interest to attending members.

William J. Bennett, pioneer in this region and until comparatively recent years prominent especially as a lumberman, died suddenly at his residence in Boyne City Tuesday, April 20th. He was about 65 years of age and is survived by his wife and nine sons—one of the sons live in Detroit, two in East Jordan and one in Antrim county.

Word was received from Dearborn last Tuesday afternoon that Mr. William A. Sanford, until comparatively recent years a Charlevoix resident, passed away in Dearborn during the early morning hours of the same day that the message announcing his death arrived here. According to the message the body will be brought to this city for interment and according to early arrangements will arrive this afternoon.

Maud Starmer, Bay Shore; Edith Sweather, Boyne City; Leon Snyder, Central Lake; Virginia Pray, Frances Cook and Carlton Brown of East Jordan, all students at the Central Michigan Normal from this region have been placed on the honor roll for their work during the past term. In order to be thus distinguished their average for the term on all subjects carried must not drop below B for the complete term.

Little smoke smudges in sundry places about the city is evidence that local residents are making the usual spring improvements on their properties. General housecleaning is underway—painters, paper-hangers and interior decorators are busy. Home owners are now making improvements in their properties both in appearance and as a matter of personal convenience, all making for general benefits throughout the city.

Dr. R. B. Armstrong has been confined to his home and bed for several days, his illness being ascribed to a complication of ailments one of which is of a minor nature, of long standing. More recently the Doctor contracted a mild case of influenza from which he had not fully recovered when complications of a more serious nature made it essential for the Doctor to abandon temporarily all professional work, retire to his residence and thorough absolute rest, nursing and medical attention to overcome the threatened health impairment.

St. Mary's Catholic Church

When Grandmother Was a Girl

Since 1867

Styles have changed a lot since grandmother was a girl. The curls and frills and ruffles and furbelows of that bygone day are only a memory now.

But there is one fashion that has remained in vogue during all these years—that has, as a matter of fact, increased amazingly in popularity since 1867. That is the fashion of home decorating with paint products bearing the label of The Chicago White Lead and Oil Co. This label signified highest quality then—just as it does today. And of the completely line of half-century-old favorites, none is better known than King Wall Finish.

For this remarkable finish combines all the desirable features anyone can ask for. It's easy to prepare by simply mixing with hot water. It's easy to apply, even by an inexperienced hand. It spreads far, hides well, looks new on entrals. And it is so economical that you can finish the average size room for less than $1.00!

Write today for name of dealer nearest you and for FREE Color Chips showing 19 beautiful colors to choose from.

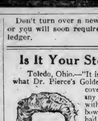
Is It Your Stomach?



Toledo, Ohio.—"It is just wonderful what Dr. Pierce's Golden Medical Discovery will do for any one who suffers with stomach and bowel trouble. I had typhoid fever and it left me in a very bad physical state of health, my bowels would not act, my food would set heavy on my stomach and did not digest properly. Gas would form and cause me great distress. I was weak, nervous, and in a rundown condition. I took Dr. Pierce's Golden Medical Discovery and it cured me of my stomach and bowel trouble and built me up in good health."—Mrs. Laura Hager, 630 Vinton St. All dealers. Tablets or liquid.

Grandmother Knew

There Was Nothing So Good for Congestion and Colds as Mustard

But the old-fashioned mustard plaster burned and blistered. Get the relief and help that mustard plasters gave, without the plaster and without the blister.

Musterole does it. It is a clean, white ointment, made with oil of mustard. Gently rub it in. See how quickly the pain disappears.

Try Musterole for sore throat, bronchitis, tonsillitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of the back or joints, sprains, sore muscles, bruises, chilblains, frosted feet, colds of the chest (it may prevent pneumonia).

The Valley of Voices

By GEORGE MARSH

Author of "Toilers of the Trail," "The Whelps of the Wolf"

(W. N. U. Service.) (Copyright by the Penn Publishing Co.)

CHAPTER XVI—Continued

At length, by a supreme effort, the under man reached the knife beneath his back with the hand of a pinioned arm. With a heave the hand was free and the blade turned into the body above him. But in a flash the right hand of the Iroquois shifted from the throat to the menacing wrist. There was a wrench—a groan as the bone snapped, and the knife slipped to the snow.

Again, like the fangs of a wolf, the long fingers of Michel clamped on the throat of the man in whose bulging eyes shone the fear of the death which neared.

"Ile sea for her!" snarled the headman, as he struck with his free hand Qué pointed face. "Ieess sea for me!" and he struck again.

Slowly the bloodshot eyes of the assassin, who had so confidently slipt from the ambush, filmed; for the last time his mouth gaped wide for the air denied him by the vise on his throat—with a quiver he relaxed on the snow.

Picking up his rifle and slipping his hands into the rabbit-skin mittens which hung from his neck by thongs, Michel bent and closely scrutinized the knotted features of his enemy. Satisfied with his work, he rasped: "Ho'-ho'! Tete-Houle! You are poor shot! You-mink' no more ignoble een dis valley!" and started for camp.

He found his friends at breakfast. Silently he accepted the dipper of steaming tea and the heaped plate of fried moose and beans, and began to eat.

"Well, what luck, Michel? Are they still leaving?" asked Steele, when his eyes suddenly focused on the shoulder of Michel's coffee. "Where'd you get that tear?"

The face of the Iroquois was wooden. "I meet old frien' een de bush. Ah-hah!"

Curious, Steele rose and examined his friend's shoulder. "Why, there's caked blood here! You have been shot at!" he cried. "Take off that coat!"

"Wen I feenish de moose and bean," laughed the stoic. "Ioss gun shake w'en he fire!"

To his relief Steele found that the bullet had grazed the shoulder blade of his friend, barely breaking the skin. When the scratch was dressed, Michel gave him the story of the ambush.

With the sting of the bullet across his shoulder, the cool-headed Indian had sensed that he was not badly hurt, and made the only move that would check a swift second shot from a concealed foe—dropped as if killed or mortally hurt. Sprawled on his face, a knee drawn up to give purchase for a lunge, he had waited for the man in ambush to approach within reach. Had there been two, it would have been a knife-fight, with the odds heavily against the man compelled to start from the soft snow.

"Good old Michel!" applauded Steele, as the Iroquois finished. "They can't beat you! He was scared when he fired. Had you ever seen this Indian before?"

Michel's black eyes snapped tantalizingly, as he played on his chief's curiosity.

"Wal, he look lak' man I see one time."

"Traded once at Wailing River, you mean?"

"Ah-hah! he come to de post." "When?"

"He was dere dis summier. He got leg-lak' bow on snowshoe. Hees eye look lak' de mink. He—"

"You mean—good Lord! It wasn't Tete-Houle!" cried the surprised American.

"Ah hah!" admitted the head-man, blowing a cloud of smoke from his mouth. "Dat was Tete-Houle. I t'ink Charlotte be happy squaw, now."

"He found your trail leading to the lake and took a chance you would backtrack—which you did." Delightedly Steele shook the hand of the Indian until the sore shoulder protested.

"Tomorrow nicht we go to de post."

"Yes," agreed Steele, his eyes reflecting the joy of victory, hard won. "Send one of the boys for David at once."

CHAPTER XVII

Behind the slab counter in the trade-room at Ogoke a man sat at a table. On the table stood a glass and two bottles—one empty. For hours the man had not moved, except to fill and drain the glass. Although it was barely three o'clock, candle lanterns dimly lit the room, for the sun had died in cloud banks and the light had failed early. In the air outside there was snow and the night would be thick.

The yelping of dogs aroused the man from his bitter thoughts. The door of the room opened and a bulky figure entered. The muscles of his hooded face, disfigured by a long scar, twitched nervously. In his eyes was fear.

"I found him," gasped the big man, in French, breathing hard, for he had raced the dusk to the post. "Choked! Not a mark on him—his tongue out and his eyes bulging like a pike's you squeeze in your hand! Ambushed!"

"So they got him, too?" nodded Laflamme, chin on chest.

"It's no good, I tell you," whined Antoine, his voice vibrant with panic. "That makes nine—nine who have gone out. It'll be our turn next. Tonight I leave for the Rouge."

The hard eyes of the trader, lined by worry and red from drink, lit with contempt. "You've gone like the rest. Why didn't you run away with Rose? Want to desert sixty thousand dollars' worth of fur, do you?"

The heavy features of the other filled with blood at the taunt. He leaned and struck the table with his fist, overturning the bottles.

"Sacré, sac I?" he snarled, "because I leave this hell before they close in and take us—hang us from the rafters here or cut our throats, you call me soft! I tell you we're done! They caught Pierre and the whole valley's after us. They're out there now, waiting." He pointed a shaking finger toward the forest. "It may be tonight—they come."

Ruined by the mystery—the menace of the inscrutable forest from which no man returned, which for weeks had ringed the post, sapping the nerve of his people until they fled in the night, Laflamme sat, numb with despair. Slowly the whisky from the overturned bottle dripped to the floor. Then he said: "That tale Tete-Houle brought from down-river was true. The men we sent to the Iroquois to stop him lied."

Antoine nodded.

"Steele got through and came back on the snow," continued the trader. "The police are not in this. They'd come straight here."

"This Steele caught Pierre himself," sibled the other. "When the Indians found how we had fooled them, they took the trail. The whole valley was ours—until he got the Windigo." Suddenly the speaker faced the door, listening. "What's that?"

As the two watched the door apprehensively, it opened to admit a half-breed with drink-sodden face.

"What you eat tonight, m'sieu?" The dull eyes of the cook shifted uneasily from Antoine to his chief.

"You here still, Philippe?" sneered Laflamme. "I thought you and Jean

Suddenly the Speaker Faced the Door, Listening. "What's That?"

would hit the Rouge river trail when it got dark. All the rats have left."

"They'll hang on while the whisky lasts," muttered Antoine.

"You find Tete-Houle?" The face of the cook, mottled-gray in the half light, turned to the man who had gone out that morning on the trail over which none had returned.

"He found him—with his tongue out." Laflamme laughed bitterly. "You'd make a pretty picture, Philippe, hanging from that hook, with your throat cut. You'd bleed straight Scotch; you've lived on it for months."

The man's terror in the eyes of the half-breed seemed to appease his chief, who went on: "We'll have bacon and potatoes—if they give us time to eat them, firing that jug."

The jug was passed on the table between the two men, and the cook, muttering incoherently, shuffled to the door.

"Two left, out of the lot; and they stay for the whisky!" commented Laflamme, filling a glass and shoving the jug across the table. "My friend, I'll give you a toast," he added, as the nerve-shattered Antoine gulped down his drink. "May that 6—4 American rot in hell!"

Laflamme's glass was at his lips when a chorus of howls rose from the clearing.

The startled eyes of the men met across the table. "What's that?" demanded the trader, slowly lowering his glass, untouched.

"The dogs—hear something—out there!" The hoarse voice of the other quavered as he went to the door.

From the murk, the whimpering of the awed huskies reached the straining ears of the two at the door, who stood, nerves strung with suspense—one thought in their brains.

Then from the invisible forest beyond rose a wail—demon-like, blood-freezing, the voice of no clawed creature of the night—to die away, into silence.

"They have come!" warned Antoine, seizing the arm of his chief.

(TO BE CONTINUED.)

That Earth Is Round Has Long Been Known

Discovery at Oxford of a musty tome written a couple of centuries before Columbus' time, in which it is definitely stated the "arthe is round," will not surprise any person conversant with the subject. The assumption that the science of the Dark ages was sterile and entirely incorrect has always been gratuitous.

Knowledge, it is true, was not widespread among the masses. Scientists were inclined to keep their discoveries more or less secret for several reasons. But it is certain that an exchange went on among the elect and it is presumable that Columbus had access to documents, information and maps which have since been lost.

Unscientific and uneducated persons, such as kings and queens and emperors, naturally would not have understood scientific proof any more than, say, the average politician today understands the proof of the Einstein theory. The theory that the earth is round must have had quite a wide circulation long before Columbus set out to put it to practical use.—New York Evening Post.

What makes the value in General Motors Cars?

1 SCIENTIFIC RESEARCH AND TEST. *Centering in the largest automotive laboratories and proving ground in the world.*

2 COMBINED PURCHASING POWER OF MANY COMPANIES. *Insuring the best materials at the lowest price.*

3 VOLUME PRODUCTION. *120,000 skilled workers made more than 835,000 General Motors passenger cars and trucks in 1925.*

4 QUALITY BODY WORK. *Fisher Body Corporation is a part of General Motors.*

5 WORLD-WIDE MARKETS. *Sales and service in 144 countries.*

6 FAIR PRICE POLICY. *Standard prices, with General Motors' savings passed on to the buyer.*

7 GENERAL MOTORS ACCEPTANCE CORPORATION. *A finance company owned by General Motors, and assuring sound terms and low rates to time purchasers.*

All these factors mean that General Motors has every facility and every incentive for maintaining quality in the product and value for the price.

Says Dangerous Varicose Veins Can Be Reduced at Home

Rub Gently and Upward Toward the Heart as Blood in Veins Flows That Way.

If you or any relative or friend is worried because of varicose veins, or bunches, the best advice that anyone in this world can give you is to ask your druggist for an original two-ounce bottle of Moone's Emerald Oil (full strength) and apply night and morning to the swollen, enlarged veins. Soon you will notice that they are growing smaller and the treatment should be continued until the veins are of normal size. So penetrating and powerful is Emerald Oil that even Piles are quickly absorbed.

CORN IN CAMP

1st Soldier—"When you eat corn on the cob are you able to bite off the major part?" 2nd Ditto—"I bite off the whole kernel, my boy."

Precisely

A minister, while passing a group of convicts at work on the county roads, became very much depressed at the wickedness of the world.

"My good men," he exhorted, "we should strive to mend our ways."

"Well, wot you think we're doing," asked No. 2286, "digging dahlywerms?" —Carolina Buccaneer.

BEGINNING SMALL

Birdie—"I suppose you had some capital to start business on?" Algernon—"Nothing — only my brains!" Birdie—"Want a terrible misfortune lack of money is!"

The Second Reading

Father—What are you reading, my dear?

Daughter—A novel, pops, entitled "The Heart of a Poor Girl."

Father—The usual rubbish, I suppose.

Daughter—Yes, papa. It's a book you presented to mother twenty years ago.

IN THE SANCTUM

Editor (losing patience)—"No, I can't take it! I'd like to trample such verse under my feet! Genius (departing)—"Alas! No poetry in his sole!"

All His Fault

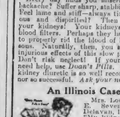
"Beans! Beans! Beans!" stormed the wrathful husband, as he sat down to the table. "Can't you cook anything but beans?"

"Maybe," answered the sarcastic wife, "if you brought home more bacon—in the pay envelope you wouldn't have so many on the table."
—The Progressive Grocer.

Backache Wearing You Out?

Every day finds you miserable with backache? Suffer sharp, stabbing pains? Feel lame and stiff—always tired, nervous and discomfited? Then look to your kidneys. Your kidneys are the blood filters. Perhaps they have failed to properly rid the blood of body poison. Naturally, then, you suffer the injurious effects of this slow poisoning. Don't risk neglect. If your kidneys need help, use *Doan's Pills*. No other kidney diuretic is so well recommended for so successful. *Ask your neighbor!*

An Illinois Case



Mrs. Louis Beal, 2 Seventh St., Dolavan, Ill., says: "My kidneys were out of order and caused me backache. Often sharp pains darted through the small of it. Mornings I felt tired and felt all tired and worn out. My kidneys seemed to act too often at times and then again they didn't act enough. Doan's Pills relieved me of the trouble."

Touch pimples, redness, roughness or itching, if any, with Cuticura Ointment, then bathe with Cuticura Soap and hot water. Rinse, dry gently and dust on a little Cuticura Talcum to leave a fascinating fragrance on skin. Everywhere 25c each. Advertisement.

The fool never has judgment.

Sick bodies made strong

"Two years ago I was all run down. All I got from food was indigestion, bloating and constipation.

"Since taking Tanlac I sleep and eat fine. Even quiting cigarettes does not bite me."
Samuel L. Martin, 2725 Main Street, Evansville, Ind.

After a spell of Grippe or flu, when your system is all run down and your legs are so weak they can hardly hold up your body, start right in taking Tanlac.

It's wonderful how soon you really do improve! Tanlac sails right in and puts the system in fighting trim. It cleans the blood, revitalizes the digestive organs, gives you an appetite for solid food and makes you feel like a new person.

Nothing will turn the trick quite as fast as Tanlac, made after the famous Tanlac formula from roots, barks and herbs. Buy a bottle today and get started back to full strength and vigor. Take Tanlac Vegetable Pills for constipation.

Too Much Mechanism for the Modern Mind?

Complete civilization will be here when our modern conveniences do not add to us as much as they help us. Dissatisfactions are multiplying in the public press on the perils of the mechanical results of our inventive ingenuity. It requires such vigilance and intense application to carry on all this machinery of our civilization.

The complaint is made that the mind is left no time for abstract thought or contemplation or even for a healthy following. Can we live "on the jump," and live long and profit, ask? Every moment of our time feels the demand of some new distraction.

We are not in Alaska, where they can "set and think," through the long winter nights, and the advantages of "setting and thinking" are not to be belittled. By and by, Alaska may begin producing our sages and philosophers. Down here in summer and busier climes, we have no time for Platonian rajahcination.

A generation or two ago we reasoned out a fairly tenable philosophy on "What is man?" and "What are his purposes?" but now we are not so sure. W. G. Wells, somehow, is not so convincing as John Stuart Mill, and what giants have arisen since Darwin and Spencer and Huxley and Tyndall? Machinery, machinery!—St. Louis Globe-Democrat.

Life's Opportunities

Be glad of life because it gives you the chance to love and to work and to look up at the stars.—Henry Van Dyke.

Costly Elegance

About 35,000 persons in Great Britain pay taxes for using armorial bearings on automobiles and carriages.

Romance and Adventure—Just Around the Corner!

Within easy motoring distance of your own home, spots of wonder are waiting for you! The spectacular—the beautiful—the wonderful—not many miles from your own door! With fun, freedom and adventure all along them.

Fill your tank with Red Crown Gasoline—get a good road map—leave your troubles behind—and thrill to the excitement of flying landscape and surprises at every turn. This short list is just a suggestion of the infinite variety that awaits you.

1—The Black Hills of South Dakota, in reality mountains over 7,000 feet above sea level, the color of midnight blue because of their forests of blue-spruce and Norway pine. State Highway No. 85 .

2—Big Spring State Park, Missouri. An average of 232,000,000 gallons of water per day gush out of a rocky cliff and rush into Current River, one of the swiftest and most beautiful of Ozark streams. Near Van Buren on State Highway No. 16.

3—Fort Lincoln Park near Mandan, North Dakota, on a high bluff overlooking the Missouri Valley. Old officers' quarters of Fort Abraham Lincoln and the site of an old Mandan Village. State Highway No. 6.

4—"The Giant Sycamore" largest broadleaved tree in the United States, over 42 feet in circumference at five feet above the ground. Three miles from Worthington, Greene County, Indiana. State Highway No. 12.

5—The vast prairie of Kansas, the "core of the continent." Union Pacific Highway No. 30 and Victory Highway No. 15 along the Kansas River.

6—Morehead Caves in limestone rocks that are hung with beautiful plants and rare ferns. Near Maquoketa, Iowa. State Highways Nos. 20 and 62.

7—The famous Gull Lake, Michigan, beautifully wooded and silver-beached. State Highway No. 17 between Battle Creek and Kalamazoo.

8—The Swiss Settlement at New Glarus, Wisconsin, an odd little town transplanted from the Old World with Swiss people, architecture, language and customs. Not far from Madison, on State Highway No. 31.

9—The "North Shore Road" in Minnesota, one of the famous scenic highways of the country along the wild and rugged coast of Lake Superior from Duluth to the Canadian boundary. State Highway No. 1.

10—The Cahokia Indian Mound covering 14 acres in Illinois, the largest office ever built by human hands. Just out of East St. Louis on State Highway No. 3.

Smooth, wonderful highways throughout the Middle West make motoring a joy. And at convenient intervals all along these highways the Standard Oil Company (Indiana) has established service stations for your convenience.

The progressive policy of better highways and the hearty co-operation of the Standard Oil Company (Indiana) have thus opened the road to happiness to all the thirty million people of the Middle West.

SCHOOL AND OIL STIRS NAVAJOS

Wealth Enables Them to Buy Civilization.

San Juan Indian Agency, Ariz.—Oil and education are leaving the stamp of their influence on the Navajo Indians.

Wealth from the one is enabling them to "buy" civilization, and education teaches desires. Soon, it is to be expected, the Navajos will be an affluent as the Osages in Oklahoma.

The Indian agency has been kept busy providing schools for the brown-skinned Navajo youngsters. A. H. Kneale, superintendent of the reservation, reports the San Juan school capacity was doubled in the last year, and 650 children now are taught the ways of the white man. The San Juan schools teach only six grades. Three hundred and fifty higher students are scattered in Indian institutions throughout the West.

Most of the first-graders have never been out of sight of their own "hogans"—family dwellings. They have never worn shoes nor hats, never eaten at a table, nor ever seen a stove, picture, newspaper or chair.

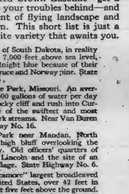
"The children have never eaten what a civilized person would call a meal," Mr. Kneale said. "They have thrived on beef and horse meat, goats' milk and corn cakes, served on the dirt floors of the 'hogans.' They do not know what sanitation and hygiene are, and they have not seen the simplest tools that make civilized people comfortable. But they learn quickly."

The Navajos have a natural aptitude for agriculture and stock raising. Far back in history they were not famous as warriors, but as tillers of the soil. Today they are shepherds; shepherds of 170,000 individually owned sheep. The name Navajo was given by the Spaniards and means "people of large fields."

Mr. Kneale said the adults were quickly taking up the civilization the new generation takes home from school. Modern machinery is being used for farming and the "hogans" are being transformed into houses.

The oil, which now is pouring wealth into the laps of the Navajos was discovered four years ago, but inaccessibility prevented rapid development. Thirty-six wells have since been drilled, most of them good producers. A small pipeline has been completed to Farmington, N. M. A larger pipeline is projected. The Navajos receive a royalty of 12½ per cent.

WEIGHS 585 POUNDS



Emile Rohne of Berlin as he stepped off the Westphalia of the Hamburg-American line at Boston. He weighs 585 pounds.

Prehistoric Monster's Bones Found in Illinois

Springfield, Ill.—Three teeth weighing fourteen pounds each, a tusk seven feet nine inches long and a skull four feet wide are the remains of a prehistoric Illinois monster which have been excavated near Golconda for the state museum by Dr. A. H. Crook, chief.

Bones of the monster are also included in the collection which has been created by Doctor Crook for shipping to the museum. Fifteen boxes were necessary to contain the remains excavated after the tusk had been found by steam shovel working on a dam.

The remains were found about a month ago by a steam shovel crew working on dam No. 31 of the Ohio river waterway project. The dam is about four miles below Golconda. When notified by the Associated Press of the discovery of the remains, Doctor Crook communicated with engineers in charge of the construction of the dam, asking them to leave the remains as they were found until he could superintend the excavation.

LEGAL NOTICES

Order For Publication.

STATE OF MICHIGAN— The Probate Court for the County of Charlevoix.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Frederick Yahr and Sophia Yahr, his wife, of Hayes township, Charlevoix county, Michigan, unto Mary Zipp of the city of Petoskey, Michigan, dated January 26th, 1921, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 26th day of January, 1921, in Liber 45 of mortgages on page 279, on which mortgage there is claimed to be due at date of this notice the sum of One Thousand Three Hundred Seventeen and 06-100 Dollars, including the principal sum for with interest, and a further sum of Four Hundred and Eighty Nine and 17-100 Dollars, being taxes and interest thereon paid by the mortgagee on the land and premises herein described, together with an attorney fee of Thirty-Five Dollars as provided for by the said mortgage, and no proceedings at law or equity having been instituted to recover the money secured by said mortgage, or any part thereof, and, whereas, the taxes required by the statute to be paid on said mortgage was duly paid prior to the recording thereof.

Now Therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, at public auction or vendue to the highest bidder, at the east front door of the court house in the city of Charlevoix, Charlevoix county, Michigan, that being the place where the circuit court for the county of Charlevoix is held), on Friday the 25th day of June, 1926, at ten o'clock in the forenoon on that date.

The premises described in said mortgage being the lands and premises situated in the Township of Hayes, county of Charlevoix, state of Michigan, viz: The east one-half of the Southeast quarter of section Eleven in township Thirty-four, North, Range seven west, containing eighty acres of land, more or less, according to the government survey thereof.

Dated March 19th, 1926.

James L. Tunath, Plaintiff

vs.

Joseph Graham, or his unknown heirs, devisees, legatees and assigns; Lester Collenter, or his unknown heirs, devisees, legatees and assigns; Julian M. Wheeler, or his unknown heirs, devisees, legatees and assigns; William Green, or his unknown heirs, devisees, legatees and assigns; and the Smalley Manufacturing Company, a Wisconsin corporation, Defendants.

Suit pending in the Circuit Court for the County of Charlevoix, in Chancery at the City of Charlevoix on the 27th February, 1926.

In this cause it appearing that it is not known whether the said Joseph Graham, or the said Lester Collenter, or the said Julian M. Wheeler, or the said William Green, each or any of them is living or dead, or where each or any of them may reside, if living; therefore on motion of Lisle Shanahan, attorney for the said plaintiff, it is ordered that the said Defendants, Joseph Graham, Lester Collenter, Julian M. Wheeler and William Green, or each of their unknown heirs, devisees, legatees and assigns, enter each, his or their appearance in said cause on or before three months from date of this order; and it appearing that the said Smalley Manufacturing Company, a Wisconsin corporation has no office or offices within the State of Michigan; therefore on motion of Lisle Shahahan, attorney for the said plaintiff, it is ordered that the said Smalley Manufacturing Company, a Wisconsin Corporation enter its appearance in said cause on or before three months from date of this order; and that within twenty days the plaintiff cause this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in the said county of Charlevoix, said publication to be continued once in each week for six weeks in succession, or that said plaintiff cause a copy of this order to be personally served on said defendants at least twenty days before the time above prescribed for their appearance. The above cause is for the purpose of clearing and quieting the title to the northeast quarter of the northeast quarter of section twenty six in township thirty three north, range seven west in said plaintiff.

Joseph W. Locke, Plaintiff

vs.

Reuben Hetson, or his unknown heirs, devisees, legatees and assigns; John Verly, or his unknown heirs, devisees, legatees and assigns; John R. Struthers, Andrew C. Struthers, Charles W. Struthers, Robert K. Struthers, Amelia Howe, Lucinda Haggerty and Viola Peterson, known sons and daughters of Andrew K. Struthers, deceased, and all the unknown heirs, devisees, legatees and assigns of the said Andrew K. Struthers, deceased; Elizabeth Struthers, widow of Andrew K. Struthers, deceased; Isabella G. Lisenby, or her unknown heirs, devisees, legatees and assigns; Howard Brooks, and Francis L. Griffith, known sons and heirs at law of Fanny I. Brooks, deceased, and all the, unknown heirs, devisees, legatees and assigns of the said Fanny I. Brooks, deceased; Michigan Mortgage Company, limited; Anthony DeLong, or his unknown heirs, devisees, legatees and assigns; and Richard G. Lewis, Defendants.

Suit pending in the Circuit Court for the County of Charlevoix, in Chancery at the City of Charlevoix on the 14th day of April A.D. 1926.

In this cause it appearing that it is not known whether the said Reuben Hetson, or the said John Verly, or the said Martin G. L. Lisenby or the said Howard Brooks, or the said Francis L. Griffith or the said Anthony DeLong, or each or any of them is living or dead, or where each or any of them may reside, if living; and it appearing that Viola Peterson and Charles W. Struthers are residents of the state of Oregon and that it is unknown whether Amelia Howe or Lucinda Haggerty reside in the State of Michigan or not; and it appearing that it is unknown whether the Michigan Mortgage Company Limited is in existency or not and it also appearing that none of its officers or any person upon whom service or process may be made, is a resident of the state of Lisle Shanahan, attorney for the Plaintiff, Joseph W. Locke, that the said defendants, Reuben Hatson, John Verly, Matilda G. Lisenby, Howard Brooks, Francis L. Griffith and Anthony DeLong or each of their unknown heirs, devisees, legatees or assigns, and all the unknown heirs, devisees, legatees and assigns of Andrew K. Struthers and Fanny I. Brooks, or either of them, Viola Peterson, Charles W. Struthers, Amelia Howe and Lucinda Haggerty and the Michigan Mortgage Company, Limited enter each, his or their appearance in said cause on or before three months from date of this order; and that within twenty days the plaintiff cause this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in said county of Charlevoix once in each week for six weeks in succession, or that said plaintiff cause a copy of this order to be personally served on said defendants at least twenty days before the time above prescribed for their appearance. The above cause is for the purpose of clearing and quieting the title to the northeast quarter of the northeast quarter of section twenty-nine in township thirty-four north, range seven west in the said plaintiff.

LITTLE BOY KILLED

Tragedy Occurred on Ferry Road

DAVID NOWLAND, THE VICTIM

Was Playing in the Road at the Time Accident Occurred

A tragedy was enacted last Saturday forenoon out on Ferry road near the Pere Marquette railroad crossing, in the southeast part of the city, resulting in the death of little David K. Nowland, 4 years old, son of Mr. and Mrs. Irving Nowland, who reside near the place where the accident, that took the little boys life happened.

The little boy was playing in the road at the time of the accident and had just made a run across the street, turning around he started to renew some fun he was having on a truck driven by Albert Shaw, who made a strenuous effort to divert the course of his machine, stop the car and avoid running the child down. In this he was unsuccessful the feeder of the machine striking the little fellow squarely knocking him down and causing instant death.

Upon examination it was found that the child's skull had been badly fractured, face injured and several severe bruises at various places about the body, were discovered all resulting from the collision of machine and child, the most severe being the injury to the head which was no doubt caused when the head of the child struck the hard pavement.

That the machine was being driven at modern speed is generally conceded and that the accident was unavoidable has been determined by a coroners jury, who also exonerated the driver from responsibility in connection with the tragic affair. This decision being made after a full investigation had been made by parties authorized to act in cases of this nature.

Funeral service was held at the family home Monday afternoon, with Rev. Herman Burns D.D., officiating.

JOSEPH COURIER BEEN APPOINTED

Superintendent of Construction Work, County Road System

Through an appointment recently made Mr. Joseph Courier becomes superintendent of construction work in the Charlevoix county road system.

In this he succeeds Mr. Frank M. House for some time past superintendent, the latter retiring to accept a position in Emmet county.

Mr. Courier has been active in the work now under his supervision, thoroly conversant with the duties imposed as well as a practical roadbuilder. He is well and favorably known throughout the county, therefore his appointment meets with general public approval.

Heavy Shipping Loss

Nearly 4,855 vessels were lost during the World war.

CROOK CAPTURED

Getting Money Under False Pretense

CAPTURED AT SYRACUSE, N. Y.

Now in County Jail Awaiting Trial for Alleged Misconduct

Several months ago a man representing himself as being connected with the Leslie-Judge Company operated in this region quite extensively, finally taking his departure to other fields.

Soon after ceasing his activities in this territory several local banking houses discovered that they were holding paper upon which they had advanced cash, in small amounts, that was impossible to realize returns for their investment, due to crooked work by the way of illegal endorsements. In the various transactions parties at Onekema, hold worthless paper to the amount of $107, while Reed City, Grayling, Kalkaska, Peoples State Savings Bank of East Jordan, and the Charlevoix County Bank, the latter for a minor amounts, and possibly others not yet reported are in the classified list of losers.

Sheriff Novak was placed in charge of the case and through persistent diligent effort traced the man from point to point finally landed him at Syracuse, New York, where he was living under the name of Bert Conway, having taken this as an alias, thereby changing from the name of Hugh Lazon as he was known while operating in this section.

Following Sheriff Novak's arrival in New York there was some difficulty in getting his man out of the state. This was finally accomplished and the man Lawton alias Conway was safely landed in the Charlevoix county jail where he is held pending trial under a charge of obtaining money under false pretenses.

Sheriff Novak returned from his eastern trip last week and with others interested in the legal proceedings, feels that a satisfactory showing has been made in the case and that the prisoner will have such justice from the court as is legal and warranted for the crime which it is alleged, has been committed.

HORSE CONTESTS

Schedule Many Shows During Summer

PULLING CONTEST AT FAIR

Michigan Champions Will Enter the National Tests

Michigan's best horseflesh will prove itself next summer during a series of special horse pulling contests to be held at fairs and agricultural meetings scattered all over the state.

Tests of this kind held in the state for the first time during the summer of 1925 aroused so much interest among the farmers and other horsemen that the events will be held on a much larger scale during the coming season, according to the farm and home dept. at the M. S. C., sponsors of the pulling contests.

The so-called Collins Dynomometer, an ingenius machine which measures accurately the exact pull exerted by each team hitched to the bar, will be used in the contests.

More than a dozen other states will hold similar horse pulling events during the summer, and plans call for a national contest for the winners in each state. Michigan horses last year ranked high among those of the country which entered the tests.

Determining and emphasizing the factors that make for increased pulling power, especially among farm horses, are said to be the real purposes of the contests. The spectacular nature of tests, with competition frequently reaching stages of keenest excitement result in lots of entertainment as well.

Fifteen contests in the lower peninsula, mostly at county fairs, have already been booked, while many are being set for the upper peninsula.

Gold in the Arts

Something like $80,000,000 worth of gold is used annually in the manufacture of jewelry, gilding, fillings for teeth and for similar work in the fine and liberal arts.

Br'er Williams

De reason some folks don't act wise is kase wisdom don't stay wid 'em long 'nuff tee git good acquainted.—Atlanta Constitution.

SUMAC ENTERED PORT LAST SATURDAY

The government ship Sumac, Captain John Olson, entered this port for the first time this season and will be a frequent visitor during the season, particularly so until buoys and other aids to navigation in local and other contiguous waters in the Lakes region for this district are placed in position.

Some difficulty was experienced in making an entrance to the outer harbor due to a heavy ice field that had been driven by the wind along the Lake Michigan coast line earlier in the day but this was rately negotiated after a constant steady struggle buckling the ice formation.

The entrance of the Sumac was the first ship of the season to enter this harbor from a southern port.

MISS MAY O'DONNELL

DIED LAST FRIDAY AT DETROIT

Resident of St. James for a Number of Years—Age Thirty

A message came from Detroit last Friday announcing the death in that city of Miss May O'Donnell and the information that the body would be taken to St. James for interment.

Miss O'Donnell was for many years a St. James resident, but more recently of Detroit, where she held the position of stenographer with the United States Radiator Corporation.

She was about thirty years of age, born at St. James, a daughter of Mr. and Mrs. Patrick O'Donnell, and is survived by her mother and four brothers, Patrick, Tony, Edgar and Walter, all of Detroit.

Up to a very short time before her death Miss O'Donnell was supposed to be enjoying perfect health and passed away almost instantly from some heart derangement.

The body arrived in Charlevoix from Detroit, Saturday morning accompanied by the mother, four brothers above named and one sister of age, Mrs. Maloney and cousin, Miss Agnes Mooney, the last two mentioned from Chicago.

Saturday afternoon the funeral party continued their trip to St. James where the funeral service was held at the church of the Holy Cross last Monday, with Rev. Fr. McMannon officiating at the final ceremonies.

DIES IN FLORIDA

Mrs. Arthur C. Clement, Age 63 Years

HAD BEEN AILING LONG TIME

Funeral Was Held in Joliet Ill., on Tuesday Afternoon.

Funeral service for Mrs. Arthur C. Clement, 63 years old, who died at Wilbur-by-the-Sea, Florida, Friday, will be held Tuesday afternoon at 2:30 o'clock in the home, 216 Campbell street, the Rev. E. E. Hastings officiating. Burial to be in Elmhurst cemetery. The body is scheduled to arrive tomorrow morning.

Mrs. Clement, who observed her 63rd birthday anniversary four days before her death, had been in failing health for the past two years. She was born April 19, 1863, on a farm in DuPage township, and attended the Jennings seminary at Aurora. Mrs. Clement, before her marriage, Miss Mae Eaton, had lived in Joliet for fifteen years.

In addition to her husband she is survived by two sisters, Miss Grace Eaton of Joliet, and Mrs. Carrie Holcomb of Berkeley, Calif."

The above write-up is from the Joliet Herald-News, issue of April 25, 1926. Mr. and Mrs. Clement for some years past have been Charlevoix summer residents, maintaining a summer home on the grounds of the Belvedere Club where she was held in high esteem by the many club members as well as by Charlevoix citizens, all of whom deeply regret her passing and sincerely sympathize with Mr. Clement in his bereavement.

Rain Last Sunday—A rain storm that lasted several hours, during which period a considerable quantity of water was distributed, visited this section of the state last Sunday. The rainstorm was accompanied by several sharp flashes of lightning and peals of thunder, about the first demonstration of this nature of the spring months.

VENUS WAS FIRST

Then the Str. James E. Sanford Second

THE TUG JOSEPHINE WAS THIRD

In Their Attempt to Get to Open Water—Last Thursday

Local ship owners and navigators in this region after studying ice conditions for several days made a strenuous effort to force an ice passage from the outer Charlevoix harbor to open water some distance off shore in Lake Michigan last Thursday. In their effort and struggle to win the open space they met indifferent success from the start, finally returning to their home port after spending some hours bucking the, for small craft, impregnable ice field.

The tug Venus, Captain John McCann, was the first to make the attempt, second on the list came the S. S. James E. Sanford, Captain Joian M. Chambers, bound for St. James with mail and a big cargo of merchandise; then came the Josephine, Captain Chas. Hendrickson Jr., headed for Benton Harbor and a little later the big ship of the fleet, the J. B. John, under the command of Captain F. P. Russell in an attempt to reach Petoskey.

Her progress was slow and for hours the ship made but little headway against the huge ice field and at frequent intervals was apparently helpless to overcome the confronting obstacle—by steady persistent battling for hours the ship finally won the contest and tied up at the loading point, where she took on a shipment of cement for delivery at a southern port.

Friday morning another start was made from this port by the Sanford under more favorable conditions than existed the previous day. For several hours moderate easterly wind had prevailed. The vast field of ice along the coast of Lake Michigan was moving, and was in the process of opening, leaving a water stretched out between Charlevoix and St. James, all making for an outlook wholly encouraging from the viewpoint of navigators of small craft, while members of the crew, passengers and others interested were of the opinion that the route to St. James could not be negotiated, and firm in the opinion that the attempt to make the trip would be abandoned resulting in the return of the ship to the point of starting without reaching the original point of destination.

Friday the ship again attempted to make the trip, this time with success. With ice conditions as at present no regular schedule can be maintained, therefore the ship will make regular trips at frequent intervals as opportunity offers. With the outlook favorable at this writing it is probable that the ship will enter upon a regular schedule over the Charlevoix-St. James route early next week.

MANAGER JOHNSTON TO TRAVERSE CITY

H. J. Johnston is Transferred from this District to Another

H. J. Johnston, manager for the Michigan Bell Telephone Co. in this district with headquarters at Petoskey, has been transferred to a like position with his office in Traverse City, the change to become effective June 1st. He will be succeeded at Petoskey headquarters by Lester A. Johnston, for some time past at Saginaw as division commercial engineer.

The retiring manager of this division has been in charge at Petoskey for about ten years during which period he has built up an extensive acquaintance in his territory and in retiring from the field leaves a host of friends who admire him for able conscientious service rendered, his honorable business methods practiced and the thoroughly efficient manner in which he has managed and conducted affairs for his company.

Drops Gather Weight

The weather lingoists says that the chief reason why frozen raindrops are of so many different shapes is the fact that partially frozen drops often collide and stick together, giving shapes that vary with the number and size of the adhering drops, and the extent to which they were frozen when they collided. Entirely liquid drops on collision form, if they unite, only one larger but still spherical drop.

What's a Psychologist?

According to a psychologist 10,000,000 of us are morons and 25,000,000 more just plain, ordinary dumbbells. What's a psychologist?—Philadelphia Inquirer.

LICENSE REVOKED —DRIVER IS FINED

Justice Montgomery assessed a fine of $60, costs $4.00 and revoked a drivers license for six months period in a case against Hugh McGinn of Boyne City, in Petoskey one day last week. Driving an automobile off the regular line of traffic and damaging to some extent a bridge across Bear River on Mitchell street, while the driver was under the influence of some kind of intoxicant, was the alleged reason for the penalty imposed. In addition a cash deposit of $100 was exacted and deposited with the City Manager to pay for necessary repairs on the bridge. McGinn was at one time deputy sheriff in Emmet county.

TWO BLASTING SCHOOLS HELD

W. A. Kessler Demonstrates Use of Pyrotel as an Explosive

First demonstration at farm of Steve Jermaine of Boyne Falls on April 28. If there was any one in doubt as to how good Pyrotel was in blowing stumps, that doubt was soon dispelled as Mr. Kessler blew out the first stump as clean as a whistle with only two pounds.

Later a green stump was tried and the result showed that they could be loosened sufficiently with a small charge, so as a team could finish the job quickly.

The second demonstration was conducted at the farm of Bert Elliott of Charlevoix. A large stump was blown out cleanly, showing the proper manging of the charge was the all important factor. The most spectacular part, however, was the ditching blasting. The explosion carried the dirt and stones for several hundred feet and spattered the swamp with a nice black veneer for many feet in all directions.

The specialist stated that the greatest trouble with ditching work was that 60 per cent dynamite was used and that the distance between charges too great. The most effective kind is 50 per cent strength and spacing 18 and 24 inches. At 20 inches only 4.0 pounds per rod is needed, which shows it is much cheaper to dynamite than to dig by hand.

If you want to buy this Pyrotel for stumps and stones for 10c a pound, send your order and money to the County Agent at Boyne City, before Saturday the 15th of May. It is doubtful if this opportunity will present itself again.

Pioneer in Novels

"Miss Betsy Thoughtless," by Mrs. Haywood, published in 1751, is generally regarded as the first really domestic novel in the English language. It is thought to have been the model for Miss Burney's "Evelina."

Fond of Their Coffee

The native of Algeria takes strong black coffee in the street, purchasing the beverage from venders who boil it over portable stoves.

ANNUAL BANQUET

Tuesday Evening, April 27th Noble House

THE DICKENS CLUB ENTERTAIN

Members, their Husbands and Other Invited Friends

The annual banquet of the Dickens Club was held at the Noble Hotel the evening of April 27th, and was an event of unusual interest to the members of the club and to their husbands and other invited friends.

The banquet tables were decorated in the club colors—Chinese blue and yellow, and hand painted place cards indicated the seating places for the guests.

The cuisine and service were very acceptable and the spirit of comradeship and mirth made the evening one long to be remembered by those present.

Mrs. Harley Hales the club president greeted the guests in a welcoming speech that was both gracious and witty.

At the close of the dinner Mrs. Harley arrived with her famous collection of wax wigs and presented an evenings entertainment which much amused and delighted the guests. The original of the "Harley Wax Works" was taken from Dickens' Old Curiosity Shop, but was thought by those present that Dickens must have visited Charlevoix before he wrote that story as this display showed an up-to-date knowledge of our city and its inhabitants. The arranging and manipulation of these wax figures were both unique and original and all felt that they had enjoyed an evenings entertainment of very unusual character.

MOVES TO PETOSKEY

FRANK M. HOUSE HAS RESIGNED

As Commissioner of Roads Goes to Emmet County

Frank House the popular commissioner of roads has resigned and has been secured by Emmet county to take charge of the highways north of us. Mr. House has lived in Charlevoix county for the past 51 years and most of the years have been spent on the old home farm north of Boyne Falls. During the past 14 years he has been identified with the road building and repairing in Charlevoix county where he has made good.

Emmet county is to be congratulated on securing one of our best road builders and one who is always on the job. It is with satisfaction that we accept the situation knowing that we can develop competent road builders even though we are unable to meet the advance in salaries that counties are forced to make to place their roads abreast of those in Charlevoix county.

The old residents as well as the new regret to lose, for the time being, Mr. House and his fair dealings with employes and with the county and we bespeak for him success in his new position.—Boyne Citizen.

The Oldest Bank in Charlevoix County

If You Had $500 Now

in "cold cash" could you use it?

Of course you could. And it will probably be the same five years from today. If you

Pretty Things that are Made at Home

"EARLY American," that is a description to conjure with whether the conversation is of architecture in a home, or the furnishings of the home. A wave of appreciation for early American art in home furnishings has swept across the country. Lucky possessors of fine pieces of furniture, handed down to them, have learned how precious these pieces are and a new interest has been awakened in the work of women in colonial times, in the craftsmanship of their weaving, quilt piecing, rug making and the like.

The old art of rug making has been revived and women are making hooked rugs of coarse yarns. Some of them are piecing quilts, as their grandmothers did and copying the quaint, old

DESIGN FOR HOOKED RUG

patterns that are well worth preserving. These are occupations for moments of leisure and the finished rugs and quilts are valuable from a money standpoint, as well as from the standpoint of sentiment. Rugs made of rags, cut into strips, braided and sewed in oval and circular shapes are well established and some of them are now made of discarded silk stockings. The legs of these are cut into continuous strips, the strips braided and sewed together. Table mats are made in the same way—the colors arranged according to the fancy of the maker.

A handsome design for a hooked rug is given here. These rugs are made on a burlap foundation and a modern needle, invented for the purpose, makes the work proquickly. With a colonial bed or bureau, a pieced quilt and homemade rugs one can make a splendid start in refurnishing at least one room so that it shall be a tribute to the early Americans.

Strips of silk in many colors sewed together and loosely woven in the old "hit-and-miss" rag-carpet pattern, of becomingness has grown to be vastly important in them, it is stressed in all shoes except, perhaps, those for special sports wear, and even these must consider the element of style.

Besides the usual black and brown shoes for the street, there are new light browns, beige, parchment, honey, gray and gray-beige that harmonize with fashionable colors in suits or costumes, and are inconspicuous. But the color range is much wider and includes sauterne, blond suit bois-de-rose as well as pastel colors in very smart oxfords. These are provided for those who are particular about choosing a color to harmonize perfectly with the costume. But kid leather in the brown, beige, gray-beige, parchment and honey shades, contributes shoes that will fill all ordinary requirements. Pumps seem to be cut a trifle higher than they were and oxfords somewhat lower, and becomingness depends upon cut.

There are a good many shoes of reptile skins—not so many that look like them. The alligator, the lizard and numerous snake skins, very often in combination with plain leathers, add interest to the collections of spring footwear. These may or may not be genuine, the innocent kid and calf, for all one knows, may be masquerading in the fancy of the maker, so, the imitation is so clever that no one is the wiser. The almost luxury in reptile skins is manifested in combining two leathers. For sports or semi-sports wear these and kid also are shown in white, brown, beige and in white and brown combinations. Those made of braided strips of leather are popular with sports frocks and so are white "saunter oxfords" to be worn with a smart jumper frock. The slippers shown in the oval are of bole-de-rose kid skin and appear

STYLES IN SHOES

made beautiful couch covers, pillow covers or portieres and small colonial rugs are closely woven and made of cotton or woolen rags, are staple articles of merchandise that find a ready sale. Even the most alluring of all revivals seems to be the pieced quilt, because of its quaint, homey beauty, and because of its convenient pick-up work which anyone can do.

In front of windows filled with spring and summer shoes, women are clustering like bees about a honeysuckle bush—studying the new styles industriously and enthusiastically. These footwear consciousness has been developed very rapidly during the past few years and they are quite as mindful of the clothing of their feet as they are of their millinery. Meantime shoe styles have grown more complicated and much more greatly varied than they ever were and the element to have a tasteful appearance of lizard skin as a finish.

For evening wear metallic brocades, in slippers appear to lead. There are many black satin slippers with touches of gold or silver and handsome rhinestone buckles have lost none of their prestige. Metallic kid and brocades are combined in some of the smartest evening slippers.

About the best choice for mid-summer wear with full dress day dresses, is the kid shoe in beige, gray-beige, parchment, honey or light brown, with stockings and gloves to match in color. Even the street hat is often chosen with reference to the color of the shoes, and these matching accessories worn with tailored suits or frocks insure a chic ensemble.

JULIA BOTTOMLEY.

(©, 1926, Western Newspaper Union.)

Tied in a New Way

The newest neckwear are wide squares one corner of which ties about the throat and the rest hangs down the front in a streamer. These are very smart with tailored suits.

The New Tailleur

The newest tailleurs have jackets fashioned exactly like a man's dinner coat. To be correct they must be complemented by white silk shirt, black waistcoat and black tie.

Rhinestone Ornaments

From Paris comes word that the smartest ornaments are those made of rhinestones. They appear on both frocks and hats as well as in the form of costume jewelry.

Kasha Coats

To match the pastel tinted frock worn underneath, there are coats of kasha in the same lovely colorings. Many have the short cape so much in vogue this season.

THE FIFTY-DOLLAR BILL

By WILSON C. MISSMER

(©, by Short Story Pub. Co.)

HER trip had been planned hurriedly and her packing had been done in haste and confusion, and when she entered the pullman and the porter had found her berth for her, she was all in a flutter. It had been one of those last minute trips to New York to do some shopping, decided because her husband had made her a present of a fifty-dollar bill which, with the money she had already laid aside, was sufficient for her to make the journey now instead of later as she had intended. The matter of the money which her husband had given her was merely one of the odd little surprises he was generally lavishing upon her, and she had stuck the bill with a pin into the pincushion and decided then and there not to postpone her trip any longer, and had begun packing immediately.

Settled at last, the hurry and excitement of the last hour seemed to fade to a mere nothing, and changed from a bit of annoyance to a rather pleasant memory. Reminiscently she rehearsed the scenes in her mind. She remembered how flustered she had been, how she had ordered the maid about to do her bidding, how she had literally thrown a few clothes into her traveling bag, how she had taken a most hurried leave of her husband. She could remember distinctly having at the last moment snatched up the fifty-dollar bill from the pincushion and thrusting it loose into her handbag. And now after all the confusion and excitement and worry, here she was safe aboard the train, and apparently none the worse for the rush.

There were not many people in the car. Two middle-aged gentlemen sat three or four seats in front of her, heatedly discussing some topic which she could not overhear. Opposite was a rather young woman, oddly dressed, whose eyes seemed to wander restlessly through the car. Behind, a mother and two small children were conversing irreverently, the mother endeavoring to answer patiently the questions of a very talkative son.

When the train started Mrs. Rockwell purchased a magazine and passed an hour or two in its perusal. Then becoming thirsty she started down the aisle for the water cooler, and it was while drinking a glass of water that she remembered having left the handbag in the seat and she realized that this was a most careless thing to do as it contained all her money. Hurrying back she saw with some relief that the bag was still there, and, sitting down, Mrs. Rockwell, obeying some strange sudden impulse opened the bag and looked in. The fifty-dollar bill was not there!

She sat up rigid and stiff, gazing straight ahead of her. She had been robbed in that marvelously short time! She could scarcely believe her senses. She searched the side compartments of the bag, counted her other money which she had packed away carefully but there was no sign of the fifty-dollar bill. She did not know what to do. She glanced about her cautiously and found the eyes of the oddly-dressed woman upon her; when Mrs. Rockwell looked at her she immediately glanced away.

Mrs. Rockwell was not a woman of very decided character, and was rather easily excited. She lacked the acumen which enables one to act quickly, and she lost much time sitting rather dazedly gazing ahead of her. She was at a loss what to do. There was nothing particularly suspicious in the attitude of these near her, yet the only person who could possibly have had the time and the chance to look into her handbag was the woman across the aisle. But Mrs. Rockwell did not relish the task of accusing her openly, and had just decided to call the conductor and explain the circumstances to him, when the lady across the aisle arose and went to the water cooler for a drink, leaving a black handbag behind in her seat. Acting on a strange swift impulse Mrs. Rockwell took a long chance. Glancing through the car she saw that the woman with the two children was very busily engaged with them and that the men ahead were at the height of their argument. So she noiselessly slipped across the aisle, picked up the handbag, snapped it open and there, thrust in hurriedly amongst a confusion of other things lay her fifty-dollar bill. Mrs. Rockwell took it, returned to her seat, and calmly deposited it in her own bag before the lady returned.

The success of her impulsive plan did not surprise her so much as did the extreme boldness of the other woman. She had heard and read of the hundred and one little robberies that occur aboard trains, but she had always believed them with rather a shade of doubt. That an ordinarily good-looking young woman, whose wearing apparel, to say the worst of it, was of rather an odd selection, should be so daring as to actually try to commit robbery in the space of time required for one to pass down the aisle and take a drink of water was indeed astounding. She could readily appreciate that it was merely because the time was so limited that the woman did not remark the whole bag and strip it of its unobserved contents.

When the woman returned to her seat, she rather carelessly pushed her bag to one side and picked up a book which she held with her and began to read, leaving Mrs. Rockwell to wonder what kind of a criminal she was.

As she studied her, Mrs. Rockwell thought the woman had a hard face. There was nothing about it by which one could judge her age. The lack of the faintest trace of wrinkles might lead one to think she was young, but the lips were too thin and the eyes gazed about too calmly and too carelessly for a person of inferior age. Her easy manner, too, gave one the suspicion that she had seen lots of the world, and that it would take a great deal to throw her off her guard. Yet there was something about the face that attracted Mrs. Rockwell, and she found herself at times almost pitying the poor creature, and even going so far as to advance to herself the theory that possibly she was a victim of kleptomania.

The gravity of the act she herself had committed, or the possible consequences of it should she be apprehended, did not once occur to Mrs. Rockwell. She was one of those women who move upon impulse and never stop to anticipate possible results, and it never occurred to her that if she had been caught in the act of going through the other's handbag her own story of having first been robbed would not have been credited by the conductor, and the other woman had only to tell a simple little lie to put Mrs Rockwell in a very compromising position. However, she had not been detected in the act and her own conscience, had recovered her fifty-dollar bill, and was inwardly congratulating herself that she had come out of the thing. And the rest of her journey was divided between congratulating herself on the back and watching the movements of this woman across the aisle.

In New York the journey had been enough, but even with what she had saved it was quite inadequate to complete the list she had mapped out. However, when one runs short of funds there is nothing to do but to return home or go somewhere where the funds can be replaced, and Mrs. Rockwell returned home.

She telegraphed her husband, and he met her at the train. There was an odd little expression on his face when he kissed her, and a certain reserve in his voice when he greeted her that of a time she had had, both of which impressed Mrs. Rockwell as peculiar.

"Add about your shopping, dear?" he asked suddenly. "You didn't do much, did you?"

"Indeed I did," Mrs. Rockwell replied?

"You did?" he repeated and exclaimed rather wonderingly. "Why, what on?"

"Why, on the money I had saved, but principally on the fifty dollars you gave me, dear."

Rockwell stared aghast at her. "The fifty dollars I gave you. Why, my dear, don't you know that you forgot that fifty dollars and left the bill pinned to your pin-cushion, where I found it the morning after you had gone?"

Honey Used for Food From Earliest Times

Honey was probably the first pure sweet known to mankind. The cradle of the race was in southwestern Asia where bees in a state of nature have always been common, and where honey from prehistoric times has been a common article of diet. The description of the Land of Promise given in miraculous manner to Moses was that it was a good land and large, "a land flowing with milk and honey." Modern travelers in Palestine agree that the description is a good one especially with respect to the honey, bees being abundant even in the remote parts of the wilderness, where they deposit their honey in the crevices of the rocks or in hollow trees. The dwellers of northern Arabia the hills are so well stocked with bees that no more are hives placed than they are occupied.

Of Course! Of Course!

Slagsby, Isn't it, how the obvious escapes us sometimes. We wrote the other day about a fish that washes its young, and an exchange wondering how on earth the little ones get dried. "Why, on a fish line, probably," answers a correspondent, and this no doubt is the real solution of the problem.—Boston Transcript.

Toofus' Philosophy.

"What is your idea about life, Toofus?" ask post, trader in moralizing mood. "What are we here for, hey?"

"Growth, I think," say Toofus. "No matter how small a potato you are at the start, you can grow."

Awarded Life-Saving Medals

Underwood & Underwood

Two Washington women, Miss Florence Skadding, and Mrs. E. B. Milton, were awarded life-saving medals and bars by the American Red Cross. At left is right: M. K. Reckford, assistant national director; Mrs. Milton; Miss Skadding, and Gen. George Barnett, chairman of the Washington chapter of the Red Cross.

Reviews School Gains in 25 Years

Specialist Cites Advances in Vocational and Scientific Fields.

Washington.—James F. Abel, assistant specialist in foreign education systems of the United States bureau of education, in reviewing the advances made on education in the last quarter of a century, calls attention to the changes brought about by the war resulting in new countries and marked changes in others. He says some of the new constitutions contain virtual educational bills of rights.

It is declared that reforms affecting entire systems of schools were attempted and carried out with more or less success by several of the large nations. The scope of education was almost doubled in breadth by the further inclusion of scientific and vocational training, a training for citizenship and services and its adoption by a number of countries as a matter of national promotion and support. Better care for the physical welfare of mankind through teaching children essential health habits, arranging games and athletics for all rather than a few, erecting finer school buildings to furnish good and pure air and insisting on medical inspection as a directive more than a defensive activity had their practical beginnings.

It is pointed out that on the continent of Europe alone twelve nations adopted new constitutions in the four-and-one-half years period between July, 1918, and December, 1922. "Nine of these were new nations whose people had long been subjected to a kind of denationalization through having their racial customs and traditions ignored," says Mr. Abel, "their religion suppressed and their native tongues more or less outlawed.

Gains in Colonies.

"They wrote into their constitutions a recognition of the right of national minorities to education in their native tongue and to the development of their own racial literature and culture. Other classes in some of the new constitutions amount to a veritable educational bill of rights. A uniform school system for all children, with special privileges for no social class, a minimum of education granted only for different vocational and local interests, is the common ideal.

"Colonial policies in education and their results have stood out in bold relief in this first quarter of the Twentieth century. As a part of the responsibilities which they assumed in consequence of the Spanish-American war, the United States set about the education of their new people and rapidly developed in the Philippines and Porto Rico systems similar in plan to those in the continental states. In the Philippines they undertook to provide some 12,000,000 of people with a training adapted to their needs. It a training that would mold those people into a self-reliant, self-dependent body. Philippine schools from kindergarten to university grade now enroll more than one and one-quarter millions of students and are maintained at a yearly cost of more than 23,000,000 pesos.

"In Porto Rico the government of the United States found a population at least 80 per cent illiterate, no public school buildings, elementary education provided for less than one-fifth of the school children and no instruction on the island in a financed grades or of quality sufficient to prepare a student for admission to a good college. Out of that situation a complete education-al system has been wrought, reaching approximately one-fourth of a million students and costing annually about $4,000,000. Vastly more has been accomplished in 25 years in these two insular areas than was brought about in several centuries under a government neglectful of the place of education in wise colonial policies.

"Centers of study are being followed closely or accompany the governors general sent out to the colonies by the government of the British empire. Autonomous universities have grown apace in numbers and wealth throughout most of its dominions in recent years. Cambridge and Oxford local examinations are held in many of the colonies as a way of opening to colonists attendance at British universities.

New Organizations Start.

"Engaging in and bringing to an end great military conflicts necessarily created new international contacts. These carried over into education and gave added impetus and force to generous policies such as were initiated by Cecil Rhodes. Considerably more than a hundred private organizations sprang up, most of them in the past decade, and they are carrying out their purposes in the promotion of finer-or more public spirit and in the interests of international relationships. Several of these were world associations claiming no less than all nations and all peoples as their field for further mutual understanding and progress in education. International exchange of students, teachers and research workers in the spirit that science and learning know no political boundaries was established and is growing rapidly.

"The educational revival in Mexico was concerned with improving existing schools and establishing new ones, encouraging industrial and technical education, providing more libraries and books, gathering and conserving the historic and artistic material of the country, aiding poor children and reducing illiteracy. The ministry of public instruction was recreated and reorganized and budgets far in excess of those for previous years were proposed and expended.

"The program of general participation in and partial direction of vocational education begun in the United States in 1918 now affects some 6,000 schools and more than half a million young people and involves an annual expenditure of approximately $20,000,000.

"The United States began the century with approximately 720,000 pupils in 8,000 public and private secondary schools. For years new schools were opened at a rate equal to at least one each calendar day. More than 16,500 of these now enroll upwards of 2,250,000 students and are training 23 per 1,000 of population in secondary subjects as against 9.5 in 1900."

3 in Every 10 Brooklyn Women Work for Living

Brooklyn, N. Y.—Three of every ten women and girls more than fourteen years old in Brooklyn are engaged in remunerative occupations, according to figures released by the chamber of commerce from a compilation of the United States census.

What's more, one in every four persons working for wages is a woman. The total number of women employed in Brooklyn borough is 215,120, the census figures show, compared with virtually every field the figures show.

This borough has a full-fledged woman paperhanger, two boatwomen, a sailoress, two female cemetery keepers, three railroad switchwomen and flagwomen, 25 farm "laborettes" and 607 who gave their occupations as longshoremen and stevedores.

There also are female piano tuners, foundry workers and cuspidor. Draymen, expressmen and teamsters total 56, and painters, glaziers and varnishers, 85.

Convert Corn Into Sugar

Corn may be converted into sugar within an hour by use of a new process developed by the bureau of chemistry of the United States department of Agriculture. It is called maltose sugar and is about 95 per cent as sweet as cane sugar.

MYSTERY OF SLEEP SOLVED IN PART BY PSYCHIATRIST

Special Electrodes and Galvanometer Enable Doctor Richter to Test Depth of Unconsciousness.

Baltimore, Md.—A definite step in unravelling the mystery of sleep, which has baffled scientists from earliest times, has been made by Dr. Curt P. Richter of the Henry Phipps Psychiatric clinic of Johns Hopkins university. With a string galvanometer and specially constructed electrodes he has been able to tell how soundly a person is sleeping without awakening him.

His experiments not only have shown that sleep is of two distinctly different kinds, but that there is a great difference between rest sleep and conditions in which certain types of mentally ill people appear to be asleep.

His discoveries are reported in a paper entitled "The Significance of Changes in the Electrical Resistance of the Body During Sleep," which appears in the proceedings of the National Academy of Sciences.

His research showed that the resistance to an imperceptible electrical current sent from hand to hand during sleep was localized almost entirely in the skin. This resistance increased in one instance from 50,000 ohms when the subject was awake to 500,000 ohms when asleep.

The current was applied by two electrodes of zinc covered with a thick kaolin paste mixed with saturated zinc sulphate solution. These were attached to the hands and connected to the string galvanometer, designed to measure the smallest currents.

The experiments showed that the intensity of the resistance varied directly with the intensity of sleep. It was discovered, however, that when sleep was not sound the resistance of the skin on the backs of the hands usually decreased. In these cases the subject was not refreshed by sleep.

In the case of patients suffering from catatonic stupors, which so closely resemble sleep that it is impossible to tell by looking at the patient that he is not asleep, a very different condition was found. In these cases it was discovered that the palm-to-palm resistance of the hand was very high, indicating complete unconsciousness; while the resistance from back to back of the hand was very high, indicating complete muscular relaxation and lack of control.

From these studies it is hoped that new light will be thrown upon nervous conditions, not only of mentally ill patients but of relatively normal people suffering from nervous strain.

PETROLEUM JELLY

Why Bother About the Poles?

By PROEHL HALLER JAKLON

WHY do men risk their lives in hazardous expeditions to the polar regions? Is there anything to be gained, other than the satisfaction of their curiosity and the lure of adventure, which justifies to any reasonable degree the unending hardships they suffer, not to mention the enormous costs involved and the long months of preparation and study necessary, even before a start is made?

Most of us regard a polar dash as a spectacular stunt, full of thrills for the few who engage in it and anxiety and uneasiness for those who remain at home. What's the use of exploring and charting new territory whose area is more than a million square miles if this land is only to be found buried under tons of ice centuries old?

It is obvious, however, with three costly expeditions planned and one already in the field that there is some sound reason behind all this effort. Something more important than the charting of that spot on the map which now is a blank marked "Unknown Area."

From John Tilghman Rowland, fellow of the American Geographical society, writing in the New York Herald-Tribune, comes some very logical reasons concerning the importance of polar exploration. Rowland says that we who live in North America have a vital interest in these great adventures. A hundred years from now by intimates, it is not unlikely that historians will view these expeditions in the same light that we now regard the epochal voyages of the fifteenth and Sixteenth centuries when Columbus and Magellan, as well as many other daring navigators, discovered those more temperate parts of the earth, paved the way for colonization and thus changed the history of the world.

We must realize that the age we live in is an age of rapid transportation, both of persons and things, and ideas. Distances have been annihilated by man's ingenuity, and journeys which not so long ago were reckoned in days and weeks are now thought of in terms of hours and days. It took our forefathers thirty days to cross the Atlantic; we speed across it today in from five to seven days. Soon we will commonly make the trip across in an airplane in less than two days. The barriers between nations have been broken down, and the man finds the world today a much smaller place than the world of yesterday.

Now Mr. Rowland asks us to glance for a moment at the globe above map, which, although not drawn accurately to scale, will serve our purpose. Do you notice how all the countries of the northern hemisphere are grouped around the Arctic ocean? There's Russia (Siberia) and Canada facing each other across the northern dimmer of the Arctic. Ordinarily we think of them as being widely separated. The tip of Alaska nearly touches Siberia. Norway and Sweden, by this route, find themselves not at all so distant from the Far East as they have hitherto supposed. It's really just a big ocean that part of the horizon which lies under the pontoons of the larger airplane in the above picture. Thus, the Arctic ocean is truly a new Mediterranean, geologically as old as time; but strikingly new as a factor in the affairs of men. On this ocean Europe, Asia and America all have frontage, which, if the climate of the Arctic were reversed, would have been bordered long ago with thriving cities and shipping centers. Imagine this ocean free of ice so that it offered no obstacles to the passage of ships. Immediately new trade routes would be opened. Vessels, both freight and passenger, which now ply between European countries and those of Asia via the Suez and Panama canals or around the Cape of Good Hope, Australia through endless miles of the world's widest oceans, would take a new short-cut across the top of the world. Sailing northward between Greenland and Spitsbergen, they would steam quickly across some place not far from the pole and descend into the Behring strait. After holding their course southward for a few days they would reach the ports of Korea, China, and Japan. Enormous savings in fuel, time and distance would be effected, not to mention the item of find economy.

Short lines of communications would spring up also between Canada and Russia, Alaska and Norway, and northwestern Europe and Siberia. The Arctic ocean would be alive with ships, and those nations would realize that their Arctic coasts were by far the most important they possessed. This, Mr. Rowland says, would mean not only commercial but military readjustments on a huge scale, for in the future whoever controlled the Arctic would hold the key to world trade.

Of course, nobody expects the climate of the Arctic to undergo this radical change, but there is the possibility, however, that within a relatively short time we shall be able to discover a way that will recognize no such barrier as the Arctic offers, for the good reason that ice is no obstacle to a ship navigating the air.

We have the assurance of aviation experts that polar air routes are feasible and that such flights can be made if necessary will explore the entire Arctic basin and find out in particular the nature of the great unexplored area. This done, we can expect the day when giant planes with fly from England to Japan in forty-eight hours. Such a trip would require a speed of not more than 100 miles an hour.

How can this unknown area be explored? Northward from Alaska, in the center of the Arctic ocean, lies a million square miles of territory, the nature of which we know nothing. The Arctic ice bars out ships, dog teams cannot cross it, for the distances are too great. Here and there the edges have been scratched by our adventurous explorers, who have been forced to admit that this mighty area defies penetration.

The one remaining way to conquer this region is through the air. Two years ago the chances against the airplane were heavy, but today with better steering instruments, improved planes and motors, and a better knowledge of Arctic conditions, the chances are strongly in favor of the air route. Conditions most favorable for the flight are found in the early spring. The day is twenty-four hours long. Thick snow underneath, instead of melted snow and open water, affords adequate landing fields, and in April and early May the Arctic air is less obscured with fog than at any other time of year.

What explorers want most to find in this unknown area is solid earth. If land is there and they can discover safe landing places for aircraft, the discovery will be an event of world-wide importance. It will permit the establishment of supply bases, lighthouses and radio stations to guide the pilots of future air liners. With fuel and food near at hand no airship or plane would be more than a few hours from help in this polar desert, and the risk of such travel would be cut in half. Those who have visited the Arctic are inclined to believe that such land exists. They have watched the behavior of tides and currents in the polar basin, which would indicate the presence of land. They have seen migratory birds fly straight out to sea just before their nesting season and disappear over the far horizon.

Discovery of land there would have an important military significance. Station a fleet of speedy bombing planes upon the new land and they would command an international area. Alaska and northwestern Canada would be completely at their mercy and only upon these planes' supply of fuel would rest the security of Great Britain, central Europe, Scandinavia and Japan.

No other spot on the earth is equidistant from so many important points. Place one point of a pair of dividers on this unknown area and the other point somewhere on the fortieth parallel of latitude in the northern hemisphere. Using the first point as a center, you can describe a circle which for the most part will include the world's greatest cities and economic centers. Of course, it may be argued that a flying base in such a far northern location would have value only at certain seasons, but it is also true that aggressor nations generally choose their own time to strike. It is not without the bounds of imagination to foresee the world threatened by some predatory power which had acquired the new land.

All nations in the last few years have begun to show increasing interest in their Arctic possessions. Canada has declared sovereignty over all lands between her northern coast and the pole, yet not a few of them were discovered by explorers sailing under the flag of the United States. This new principle of sovereignty ought to give the United States a title to all lands lying north of Alaska, but it cannot be relied upon to have this effect. Those who have studied the problem urge that the United States and Canada join forces in these matters. The right of a nation to the territory it discovers is not yet outlawed, and if new discoveries tend to disrupt world peace some definite agreement, such as international utilization of the new land, must be agreed upon.

This year America will be represented in the dash to the pole. Commander Richard E. Byrd of the United States navy, on leave, who commanded the navy flyers in the Arctic last summer, has chosen Spitsbergen as a jumping-off place. From here he goes to the northernmost point of land in the world, a promontory in Greenland. After a base has been established at this place, he will return to Spitsbergen for additional fuel and supplies. He will then return to the Greenland base and fly to the pole, then either to Spitsbergen direct or via Greenland, as circumstances dictate.

This expedition has been financed by such men as John D. Rockefeller, Jr., Vincent Astor, Thomas F. Ryan, Richard Hoyt of New York, Robert Ford and Congressman Frothingham of Massachusetts and several others. Explaining the details of the expedition in an article in The New York Times, Commander Byrd said:

"My plan is to do the flying in a series of legs of about 400 miles each. Careful estimation indicates that, with the three motors, the chances are about five to 1 against breakdown due solely to motor trouble on any single leg of the flight.

"On our flights on the MacMillan expedition last year we expanded near water, because we could not safely land on the ground. It was August, and the snow had largely melted away. Flying in the spring, however, we will carry skis and will land and take off by skiing on the ground.

"The objective of our first flight will be the first landing field we can find on Peary land, the northernmost known land in the world. It is at the extreme north tip of Greenland, about 400 miles northwest of Spitsbergen. We will stop at the first spot on Peary land that promises good skiing for the plane.

"Here it is our intention to deposit 1,000 pounds of gasoline, food and supplies. Then we purpose to fly back to King's bay, load up and return to our Peary land air base. Our exploration of unknown areas in the Arctic begins with our flight from Spitsbergen to Peary land. Most of the region between the two places is unexplored.

"After our second flight to Peary land we will be ready to make the attempt to fly to and around the North pole. Our objects are to explore the unknown stretch of about 400 miles from Peary land to the pole and possibly to complete the sporting feat of reaching the pole from the air.

"From our projected base in Peary land it is approximately 400 miles to the pole. If we reach the vicinity of the pole, our instruments will enable us to determine, while in flight, our location within a margin of twenty miles. To make sure that we have reached and passed the pole, we will make a wide circle around it. This circle would be less than 100 miles in distance, but it would be a complete circumnavigation of the globe."

Nature Has Own Way of Scattering Seeds

Nature has various clever devices for scattering seeds. Those who walk through a field and find burrs attached to their garments have been made her involuntary carriers. The thistledown is an example of the larger class of devices that, like parachutes, send the seeds on long voyages, and many seed pods have hooks whereby to attach themselves to wading or swimming birds. In the state of Washington experiments are in progress in connection with reforestation, to determine how far the seeds of the Douglas fir will carry. Set adrift from a kite at a height of 175 feet, they have floated on their own wings, as a maple seed might voyage, to a distance of 1,600 feet, where they were collected on squares of canvas spread on the ground. The breeze blew at a rate of eight miles an hour. Many seeds were found at 1,100 feet, and it is estimated that 80,000 were thus broadcast over an acre. Those who are replanting areas where logging operations had cut broad swaths in the woodland intend to profit by the results of the experiments.—Exchange.

No Great Bell Ringer

Possibly the greatest bell ringer was a Belgian, Matthias van Gheyn. He died in 1785, and with him, the highest art of bell ringing apparently came to an end, as no one has been found capable of playing the bell compositions which he has left. The great belfry of Bruges has 40 bells, while Mechlin has 44.

One can scarcely believe the number of changes that can be made on a peal of 12 bells, but it is stated on reliable authority that it is possible to ring 479,000 changes.

Middle-Age Masticating

Jackdaws, magpies, hedgehogs, cranes, peacocks and swans were popular dishes in the Middle ages.

THE KITCHEN CABINET

(©, 1926, Western Newspaper Union.)

Methought I saw a robin's wing
Among the budding trees!
What need of chilly lingering
Mid winter reveries.
When life is at the edge of spring?
—Florence Converse.

GOOD EVERYDAY FOODS

An attractive salad is always a most welcome addition to a dinner or luncheon.

Sweetbread and Cucumber Salad.—Prepare the sweetbreads by parboiling and removing all the inedible portion, then drop into cold water to make firm again; add a tablespoonful of vinegar to the water. After standing an hour, drain and cut into pieces. Cut into cubes half the amount of cucumbers, mix all together with a highly seasoned mayonnaise which has been mixed with half its bulk in whipped cream. When well blended, heap lightly into nests of tender lettuce. Serve with toasted wafers.

Celery Jelly Salad.—Put two cupfuls of strained tomatoes, a tablespoonful of grated onion, a bay leaf and a pinch of celery seed into a saucepan; bring to the boiling point and set aside for fifteen minutes to keep hot. Add half a package of gelatin which has been soaked in half a cupful of cold water, one-half teaspoonful of salt, and the juice of half a lemon. Stand over boiling water until the gelatin is dissolved; strain, stir in a quantity of finely cut tender celery and set on ice to set, stirring occasionally until it begins to thicken. Mold in small cups and chill. Serve on beds of lettuce and mask with a rich mayonnaise.

Apple Lemon Pie.—Take two cupfuls of chopped apple, one cupful of sugar, the juice and rind of a lemon, one egg well beaten, a cupful of water, and the same of cracker crumbs. Bake in a two-crust pie in a moderate oven.

Peas, Pickles, Peanuts Salad.—Take an equal quantity of peas and peanuts with enough chopped sour pickle to add zest. Serve on slices of orange, garnished with parsley. Serve with a highly seasoned boiled dressing.

Tapioca Pears.—Cook tapioca and bake with canned pears, adding grated lemon rind and butter. A little lemon juice added to the sauce which may be made from the pear juice will add to the flavor.

Mock Duck.—Take pork tenderloins and split them lengthwise. Make a dressing as for turkey. Put dressing in the meat, sew it up, season, and with strips of salt pork, add a little hot water and bake for forty-five minutes.

Luncheon Desserts.

For the noon meal, when dinner is served at night, the dessert should be a very light one. A dish of fruit is a small cake or cooky, a gelatin pudding are all desirable desserts for a light meal.

Jelly Fluff.—Take half a glass of jelly and the white of one egg; beat until stiff and the mixture will stand up alone. Heap in sherbet cups and top with a little egg white mixed with sugar or a bit of whipped cream.

Another nice fluff which is well liked is prepared as follows: Grate a medium-sized apple and cook until sugar to taste, add an egg white and whip until stiff. This may be served with a thin custard sauce, ice cold, or the fluff heaped over small cup cakes.

Emergency Desserts.—Steam any leftover cake and serve with marshmallow sauce. Mix one cupful of brown sugar with three tablespoonfuls of flour, add one and one-half cupfuls of boiling water and cook until smooth, add a generous grating of nutmeg and two tablespoonfuls of butter with a dash of lemon juice and rind. Just before serving have the sauce boiling hot and add a few marshmallows cut into quarters.

Caramel Cornstarch Pudding.—Brown one-half cupful of sugar until it forms a syrup in the pan, then add a pint of boiling milk; stir until the caramel is dissolved—this will take time. Add two tablespoonfuls of cornstarch mixed with a little cold milk and cook until the starch is thoroughly cooked. Four into sherbet glasses and garnish with a spoonful of whipped cream topped with a piece of preserved ginger for each glass.

Chicken Loaf.—Cook a fowl in water until the meat falls from the bones. Strain, put the broth into a saucepan and reduce to three cupfuls by boiling. Add one-half package of gelatin. Separate the meat from the bones and shred fine. Put the chicken into a well-rinsed mold, season the broth and pour over it. Set away to harden and serve on lettuce with mayonnaise dressing. A good imitation for a hurry-up dish is canned chicken with chicken broth or canned soup used instead of the fresh fowl.

Snowballs.—Spread cooked rice an inch thick over squares of coarse muslin wet in cold water. In the center of each place a canned peach or apricot, or pear. Tie carefully and steam ten minutes. Serve with a sauce prepared by thickening the fruit juice from the can, adding a little butter to make it richer.

Nellie Maxwell

Electricity for Dogs

One of the latest applications of electricity is in the treatment of dogs for distemper. Exposed to ultra-violet rays for 15 minutes at a time, the treatment is said to be very effective.

One of Largest Geysers

Excelsior geyser, in the Yellowstone National park, Wyoming, is said to be one of the largest geysers in the world. It has thrown a column of water to a height of from 200 to 300 feet.

"TARIFF NO INFLUENCE"

Protection can no longer be called the promoter of monopoly because our recent experiences show that products coming through the customs houses can be as easily cornered as anything else, according to the National Republic which editorially answers Senator King's attack on the protective tariff as follows:

"Senator William H. King of Utah expresses the belief that a protective tariff is 'the thin edge of socialism.' He declares that protection destroys competition, and promotes monopoly, the precursor of socialism.

"Does not the protective policy persist in the strange delusion that protection is the mother of monopoly. In taking this position they are compelled to overlook the fact that it is quite an easy to 'corner' commodities which come through the customs house as those which are delivered from our own factory doors. They must ignore the fact that articles on the free list have been as generally and as effectively subjected to monopolistic control as those which are on the protected list.

They must overlook, for instance, the fact that rubber, nitrates and other articles which come in tariff-free are not only controlled by combinations in restraint of trade, but by foreign combinations beyond the reach of our anti-monopoly laws.

Monopoly deals primarily with distribution, not production. Where monopoly or near monopoly, is operative, the price to the consumer is not governed by factory price but by 'what the traffic will bear.'"

One Too Many—Voice Over Phone —Twins; all doing well.

Harrassed Father—Er-sure you have not got the wrong number?—London Punch.

Bureaucratic Government

One of the most significant political tendencies of the times in America is the rise of sentiment against the further increase of the power of the federal government. There can be little doubt that the government at Washington has taken over activities that were little dreamed of by the framers of the Constitution.

In fact as every school boy knows, the Constitution was designed and adopted only because there seemed no other way out. The articles of confederation had proved ineffective and there was danger that the country would break up into thirteen jealous states which would easily become the prey of the designing powers of Europe.

At first, therefore, the danger was not that we might have a bureaucratic government, but that we might have no government at all. It has only been within the past two or three decades that the federal government has taken so many advances into the field of governmental activities which had heretofore been regarded as the peculiar province of the states.

All sorts of societies and organizations have been formed to get the government to do things which these well-meaning persons have been unable to get some of the states to do. As a result many different bureaus have grown up at Washington apparently responsible to no one but their own sweet will. This has made neither for economy nor efficiency in government.

But now the time of reaction seems to be at hand and men of all political parties are protesting against the establishment of any more paternalistic bureaus in Washington.

It is not only that these bureaus are expensive. There is danger that the people will forget to do things for themselves.

Senator Bingham, of Connecticut recently summed up this danger in the following well-chosen words:

"If we take away from the communities the power of local self-government their ability to govern themselves will atrophy. Eventually our system of government will fall because the citizens have neither ability to think nor power to act as responsible citizens.

"Let us aim to give our localities more responsibility rather than less.

"Far better is it for him to be independent and make mistakes than to be free from mistakes and dependent on the wisdom of a highly centralized government. As a matter of fact a citizen without responsibility ceases to be a citizen and becomes a subject. In our country we do not want subjects; we want citizens."

The day has passed when there is any danger of our government breaking up into a number of independent states. What we must see to now is teat the federal government does not take over too many of the functions of local government. Fortunately, however, the people are becoming awakened to the danger.

COMMENT.

—One can't expect a young man to turn out well who doesn't turn in early.—St. Paul Pioneer Press.

—Senator Brookhart says that Iowa now has na United States Senator, but he doubtless knows where he thinks they can get one.

—The government of Tibet has prohibited any further attempts to climb to the top of Mt. Everest. Well, it doesn't spite us any.

—It is said that the people are coming out of Florida so fast now that the state highway commission had to put red lights at all exits.

—A Dallas candidate has shaved off his mustache in preparation for the campaign. Easier on the babies, you see.—Dollas News.

—Perhaps the reason a legislature is slow to adjourn is that it gives people a chance to talk behind its back.—Atlanta Constitution.

—Columbus had many hardships but at least he had no trouble in finding a place to park his boat when he arrived.—Lebanon Reporter.

—It's a good bet that when one of these Scandinavians finally discovers the North Pole he'll find an American already there running a hot'dog stand.

—The police of an English town pinched a man who offered to sell his wife for $50. The public must be protected against swindlers.—Baltimore Sun.

—British scientists have started an expedition to find out whether or not whales are polygamous. Supposing they are, what are they going to do about it?

—A popular referendum now on the prohibition amendment would seem a good deal like voting to find out who was queen of the May back in Cleveland's administration.

—Life is just one thing after another. We won't any more than get rid of the primary elections this summer until it will be time for the League of Nations to meet again.

—The old traveler who said he rode in a train so fast that that the telegraph poles seemed all run together, now has a son who travels so fast he can't see the filling stations.

—Philip Snowden holds America's war credits ought to be "gifts to a common cause. It seems like we would never be forgiven for lending that money.—Pittsburg Gazette-Times.

—Now it is a Chicago bridge player who slaps his wife's face for criticising his game. The rules committee will eventually have to decide whether this constitutes a little or grand slam.—Detroit News.

—The sentences given four St. Paul bandits aggregate 1,000 years, but even at that a really enthusiastic Parole Board should be able to get them out in time to enjoy next fall's world series.—Marion Star.

—The most remarkable feature of the whole thing is that those bandits found $13,000 on a visitor at Palm Beach after the real estate men had been covering that town for more than two years.—Lexington Herald.

Baked Chronometers

Every chronometer issued to the British navy has to be "baked" at the Greenwich observatory. Those required for extended cruises in varying climates are kept for two months in an oven heated to 90 degrees to "acclimate" them.

Pugilist's Vanity

An oddity of Tom Sayers, the celebrated English heavyweight pugilist, was to have his name picked out in little brass studs on the toe-cap of his boots, so that all might be able to recognize him.

Guide to Destiny

That character and destiny can be read by watching people dance is the novel declaration of a society clairvoyant. Women especially, she thinks, give themselves away, as it were, when they dance.

Power of Faith

Faith consists in the willingness to pursue unstrungly the things for which we hope. It is the power by which we seek daily to translate possibilities into realities.—John Herman Randall.

Make Yourself Worthy

Do you ask to be companion of noblest? Make yourself noble, and you shall be. Do you long for the conversation of the wise? Learn to understand it, and you shall hear it.—Ruskin.

Reason for Thrift

Thrift is described as a duty. Tint's right. Without it, low could nany a family obtain the necessaries of life, including the family automobile?—Boston Transcript.

Incomplete Definition

A woman writer says that the American beauties rival the Greek goddesses, but she fails to say whether it is in figure or in clothes.—San Bernardino Sun.

Didn't Take It All

"Dem old excavations," said Uncle Eben, "shows dat an Egyptian family had quite a little left after de undertaker's bill was paid."—Washington Star.

Pittsburgh Glass Center

More than half of the window glass, one-third of the plate glass and one-eighth of the bottles used in the United States are made at Pittsburgh.

Black Flower From Tibet

Species of rhododendrons which produce perfectly black flowers were recently discovered by an English botanist in Tibet.

Comfort for Lowbrows

A lowbrow is one who gets the story; a highbrow one who concentrates on the author's style.—Washington Post.

Good Voice Can't Fool 'Em

It is impossible to stanupede the musical critics. They're always too busy looking for technicalities.—Toledo Blade.

The Real Test

A great man is one who has been dead long enough for his enemies to be dead, too.

Where They Get It

College Humor—Any old joke dressed up in new slang.—Nashville Tennessean.

Just Think of It

"Although 'tis Uncle Fred bought 'im that nice geography book, 'e hasn't even looked at it, an' yet if you was to ask 'im where Sdudies was, 'e couldn't tell you."—London Opinion.

SECRETARY HAS REAL JOB ON HANDS

SECRETARY WORK of the Department of the Interior had a big task before him when he undertook the work of the department and the necessary reorganization, according to H. O. Bishop in the National Republic.

The Interior Department is a diversified service touching many peoples, he says. The Esquimo of the Arctic Circle and the Hawaiian of the the South Seas, the red man and the white, the pioneer and the tourist, the stockman and the irrigationist, the developer of natural resources, the veteran of wars, the sick in mind and body, the boy and girl in school, are all influenced in their daily lives by the policies of the Secretary of the Interior.

To these responsibilities is added the duty of safeguarding the natural resources of the public domain, which means securing the government's share, running into many millions of dollars annually from oil, coal, potash and other mineral leases on the public domain, the disposition of agricultural homesteads to settlers selling high priced townsites in Florida, running a railroad in far-off Alaska, caring for 2,000,000 visitors annually in the national parks, and protecting the health and social welfare of 225,000 American Indians.

There are twelve bureaus or offices in the Interior Department and 13,000 employees located in every state of the Union, and the territories of Alaska and Hawaii. This number includes 726 engineers, 225 regular and 4,728 part time physicians, 322 nurses and 147 lawyers. Appropriations amount to about $250,000,000 annually.

Such is the conglomerate picture that faces the new comer to the interior department, and when Secretary Work undertook the reorganization of the department of the request of President Harding he found these various activities to be operating almost independently of the secretary and without a dominating policy to insure good administration.

THE THEATRE

"The Outsider"

Two concrete instances can be found in the cast of "The Outsider" which will open Friday at the Palace theatre. Miss Standing is rated as one of the cleverest feminine players and while she never engaged victorious from a beauty contest, she declares she would not change places with Gloria Swanson.

Then there's Gibson Gowland whose performance in "Greed" is screen history. Yet he is clumsily built, with prominent irregular features and shaggy eye brows that a hero might consider a hopeless disfigurement.

However good looks will continue ever to be a premium proven too in "The Outsider" where the leading roles are in the hands of charming Jacqueline Logan and stalwart Lou Tellegan.

Thrill in "Pony Express"

The Sioux Indians took part in the greatest battle their tribe has fought for forty years during the filming of James Crulle's new western epic 'The Pony Express." A band of more than one thousand Sioux Indians was brought to Cheyenne, Wyoming, from their reservation in North Dakota, for the purpose of this stupendous picture.

Decked out in fantastic war paint, and mounted on spirited ponies, they were given the order to attack. In a minute they had swooped down on the town, firing arrows and old fashioned muskets and driving off the stock.

Then in came the soldiers, and the greatest Indian battle of this century took place.

"The Pony Express" comes to the Palace theatre on May 8-9 next.

Strong Role in "Lord Jim"

Marmont won his place in the production through his splendid work in the "The Street of Forgotten Men," recently seen on the screen at the Palace theatre.

In being selected for the part Marmont has been given one of the strongest and yet most difficult roles in any production made by Paramount. The theme of the story concerns the famous character Lord Jim, who launches himself on the high-seas of adventure eager to find romance and to meet dangers.

But when the opportunity for heroism arrives, Lord Jim finds himself a coward. How he redeems himself and how he sacrifices everything for the love of a native girl, goes to make one of the most vivid characterizations ever put on the screen.

Marmont is featured with Shirley Mason, Noah Beery and Raymond Hatton in the principal roles of the production, which opens a run of two days at the Palace theatre May 11th.

Power of Vibrations

A Boston violinist says he can put out a flame with the vibration of his fiddle. Some of the boothjacks at saxophone slightly oil key can put out an entire orchestra.—Cleveland Plain Dealer.

An Unique Ad. Rate Card

Phil Goldwater, publisher of the Bingham, Utah, Press-Bulletin, has published a new rate card for "special and private advertising," as follows:

In our travels from day to day we meet with a lot of odd and peculiar folke, but the ones that bother us most are those who are always wanting us to say something "nice" about someone, who everybody knows is not so "nice." Our friends become quite provoked when they fail to see these wonderful writeups concerning their friends, and for those who really do insist on their having their stories published, we have made up the following rate card, which we trust will not be considered too exorbitant. We will not deviate from the price, but we hope to donate a certain percentage of our earnings toward founding an asylum for those feebie-minded persons who believe an editor has a soft snap.

For telling our readers a man is a successful citizen, when everyone knows he is a lazy bench warmer $2 75

For referring to some gallivanting fellow as one who is mourned by the entire community, when he will only be missed by boozers . 1 0 18

Referring to one as a hero and a man of courage and one who stands by his convictions, when everybody knows he is a moral coward and would sell for a dime . 4 13

Referring to some gossipy female as an estimable lady, whom it is a pleasure to meet, and know, when every man in town would rather see Satan standing 8 10

Lambasting the daylights out of John Hardpreser, at the behest of the local dry forces 6 77

Whooping 'em up for the repeal of the Volstead law in the interest of the local white mule club 6 95

Referring to a deceased merchant who never advertised and who was too stingy to contribute toward needful improvement as a leading citizen and a progressive resident 344 99

Changed in Meaning

"Rivet" originally meant "one who lives on the opposite bank of the stream." The word is taken from the Latin "rivalis" and is related to our "rivulet."

Strawberry States

States producing by far the most strawberries grown in the United States are North Carolina and Tennessee.

"We Serve Michigan"

What Co-operation Is Accomplishing

THE American shipping public since the war period has come to realize a certain responsibility devolving upon it beyond the mere payment of the authorized charges for the transportation service performed.

There is, for instance, the requirement of the prompt loading and unloading of the railroad equipment on the part of consignors and consignees, respectively.

There is the obligation on the shipper of early advice of car requirements to enable the railroads to "mobilize" equipment.

THESE two requirements enter largely and eventually into the cost of steam railroad transportation and they are dependent upon the good-will directly manifested by the shippers and altogether beyond the control of the railroads.

Recognition of these factors has brought about the organization of the Shippers Regional Advisory Boards and enables the country to get more service from the equipment of the American railroads.

THIS is entirely voluntary service on the part of the shippers and is a unique page in the history of business. It has also been a profitable expedient, a lesson in co-operation gained from the world-war, a phase in the onward march of the times, which Judge E. H. Gary, of the United States Steel Corporation, recently described as the application of the Golden Rule in business, a condition that was inconceivable twenty-five years ago.

It is a manifestation of a quiet but certain revolution in American business thought which is gradually progressing towards the finest ideals, and incidentally tending to the greater well-being of our people and making for greater material returns.

THE Michigan Railroad Association is keeping step with the shippers and heartily seconding those ideals of an enlightened business opinion and appreciates that this policy is as important to the stabilizing of business as are the operations of the Federal Reserve Bank System in its particular branch of public economy. In fact, it is the identical application of that principle to transportation. Michigan industry has much to gain through the policy of the Shippers' Regional Advisory Boards.

Pigeon Steals Ride in Auto to Deliver Message

Washington.—The navy's pet pigeon story about a carrier bird that went away from a Canal Zone station for a year and then returned to duty was capped in an official report from San Diego of an aerial messenger which stole a 40-mile automobile ride to deliver its message. The San Diego pigeon arrived at the navy station there perched on an automobile driven by Mrs. Evelyn Johnson of San Diego, who said it had boarded the machine at Oceanside, 40 miles away. It drew rations, rested a bit and then took the air to make its home port at a nearby naval aviation station under its own power.

Try It Elsewhere

Everybody has a majority for appreciation, but too many waste it on themselves.—El Paso Herald.

Not Responsible for Any Wildcat's Blunder

A stranger, driving down a lonely road, saw a big wildcat dash across the highway in front of him and leap through the open window of a farmhouse. At the same moment he saw the farmer working in a field a short distance away. Whipping up his horse, he excitedly accosted the farmer.

"Is that your house?" he breathlessly inquired.

"Guess it is," drawled the man of the soil.

"Is your wife in the kitchen?"

"Ought to be," said the farmer.

"Then hurry home, man, and see what you can do. I just saw a wildcat leap through the kitchen window."

"That so?" asked the farmer.

"Yes, sum; hurry, hurry."

"Tell me, stranger," insisted the farmer, "was anybody chasing that wildcat?"

"No."

"He went through that window of his own free will and accord?"

"Yes," replied the now thoroughly puzzled stranger.

"Then let him defend himself," concluded the farmer, as he returned contentedly to his task.—Washington Star.

'Gators Eat Dynamite; Halt War on Lizards

Beaumont, Texas.—War on alligators in the marsh district of Cameron parish, Louisiana, has been called off temporarily since it has developed that dynamite subsiding from the camps of oil prospectors making seismographic tests has been eaten by the 'gators.

A post mortem on one of the big lizards revealed several sticks in his stomach and trappers are apprehensive of the results should a bullet come in contact with one of those choice morsels of alligator dessert.

The sportsmen are being lilled as a protective measure against destruction of muskrats, which are valuable for their fur crop.

Right Here at Home

They make fortunes in Florida, simply because America is pleasure mad and has most of the world's gold corralled.

Florida has no natural resort attractions that Michigan can't offset—Florida has no natural playground to outrival Charlevoix with its Pine Lake.

Then, why can't fortunes be make right here at home? Why, they can be—they will be.

PERSONALS

Dr. Russell A. Palmer of St. James, spent the week end in this city.

Mr. and Mrs. Hugh L. Brady spent Sunday with relatives in Bellaire.

Harry Barber, of Petoskey, was a business visitor in Charlevoix Wednesday.

Don T. McHugh made a business trip to Chicago and other points south last Friday.

Mr. and Mrs. Walter S. Richardson are spending the week with friends in Grand Rapids.

Mrs. Jeanne Durgin of Petoskey, spent the early part of this week with friends in this city.

Dr. and Mrs. A. Lawson Baxter and daughter Charlotte were Charlevoix visitors last Tuesday.

Baked good sale Saturday, May 8th, by Aid Society of the Baptist Society at the Holley Gift Shop.

Attorney Clare C. Coulter, a business visitor here for several days, returned to Detroit last Monday.

Mr. O. Gatti of Miami, Florida, is spending a few days in this city attending to business matters.

Wm. T. Dridget was a business visitor in St. James last week, making the trip over on the James E. Sanford last Friday.

Captain Thomas Bonner and wife, guests of Charlevoix friends for a number of days, returned to St. James last Friday.

Messrs. Jess and Edgar Smith with their families, were Bellaire visitors last Sunday, guests of Mr. and Mrs. F. W. Smith.

W. J. Gallagher, Dr. Russell A. Palmer returned to St. James Wednesday following a business visit here for several days.

Nels Lafreniere, a business man of St. James, has been in Charlevoix several days attending to matters of personal interest.

Lou Allard and Frank Miller left for their post of duty at the Squaw Island Light, last Friday, going on the Sanford via. St. James.

W. A. Hawker is in the city making improvements on his summer home and getting the cottage ready for occupancy for the season.

Mrs. Margaret Cook, for the winter months with her son, Neri Cook, in Cleveland, returned to her home in this city last Monday.

Mrs. Lou Comfort who has been away for several months, mainly in Milwaukee and Chicago, returned to Charlevoix last Saturday.

The barge Rambler, Captain C. J. Allefs, of St. James, entered the Charlevoix harbor last Wednesday for the first time this year.

Gustav Mielke, of St. James, is spending a few days here on business. He returns today to St. James with his ship the "Rambler."

W. A. Loveday, a former Charlevoix county citizen residing at East Jordan, now of Lansing, was a Charlevoix business visitor late last week.

Captain C. J. Allers of St. James was a business visitor here last week, returning to St. James on the first trip of the Sandford, last Friday.

Mr. and Mrs. Will Ripley returned to their home in Benton Harbor today after spending the past week with relatives and friends in this section.

Mrs. F. F. McMillan and Mrs. Milton Block entertained sixteen ladies at a bridge party at the McMillan residence, 319 Park Avenue, last Friday afternoon.

Mr. John J. Pagan, for some months past a visitor in Philadelphia, returned to Charlevoix last Tuesday with the intention of spending the summer season in this city.

George E. Bacon returned last Tuesday from a short visit in Jackson and will continue here during the summer season at the Western Union office as in previous years.

Mrs. Russell A. Palmer of St. James left for Cash Bay, Ontario, last Saturday and will spend about two weeks with her mother before returning to her St. James home.

W. J. Gallagher of St. James, spent several days here recently on business. He arrived in Charlevoix last Thursday afternoon making the trip with Capt. Donnellan via. the air route.

Grays Reef lightship entered this port yesterday afternoon and will depart for her summer location as soon as condition in the straits region will warrant making the trip in safety.

Ivan Newman, who spent the winter months in the west, mainly in California, returned to Charlevoix last Thursday via the motor route and will spend the summer season in this vicinity.

Mr. and Mrs. C. G. Ellis, of Toledo, and Mr. and Mrs. Harold D. Jacobs, of Flint, motored in last Saturday and spent the week end with relatives here, returning to their homes early this week.

CANDY—For Mother's Day, Sunday, May 9th

A beautiful assortment of the finest Chocolates and Bon Bons in exquisite Boxes and Glass Bonbonnieres with dainty framed mottoes, 50c to $5.00.
FESSENDEN, the Druggist.

William L. McManus, of Petoskey, is a business visitor in Charlevoix today.

Dr. and Mrs. Frank M. Wilkinson were visitors in Central Lake last Sunday. The trip was made primarily for the purpose of assisting in a musical program arranged for Sunday evening at the church.

Mrs. L. B. Bartlett was happily surprised last Friday when twenty-six of her old Clearlevoix friends called at her home on Park Avenue and served a sumptuous pot luck dinner, and remained through the evening.

Mr. J. H. Koch spent the early part of this week looking after some building operations and improvements on one or two cottages. Today he will motor to Jackson accompanied by his nephew, Mr. C. Koch and Mr. O. Gatti.

Mr. and Mrs. E. L. Stanford and daughter Thelma, returned to their home, Marquette, last Thursday, following a visit of two or three days with Mr. and Mrs. James Gaskin—the latter is a sister of Mrs. Stanford.

Mrs. Flora M. Lewis, Mrs. Blanche Greenman and Master Lewis Greenman, who spent the winter months in Highland Park, Michigan, returned to Charlevoix last Saturday and are at their cottage, 223 Clinton street, for the summer.

Dr. and Mrs. W. W. Mitchell went to Detroit Saturday evening making the trip via Indian River and the M. C. R. R. They will return later this week with a new Hudson broughan, a recent purchase made through the H. R. Fowler agency.

James B. Parsons in accordance with a custom of long standing, was a passenger on the first boat of the season, making the trip from Charlevoix to St. James. The trip over was made for the purpose of business more than for a pleasure trip by water.

John Baker returned from Detroit last Monday after spending several weeks in that city with his daughter, Mrs. Arthur von Dolcke. He reports the birth of a granddaughter April 27 with Mr. and Mrs. von Dolcke as parents of the new arrival.

Mrs. Peter McCafferty, daughter Edith, sons Jack and Stanley and Daniel McCann motored up from Chicago last Thursday primarily to visit Mrs. James McCann who has been ill for some time. The motor party returned to Chicago last Tuesday.

According to information from the state highway department one of the state owned ferry boats will go into commission on the Mackinaw City-St Ignace route today, making for better facilities and conveniences for automobile owners making the trip to and from the north part of the state.

Loverne E. Miller, who has charge of the landscape work on the grounds of the Belvedere Club golf course, is here to continue the work under his supervision. The trip from his home office, Sterling, Ill., was by airplane accompanied by a pilot in charge of the machine which settled on the landing field Wednesday afternoon.

Rev. C. E. Pollock left here last Saturday morning at an early hour for Ann Arbor in response to a message announcing the illness of their son John Pollock, who is taking a course in electrical engineering at the U. of M. The young student's illness we learn is due to a severe case of appendicitis and that an operation is imperative in order to relieve the victim.

Mr. William Watson is spending a few days here inspecting the work under way at the Chicago Golf Club and the Belvedere Golf Club courses. He came from Los Angeles, California, arriving here Sunday and will return to the west coast as soon as his inspection work is completed, with the expectation of returning to Charlevoix early in June, in time for the summer season.

With plans formulated, under way and carried out by a company recently organized at St. James, the citizens feel assured of more perfect and complete mail service, particularly during the winter months, in the future than in past season. With the company the owners of two airplanes to which they will add a high power hydroplane the St. James people feel that (their future relative to mail service is fully assured. Captain J. F. Donnellan will make selection of the hydroplane which will come from New Jersey probably about May 15th. This ship will have a carrying capacity for at least fifteen passengers and in addition one half ton of freight or baggage.

A divergence of opinion relative to the extension of a license in order that Earl A. Young can continue to operate as a legal real estate broker under the state law apparently exists between Mr. Young and the members of the Michigan Securities Commission. This matter has been up for discussion and consideration by the Securities Commission since the early part of the year and in order to clarify the situation a hearing will be held at Petoskey, Saturday, May 8th, according to citations served on a number of local citizens, to appear for examination and give such evidence such as will enable the commission to make a ruling as to whether or not a license will issue permitting Mr. Young to continue as a licensed real estate broker.

—DRESS MAKING. — Fashionable dress making by Miss Nellie Guild Charlevoix, phone 7012-F21. 49-1f

O. E. S. Installed Their New Officers

At a special meeting of Charlevoix Chapter No. 72 the following officers were installed by Past Patron, Charles See, assisted by Hattie Cooper as Marshall, Lida Benton as Chaplain and Mrs. Stelter at the piano:

Worthy Matron—Minnie Bonthron.
Asso. Matron—Anna Withers.
Sec'y Matron—Ella M. Usher.
Treas. Matron—Louise Elston.
Conductress—Marion Carney.
Asso. Conductress—Laura Courier.
Chaplain—Sadie Faulkner.
Organist—Pearl Partridge.
Warden—Ida Sterritt.
Ada—Cordelia Kelderhouse.
Ruth—Anna Wooley.
Esther—Hazel McMillan.
Martha—Alice Aune.
Electa—Elsie Van Allsburg.
Marshall—Clara B. Todd.
Sentinel—Hazel Bogard.

Dainty refreshments were served by the committee.

Good Stories Spread With Amazing Speed

Who originates the witty sayings and naughty stories which appear every day or so and run over the country as wildfire never can? Who carries them on what wings?

I hear one of these good things in a club or at a lunch table downtown in New York and hurry uptown to try them on my colleagues at Columbia, says Carl Van Doren in the Century Magazine. Half the time, however, the thing has got there before me. I know town for Chicago, say, and I am still like as not too late to surprise anybody with my goods.

There is a belief firmly held by many people that the telegraph operators spend their free hours during the night spreading the news. If this is true, the services of those useful men ought to be recognized, if not rewarded. What a charming idea it is that wit goes whispering over the wires while the wits rest from their labors! It makes the country resemble a sleeping person in whom the unconscious sends the strangest messages along his dreaming nerves.

Get All in Time

Contentinople, Turkey.—All women who are too outspoken are to be arrested. Several are in custody already for criticizing the present regime.

Baptist Church

Rev. Herman Burns, D. D., Pastor

Despite the storm a greatly interested audience gathered last Sunday morning and listened to a talk on "Public Safety" which was inspired by the accidental death of little four-year-old Kenneth Nowland. This sad event should stir the community to renewed effort to prevent similar accidents in the future. This child suddenly ran in front of a loaded truck driven by Albert Shaw who was exonerated by the Coroner's jury of all fault. It was suggested that drivers—all drivers double their efforts to be careful and strictly obey the laws governing traffic. And that parents be deligent in keeping their children off the streets, especially those thoroughfares where the traffic is heavy and often congested. Diligence on the part of the whole community will be fruitful in saving lives.

The interest of the Baptists of this locality will center in the meeting of the Grand Traverse Association at Petoskey on Thursday and Friday of this week. State and National speakers will add interest to this gathering.

The Ladies Mission Circle are meeting today with Mrs. Charles Taylor on S. Bridge St., and the Aid Society will hold a bake sale in the Holley Gift Shop on Saturday.

The Sunday services will be as usual, and a cordial welcome is extended to all who are not worshiping elsewhere to do so with us. While our services are strictly religious we believe the themes are of general interest to all. So, come and we will try to do you good.

Congregational Church

Rev. B. G. Mattson, D.D., Minister

10:30 morning service in observance of Mothers' Day. Mrs. Livingston and Mrs. Mattson will sing a duet. The choir will render a double quartette number. The pastor will preach a sermon from the text "Behold The Mothers."

At 2:30 the Ironton church will also observe Mothers' Day. The young people will sing a special number—Mrs. Matteson will sing a solo. The pastor will preach on "Bible Mothers and the Mothers We Knew." Charlevoix friends are invited to attend.

At 6:30 both Senior and Junior C. E. societies will meet as usual.

St. Mary's Catholic Church

Low Mass 8:00 a. m.
High Mass 10:00 a. m.
Saturday and Monday 7:00 a. m.
Rev. Knute Lowenski, Pastor.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Adam and Fallen Man."
Sunday School 12 o'clock.
Wednesday evening service 7:45.
First Wednesday of month only during May, 7:45 p. m.
The public is cordially invited to attend our services.

Waterproof Sandpaper

Waterproof sandpaper, new on the market, permits use of the abrasive under flowing water even wet conditions and prevents rubbing dust when cleaning painted, varnished or ornamented surfaces. Both sides have been treated and the gritty material does not readily come off, so that the paper is said to last ten times as long as the ordinary product.

A Test of Blood Pressure

Another good test of blood pressure is to watch a man being liberal with the money he owes you.—Flint Journal.

Have Not Got Down Far

The range of reliable observation of the earth's crust does not extend below ten miles, or one-fourth of 1 per cent of the distance to the center.

UNCONDITIONALLY GUARANTEED

CHAPTER XVIII—Continued

—2—

"My friends, we have worked together to drive from this valley the man who would destroy the Indians. We have won. He has gone. You have toiled, you have kept your promises and obeyed orders. You will take to your families what food and trade-goods your dogs can pull. Also, there is much fur in the loft, for which Lafiamme paid the Ojibways in whisky. This the government will take, if it remains here. But it belongs to the Indians. You shall have it to divide equally among the hunters of this valley, but first it must be taken to the fork of the Stooping and cached. I am going on the long trail to Fort Albany. When I return I will meet you at the cache, divide the fur among you, and tell you where you are to take it to be traded—to Walling River or to Fort Hope, of the old company.

"In the loft we have found the fur that was lost this summer with the canoe on the lower river, Lafiamme murdered the crew and stole the fur, to drive the honest trader, St. Onge, from this valley. This morning it goes back to him. Will you cache the rest of the fur at the Stooping and wait for my return from Albany?"

"Ehah, yes!" The Ojibways, delighted with their sudden wealth, readily agreed, surprised that the man who had caught the Windigo reserved nothing for himself.

The following morning, as Michel and Steele watched the last sled fade from sight on the white surface of Ogoke, bound with fur for the fork of the Stooping, a moving spot on the snow, far to the west, attracted their attention.

"It can't be David, so soon?" queried the American.

The Iroquois shook his head. "He not kech dem so quseek. Dey drive dog hard to get away."

Steele went into the trade-house and returned with his binoculars.

"There seem to be two sleds," he said, adjusting the glasses. "The drivers are riding. I can't make them out. They may be police." He handed the glasses to Michel.

For a long time the Indian studied the distant spots on the snow. Then he said, drily, "Unless one man—odder team bitch to from sled. Dogs tired." He returned the glasses to his chief, with a look which aroused Steele's curiosity.

"You think it's David, after all?"

"I t'ink," nodded the Indian.

The two men returned to the kitchen. The man who had spent two nights and a day on the trail would appreciate a warm breakfast. When they again looked down the lake, the familiar, lanky figure of David was urging the exhausted teams from the tail of the second sled. Shortly the dogs turned into the post. Then the curious men who hailed with a shout the return of the Offaway, saw, lashed to the pack on the rear sled, two rifles in skin cases.

In silence the two gripped the hand of the one who had left in the night on his grim quest—faithful to an oath and a memory.

To Steele questioning eyes he answered: "My brudder—he steep soun' last night."

That was all. But Steele and Michel knew that somewhere on the Rouge river trail, two men had paid—somewhere, two bodies lay stiff in the snow.

CHAPTER XIX

All Walling River, women and children, were on the river ice to welcome the return of the men who had saved the trade. Leaving the chattering Indians, as the dogs, brave with bells and colored worsted, jingled down the trail, St. Onge hurried to meet his friends.

"My friends!" he choked, powerless to continue. Then, "My brave comrades! I can never repay you—but I will not forget."

Steele's eager eyes searched the group at the shore for a straight figure in fur coat and hood—then found her standing with the women. As the people surrounded the dog-teams, congratulating Michel and David, she came to meet him.

The sharp air had driven the blood to her cheeks. In the mink hood, her face had never so appealed to him as when she laughed up, with: "The conqueror returns for his triumph! Welcome, Monsieur Steele!" Then her dark eyes went grave. "We owe you everything—everything," she said, lowering her voice. "Thank you, oh, so much, for what you have done for my father."

"But—for you?" he protested. "You know—it was for you?"

She met his gaze frankly. "I thank you—for myself."

"You have been well?" he asked, chilled by the reserve in her level eyes. "The violin—Jacques brought word—I am so sorry."

"Yes, you would know what its loss has meant. But your catching the Windigo—surrounding them—driving them from Ogoke through fear! It was wonderful, monsieur. And David is with you? The Indians told us he had left in pursuit of Laflamme—he—"

"Yes, David's account is settled," said Steele, quietly.

The girl shuddered.

"The future of the post is safe," Steele went on. "We have much to be thankful for—finding that lost fur. Your father will show a big profit this year. Montreal will not allow the post to be closed now."

"It Is Unbelievable, My Dear Steele," Said St. Onge.

He watched her face closely.

"Father wept at the news—it was wonderful," she calmly replied, as if ignorant of how great moment to her own fortunes was the rehabilitation of Walling River.

She had not changed; nothing would move her. She would go through with it, notwithstanding the assured independence of her father. She would keep her contract. That was clear. If she cared, she would have shown it there, on the river, when she met him. But she still believed he had been disloyal—made love to another woman, on his way home in October. Her pride had killed forever what she had felt for him that morning on the river shore.

At the trade-house he found Michel and David, narrating in detail the history of the campaign against the Windigo and Ogoke.

"It is unbelievable, my dear Steele," said Mr. Onge, "that I owe you and Michel a humble apology. I could not believe that Tete-Boule was dangerous —a spy. For me to leave you at the mercy of Laflamme was unthinkable—and the violin! Foor girl, that was the final blow."

Michel glanced at David's stole face, nodding grimly. "Wal, dat ees paid-dat leetle debt."

"It was uncanny—the way you threw men caught Pierre and paid them with their own medicine. I can't believe now that it isn't all a dream. And this fur of Laflamme's, you say it is cached up river?" The Frenchman was puzzled.

Steele nodded.

"And you are to divide it among the Indians later?"

"Yes, when I return from Albany."

"From Albany? You are going to Albany?"

"Yes, David and I start tomorrow."

The factor was frankly bewildered. "But you need a rest, and you are apt to run right into a Keewatin northwester at this time, monsieur," objected St. Onge. What Steele's mission was he did not ask.

"Our dogs are good for it. We'll take six and go light. We can count on seeing us inside of three weeks."

"But why not send Michel and David? You do not hanker for the post hospitality of Walling River when you give us but a night. I've looked forward so to your return—and now you are leaving us," protested the mystified factor.

"It is a personal matter," said Steele, "and is urgent. We start at daylight."

After reeling off the last miles of the lower Albany on an icebound trail, the swift dogs of Steele trotted up to the building of the Revillon Freres at the mouth of the river, two days before New Year's.

Leaving David to protect the team, Steele entered the trade-room. At the counter a half-breed clerk was busy with a hunter, but beyond, occupied at a desk, sat the man he had come three hundred miles to see.

At Steele's "Good afternoon, monsieur!" the trader looked up from his work. Slowly, as he recognized the frost-burned features of the man in duffle capote, the face of Lascelles went black with anger. He rose and faced the newcomer, his mouth twitching in vain effort to articulate.

"You remember me," went on Steele, casually, openly amused at the surprise and discomfiture of the other. "My name is Steele. I met you at Walling River."

"Yes, I remember you," exploded the inspector, finding his voice. "What brings you here?"

"I came on a little matter of business which we had better discuss in private," suggested Steele, nodding in the direction of the listening clerk.

"Come in behind the counter, then." Steele passed to the rear of the counter and sat down.

"You come from Moose or Walling River?" demanded Lascelles, curious of the purpose of this strange call in midwinter.

"I come from Walling River. You may be interested to know what has happened in the valley since September."

Lascelles was interested. "You brought letters for me?" His tone dropped to suspicious.

"Oh, no! I have no letters, Mademoiselle St. Onge and her father are well, however. In fact, St. Onge is a happy man. He's got the fur he lost last summer at the big rapids."

"Diet his fur? How?"

"Why, Laflamme had it. By the way, the trade of the valley is in your hands. Walling River will pay big in the future." Steele added pointedly: "You can't close the post now."

"But Laflamme? He stole that fur!" demanded the astonished and mystified Frenchman. "How did St. Onge get it back?"

"Why, Laflamme bequeathed it to him—sort of a legacy. You see, Laflamme died—with a few others."

Lascelles stared at the man across the desk as if he doubted Steele's reason. "Laflamme dead! What's happened?" he gasped.

"Well, in the first place," began Steele, lighting his pipe, "the Windigo you scoffed at proved to be an Indian from Ogoke. We got him in a bear-trap—then closed in on Laflamme and picked up half his people on the trails. Those who walked in the rest had already stampeded from sheer fright. We released Laflamme by minutes." The American enjoyed the play of mingled incredulity and amazement on the face of the man he faced. "He was found strangled on the Rouge river trail—later," Steele added. "A private affair, I imagine. Exit all competition in the valley for St. Onge."

Lascelles glared—Laflamme dead. And his fur? It will come, of course, to Walling River," added the trader, with satisfaction.

The moment of the American had arrived. He deliberately knocked out his pipe, as he countered: "That depends on whether you sign this." The inspector looked in an inner pocket and produced an oil-skin envelope with the addresses.

Lascelles scowled as Steele drew out the paper.

"What is this?" he demanded, his small eyes shifting suspiciously from the paper to the cold gaze of the American.

"This is your title to forty thousand dollars' worth of fur, your title—when you sign it and return it to me."

Mystified, on the defensive, Lascelles relapsed in silence.

"I'll read it to you," continued Steele.

"Mademoiselle Denise St. Onge:

"I hereby release you from your agreement to marry me.

"GEORGES LASCELLES,

"Inspector, Revillon Freres, Albany District."

"You dare to insult me in my own house!" raged the furious trader, leaping to his feet and shaking his fists in the face of the man who sat coolly in his chair, looking up at him. "Why—you impudent scoundrel—I'll have you thrown out of the place—you and your dogs! You—" Lascelles choked with anger, was unable to continue.

"You forget my man David," drawled Steele, "the Indian who laughed at you on the shore. You haven't got enough Swampy Crees at your post here to throw that Ojibway out."

The trader flinched from the threat in the wind-burned features, slid the clamped jaw.

"Now, sit down!" snapped Steele. "At the Stooping River there is forty thousand dollars in fur under guard of my men. Sign this, and it goes to St. Onge; refuse, and it will be traded at Fort Hope, with the Hudson's Bay. Understand? Forty thousand in fur for the Hudson's Bay?"

"Did she send you with this?

STATE CLUB LEADER VISITS OUR COUNTY

Mr. A. G. Kettunen, State Boys' and Girls' Club Leader and Mrs. Buckhart of the same department judged the work completed by the County Clothing and Handicraft Clubs and selected the local champions at the achievement days held on April 27th and 28th.

These Clubs were organized by County Agent Mettetal, with assistance from M. S. C. last fall in several of the rural schools of the county and instructed by their local teacher. During the winter these clubs have met every week or two weeks and have had some rousing good times, besides learning how to sew and how to make handy articles for the house and farm.

In order to complete the club project, each member of the clothing clubs had to make at least three articles of clothing, in addition to darning and patching, and in the case of handicraft clubs, each member had to complete at least five articles. In addition each member had to keep an accurate report of the cost of materials used, as well as time spent and to write a story of their club work.

Surely this is a real achievement and the members are to be congratulated in completing this valuable work as well as the teachers who so splendidly devoted their time and efforts toward instructing these young boys and girls.

At the completion of the project the local champions for each club were selected by Mr. Kettunen and Mrs. Buckhart. These local champions will now compete with each other for the honor of Charlevoix County Champion, the lucky one will then compete for the state championship, which means so much. Also each member received an reward called "Certificate of Achievement."

The following are the various clubs, members and leaders:

Clothing Clubs

1. Leader, Miss Mamie Feebles.
   Club, Bay Shore, Jolly Sewers.
   Members, Dorris Anderson, Local Champion; Edith Spolgie, Reserve Champion; Viora Furgeson, Dorothy Furgeson, Dorothy Sky Eagle.
2. Leader, Miss Thelma Crandall.
   Club, Boyne Falls Club.
   Members, Germaine Yell, Local Champion; Irene Goff, Reserve Champion; Bernice Jerramen, Martha Bauman, Irene McDonald, Francis Bauman.
3. Leader, Miss Vera Belding.
   Club, Clarion, Eight Needles.
   Members, Dorothy Barkley, Local Champion; Geneva Geyer, Reserve Champion; Dorene Banks, Oakhum Baumgardner, Vera Belding.
4. Leader, Miss Mildred Wangeman.
   Club, Seven Merry Maidens.
   Members, Clara Leu, Local Champion; Katherine Wanghman, Reserve Champion; Dorothy Lem, Marie Johnston, Gertrude Looze.

Handicraft Clubs.

5. Leader, Galo Chew.
   Club, Bay Shore, Busy Bees Handicraft Club.
   Members, Willard Minier, Local Champion; George Sneathen, Lee Sneathen, Franklin Sneathen, Thomas Wightman.
6. Leader, W. C. Palmer.
   Club, Clarion Hammerfast Club.
   Members, Arthur Lloyd, Lester Stricker, James Griswold, Lowell Banks, Clifford Hankins, George Fine, Stanley Stricker, Donald Geyer, Billie Hankins, Dell Lloyd, Charles Kleinhans, Lewis Kleinhans.

Local Champion will be selected at a later date.

RED CROWN GASOLINE

What It Means to You

The Red Crown disc is a symbol of Standard Oil Company (Indiana) service.

These signs mark each unit of the vast network of distributing stations established by the Standard Oil Company (Indiana) over the Middle West. No matter where you are or where you may go you can get Red Crown Gasoline.

Red Crown is dependable. With it in your tank you are assured of abundant power for the steep grade or heavy going, in good or bad weather.

All roads in the Middle West are possible highways for you because the Standard Oil Company (Indiana) has gone before, with Service Stations and Garages selling Red Crown Gasoline. They make it possible for you to go where you please.

With Red Crown in your tank, your car will develop its maximum power.

As you explore or rediscover your own Middle West, you will find the welcome Red Crown Sign everywhere—which means—Red Crown everywhere and everywhere the same.

In this vicinity you can get Red Crown

At the following Standard Oil Service Station:
State and Antrim

And the following Filling Stations and Garages:
Chicago Club
H. Fowler
S. Orlowski
Orchard Bay Farm
H. Rose
Hayes Coop. Assn. Co.
E. E. Cross, Petoskey Ave.
Sam Hamilton & Son
M. B. Tranker, Interlin St.
E. O'Neil, Bridge St.
Sam Alexander, Interlin

RED CROWN GASOLINE

Standard Oil Company, Charlevoix, Mich.
(Indiana) 4381

BEAVER ISLAND NEWS

Death of Miss May O'Donnell

This community was grievously shocked when word reached here of the sudden and unexpected death of Miss May O'Donnell at her home in Detroit on April 29th.

The body was taken here for burial and interment took place in the family lot at Holy Cross Cemetery, beside that of her father, who passed this life a few years ago. Although the deceased has not made the island her permanent home for a number of years, yet scarcely has a summer passed that she and her mother did not spend several weeks here at their cottage, renewing old acquaintances and making new ones. The high esteem in which she was held in Detroit and elsewhere, was manifested by the profusion of flowers that accompanied the casket here. During the day or so in which the body was held in state, the large influx of people, young and old, that visited the O'Donnell cottage eager to pay their last respects to their dead friend, was another evidence of her popularity.

"May," the only daughter of Peter O'Donnell and Mamie Maloney, was born on Beaver Island, May 31st, 1895, and grew to womanhood here. After graduating from the local high school she taught school in St. James township for two terms, going from here to the Ferris Institute, where she took up a two year's business course. Finishing her term at Ferris's she held various positions of trust with different concerns throughout the state, and in 1918 she entered the employ of the U. S. Radiator Corporation at Detroit, and at the time of her death held the position of private secretary to the general manager.

Besides a host of friends she is survived by a grief-stricken mother and four brothers—Patrick, Edgar, Tony and Walter, all of Detroit.

Mr. J. P. Maloney and daughter, of Chicago, an uncle and cousin of the deceased, accompanied the remains to the Island.

Ripe Butter for Rifs

The natives of Tangier are reputed to be extraordinarily fond of butter, but not the fresh, sweet kind that Americans like. To satisfy the taste of a Riff his butter must be at least a year old before it attains the proper aroma and tang.

Might Have Been Worse

A nun committed suicide because he proposed to two girls and both of them rejected him. Well, look how much worse off he'd be now if both had accepted him.—New York American.

Natural Question

Diner (to the doorman as he leaves expensive restaurant)—Er—tell me—is there any charge for going out?—London Opinion.

Cream Makes Weight

A wineglass of cream after each meal is a weight producer.

Walnuts From Rumania

Walnuts form the chief item in the exports from Rumania to the United States. In 1923 they brought Rumania $83,000 out of her total receipts from us of $126,000, and in 1925 the amount was still larger.

ENABLES HUMANS TO USE ANIMAL BLOOD

Exact Transfusion Unnecessary in New Method.

London.—Important experiments on blood transfusion, made by Professor Yourevitch and Mlle. Vergesova of Prague, appear to lead to the conclusion that special human blood donors will no longer be required where transfusion is necessary to save a patient's life. The blood of a sheep or a horse will serve the same purpose, said special preparations of solution could be made in advance and kept in bottles until required.

It has long been known that the most important point about blood in regard to transfusion is its specificity. That is to say, a rabbit can only be saved by the injection of the blood of another rabbit. If the blood of a different animal is injected into its tissues it dies immediately. In the case of human beings blood has been divided into four groups. When an injection has to be made the blood of the patient has first to be tested to see which group he belongs to. Only rare individuals belong to the fourth group can give blood to any of the others with beneficial and not dangerous results.

Separate Red Corpuscles.

Professor Yourevitch and his woman colleague have opened up an entirely new line of treatment. They separated the red blood corpuscles from the serum by centrifuging methods. They found that the poisonous qualities which on injection have such harmful effects are in the plasma, and that if the separation or "washing" has been thoroughly carried out the red blood corpuscles of an animal of one species may be injected into another without the slightest danger, but on the contrary with completely satisfactory results.

Rabbits which have lost an absolutely fatal quantity of blood could be saved by the injection of sheep's blood which would have been highly poisonous to them, provided only the washed red corpuscles were injected.

A rabbit which had received ten or fifteen cubic centimeters of unwashed ox blood died within five or six minutes. Another rabbit was given a similar blood which had been partially washed, about the same quantity of its own. Ten cloth shoes are worn but legs are bare.

As they run through the streets, usually in groups, the youths carry Japanese lanterns, and flashing bells herald their approach and they chant "Rokkon Shojo," a prayer in which they ask to be cleansed of the six roots of evil.

Sometimes there are women among them. Years ago the apprentices wore nothing except loin cloths. The flimsy cotton garb worn now is not for warmth but to comply with police regulations.

These religious pilgrims start from their homes shortly after dinner. They meet in appointed places and then begin their narration to the nearest Fudo temple. As they run they keep their minds on their rites and they indulge in no boyish caprices. They chant unceasingly.

When the runners reach the temple they assemble at the well in the temple compound. Here they chant solemnly their single cloths and pour cold water downstream from the tops of their heads. Then they offer prayer to Fudo. Hot amasuke, a sweet, non-alcoholic drink made from rice, is served to the pilgrims by the temple authorities and the homeward trip begins, with the same chanting and thinking of bells.

Even if their prayers are not answered, the followers of Fudo believe their scantily clad exercises give them endurance, hardiness and healthy circulation. They believe that running in snow do not interfere with the practicing of the rites and few of these devout believers suffer any illness from exposure.

ENRIQUE BUSTOS

Senor Enrique Bustos, recently appointed a secretary at the Chilean embassy, has arrived in Washington to assume his new duties. Senor Bustos, who was accompanied by his family, was formerly consul at Philadelphia.

JAPANESE STREET RITES ENTERTAIN

Novel Ceremonies by Youths Attract Visitors.

Tokyo.—Youths clad in little more than pleasant smiles are to be seen running through the streets of Tokyo and other Japanese cities. They are a source of amusement to visiting foreigners.

But there is a reason. They are apprentices and young workmen practicing the "nihingyo," or nine-old water purification rites in Fudo temples to improve, through the grace of that particular god, their craftsmanship.

Their costumes look like reduced to fifteen cubic centimeters of unwashed ox blood died within five or six minutes. Another rabbit was given a similar blood which had been partially washed, about the same quantity of its own. Ten cloth shoes are worn but legs are bare.

As they run through the streets, usually in groups, the youths carry Japanese lanterns, and flashing bells herald their approach and they chant "Rokkon Shojo," a prayer in which they ask to be cleansed of the six roots of evil.

Sometimes there are women among them. Years ago the apprentices wore nothing except loin cloths. The flimsy cotton garb worn now is not for warmth but to comply with police regulations.

These religious pilgrims start from their homes shortly after dinner. They meet in appointed places and then begin their narration to the nearest Fudo temple. As they run they keep their minds on their rites and they indulge in no boyish caprices. They chant unceasingly.

When the runners reach the temple they assemble at the well in the temple compound. Here they chant solemnly their single cloths and pour cold water downstream from the tops of their heads. Then they offer prayer to Fudo. Hot amasuke, a sweet, non-alcoholic drink made from rice, is served to the pilgrims by the temple authorities and the homeward trip begins, with the same chanting and thinking of bells.

Even if their prayers are not answered, the followers of Fudo believe their scantily clad exercises give them endurance, hardiness and healthy circulation. They believe that running in snow do not interfere with the practicing of the rites and few of these devout believers suffer any illness from exposure.

A RESIDENT GONE

H. P. Hansen Died in Grand Rapids

THURSDAY, MAY 6th

Resident of Charlevoix for a Number of Years—Aged 71

Word reached this city from Grand Rapids that Mr. H. P. Hansen, for several years a resident of this city, had passed away last Thursday, while temporarily stopping in Grand Rapids, his home city in earlier years.

For many years Mr. Hansen has been proprietor or manager of hotels or clubs, the more recent years in this city, the last being the Alhambra which he opened two years ago. Prior to the management of the Alhambra he was in charge of the Hotel Charlevoix for several years. Before taking the management of the last named hotel he was at Manistee as manager of the Brinsy Inn, and in earlier years manager for many years of the Peninsular Club in Grand Rapids.

As a hotel man he attained more than ordinary prominence and was held in high esteem by hotel patrons and the public generally while through his long service he formed the acquaintance of the major part of the traveling public both ordinary and people of note and with all such he formed intimate friendships that have been continuous since their earliest conception.

Mr. Hansen was a native of Denmark born to Copenhagen seventy one years ago. When he was eleven years of age he crossed the Atlantic and has since resided in this country,his earlier years being spent in Greenville.

He was a member of the Masonic fraternity in all its branches, frequent and regular attendant as well as prominently identified with all stages of exemplification of the various degree work.

He is survived by his wife, one daughter, Miss Maxine Hansen, a sister Mrs. Carlo Knudsen of San Francisco, Cal., and two brothers, William of Sault Ste. Marie, and Christian Hansen of this city.

Funeral service was held in Grand Rapids Saturnoon under the auspices of De Molai Commandery.

Changed in Meaning

"Rival" originally meant "one who lives on the opposite bank of the stream." The word is taken from the Latin "rivalis" and is related to our "rivulet."

PROMINENT POLITICIAN IS DEAD

Sybrant Wesselius, Lawyer, Sunday at Grand Rapids.

Sybrant Wesselius, lawyer and for a term of years a prominent factor in state politics, died unexpectedly last Sunday at his home in Grand Rapids, the city of his birth. He was sixty-six years of age, and had been engaged in the practice of his profession since '85.

He was a follower and supporter of the late Governor Hazen S. Pingree. During this regime he was state railroad commissioner, retiring from the position before the close of the second term that Mr. Pingree was governor.

Prior to the Bull Moose campaign Mr. Wesselius was a worker in the Republican ranks. A strong supporter of Theodore Roosevelt in renominated his old time Republican faith and became allied with the so-called progressives and as a Progressive Republican he headed the Michigan delegation as delegate at large to that memorable convention held in 1912.

Find Tapestries Worth $2,000,000 in Attic

Venice.—Ten early gothic tapestries, estimated to be worth $2,000,000, have been found in the upper attic of St. Mark's cathedral by Dr. Phyllis Ackerman and Prof. Arthur Upham Pope, advisory curator in Mohammedan art to the Chicago Art Institute.

The two Americans discovered the tapestries hidden under coarse burlap hangings.

Doctor Ackerman is of the opinion the tapestries were made about 1430. She pointed out that they have borders, an important feature as it hitherto has been assumed that early tapestries were without borders.

Another unusuality is the use of a shade of rich violet and black background against which the strong reds and greens of the costumes stand out vividly.

The set obviously was made for the choir of the cathedral and probably found their way to the attic during the Renaissance, because of opposition against sacred art.

HOLY ISLAND IS TO BE KNOWN AS THE ISLE OF PINES

Changes come with each season, some of one type, some of another, one such this season being the change in name of what from its earliest history to the present has been known as Holy Island, a most historic and certainly beautiful spot located in the South Arm of Pine Lake.

Hereafter the little Island will be advertised and known as Isle of Pines making for an innovation for which the owner of the island, Mr. I. B. McLean stands sponsor.

CHARLEVOIX THE BEAUTIFUL

AN APPRECIATION

By the Observer

Traveling directly north, along the west side of the state of Michigan, a long day's journey from its southern boundaries; amid lakes, hills, and wooded glens, like a pearl in exquisite setting, repose the little city of Charlevoix, justly named "The Beautiful" for nature has been so profuse in the beauties she has bestowed upon Charlevoix, that any work of man is but an added polish to the gem.

In winter time, clothed in virgin white of new-fallen snow, glittering like a million diamonds in the diffused solar light; the trees garnished with a coating of frosted lace, and lakes covered with gleaming blue ice, Charlevoix is beautiful; but in summer time, when the verdant foliage, blessed by the summer sun, and cooled by gentle zephyrs that blow from the lakes, she is unsurpassing; that visitors come from all over these United States to spend the summer season in Charlevoix is little pride keeps the little city in the first class for sanitation and cleanliness, and beautiful velvety, green lawns, handsome shrubberies and fine modern residences speak well for its progressiveness.

When summer skies reflect cerulean blue on the waters of Lake Michigan, large steamboats sail proudly on her waves to Charlevoix, bearing with them merry guests who return each season to this best-loved summer resort. Special passenger trains bring their quota while the season is yet young, and when summer grows warmer, white-winged yachts sail into the bay, happy bathers disport themselves on the long stretches of sandy beach, and enthusiastic golfers lving their clubs on the unrivaled golf course.

Gloriously the dawn greets Charlevoix-the-Beautiful, and, when at the close of the day, the summer sun, with his golden sadle, sinks slowly to his western home leaving a path of light across the waters of Lake Michigan, and crimson and purple clouds float softly overhead, sweetly and gently the northern twilight creeps down and wraps the town in a mantle of rest

HOTEL CHARLEVOIX NEW MANAGER

Mrs. C. J. Winder now Has Complete Charge of Hostelry

Redecorating and various other improvements is on the regular spring house cleaning schedule at present in order to put everything in splendid condition for the opening of the resort season. Mrs. C. J. Winder is in charge of the hotel business and the extensive improvements now under way, and in this work there is pronounced evidence of Mrs. Winder's ability to carry on the progressive policy of her management and supervision.

When completed the interior of the hotel will take on a most pleasing, tasty, neat appearance such as will make a complete transformation that will be wholly convenient and enjoyable to local and transient guests.

The new work will be carried out extensively throughout the entire building making for a complete renovation from basement to garret. This work has been under way for several days and will be continued until fully competed. It is a job of considerable magnitude with much yet to be done in order to have everything in readiness for the opening of the season and in this part of the program Mrs. Winder is optimistic and fully confident that the work outlined will all be accomplished in ample time, a satisfaction to herself and guests.

"Divine Rights"

George F. Baer was known as Divine Rights Baer because of a statement in which he is alleged to have said: "The rights and interests of the laboring man will be protected and cared for—not by the labor agitators, but by the Christian men to whom God in His infinite wisdom has given the control of the property interests of the country."

HERE LAST SUNDAY EVENING

Steamship Missouri Makes First Appearance of the Season

The steamship Missouri of the Michigan_Transit Co. line visited the local port last Sunday evening for the first time this season, taking the trip from Chicago scheduled for 5:S. Purvian.

Future sailings from Chicago will probably be made in accordance with arrangements now in the Purvian with the Missouri making frequent regular trips between Milwaukee and Muscoda with an occasional trip to Northern Michigan ports.

A schedule of regular sailings of the ships of the Michigan Transit Co. will be ready for distribution soon, in which the public will be advised as to the summer sailings with points served by this steamship service for the season.

Fish That Cries

In Hongkong harbor, a strange fish, of the size and appearance of a baby's head, has been caught. It is like a big orange, with eyes, mouth, nose, ears, and two small uncommon-looking fins. This curious creature, resembling what the Chinese describe as a "wail" fish, is popularly known as a mermaid's child, and utters a sound like the cry of a baby. The possession of this fish is said to bring good luck.

Synthetic Women

It is a world to see how commonly we are blinded with the collusions of women, and more enfeed by their ornaments being artificial than their proportion being natural. I loathe almost to think on their ointments and apothecary drugs, the bleeking of their faces and all their slibbier succus, which bring quaintness to the stomach and disgust to the mind.—John Lyly.

Two Fire Causes

Electric light wires hung over nails and oily rags thrown into a corner are two of the things which give the newspapers stories about "fires of unknown origin."

PETOSKEY HEARING

Michigan Securities Commission

REVIEW TESTIMONY

Many of Our Citizen Appear and Testify—Decision Later

Last Saturday was Charlevoix day in Petoskey for some of our local citizens who were called to our neighboring city by the Michigan Securities Commission to testify and supply evidence through which the commission could rightfully determine whether or not a license could issue authorizing Earl A. Young, of this city, to continue as a licensed real estate broker.

The granting of an extension to a license under which Mr. Young operated through the 1925 season, has been held in abeyance since the first of the present year. During this period Mr. Young has been without a license such as is issued under the state law by the commission; therefore he is more or less handicapped in conducting the business heretofore carried on through his office, hence the final decision of commissioners relative to the hearing conducted at Petoskey last Saturday is the cause of no small amount of anxiety by Mr. Young, witnesses cited to appear at the hearing and the public generally.

Mr. Hezekiah N. Duff, chairman and member of the board of Commissioners presided at the Petoskey conference and with other members of the commission will review the testimony and later when they will render their decision as to the status of Mr. Young with the commission and as to whether a license be his to continue as a real estate broker will issue. If in Mr. Young's favor the coveted document will be forthcoming. If not in his favor the subject will be up for further consideration by the members of the commission.

The following Charlevoix citizens were cited to appear at the hearing their citation coming direct from the commission in Lansing, and all appeared in answer to their citation: Mrs. Cassie Hart; Messrs. Judge S. A. Correll, Elmer Johnson, Harry S. Graves, Dr. Frank H. Wilkinson, Lawrence R. Chase, Robert Bridge, R. C. Hamiuet, R. P. Sloan and E. E. Rite.

Others present were Earl A. Young, Miss Addie Holley, Gelk C. Gelken and Attorney H. L. Lewis of Charlevoix and Attorney J. M. Harris of Boyne City

MISS GRACE LORRAINE

A true beauty of the South is Miss Grace Lorraine of Richmond, Va., a student at Gunston Hall in Washington, who was recently awarded a gold medal for writing the best essay on the life of Edmund Burke. The contest was conducted under the auspices of the Sons of the Revolution.

DAWSON, ONCE PRIDE OF YUKON, IS FADING

Scene of 1900 Gold Rush Slipping Into Oblivion.

Dawson City, Yukon.—A bunch of the boys no longer whoop it up in the Malamute saloon, nor is there a ragtime kid available to hit a jag-time tune up the music box. The episode dealing with the demise of bungerous Dan McGrew and the reign of the lady known as Lou are but vague memories of bygone days as far as this town is concerned.

When Robert Service wrote the "Shooting of Dan McGrew," the Malamute saloon was one of the many bright spots during the mad gold rush of 25 years ago. Together with scores of other such places, it played host to the hordes—the frenzied gold-seekers. Today, with its kindred resorts, it stands in the last stages of decay.

From the status of a thriving city of 30,000, Dawson City today has dwindled to a struggling village of less than 1,000.

Dawson's mushroom growth had its genesis in the great Klondike strike of 1898. Miners, adventurers, con men and courtesans swept into the frozen city of the North. Fortunes were made and lost over night. The miners mined the fortunes, the businessmen minded them. Winnings at the faro tables in the semi-bathing gambling halls went the same way. Thousands dropped their bodies over the frozen wastes, many to fall from exhaustion before the journey ended—to the gold-mad city. The North exacted a heavy toll in lives—but the world went for fortune from the ground.

With the exception of the Chilkoot circle of '98, the rush of 1900 was the richest in the history of mining. Hundreds of millions of dollars in dust and nuggets was taken from the ground. For more than ten years the yield stood up under the terrific pressure.

Then began the fading of the strike. From there peak of $22,000,000 gold production in the territory dropped to $2,000,000 in 1924. Tremendous areas dredged and other sources received the minimum of miners.

MISS GRACE LORRAINE

Earl A. Young, of this city, to continue as a licensed real estate broker.

The granting of an extension to a license under which Mr. Young operated through the 1925 season, has been held in abeyance since the first of the present year. During this period Mr. Young has been without a license such as is issued under the state law by the commission; therefore he is more or less handicapped in conducting the business heretofore carried on through his office, hence the final decision of commissioners relative to the hearing conducted at Petoskey last Saturday is the cause of no small amount of anxiety by Mr. Young

FATE AND THE TWO PHILOSOPHERS

By RUTH GRIFFITH

(© by Western Newspaper Union.)

DEBORAH HARLAN opened her cigarette case and looked up at her companion sweetly. She liked his profile in the cool moonlight as he drove the car, but she didn't like his argument.

"Why, Sammy, dear, you don't believe all that, do you?" she asked.

"Yes, I do believe it, Deb," replied Sammy Barlow, not without effort, as he looked into the face of the minister's daughter. Deborah's rosy lips parted in a crooked smile.

"And I always thought that doctors, especially young ones, were atheists or infidels or something; interesting," she sighed.

Again the doctor looked puzzled into her brown eyes. Large question marks, those eyes seemed, always asking him something.

"Now, Deb," he scolded. "You know I'm quite orthodox, so why do you want to talk about it?"

Deborah placed the cigarette between her lips and shook out the lighted match with a professional gesture. Dr. Sammy Barlow brought the car to a grinding, jerky stop.

"Deb," he said sternly. "I wish you wouldn't."

"Wouldn't what?" she prompted eagerly.

"Wouldn't smoke those confounded cigarettes. I hate to see you do it."

Much to his surprise she flung the cigarette away. Instantly his arm encloased about her.

"Deb," he accused, "you want to be a little devil."

"You're right," she admitted, "I always had intended to be a missionary, and to go to teach the heathen that they ought to wear clothes, but I've changed my mind."

The doctor laughed.

"What changed your mind?" he asked.

"Oh, I've come to have a different view of the Adam and Eve story, that's all."

"Deborah dear, when are you going to marry me?" he asked. She looked at him, feigning surprise at the question.

"Why, Sammy! Never, of course."

"Deb, I'm not joking."

"Neither am I."

"But you must marry me."

"All right," she sat up quickly, and looking at an imaginary book in her hand, began to recite in a solemn tone:

"Dearly beloved, we are gathered together in the sight of God and in the presence of these witnesses to join this man and woman in the bonds of holy matrimony—" she paused.

"Don't Deb," begged the doctor solemnly.

Deborah dropped the book and settled back in the seat.

"Now we're married," she assured him. That Sammy was in no mood for burlesque.

"Deb, won't you really marry me?"

"No, Sammy," she answered emphatically.

"Why not?"

"Because I love you too much."

"Fiat, Deb—"

"Yes, I know what you are going to say, but I mean it."

"Then, Deb," the doctor muttered, and Deborah saw that his fists were clenched.

"Then we must stop this," he said finally.

"What?" she asked innocently, and then without waiting for an answer, went on: "Don't get metaphrasitic, Sammy; you don't know the time. Besides, you'd better drive on. We don't need to stay here all night." Doctor Barlow closed his mouth like an oyster, pushed in the clutch and gave the starter to his roadster.

Now Deb, he finally demanded, "just leave out all of that Socratic questioning and answer one question for me, will you?"

"Proceed," she said slowly, but with a twinkle in her eyes.

"Will you marry me?—say yes or no."

"No."

"Don't you care?"

"I don't believe in marriage at all, Sammy."

"Where under the heavens did you get such an idea?"

By wheedling did marry so many, I suppose. They just seem to pour in —those people, some good, some bad, some poor, and some rich, with consent and without consent, widows and widowers, and some with several marriages already to their credit—all coming to hear dad say those words that I just said to you—"

"But where did you get that ridiculous idea of marriage, Deb? Surely not just from seeing people get married."

"Well, no, not only from that. But you see, I see them that day and then I look at them a year or two later and draw up own conclusions concerning marriage."

"You probably saw only the conclusions that you were determined to find. You didn't look for any good results, did you?"

"Yes, Sammy," she answered pathetically. "I looked, but I looked in vain." Another silence and Sammy drove quickly. He didn't know where he was going, but he had a vague idea that he was off the Southern trail which they had intended to follow. He felt Deborah's head on his shoulder.

"It's dark tonight, Sammy, isn't it?" she said.

"Yes, it's dark for me tonight, Deb, but not only the road—everything," he assured her.

"Melodramatic again, Sammy," she accused. "Can't you love me without marrying me?"

"I suppose I can if I have to," he replied. "What are those two lines of Henley's that I've heard you say so often, Deb?"

Deborah settled her head more comfortably on his shoulder and chanted in a Bantist sing-song:

"It matters not how strait the gate,
How charged with punishments the scroll!
I am the master of my fate:
I am the captain of my soul."

"Do you believe that now, Deb?"

"I don't know," she replied thoughtfully. "I'd like to—do you?"

"No—yes, that is, until two masters meet, and then we need Fate to decide the argument."

"Well, Fate generally decides, doesn't she?"

"Generally, yes. But sometimes she seems a little tardy," Deborah smiled, but Sammy did not see the smile.

"Deb," he said, "there's another car on this road, and we thought it was our road."

Deborah looked at the glaring headlights that were so quickly approaching them.

"Sammy, is this road wide enough to pass that car?" she questioned nervously.

"Oh, yes, but Lord, it's dark! I'm going to drive to the side and wait." He pulled to the side and slid the gear into neutral. By the light of the passing car he caught a glimpse of a bridge in front of him, and before his startled eyes the bridge shift he felt the sickening rock of his car, heard the sound of tearing earth, and realized what was happening. In a flash he had flung Deborah to the side and taken her place. A sharp, ragged pain went through him, he was conscious of a heavy weight on his back. Reaching out his arm he tried to call Deborah, but he could only whisper, and the pain of moving his arm made him faint.

He awoke to a sensation of coolness. He opened his eyes, but couldn't see. Something pressed down him. Suddenly he remembered the bridge, just as he had seen it by the light of the passing car; he supposed then that he was in the water; that was the pressure that was so cool. Frantically he stretched out his hands and called loudly:

"Deb!"

His hand touched something—Deb's head, he knew. In a panic he was sure that she was dead. He struggled up wildly. Somebody uncovered his eyes and he looked wonderingly up into a tall man's face.

"Calm down, now," the tall man was saying to him, "there's no call to get so excited about. You're in a hospital and not under a bridge."

"Deb?" he inquired hoarsely.

"Here I am, Sammy."

He saw her kneeling by his white bed.

"Are you hurt, Deb?"

Her face was pale, but as she smiled two tears slipped from her eyes.

"No, Sammy; I'm not hurt—only my ankle twisted a little." Sammy sat upright.

"I'll fix it," he assured her; "where is my case of bandages?" The tall doctor gently pushed him back on his pillows.

"I'm the doctor now," he said.

"Sammy, dear," she said, "do you remember what you said just before we went over?"

"Why, yes," he smiled rather weakly; "it was something about Fate deciding, wasn't it?"

"That's it, Sammy, and Fate decided," she answered.

"What, Deb?"

"When are you going to marry me, Sammy?"

"Right now!"

Deborah laughed. Some one passed and glanced puzzlingly in at the door that the tall doctor had left ajar.

"But Deb, your philosophy of marriage?"

She kissed the bandages on his forehead.

"Philosophy?" she questioned quaintly. "Oh, yes. Well, I guess I left my philosophy under the bridge."

Wife's Statement Did Little to Help Hubby

This is just a story, but it is a pretty good one. The traffic policeman signaled the driver of a motor vehicle to stop, and had to dodge to escape being run down. Overhauling the offender he told him the gravity of the offense he had committed. "Let's see your license and your registration," he demanded. The driver had neither. "Worse and worse," said the policeman; "first you disobey my signals, now I find you driving without registers." Then he tried the brakes and found they were worthless. "That," he said, "means another charge. What do you mean by driving a car with defective brakes and without a license or registration?"

All this time the driver's wife, in the back seat, had kept silence. But her husband was clearly in no despair as a fix that something must be done to save him. She had an inspiration. "Officer," she said, calling the policeman to her, "don't mind what he says. You've got to make allowances for the poor man. He's been drinking."—New Bedford Standard.

Little Cochineal Used

Cochineal as a coloring is still used to some extent. Formerly it was much employed for coloring wool or silk a scarlet or crimson, but owing to the cost of its production and to the fact that the colors, although brilliant, are not very enduring, this dye has been greatly replaced by cheaper coal-tar products, and for this reason the cochineal industry has been rapidly declining.

"Black Ox" Superstition

In the olden days a black ox was sacrificed to Pluto, the infernal god, as a white was to Jupiter. Hence black ox came to signify misfortune, sorrow or adversity. To have the black ox tread on one's foot, means to be visited by death, or to know the meaning of sorrow.—Pathfinder Magazine.

FORMAL GOWNS FOR SUMMER; NEW BLOUSES FROM PARIS

AS GOWNS designed for our hours of leisure and pleasure glide across the social scenes—at tea, at bridge—at anything after midday, or in the evening, we become more and more aware of the support that lace lends to present modes. Few frocks, for any sort of formal wear, are lifeless and the role of lace grown in importance as the degree of formality advances. First come those demure and charming full-skirted and long-sleeved frocks of taffeta, with their chemisettes, collars and cuffs of lace, looking so fine-grained and dignified—and so ingenuous! How much less interesting they would be without the saving grace of lace!

Following these quaint, straightforward and simple frocks, may glide in a sophisticated, carefully draped and very short satin dimner frock. Its skirt veiled with lace that extends below the hem line, and finished with a long pointed panel of satin falling at one side. Here we have an effective example of the hem line lengthened by lace—and we shall see many more gowns employing this fascinating idea. The very next frock may be a dignified affair of crepe, with long, graceful flaring sleeves, making a background for a paneled and rippling revers of fine lace from neck to hem. Lace is the note of greatest importance here. It is used in endless ways on afternoon dresses of taffeta, or crepe, or georgette, in bandings on the skirts and decorations on the sleeves and bodices.

In evening dresses lace is even more important. In yokes, panels and

ADORNED WITH LACE

TWO MODELS FROM PARIS

medallions, but more particularly for lengthening the hem lines of fashionable skirts, it has captivated the fancy of designers. Godets of lace let into skirts, tiered skirts of lace flounings, inserts and panels of lace, dyed to match, all help build the airy evening frocks for summer. Then there is the revival of the lace petticoat worn under a boufiant taffeta, opening in a panel down the front, the robe-de-style with plain silk bodice and boufiant skirt of lace flouncing, and finally the all-lace dress, of which one example is pictured here. The lure of the feminine lies in lace and in lacy materials, and it is a universal lure—among the civilized.

The blouse, considered independently—that is, without reference to some particular suit or skirt with which it is to be worn, plays a minor role in spring's fashion dream. But considered in connection with a suit or skirt, it becomes a subject of much importance, for stylists demand that it reveal some kinship to the rest of the costume. It may be over sister to the suit, or first cousin to the hat, if, in some particular, it carries a family resemblance—as, for example, a blouse of champagne-colored crepe, covered with green polka dots in the same shade of green as the suit it accompanies, or a blouse of gay and vivid colors worn with a dark suit and a hat that repeats the colors in the blouse. The choice is really parading in the mode under an assumed name, or no name at all in the varied bouquet of dresses and the two-piece frocks that are having such a tremendous vogue.

Nevertheless, and notwithstanding all this dependence of the blouse on other things, Paris sponsors, as always, the good style of both tunic and overblouse, and the fascinating "little important additions" to the summer wardrobe. Of all strange, the most second fiddle in the costume. Into these blouses, skirts or dresses go the richest that will make ornaments and inconspicuous backgrounds. In the uncompanying sketch a tunic blouse and an overblouse are types of formal styles as Paris shows them. The tunic blouse at the left is made of finely pleated, light brown georgette crepe, with embroidery in dark brown, but may be developed in any wanted color, choosing a dark shade for the embroidery.

The pretty overblouse at the right is made of navy blue, marocain crepe and embroidered in green and blue silk. In both blouses emphasis is placed on the sleeves, which are long and elaborated at the forearm.

For wear with tailored suits there are many high-necked blouses of plain or fancy silks and the scarf collar is an important feature in blouses of this type. The jabot is also an important note in these blouses, which are usually finished by a wide hip band and of about the length of the overblouse at the right of the sketch.

Among very promising suitmates for midsummer favor are overblouses of white crepe de chine for wear with white skirts. They are made with either high, open or round necklines and long sleeves.

JULIA BOTTOMLEY.

Those Fashionable Blues

The popularity of every shade of blue is evidenced by a glance at the spring collections. Chinese blue and the old favorite, Alice blue, are very prominent.

Tailored Chiffon Frocks

Frocks of printed chiffon in the new pastel colorings and conventional designs are made in the simplest fashion, and with few exceptions have long sleeves.

Lovely Fabrics of Dyed Yarn

Fabrics which are woven out of dyed yarn are known as yarn-dyed. Beautiful iridescent patterns are produced by using opposing colors of warp and weft threads.

Poppy Red

A color which is much in evidence is the brilliant shade of the poppy. It is especially effective when chosen for dance frocks of chiffon, taffeta or tulle.

THE KITCHEN CABINET

Away with clocks and sundials!
Time and I
Have made a compact—this to be my hour
To hear the evening thrush, and know the hour.
Yet feel it soon.
—Jean Ingelow.

GREENS ARE GOOD EATING

The best of spring tonics are found in Mother Nature's own garden in the form of greens which are often weeds, but are much more wholesome than any tonic taken from a bottle.

This craving for green foods is gratified by serving the crisp, raw leaves, which are rich in iron, sulphur, lime and phosphorus, and at the same time because of their fibrous nature afford a most effectual internal cleanser. If eaten with the snappy French dressing, this too is a stimulant, exciting the digestive organs, particularly the pancreas. The oil is a lubricant, so, with the acrid and greens, it is easy to see how necessary green food is in the diet.

When planting a garden the weeding out for thinning should always be planned as a salad. Such small plants as turnips, cabbage, onions, beets, when very young, are delicious served raw, or later cooked in the form of cooked greens.

Wild mustard, sorrel, dock, cress and milkweed shoots are uncultivated greens which are rich in vitamines. The young shoots of milkweed when cooked taste much like asparagus.

Dandelion Hot Slaw.—Take about three quarts of carefully picked and washed dandelion leaves. Fry out sliced bacon in a hot skillet, then lay in the well-drained leaves, cover and simmer until the leaves are well wilted. Mix salt, pepper, a tablespoonful of sugar, two tablespoonfuls of cream, adding enough vinegar to add zest to the dressing, add two beaten eggs and stir until well blended—not directly over the heat; pour over the greens and serve hot.

Blanched dandelion leaves found under boards or in sheltered spots are delicious cut up and served with shredded green onion and a French dressing.

Black walnuts, a half cupful coarsely chopped, sprinkled over a custard pie makes a most delicious, rich pie, if one likes the black walnut flavor.

Baked Eggs With Cheese.—Break four eggs into a buttered baking dish and cook in a hot oven until they begin to turn white around the edges. Cover the eggs with a white sauce, and over this a cupful of buttered crumbs. Bake until the crumbs are brown.

Sweets From Honey.

Those who "keep a bee" these days will find it most profitable, for there are so many delicacies that can be made from honey. The children there is no more delicious and wholesome. A hive of bees in the garden means a finely pleated, light brown georgette crepe, with embroidery in dark brown, but may be developed in any wanted color, choosing a dark shade for the embroidery.

Honey Candy.—To one quart of strained honey add two tablespoonfuls of butter, two tablespoonfuls of vinegar and boil until it hardens in water. Flavor with a teaspoonful each of almond and lemon extract, add one-half teaspoonful of soda and pour into buttered pans to cool. Mark off into squares before it gets too hard.

Honey Fruit Cake.—Warm one-half cupful of brown sugar and one cupful of honey until it hardens in cold water. Remove from the heat, add one-half teaspoonful of soda, and all the puffed rice, wheat or popcorn that can be stirred into it.

Honey Baked Beans.—Moisten six tablespoonfuls of cornstarch with one-fourth of a cupful of cold water, add two cupfuls of boiling milk, and cook eight minutes; then add a pinch of salt and one cupful of honey. Mold in cups and serve with honey and cream, adding sprinkled nuts over, each mold if desired.

Cauliflower Soup.—With a cupful or less of meat or cooked cauliflower, a most tasty creamed soup may be prepared. Put the vegetable through a sieve and add to hot milk, season well and blud with two tablespoonfuls of butter and one of flour cooked well in the soup.

Asparagus Rabbit.—Cook diced asparagus until tender. Cover buttered toast with the cooked sliced asparagus, sprinkled with grated cheese, salt, cayenne and a little worcestershire sauce. Place in a hot oven or under the gas flame for a few minutes to melt the cheese. Serve at once with a poached egg in the center if desired.

Lemons will keep for several weeks if put into a dish of fresh water and the water is changed occasionally, washing the lemons.

Honey mixed with orange or any fruit juice with a bit of lemon juice makes a good dressing for a fruit salad.

Honey in place of sugar for doughnuts adds to their flavor and they do not dry so rapidly as those made of sugar.

Nellie Maxwell.

His Ability Limited

We should never find fault with the man who thinks he knows it all. He, in all probability, does, in so far as his ability to learn is concerned.—Bern Broadway in the New York Telegram.

But "Col. Cons." Don't Boast

A member of the western hockey of Editors declares that the front page of a newspaper is not the most widely read page. Column conductors have been aware of that for a long time.

A car for every purse and purpose

IN THE automobile industry several distinct price classes have developed. General Motors is represented in each. The General Motors line of passenger cars comprises 52 different models. They include every open and closed body type and range in price-at-the-factory as follows:

CHEVROLET
6 *Models*—$510 to $765

PONTIAC
2 *Models*—$825

OLDSMOBILE
9 *Models*—$875 to $1115

OAKLAND
6 *Models*—$975 to $1295

BUICK
16 *Models*—$1125 to $1995

CADILLAC
13 *Models*—$2995 to $4485

Quality is the first law of General Motors; and sweeping economies, possible to an institution with the resources of General Motors, are reflected in the prices of General Motors cars.

Select the car that suits you from the General Motors line. You may buy it out of income on General Motors' time payment plan (GMAC), which assures fair terms and low rates.

While the fortunes of war at the coming congressional elections will turn so the Republicans may lose some seats, the Democratic claims of earlier in the season, that this was to be a great banner year for the party of the donkey, have quieted down.

For the purpose of the campaign on the Republican side, there is to be a complete union, the National Committee under William M. Butler who swung the Coolidge line in 1924 the senatorial committee under Senator Phipps, and the congressional committee under Congressman Woods of Indiana, all working together for the common cause.

As for the Democrats controlling the Senate, that thought has vanished. The Democrats must gain ten seats to get the Senate, and this they cannot do. Should they carry five possible states, they would have only 44 senators to 51 for the Republicans, a nominal Republican majority. The 28 states where no change is indicated include Massachusetts and New York, where the contests will be particularly hot. But if the party in these two unexpectedly fail, it would still fall short of control. Should it gain two more, a total of nine, the Senate might be tied, and the vote of the vice-president, should the Farmer-Labor senator, Shipstead, go with the minority to make a tie, would overcome that and give the Republicans a majority of one. But when one goes that far, it would be just as if one should soberly speculate as to whether or not the moon is made of green cheese.

—The late Richard Wagner, in his resonant and terse [manner, once described the sound made by a saxophone as "racenkreunzungsklankewerkzeuge," and we wonder what he would have had to say about the direct primary.—Ft. Wayne News-Sentinel.

Miss Helena Maloney, of Brookline, although she wrote perhaps a pert letter to the President must be credited with having written a pertinent one when she inquired as to why girls were not admitted to the training camps. It is worth noting that in this case the president did not attempt to reply to the Brookline girl, but turned the letter over to Major General Davis, who replied that under the law unfortunately, whatever his own ambitions, the appropriations were made only for the training of men. The value of Miss Maloney's letter is two-fold, first, it calls attention to the fact of the slight of a substantial group of our citizens to equal opportunities of physical training which is given to another group. Its pertness can also be forgiven because it will make plain to those who read it that after all there is a strong healthy body of young womanhood which has so far escaped the pacifist tendencies of the times and is not only anxious but prepared to do its share.

WHY THEY DON'T VOTE

Quite frequently someone calls attention to the danger to representative government caused by the fact that every year an increasing number of Americans are staying away from the polls. President Coolidge himself pointed out this peril in an address to the Daughters of the American Revolution. It is often remarked, too, that the citizen who doesn't vote in nine cases out of ten is a conservatively inclined citizen, whether he be a Republican or a Democrat. It might be suggested, therefore, that there is another reason for this lack of interest in voting than mere laziness on the part of the average citizen. In each succeeding election nowadays the percentage of those voting to the whole number eligible seems to grow less. One reason for this which is not often dwelt upon is that, when it comes to voting, the average citizen is getting too much of a good thing, and nothing palls on most Americans more than this.

In the "good old days" we went to the polls every two years to vote, and that was about all there was to it. But now we have two or three elections nearly every year, and, worst of all a "dog and cat" squabble preceding each one. Instead of the biennial election to express the will of the people, this present year starts off with senatorial and state primaries, local primaries and all sorts of primaries lasting from early spring until the first of October. And in a good many communities there will be campaigns on bond issues and various other referendum ideas. No wonder then that by the time the regular election rolls around a lot of people will be too weary with it all to go and vote. For there is pothing quite so disgusting as a primary which tends to be disgusting. This is all quite different from the old days when the people voted in November on the candidates selected in convention and left the selection of the United States senators to the state legislatures. Of course, once in a while there was some anguish over the result of a state convention, but no convention unrest ever lasted as long as the mildest primary does nowadays.

For a long time the cry has been "let the people rule," taking the authority away from delegated meetings and giving it to voters direct. But by the way they are failing to come out to vote might indicate that the people are getting tired of ruling. Perhaps the best way to whet their appetites would be, not to pass a law compelling them to vote, but to abolish a lot of useless primary campaigns, so making the general election a pleasing novelty again

COMMENT.

—Wouldn't Captain Kidd have fun with all these rum fleets sailing the Spanish main.

—Down in Washington they say that Walter Johnson is worth his weight in Idaho potatoes.

—The reason they still call it pre-war liquor is that after you drink it the battle starts immediately.

—It is not yet hot enough to explain fully the impatience to discover the Pole.—Philadelphia Record.

—The way the average Florida real estate man works would indicate that he is as full of sand as his real estate.

—Now that this "medicinal beer" has been fully described, the next thing to know is the antidote.—Detroit News.

—Somebody wants to knew what a Scotch verdict is. A Scotch verdict is one where every fellow pays his own costs.

—For one thing a man can live better outside the city and inside his income at the same time.—Los Angeles Times.

—London dandies are going to shed their waistcoats this summer just like American dos. Another blow at the vested interests.

—About the only result of the Senate Volstead investigation was to leave the drys drier and the wets wetter than they were before.

—A Columbia University professor says that the twentieth century man is "ethically upset." Now you know what the matter is with you.

—Over in India it is against the law for a widow to remarry. This probably induces the ladies to take mighty good care of their husbands.

A MIRACLE OF GENIUS

By SIDNEY SMITH

Yes, he is a miracle of genius, because he is a miracle of labor; because, instead of trusting to the resources of his own single mind, he has ransacked a thousand minds; because he makes use of the accumulated wisdom of ages, and takes as his point of departure the very last line and boundary to which science has advanced; because it has ever been the object of his life to assist every intellectual gift of Nature, however munificent and however splendid, with every resource that art could suggest and every attention that diligence could bestow.

—The tired business man who used to go to a musical comedy in the evening to get rested up now does it by knocking off at one o'clock for the golf links.

—Maybe the modern youth is going the pace that kills, but anyhow the moving picture show is a big improvement on the music hall of thirty years ago.

—The wets are going to concentrate their fire on getting liquor that is non-intoxicating "in fact" but a lot of the boys would be disappointed if they really got that kind.

—A beer war has been started in Vienna because the price has been raised from ten to eleven cents a quart—which ought to make the bootleggers in America laugh out loud.

—Mexico is organizing a baseball league and soon the people may be expected to work off their enthusiasm on umpires instead of starting revolutions.—Indianapolis Star.

—The red flag of Russia will fly with all other flags at Stratford-on-Avon during the Shakespearian fete. The play of Shakespeare which appears to refer directly to Sovietism is "Midsummer Night's Dream."

BEAVER ISLAND

May 12—The U. S. boat Fulmar, Capt. Rose, was in Beaver harbor Saturday. She had been planting young lake trout.

Mrs. James Martin was in Charlevoix several days last week. She returned Monday with a new Dodge car.

W. W. Boyle is rebuilding the J. W. Green store building, and intends to move the postoffice therein.

Mrs. John McCann, who spent the winter in Charlevoix, has moved back to her home in St. James.

H. H. Gallagher, of the Booth Fisheries, made a business trip to Charlevoix last week.

Pat Early arrived home from Charlevoix City where he had been on business.

Lawrence Malloy was in Charlevoix on Monday, on business at the court house.

Capt. Charles Smith of the Game Warden dept., was a visitor here last Saturday

J. Hoffman, of the PetoskeyGrocery Co. called on our merchants last Friday.

Iva and Rita Laflenziere are in Chicago for a visit.

H. D. Gallagher went to Charlevoix last Monday.

Daniel A. Roddy of Chicago, is here on a visit.

James P. Gallagher was in Chicago last week.

We have two cattle buyers here.

John Grill is in Grand Rapids.

Rock Formation

The term "monadnock" is derived from Mount Monadnock in New Hampshire, and is applied to an isolated, nonquantitative remnant of hard rock extending above its surroundings in the late states of a period or cycle of erosion. Stone mountain in Georgia is another instance of this class.

Power of Vibrations

A Boston violinist says he can put out a flame with the vibration of his fiddle. But that's nothing. A saxophone slightly off key can put out an entire orchestra.—Cleveland Plain Dealer.

Love Attracts Love

Love and you shall be loved. All love is mathematically just, as much as the two sides of an algebraic equation.—Emerson.

McCoofs Velvet Ice Cream now on sale at Smith's Confectionery Store, Co. Bank Building. 2-2t

THE THEATRE

"THE AMERICAN VENUS"

"The American Venus", Paramount's much-talked of comedy spectacle, will make its local bow at the Palace Theatre Friday night, May 14th. Because of its theme, picturesque background, superlative cast and elaborate production trimmings, this picture is awaited with more than ordinary interest.

Fay Lanphier, who was adjudged the most beautiful girl in America at the annual Atlantic City beauty pageant, plays the title role, and in addition, a number of the other entrants have minor roles in the film. However, the chief acting burden is carried by Esther Ralston, Lawrence Gray and Ford Sterling, assisted by such experienced troupers as Kenneth MacKenna.

The story written directly for the screen by Townsend Martin, concerns itself with the comedy complications, dramatic thrills and absorbing romance that develops as a result of a national beauty contest inaugurated by a number of famous artists to find the modern American Venus. Because her father, a manufacturer of beauty creams and lotions is on the verge of bankruptcy, Esther Ralston sets out to win first prize so as to stimulate a demand for his products.

"JUST A WOMAN"

There are few movie stars who appear on the screen attired in evening clothes more frequently than Conway Tearle. Yet, strange as it may seem, the immaculate Tearle detests formal attire. He wears 'em because he has no other choice. To look at him in the movies he seems perfectly happy and quite at ease—Hi, Hon. Winston S. Churchill, in Hearst's International-Cosmopolitan.

"FLOWER OF NIGHT"

No period in the history of the world affords more sheer drama and romance than the years following the discovery of gold in California. There was an onrush of humanity in search of the precious metal that made San Francisco a city of 50,000 souls almost overnight. The hordes of fortune-seekers ended the peaceful power of the great landed Spanish families.

Joseph Hergesheimer takes this period for a background to his original story for the screen, "Flower of Night," written especially for Pola Negri, and coming to the Palace theatre on May 18-19.

In the story Miss Negri portrays Carlota Y Villalon, lovely daughter of Don Giraldo y Villalon, descendant of the Spanish grandees. Their property has been taken from them by the Innocent Americans. This includes the Flor de Noche gold mine. All the Villalons have left is their hacienda.

Carlota drifts to San Francisco where her meager funds are soon exhausted. Joseta (Julius Lee Lynching) a dance hall girl, takes Carlota to Miguel's cafe where she is employed. Luke Rand (Warner Oland) a sinister politician, but well groomed and prominent, is intrigued by Carlota.

Northern Michigan Roundtable

Charlevoix, May 21-22

Friday, 8:15 p.m. Meeting open to the public, "Education Steps Out" by Dr. W. J. Henderson.

Saturday, 8:30 a.m. Music followed by Invocation. Discussion period: "College Entrance Requirements in Music." "The Character Factor," Rev. C. E. Pollock.

Leo Carey, Charlevoix
Julius Roberts, East Jordan
Leslie Gibbard, East Jordan
Samuel Hayden, East Jordan

Another Mistake Exploded

The buttercup is another of those blue things that deceive us by their name. It derived its title from the fact that when cows ate buttercups, the butter-producing qualities of the milk were impaired. The name of the plant was given the reason, but the simple reason that cows don't eat buttercups.

In Boston Keep Going

Persons who visit Boston are often perplexed by its queer streets. A visitor was complaining to a resident that he was continually getting lost. "Never mind," said the Bostonian. "Just keep on going straight ahead and you will always come out where you went in."—Exchange.

AN UNUSUAL STORY which deals largely with the adventures of a young New Englander, an engineer, engaged in water development in the West. He comes into contact with various exciting phases of the life of the country and eventually has an opportunity to show the stuff that is in him when he is put up against the difficulties and problems of a gigantic enterprise involving the water supply of a large city. A stirring narrative by one who knows his West and has written some of its most fascinating tales.

NEW PALACE THEATRE
Attractions for Coming Week

Friday, May 14th

Esther Ralston and Lawrence Gray in the "American Venus." The perfect entertainment. A magnificent comedy melodrama built around a nation wide search for the most graceful, most beautiful and perfect girl in America, as picked by the country's greatest artists. Beauty, fashion, romance, and your fill of gasps and thrills. Also a comedy, "Light Housekeeping."

Saturday and Sunday.

Conway Tearle and Claire Windsor in "Just a Woman." Rather the depths of disgrace and shame; rather the poverty of a hovel, rather death. No! No law could take away what God had given her. And so a mother told a lie, a lie that branded her. It hits at the soul of things; too big for any man or woman to miss. Also a comedy "A Flaming Affair." And another educational picture, "Thomas A. Edison."

Tuesday and Wednesday

Pola Negri in "Flower of Night." Pola as a flaming American Carmen, in a love melodrama flashing with color, dazzling with beauty, startling with thrills. Mistress of moods, lady of love, radient regent of romance—Pola Negri in "Flower of Night." The romance of a fiery Spanish beauty in the days of '49.
Also a Hodge-Podge picture, "The Story Teller."
Also a Fox News Reel. Travel the world with the News Reels. The very best foruv of travel.

Cultivation of Hobby Remedy for Overwork

Many remedies are suggested for the avoidance of worry and mental overstrain in persons who over prolonged periods have to bear exceptional responsibilities and discharge duties upon a very large scale. Some advise exercise, and others, repose. Some counsel travel, and others, retreat. Some praise solitude, and others, gaiety. No doubt all these may play their part according to the individual temperament, but the element which is constant and common in all of them is change.

Change is the master-key. It is not enough merely to switch off the lights which play upon the main and ordinary field of interest; a new field of interest must be illuminated. The cultivation of a hobby and new forms of interest is therefore a policy of first importance to a public man. To be really happy and really safe, one ought to have at least two or three, and they must all be real.—Hi. Hon. Winston S. Churchill, in Hearst's International-Cosmopolitan.

Fish Change Color

Many species of fish can change color at will to suit temporary needs. Experiments in aquaria have shown that the changes in color depend entirely upon the sight of the individual, since the color of blind specimens remains unaffected by changes in the color of their environment. The method by which a fish changes color is well known, says Nature Magazine. The color cells in the skin may contain red, orange, yellow and black pigments, and the variations in color result from muscular action, conscious or subconscious, upon one or more of the color cells. The changes of color, generally under the control of the individual, are chiefly made for the purpose of concealment; but they are also made for many other reasons, including the rapture of love, for animosity or for courtship.

Slow Breathing Best

It has been noted by scientists that the slow breathing animals are the longest lived and the least susceptible to tuberculosis. The rabbit, which is the most susceptible to the disease, breathes 55 times a minute, while the horse, the least likely to contract it, breathes but ten times a minute at rest. The animal which never is attacked by tuberculosis and which is perhaps the longest lived is the turtle. Its respirations are so few that they are scarcely perceptible. The observations and tests on animals have been made by experts in pulmonary diseases for the purpose of trying a slow breathing treatment on tuberculosis patients.

Turning on the Tears

"My husband is very sentimental; he weeps when you begin to talk about work," stated a woman in an English court.

Men

The charge is frequently made that men are hypocrites about religion. What of it! They are about everything.—Exchange.

"Plus-Five" Trousers Latest at Cambridge

London.—Just when English university authorities thought the age of reason had returned, at least so far as the slop of trousers is concerned, this year's crop of Oxford oarsmen appeared in the most enormous "bags" or trousers ever made.

Cambridge, answering the challenge, has produced "plus fives" for golfing. "Plus fives" are extra long "plus fours." The technical description is "five inches up and five inches down from the strap at the knee." In windy weather the wearers of "plus fives" have to wind up the flapping folds of the trousers in order to make delicate shots on the putting green.

The colors are far from conservative and the socks to accompany "plus fives" are a riot of huge diamonds.

Fish Change Color

Many species of fish can change color at will to suit temporary needs. Experiments in aquaria have shown that the changes in color depend entirely upon the sight of the individual, since the color of blind specimens remains unaffected by changes in the color of their environment. The method by which a fish changes color is well known, says Nature Magazine. The color cells in the skin may contain red, orange, yellow and black pigments, and the variations in color result from muscular action, conscious or subconscious, upon one or more of the color cells. The changes of color, generally under the control of the individual, are chiefly made for the purpose of concealment; but they are also made for many other reasons, including the rapture of love, for animosity or for courtship.

City of 500 B. C. Found on Moscow Outskirts

Moscow—Russian archeologists have discovered on the outskirts of Moscow the remains of an ancient city, believed to date from the fifth century before Christ, when stone tools were best beginning to be replaced by metal implements.

Iron arrows, knives, glass bracelets, bone combs, and gold and silver jewelry were unearthed. Several examples of primitive pottery bearing designs for textiles also were found.

The main occupation of the inhabitants, the archeologists say, was cattle breeding, hunting having played a minor role. Traces of an ancient kremlin also were excavated.

Spurned, She Persists; He Has Her Arrested

New York.—Peter Simarney, twenty-two years old, caused the arrest, in Yonkers, of Miss Julia Bibiara, charging that after she proposed to him and was rejected repeatedly, the young woman indulged in gossip about him through the neighborhood. Because of this gossip and her repeated telephone calls, Simarney asked that she be held for disorderly conduct.

Judge Charles W. Foote, in the Yonkers City court, refused to uphold the charge, but cautioned Miss Bibiara to keep away from Simarney and not annoy him.

Zoo Has Odd Family Group

Perhaps the queerest family group resides in the Antelope House at the London zoo. In a pen live Bubi, a dwarf bush-buck; six chickens and a big yellow alley cat. At night the deer curls up in its stall, the cat and the chickens cluster in close proximity, absorbing the warmth from the deer's body. At feeding time the deer pushes its nimble fore the food trough and then lets the chickens pick the bits of bran and grain from its face. And the cat has forgotten how to watch its face and paws. Dixie gives the cat a thorough tongue bath regularly. The cat will lie down in front of the deer and as soon as its face is washed will turn its back to the deer for washing. And so on until its whole body is cleansed. There formerly was a goose in the family, but the deer in its anxiety to give the goose enough exercise ran the poor thing to death.

PERSONALS

Attorney E. N. Clink of East Jordan, was a business visitor here last Friday.

Mrs. Eva McGhan is spending this week in Saginaw visiting her brother and sisters.

Hugh D. Gallagher, of St. James, spent the early part of the week here on business.

Thomas Milner, who for some weeks past has been more or less indisposed, went to Grand Rapids last Monday with the intention of entering Butterworth Hospital for examination and treatment.

Harold Geiken has opened up a shop on Antrim street where he will handle a line of automobile tires as well as a full supply of accessories used in connection with and by owners of automobiles.

Miss Belle Roy of East-Jordan, was a business visitor here last week; her first visit here for some months, having spent the winter months in California and but recently returned from that western state.

All members of Baxter W. R. C. are requested to meet with the committee at the home of Mrs. John Miller, 709 State St., Tuesday afternoon, May 18, to make final arrangements for Decoration Day.

Grays Reef lightship, after occupying a berth in the inner harbor at this port for several days, sailed last Tuesday for her summer station where she will continue as an aid to navigation during the summer season.

There will be a Silver Medal Declamatory contest at 5 p. m. next Sunday at the Methodist Church under the auspices of the W. C. T. U. Several local young people will compete. The public is invited.

The regular meeting of the Woman's Missionary Society of the Congregational church will be held at the home of Mrs. E. E. Cross on Wednesday, May 19th at 2:30 p. m. Topic, "The Mexicans above the border."—Leader, Mrs. Allan Campbell.

Everett Cole, of St. James, is spending a little time here this week on business.

Attorney Lisle Shanahan is in Cheboygan this week on professional business.

Mrs. M. J. Clark, a visitor in Boston, Mass., for several months, returned to Charlevoix last Tuesday.

Messrs. Harry A. Craig and B. A. Herman motored to Grand Rapids yesterday on a combination trip for business and pleasure.

Commissioner A. C. Belding made a trip to St. James Wednesday in connection with the work in the schools under his supervision.

Request is specially made that all members of Baxter Post W. R. C. make preparations for attending Union Memorial service to be held in the First Congregational church Sunday, May 30.

Mrs. George Cook, who spent the winter months with her son in St. Petersburg, Fla., returned to Charlevoix last Monday accompanied by her grand daughter who will remain here during the summer season.

Judge Parm C. Gilbert is spending a little time here on business connected with official position and in consultation with county officials relative to some legal matters that are assuming proportions that to some considerable extent attracts notorious comment, locally at least.

Superintendent George Coverdale is spending this week on business connected with Charlevoix schools, in Saginaw, Ypsilanti, Ann Arbor and other cities, the matter of special interest being that of completing the list of teachers in the Charlevoix educational department for the coming year.

Dame Rumor has it that Charlevoix has an affliction in shape of a woman that is dispensing for a consideration, some sort of an intoxicating concoction to some few patrons who are not particular as to the quality of the liquid, but more interested in the direct result produced by partaking of the beverage.

Several complaints have been made recently by automobile owners that their supply of gasoline has been drained from their machines during the hours of the night or while standing in their garage. This is attributed to local depredators, who, on a small scale, are nefariously inclined, making for more or less annoyance to owners as well as a direct financial loss. In the main it is the opinion of the parties interested that these petty practices are due to the talent of some members of the young set who are great joy riders but are short on change with which to purchase gas and adopt this method in order to indulge in their greatest pleasure.

FREE! A genuine Gillette Silver Plated Safety Razor with each purchase of a 35c. tube of Palm Olive Shaving Cream. We have a limited supply. Get yours now. FESSENDEN the Druggist.

McCoofs Velvet Ice Cream now on sale at Smith's Confectionery Store—County Bank Building. 2-2t

Mr. and Mrs. Harold Hallett returned to Charlevoix last Sunday from French Lick, Indiana, where they spent part of their honeymoon trip. They will soon take up their residence at 214 East Upright Avenue, where they will be at home to their friends. This popular young couple were married at Waukegan, Ill., May 1st, news of the event reached friends here by wire at that time and was the occasion of considerable surprise as the ceremony was not expected at that time. However the surprise was a most agreeable one. The young couple have a host of friends and they are receiving congratulations and best wishes from everyone. Mrs. Hallett was formerly Miss Margaret H. Krulik.

Motored Up from Southern Pines

Mr.A. I. Creamer returned from Southern Pines, North Carolina, last Tuesday and for some time will be busy with improvement work at the Inn in order to have the hotel in ready for an unusual business this season—which from the present outlook bids fair to exceed any past record at the big resort hotel.

Though exceptionally well equipped with modern conveniences many new improvements are under contemplation or in process of construction and installation that will add materially to the convenience and comfort of the summer guests. This work not only requires personal supervision by Mr. Creamer but also an expenditure of an enormous fund in order to meet present day requirements of visitors.

The date for opening the Inn has tentatively been set for July 1st but this date may be advanced several days depending on earlier prospects and the necessity for opening at some prior date. Be that as it may be under consideration will be rushed and if the exigencies of the case demands the hotel will be for the public early opening of the season considerably before the date now under contemplation.

Charlevoix Free Library

Circulation record of Charlevoix Free Library for month of April, 1926:

Philosophy, adult 1, juvenile 0; Religion, adult 4, juvenile 1; Sociology, adult 9, juvenile 10; Science, adult 10, juvenile 4; Useful Arts, adult 5, juvenile 7; Fine Arts, adult 10, juvenile 8; Literature, adult 60, juvenile 7; History, adult 6, juvenile 1; Travel, adult 10, juvenile 6; Biography, adult 24, juvenile 1; Fiction, adult 680, juvenile 425; Total, 1,279.

Congregational Church
Rev. B. G. Mattson, D.D., Minister

At 10:30 morning worship with sermon by the pastor on "The Bible as a Searcher of the Human Heart." Sunday School at twelve; Young People's societies meet at 6:30 The pastor conducts a service of worship and sermon at the Ironton church at 2:30 to which Charlevoix friends are invited.

A group of new officers were elected at the church meeting last Sunday. A church committee on Benevolence—Mrs. Saltonstall, Mrs. John Burns and Mrs. Dean. A Social Service Committee—Mrs. Roto Taylor, Mrs. Allen Campbell and Mrs. Charles Novak. An Auditor—Mrs. Archie Livingston.

A special meeting of the church and all friends was announced for Thursday night, May 13, to be an indoor picnic to be held in the church dining rooms at 6 p. m. Everybody is asked to bring a basket with their own supply of food and dishes. The committee will serve coffee. A brief program of business, worship and social fellowship will follow, closing in ample time for all who wish to attend the band concert held at 8 p. m. as otherwise announced. At this meeting we expect to elect a delegate to attend the coming state convention of Congregational churches at Grand Rapids May 18-19-20.

Methodist Church.
C. E. Pollock, Pastor.

Next Sunday promises to be of special interest and value in church activities. The pastor will be the morning preacher at the regular hour of worship. The Junior church will also have its recognition at this time. At five o'clock in the afternoon there will be a union vesper service in the church, an outstanding feature of which will be a Prohibition Medal Declamation Contest, participated in by members of the various Sunday Schools. The public is cordially invited to be present at both these hours of public service.

The Sunday School is doing excellent work this spring. Great plans are being made for Children Day, and the detailed announcement will be given in the near future.

The Epworth League will meet for their great Sunday evening hour next Sunday at six thirty o'clock.

The Ladies Literary and Sewing Club meets with Mrs. George Trimble on Wood street, Thursday afternoon, this week.

Baptist Church
Rev. Herman Burns, D. D.,
—) Pastor (—

Edgar A. Guest says:—
"Good friends are few;
Not many, if you lived a hundred years,
You would discover, who,
Through all life's care and hurt and grief and tears
Would stay by you."

We love to tell the story of One Friend who will never leave nor forsake thee. We have no other story to tell, but we do try to tell about Him in such a way that the story will not become monotonous.

Two large audience gathered with us last Sunday and helped to make it a day of profit and the occasion of happy fellowship. We extend a cordial invitation to all who are not worshiping elsewhere to meet with us for another such day May 16. "The Ethics of a Strike" will be considered in the morning service. Our consideration will be more discerning while England is experiencing the real thing. For this we should devote time and study lest sometime we should have the experience.

We have yet to learn if a newspaper or a prominent public man who is opposing prohibition now, who made any great effort to secure prohibition before 1916. In a general way they were just as wet then as now. There is no doubt that Senator Pepper is right in his arraignment of the Drys that when they secured the law they abandoned the teaching of the evil effect of alcohol. Let the churches revive that instruction. It is just as poisonous now as it ever was, and is responsible to our wet friends, making more criminals and violators of law now than ever before. We will talk about it Sunday evening.

Mrs. Eccleston, of Petoskey, a former resident of Charlevoix, will be buried from the Baptist church Wednesday.

An informal reception will be given to our members who have been away from the city and have returned, on Friday evening at the pastor's home, 102 East Huribut Ave. We are glad to have them home again.

Church of God
Rev. Paul L. June, Pastor

Our Sunday School elected its officers and teachers for the coming year on May 2nd.

Come and study these lessons with us.

Our new minister is with us and we want you to come and meet him.

If you want to hear the gospel come to—

Preaching Sunday a. m. 10:30.
Sunday School 12 m.
Young Peoples Service p. m. 6:30.

CHAPTER XX

—27—

One bitter day in the middle of January six lean dogs, heads down, limped painfully across the clearing at Walling River. At the tail of the sled followed two men, whose haggard eyes and frost-cracked faces bore the scars of the barrage of the January blizzards.

"We have worried much, Michel and I," said the factor, as Steele and David thawed out before the trade-house stove. "You struck terrible weather. Did your rations hold out?"

"Yes, by cutting them in two," replied Steele with a grimace.

"We'll give you your fill as soon as it can be cooked. And your mission—It was successful?" hazarded the curious St. Onge, ignorant of the purport of the six-hundred-mile midwinter journey.

"It was," and Steele handed the factor the oil-skin envelope. "Read that!"

St. Onge read the release in open-mouthed amazement.

"Man, man! How did you get it?" he gasped.

Steele described his meeting at Albany with Lascelles.

Unchecked tears slowly gathered in the eyes of the overjoyed old man. "My boy," he said brokenly. "It would be the proudest day of my life. You still care for her, don't you?" he demanded anxiously.

"You know I care for her," Steele gently answered, "but I went to Albany for her—not for myself. You must promise me that she hears nothing of this until I have left. She would think she had to pay—feel honor bound. I know her, monsieur. You must not tell her."

"But if she cares? I feel, in her heart, that she does," protested St. Onge.

"She must be a free agent," insisted Steele. "I go south as soon as the dogs are rested. I shall talk to her first."

"I'm sorry, but as you wish it, I shall not tell her."

That night, after what, to the hungry Steele, was a sumptuous meal, consisting largely of caribou, St. Onge left his guest and daughter alone.

During the meal the girl had furtively noted the frostbitten fingers of the American, the drawn cheeks, blackened and cracked by the wind of the Albany trail, the shrabied look in the gray eyes. Steele had warmed to the sincerity of her welcome, the evident pleasure in her greeting. Exhausted as he was, the days before his departure were too few to waste one evening by seeking rest, so he watched her with hungry eyes as they talked, wondering whether her heart had changed. But she gave no sign, and he was too proud to ask.

On the evening before he left with David for Nepigon, he again sat alone with the woman for whose welfare he had given the best that was in himself, for whom he had toiled and planned, faced the sting of the norther and the pinch of the searing cold; the woman he loved too deeply to make himself the recipient of her gratitude.

"You have never told me, monsieur, why you took that terrible journey to Albany," she said, after a silence in which her black brows were drawn together in evident abstraction.

The man's eyes softened as they lingered on the clean lines of her profile, the masses of her dusky hair, for she had asked the question with averted face as if fearing his answer.

"I went to Albany," he said, "to see my judgment of human nature."

"And you found—?"

"I found—that I was a mind reader," he answered with a smile.

"Is it a very great secret?" she asked with a wistful look in the dark eyes that searched his.

"No, you will hear—tomorrow."

"But, tomorrow—you go?"

"Yes."

"And I am not to know until you have gone? So that is it?"

"You will understand—tomorrow," he put her off with.

For a long interval she sat gazing at the rug at her feet, then leaned toward him, her face tense with feeling. "What must you think of me?" she demanded. "You have planned and worked for us, my father and me—given—given—given! And we—we have sat with folded hands while you toiled—and won. Oh, I want you to know how fine you have been through it all—want you to sense my gratitude—before you go."

She had risen and was pacing the floor—restraint gone.

"I have been selfish—inhospitable," she stumbled on, her eyes avoiding his, "but I want you to know that there is nothing—nothing which I will not do—to prove my gratitude for what you have done." She turned from him and he knew by the convulsive movement of her shoulders that she was weeping.

"There are some things without price," he said gently. "What I have done, I have not done—for reward. I know—that I have your gratitude—it is enough."

She turned swiftly upon him with: "But if you knew—"; seemingly confused, checked by a surge of emotion she could not control, she stood for an instant, inarticulate; then left him alone.

* * * * * * *

Late in February, long after the last of the fur cached at the Stooping had been traded with St. Onge, a dog-team driven by a strange Indian arrived at Walling River. To the surprised questions of the factor the driver answered that he had come from Nepigon station with a package and a letter addressed to Mademoiselle Denise St. Onge. The factor took the long, woven box and the letter to his quarters, where he found his daughter with Charlotte in the kitchen.

"A packet has arrived from Nepigon," announced the excited St. Onge. "With a box and a letter for you, for child."

"A letter for me?" she said, a wave of color sweeping her face, while St. Onge watched her curiously.

In the living room Denise St. Onge opened the letter, postmarked Kenora, and read:

"Mademoiselle St. Onge:

"Walling River."

"What I wrote you at Ogoke last autumn was a lie. I am sorry.

"Rose Bernard, formerly Laflamme."

The paper slowly slipped from the fingers of the numbed girl and fluttered to the floor.

"What is it? Who is it from?" demanded her father.

The face of Denise St. Onge was the color of chalk as she raised her hopeless eyes. "He went to Albany for me," she said, as if to herself, "and would not tell me I was free, fearing my gratitude. And now—I receive this."

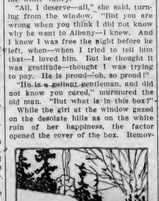
"But what is it?"

"Read for yourself, father," and the stunned girl walked to a window, and gazed with dry-eyed sorrow out on the white valley.

"Ah, I deserve—all," she said, turning from the window, "But you are wrong when you think I did not know why he went to Albany—I knew. And I knew I was free the night before he left, when—when I tried to tell him that—I loved him. But he thought it was gratitude—thought I was trying to pay. He is proud—oh, so proud!"

"He is a gallant gentleman, and did not know you cared," murmured the old man. "But what is in this box?"

While the girl at the window gazed on the desolate hills as on the white ruin of her happiness, the factor opened the cover of the box. Removing the heavy wrappings of paper protecting the contents, he gasped in surprise.



He Had Come From Nepigon Station With a Package and a Letter Addressed to Mademoiselle Denise St. Onge.

"Mon Dieu, mon Dieu!"

The girl turned from her bitter retrospection. "What is it?"

"Come here!"

She joined him and bent over the box. In its wrappings lay the ebony case of a violin. On the lid of the case letters of gold spelled: "Nicolo Amati, Cremona."

"An Amati!" she cried in her joy. "A priceless Amati!" Then, brokenly, "Father, father! I am paying—I am paying!"

With feverish haste the key was found and the case opened. She tenderly lifted the rare handiwork of the world-famous maker from its bed of velvet, and impulsively caressed it with her cheek.

"And he sends no word—no letter?" cried the perplexed St. Onge.

She smiled at his naïveté. "There is no word to send, father. He is sorry there, in his gay New York, for the lonely woman he once knew in the wilderness. This," and she held aloft the violin, "is his anodyne for the desolate—the symbol of his pity."

* * * * * * *

It was May, and Brent Steele had been hard at work at the mission for three months. In March he had received two letters brought from Walling River by the messenger sent with the violin. The letter from the factor was strained and self-conscious. Together with brief mention of the arrival of the fur from the Stooping, St. Onge had profusely thanked his friend for the costly gift which had made the long evenings again bright with music. But of Denise he said little, except that she was well and played incessantly. So much had happened that the winter seemed unsubstantial—long—to Steele, in their nerves, and the spring would be most welcome. Some day, St. Onge suggested, it might be possible for Steele to revisit the valley of the Walling. He knew the way and his friends there would live for that day.

The other letter was shorter. It ran:

"Dear Monsieur Steele:

"A violin—and a Nicolo Amati! Your generosity and your thought of me make these words but feeble things. You, to whom gratitude is distasteful, must yet endure my heartfelt thanks, not only for the rare gift, but for the journey you made for my peace of mind and that terrible wind and cold. The violin will ever be a living memory of one who came, a stranger, to two lonely and hopeless creatures, and left them, facing the future with courage.

"Denise St. Onge."

If only the letter had given him a sign that she wanted him—needed him instead of dwelling on her gratitude. She was so proud and so brave. If only he had taken her in his arms that last night, and learned from her eyes, the blood in her face, the beat of her heart, whether she was paying a debt of honor or—loved him.

Then, late in May, came a letter—addressed by a hand unused to the pen, and postmarked at Nepigon station on the Canadian Pacific. David doubtless had news and some one had written for him. Steele opened the envelope and read with increasing wonder and delight:

"Mister Steele—

"Is you weesh manuel you burn up de rest? Is by de fire de flower grow. All de long snow she have play an play de sad mussee an cry on her bed, but now she go on hill first tam she lift her arm to de sout an say, Cum bak to me. Dat mean you. You cum bak de win. Michel tak dis to de railroad, he an me get marry wen messnary cum in June.

Charlotte."

It was from the faithful Ojibway woman who had for so long faithfully served Denise.

That night the Montreal sleeper out of New York carried a man whose gray eyes were strangely happy. A week later two friends were poling the nose of a canoe into the spring freshet of the Jackfish as if pursued by a Windigo. Farther on they recklessly run in succession each whitewater of the swollen Rouge. Down Ogoke, the measured churn-swish, churn-swish of lunging blades marked off the miles to the outlet. Then riding the flood-water of the racing Walling, one afternoon the canoe slid into the beach of the post.

In the trade-house Steele and David found St. Onge and his head-man. There were surprised greetings, then: "I have come for her," announced the American. "Where is she?"

"She has gone to the ridge," answered St. Onge with shining eyes. "You will find her with her violin—alone."

At the edge of the scrub, below the bare brow of the hill, Steele stopped, with a heart which jarred him with its leap. He wanted to watch her—listen to her playing—before making his coming known. With a shaking hand he parted the spruce and looked.

Silhouetted against the soft May sky, she stood with her violin, facing from him. Presently she tilted her head and drew the bow across the strings. Faintly drifted down to him the haunting minors of the "Elegie" by Massenet, the love-song which revisits the valley of the Walling. He knew the way and his friends there would live for that day.

The other letter was shorter. It ran:

"Dear Monsieur Steele:

"A violin—and a Nicolo Amati! Your generosity and your thought of me make these words but feeble things. You, to whom gratitude is distasteful, must yet endure my heartfelt thanks, not only for the rare gift, but for the journey you made for my peace of mind and that terrible wind and cold. The violin will ever be a living memory of one who came, a stranger, to two lonely and hopeless creatures, and left them, facing the future with courage.

Searching for the Lost Coin

By REV. GEORGE E. GUILLE
Extension Superintendent, Moody Bible Institute, Chicago.

TEXT—Either what woman having ten pieces of silver, if she lose one piece, doth not light a candle, and sweep the house, and search diligently till she find it? And when she hath found it, she calleth her friends and her neighbors together, saying, Rejoice with me; for I have found the piece which I had lost. Likewise, I say unto you, there is joy in the presence of the angels of God over one sinner that repenteth.—Luke 15:8-10.

In the first part of this fifteenth chapter of Luke, our Lord answered,

Rev. G. E. Guille.

in His own behalf, the complaint of the Pharisees against His reception of sinners. In this second part He answers, partly in behalf of the Holy Spirit.

The central figure here is a woman, one of the Bible's well-known pictures of the church of God. And thus directly does the Lord represent the Holy Spirit in the lower ones, who lie directly the figure of all the saints. For the Holy Spirit works through the Word of God, having no other instrument. But the Word is proclaimed by His people, and this is the church's commission and her only one.

And in keeping with this do we see the lamp lighted for the search. With that lamp, however reflected by the world, it is slight, and how great is the need for this light in the darkness! The Spirit, working through the Word, in the hands and on the lips of God's people, is the sufficient, as the only light to search out the hiding place of the lost coin.

A lost piece of silver! In this the Lord reveals the value of a soul to Him. The ransom money in Israel was paid in the silver half-shekel, and in that which this symbolizes, the precious blood of Christ, the value of a soul for God is seen. "What shall it profit a man if he gain the whole world and lose his own soul?"

So the woman sweeps the house, And upon her knees get the work, for the short broom of the East made this necessary. And herein the Lord sets forth the church as it should appear according to His own mind, on her knees, diligently seeking for the souls that He prizes so highly. And though it raises the dust, this sweeping cleans the house and finds that which is lost. The church needs this cleansing and the dust must at times be raised, for men must be stirred up about their careless ways, about their sins and about their disregard for the law. All revivals have exemplified this method.

But it is the house that is swept. And this reminds us of the responsibility of each individual among those who compose the church of God. It is in the family and among his own kinsmen and friends that he is to search out the lost, and where he shall find the greatest gain. The testimony in the house and to the most familiar circles is the most fruitful for God. He first findeth his own brother and he brought him to Jesus" is written of Simon Peter's brother. And he that is faithful here shall find the sphere of his service ever enlarging and the service itself of increasing power.

And here again, as in the parable of the lost sheep, we hear of joy in heaven over one repenting sinner. "Likewise, I say unto you, there is joy in the presence of the angels of God over one sinner that repenteth." Before His own disciples ministers of His mind, sanctified by the Holy Spirit, He answers,

"TEDDY'S" DOUBLE

John M. Keyes of Concord, Mass., who many declare to be a perfect double of the late President Theodore Roosevelt.

183,000 Ladybirds a Profit to Insectary

Los Angeles, Cal.—A checkup just made on the Santa Barbara county (California) insectary, established two years ago, shows that a small profit has resulted from the operation of the plant, according to F. C. Greer, entomologist in charge. After all expenses including salaries were paid and 10 per cent allowed for depreciation of buildings and equipment, the county made a profit of $100 from the sale of 183,000 ladybirds at 2 cents each, Mr. Greer found.

The first year the insectary was in operation the county raised 50,000 ladybirds, which cleaned up nearly bug infestations in a number of Carpinteria lemon orchards. The nearby bug, however, has been spreading rapidly, although prevented from doing much damage by its enemy insects. This year Mr. Greer will try to raise 200,000 bugs in an effort to keep the lemon orchards commercially clean.

The indybird is being employed not only in the lemon orchards but in the walnut orchards as well, and on lettuce and other vegetables.

Service for One

Little Rock.—Because its sole subscriber opposed discontinuance of the service, the Sheridan Telephone company has withdrawn its petition to discontinue the service between Sheridan and Sprague, Ark.

Call Saves Teacher Overcome With Gas

Superior, Wis.—A friendly visit to learn why Mrs. Helen L. Barbano was not present to instruct her Eaglish classes at Central high school saved the life of the teacher.

When Miss Nellie McConnell, also a high school instructor, called at Mrs. Barbano' home she found the woman lying unconscious on the kitchen floor and gas pouring from an open jet on a range. Water being heated had boiled over and put out the flame. The teacher is recovering.

Only One Man Can Wear Hat in King's Presence

London.—Michael Constantine de Courcy, Baron Kingsale, is the only man in the United Kingdom who may, if he wishes, keep on his hat in the presence of the king.

The peer enjoys this curious privilege by virtue of an hereditary prerogative granted to Sir John de Courcy in the reign of King John, for conquering Ulster. History records that this privilege has been exercised on but the last occasion being—1859 when John de Courcy, successor to Gerald, Lord Kingsale, stood with his head covered in the presence of Queen Victoria.

HISTORY IN CAKE

This replica of historic Independence Hall in Philadelphia is a fine example of the baker's art. It was made by the chef at one of Philadelphia's leading hotels to advertise the Sesquicentennial-International Exposition, which will open in that city June 1 and run to December 1 to celebrate the 150th anniversary of American Independence. The "State House" stands on a table at the entrance to the main dining room of the hotel.

Small Girl Slightly "Under the Weather"

The Mexican Indian dislikes nothing so much as unnecessary labor. He is disposed to take life as he finds it, and seldom does anything to better his position in the world. An American hunting in the Sierra of Pueblo, stopped at the door of an Indian hut to inquire his way of a woman and a little girl who stood within. The following conversation ensued:

"Good morning, senora."

"A very good morning, at your orders, senor."

"This is the road to Zuzupoxtla, is it not?"

"Yes mr quite right, senor."

"And is it very far?"

"On the contrary, it is a little way."

"A thousand thanks for your kindness, senora."

"There is nothing for which to offer them," senor."

"Is the little girl sick, senora?"

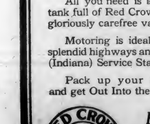
"She is a little sick, senor."

"What is the matter with her, senora?"

"She has the smallpox, senor."—Exchange.

Harness for Dogs

The ordinary style of harness used for dogs drawing sleds is made of rawhide straps. It consists of a collar with a strap extending down from the back of the neck to the middle of the back, where it meets a strap which passes from the lower part of the collar between the forelegs and up on each side over the ribs, to be attached to the back strap; at this point is made also the leading line, which is from three to five feet long, and is attached either directly to the front of the sled or to a single straight leading line fastened to the sled and extending forward to a distance sufficient for the attachment of all the dogs belonging to the team. When the team consists of more than three dogs, they are attached to the main leading line in pairs, with the most intelligent dog in front as a leader.



Out Into the Open

in your own car! With the whole countryside spread out before you and alluring roads in all directions, you are king of all you survey.

Emperors of old had no sport to be compared with motoring—up hill and down—over meadow and valley and stream—the great bowl of the sky above—golden sunlight and fresh, clean wind, bearing fragrance of wild flowers and fruits.

There are scores of interesting wonder spots just around the corner. Look over this short list and see what is near you.

1—The picturesque Badlands of South Dakota remarkable for their unique brilliance of coloring and their prehistoric fossil remains. State Highway No. 40 from Rapid City to Scenic.

2—Pancion Lake Vermillion, one of the largest lakes in Minnesota, containing 365 wooded islands and surrounded by forests. Near Tower, State Highway No. 35.

3—The cool lake front of Northern Michigan, the Upper Peninsula, State Highway No. 91 from Menominee to Escanaba and around Big Bay de Noc.

4—A natural bridge over which automobiles can travel. Near Mesquites, Iowa. State Highways No. 20 and No. 61.

5—The University of Kansas on the top of Mount Oread with the valley of the Kaw River below and sweeping view of the plains. At Lawrence on Bell Stat Route No. 23 and Victory Highway No. 15.

6—Red Banks, formerly a populous Indian city of fascinating historic tradition, on the shore of Green Bay, Wisconsin. Rich in Indian relics. About twelve miles northeast of the city of Green Bay. State Highway No. 78.

7—Greenfield, Indiana, the birthplace of James Whitcomb Riley. Beautiful spots nearby that have been immortalized by him. State Highway No. 3.

8—The cattle ranch on the banks of the Little Missouri, where Theodore Roosevelt learned to love North Dakota. State Highway No. 10.

9—Giant City—a corner from the "Garden of the Gods" near Makanda in Jackson County, Illinois. Caves, precipices, wind-carved stone columns and strange floral life. A few miles off State Highway No. 2.

10—Onondaga Cave, rich in gorgeous formations of onyx with magnificent vaulted chambers that musically echo the sounds of roaring torrents. Southwest of St. Louis, Missouri, near Leasburg. State Highway No. 14.

All you need is a good road map and a tank full of Red Crown Gasoline for the most gloriously carefree vacation of your life.

Motoring is ideal in the Middle West—splendid highways and Standard Oil Company (Indiana) Service Stations wherever you go.

Pack up your troubles, *leave* them, and get Out Into the Open!

Chest Not a Factor in Length of Life

The man with the narrow chest is in a quandary. Physical culture experts of some kind say his chances for long life do not compare with those of a broad chested man. Those of no other decline his counsel on equal and now the longevity company stat. istician has come to should live longer than his brethren.

Should he seek relief or cringe when like father asserts "Chest, thirty inches," across the room to his assistant? Nobody seems to know.

Dr. Louis I. Dublin, insurance statistician, in an address on "Body Build and Longevity" delivered the other day at Johns Hopkins, declared as a result of recent investigations the view almost universally entertained, even among members of the medical profession, that the broad-chested man is the healthier and is likely to enjoy longer life, has been found to be fallacious.

"The man with the narrow chest," he asserted, "whether he be tall or short, fat or thin, stands a better chance than his broad-chested friend of attaining old age."

Frank Lynch, athletic director in New York, agreed with Doctor Dublin.

"The man with the big, broad swelling chest does not necessarily have a large lung capacity," he said. "Often I have noticed while giving chest tests that men who seem to have narrow chests and small lungs have greater capacity than the man with the broad chest.

"The reason for this is that the lungs of the broad-chested man are short and do not reach well down into his body. Those of the narrow-chested man do."

Notice of Letting of Dock Improvements

Notice is hereby given, that the undersigned will receive sealed proposals for the repairing and improvement of the wharves on Round Lake abutting on public grounds and, and in front of parts of Block 5 of the City of Charlevoix, in accordance with plans and specifications therefor on file at my office, up to five o'clock p.m. of Monday, May 24, 1926.

Each bid must be accompanied by certified check in a sum equal to 5 per cent of the bid, payable to the City of Charlevoix, as guaranty that the bidder will, if required, enter into contract and bond to construct the work in accordance with the terms of his bid. The city reserves the right to reject any or all bids, and to require the division of bids as specified in the resolution the efor adopted by its Council.

Dated May 10th, 1926.

H. S. PAYTON,
Deputy City Clerk.
City of Charlevoix, Michigan.

LEGAL NOTICES

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Frederick Yahr and Sophia Yahr, his wife of Hayes township, Charlevoix county, Michigan, unto Mary Zipp of the city of Petoskey, Michigan, dated January 26th 1921, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 26th day of January, 1921, in Liber 68 of mortgages on page 279, on which mortgage there is claimed to be due at the date hereof for the sum of One Thousand Three Hundred Seventy and 06/100 Dollars, including the principal sum due with interest; and a further sum of Four Hundred and Eighty Nine and 17-100 Dollars, being taxes and interest thereon paid by the mortgagee on the land and premises herein described, together with an attorney fee of Thirty Five Dollars as provided for by the said mortgage, and no proceedings at law or equity having been had to recover the money secured by said mortgage, or any part thereof, and whereas, the taxes required by the statute to be paid on said mortgage was duly paid prior to the recording thereof;

Now Therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided for in said mortgage and also including the taxes paid by the mortgagee, at Public Auction, to the highest bidder therefor, at the front door of the Circuit Court House in Charlevoix, Charlevoix county, Michigan, (that being the place where the circuit court for the county of Charlevoix is held), on Friday, the 25th day of June, 1926, at ten o'clock in the forenoon on that date.

The premises described in said mortgage being the lands and premises situated in the Township of Hayes, county of Charlevoix, state of Michigan, viz: The east one-half of the Southeast quarter of Section Eleven in township Thirty-four, North, Range seven west, containing eighty acres of land, more or less, according to the government survey thereof.

Dated March 19th, 1926.

MARY ZIPP,
Mortgagee

Claimant names as witnesses:
Paul Nagoni, of St. James, Michigan
William Rattice, of St. James, Michigan
Peter Nagoni, of St. James, Michigan
George Nenings, of St. James, Michigan

D. C. PARROTT,
3-5t Acting Assistant Commissioner

Rarefied Air Used for Killing Moths

Washington.—Mountain climbers and aviators are familiar enough with the disabling and even deadly effect of rarefied air, but it has remained for scientists to utilize thin air in beneficial ways.

E. A. Back and H. T. Cotton of the Department of Agriculture have first reported on the work they and others have done in using rarefied air to kill insects in stored articles subject to their depredations. They have found that moths and other insects inside a locked trunk may be killed by exposure for a few days to atmosphere from one-fifth to one-thirtieth of normal.

A trunk was placed in a vault from which almost all the air was exhausted and after two days all the moths were found to have been killed and a few days' longer exposure killed other insects.

The method is said to be more effective than fumigation.

NOTICE

BOARD OF REVIEW.

Notice is hereby given that the Board of Equalization and Review of the City of Charlevoix in the County of Charlevoix and State of Michigan, will meet in the Council Rooms in the basement of the Carnegie Library, in said city, on Monday the 17th day of May, 1926, at nine o'clock in the forenoon, for the purpose of reviewing and revising the assessment rolls of the several wards of said city. The said board will continue in session for at least six hours each day for at least four successive days thereafter, or until the completion of such revision and review.

3-3t Judge of Probate.

STATE OF MICHIGAN—The Circuit Court for the County of Charlevoix—In Chancery.

Joseph W. Locke, Plaintiff
vs.
Reuben Hetson, or his unknown heirs, devisees, legatees and assigns; John Verly, or his unknown heirs, devisees, legatees and assigns; John R. Struthers, Andrew Struthers, Charles W. Struthers, Robert R. Struthers, Amelia Howe, Lucinda Haggerty and Viola Peterson, known sons and daughters of Andrew R. Struthers, deceased, and all the unknown heirs, devisees, legatees and assigns of the said Andrew R. Struthers, deceased; Elizabeth Struthers, widow of Andrew R. Struthers, deceased; Matilde C. Lisenby, or her unknown heirs, devisees, legatees and assigns; Howard Brooks and Francis I. Griffith, known children and heirs at law of Fanny I. Brooks, deceased, and all the unknown heirs, devisees, legatees and assigns of the said Fanny I. Brooks, deceased; Michigan Mortgage Company, limited; Anthony DeLordt, or his unknown heirs, devisees, legatees and assigns; and Richard C. Lewis, Defendants.

Suit pending in the Circuit Court for the County of Charlevoix in Chancery in the city of Charlevoix on the 14th day of April A.D. 1926.

In this cause it appearing that it is not known whether the said Reuben Hanson, or his unknown heirs, or the said Matilda C. Liscombor the said Howard Brooks, or the said Francis I. Griffith, or the said Anthony DeLoup, each or any of them is living or dead, or whether each or any of them may reside, if living; and it appearing that Viola Peterson, known as one of the Struthers are residents of the state of Oregon and that it is unknown whether Andrew Howe or Lucinda Haggerty reside in the State of Michigan or not; and it appearing that it is unknown whether the Michigan Mortgage Company, Limited is in existence or not and is also appearing that none of its officers or any person upon whom service or process may be made. It is ordered on motion of Lisle Shanahan, attorney for the Plaintiff, Joseph W. Locke, that the defendants, Reuben Hatson, John Verly, Matilda C. Lisenby, Howard Brooks, Francis I. Griffith and Anthony DeLong, each of their unknown heirs, devisees, legatees or assigns, and all the unknown heirs, devisees, legatees and assigns of Andrew R. Struthers and Fanny I. Brooks, deceased, enter their appearance in said cause on or before six months from the date of this order and that within twenty days the plaintiff cause this order to be published in the Charlevoix Sentinel a newspaper printed, published and circulated in the said county of Charlevoix once in each week for six consecutive weeks, or that said plaintiff cause a copy of this order to be personally served on said defendants at least twenty days before the time above prescribed for their appearance. The above cause is for the purpose of clearing and quieting the title to Government Lot One and Two in Section thirty-and the south one-half of the northwest quarter of Section-twenty-nine in township thirty-four north, range seven west in the said plaintiff.

TEETH TURN PURPLE WITH RARE DISEASE

Weird Ailment Makes Sunlight Unbearable.

London.—A weird and rare disease that turns the teeth purple and makes sunlight on the skin unbearable was discussed by Prof. J. Barcroft, well-known English physiologist, in a lecture before the Royal Institution.

The affliction is so rare that there are only three known cases in England at the present time, but it is of special interest to physiological and medical science because the purple substance, porphyrin, is closely allied to the red material, hemoglobin, that gives blood its color. Subtracting its iron and albumen from hemoglobin by appropriate chemical means leaves porphyrin.

No one knows yet why the bodies of these unfortunate persons should be manufacturing the wrong pigment. Professor Barcroft said, but the fact remains that it is constantly being formed and deposited in their bones, teeth and skin. Porphyrin reacts strongly to the "invisible light" or ultraviolet part of the solar spectrum, so that the weakest of this mysterious ailment have to wear gloves constantly, and if they go out-of-doors in the daytime must put on heavy veils.

The only creature that normally wears porphyrin as part of its body covering, Professor Barcroft said, is a tropical bird, the touraco, parts of whose feathers are stained a brilliant red with a porphyrin-copper compound. Some of the touraco. This pigment is further remarkable because it seems to be the only normal occurrence of copper as a coloring compound in feathers or skin. Turacin is soluble in weak alkali, so that when it rains and the bird comes into contact with such alkaline solutions as occur frequently in nature, the poor touraco bleaches out.

Although porphyrin is rare as a normal coloring to adult animals, it is the commonest pigment found in eggshells of birds. Almost all the colors of birds' eggs, from the blue of the robin's to the loosely brown of the hen's, contain this strange coloring matter.

French Tricolor

The tricolor was chosen as the national emblem of France because it combines the colors of the nation and its capital. Red and blue are the colors of Paris, while white is the color of France.

Two Fire Causes

Electric light wires hung over nails and oily rags thrown into a corner are two of the things which give the insurance papers stories about "fires of unknown origin."

STUDENTS OF HIGH SCHOOLS GATHER

Youngsters Held Annual Conference Last Week.

More than 1,000 students from the high schools of Michigan which teach agriculture and home economies under the provisions of the Smith-Hughes law, gathered at the Michigan State college last week for their annual conference, or Junior Farm Week.

The youthful farmers and farmerettes came from 137 different schools, scattered all over the state. Class work, banquets, and general recreational events featured the conference, which was the largest of its kind ever held in Michigan.

Twelve Stills Along With Moonshine Taken in Raid

Iron Mountain, Dickinson county, reached a high point of notority, a condition that still continues, a few days ago when Prosecuting Attorney MacAllister and federal authorities working in conjunction procured and had served nearly one hundred warrants in which defendants were charged with some form of liquor law violations. Fifteen defendants were charged with operating stills illegally. In the raids made officials secured twelve stills and a huge supply of moonshine liquor. The raids and serving of warrants was the cause of no small amount of excitement in the contraband service district. This is probably the largest raid and most concentrated effort that has been made in the nort country to put the boot-legging business and will no doubt check active operations along this line for a short time.

THIRTEEN NEW MEMBERS REPORT

HELD FRIDAY AFTERNOON

May Meeting of Women's Christian Temperance Union

There was a large attendance at the May meeting of the W.C.T.U. held last Friday evening at the home of Mrs. McMillan. Thirteen new members were reported as a result of the membership campaign. A proposed amendment to the constitution was read which if passed will change the time of electing officers from December to October, the officers elect to submit their plan of work and begin their term of office at the close of the December meeting.

The Social dept. was authorized to arrange for the planting of memorial trees. A special Independence Day committee was appointed with Mrs. Alcox as chairman. Mrs. Ada Dohrman, or the assistant topic "Better Homes" was much appreciated. The June meeting is scheduled for the latter church with Mrs. Nordrum as leader, topic, "Community Housekeeping."

Silver Medal Declamatory Contest Methodist Church

The Silver Medal Declamatory Contest held last Sunday afternoon at the Methodist church, was an interesting occasion and well attended. The contestants and their topics were as follows:

Helen M Campbell, "The Wise Man."
Jane Superman, "Lincoln's Attitude."
Harold Newman, "The Spider and the Fly."
Stanley Hamaiond, "Why Women Cry Distress."
Marguritc Gimble, "Freedom."
Hiett Shanahan, "Your Flag and My Flag."

All received handpainted cards as keepsakes, while the contest was awarded to Stanley Hammond. All spoke not receive the prize but all helped in a good cause.

MRS. S. A. CORRELL

Passed Away Last Sunday Evening

AFTER BRIEF ILLNESS

Was an Active Member of the Methodist Church

The death of Mrs. S. A. Correll, which occurred at 10 o'clock Sunday evening, May 16, 1926, after a brief illness, came as a surprise to her many friends who had not realized her critical condition.

Mrs. Correll's maiden name was Isora Card. She was born Dec. 27, 1857 in Ashtabula county, Ohio. On Dec. 21, 1876 she became the wife of Servetus A. Correll and the early years of this married life was spent in Warren, Ohio.

They were among the pioneer settlers of northern Michigan, living near Clarion in the vicinity of Watloon Lake, known in those days as Bear Lake. Mrs. Correll was an active member of the Methodist church at Clarion, in those days a thriving lumber town on the G.R. & I. R. R. She was choir leader, class leader and Sunday school worker; a good friend and neighbor, always helpful in time of sickness and trouble, as well as a devoted wife, mother and homemaker.

About thirteen years ago the family moved to Charlevoix where Mrs. Correll continued her various activities until prevented by failing health, but she has always maintained her interest in the work in which she was formerly engaged.

Beside her husband she is survived by a brother, Orville Card, of Ironson, and three children, Lee P. Correll, of Lawrence, Long Island, Mrs. Harry Belding, of Muskegon and Miss Nettie Correll of this city; also one grandchild, Martha Isora Belding.

The funeral services were conducted from the family residence on Allen street at two o'clock Tuesday afternoon, Dr. Herman Burns, D.D., of the Baptist church, officiating. Interment was at Greenwood cemetery, Petoskey.

Another Art

Salesmanship is the art of making yourself believe that a polite refusal is an excuse to go on arguing.—Akron Beacon Journal.

RESIDENCE DESTROYED BY FIRE

Early Tuesday Morning, Fire Discovered by Near Neighbors

A residence for some time past and until recently occupied by Richard Hall, located in the outskirts of the city on Sheridan road, near the Norwood road was totally destroyed by fire together with the major part of the household furnishings and equipment at an early hour last Tuesday morning.

The fire was discovered about two o'clock by Mrs. West Howard who reported the same to the fire department and Mr. Marshall reported at the scene with the city chemical truck but not until the fire had practically ruined the structure.

The residence has not been occupied for a short time, but was being reconditioned and ready for the Hall family to again take up their residence in the home.

Some insurance was carried on the property but the exact amount can not be obtained at this writing, but not sufficient to cover the entire loss sustained.

Flattery's Value

Flattery is the art of making others believe you are interested in them, when in reality they make you weary. —Kled Hans (Copenhagen).

May Soon Telephone to Scotias Northern Point.

It will soon be possible to talk by telephone from the extreme north of Scotland to the most westerly town in England.

At present Inverness is the farthest town north in Great Britain that can be telephoned to direct from London, but when the new apparatus is installed it will link Wick, on the northeast coast of Scotland on Moray Firth, not only with London, but with Penzance, in the extreme west on the coast of Mount's Bay. The distance from Penzance to Wick is about 850 miles and from London to Wick about 730 miles.

MISS MARY TATE

As assistant to the public printer of the United States, Miss Mary Tate holds probably the most important post ever held by a woman in the service of Uncle Sam.

EXCITING SCENES IN JUSTICE COURT

BEFORE JUDGE COOPER THURSDAY

John S. Baker Bound Over To a Higher Court Hearing.

A scene was enacted in Judge Joseph R. Cooper's court last Thursday that at times was tense, exciting, ludicrous and at times nearly approaching confusion, when John S. Baker was given a preliminary hearing under a charge of supplying intoxicating beverages in violation of the statute in such case made and provided, etc.

In this connection let it be understood that such acts of levity and confusion was not due to any act on the part of the court nor officers in attendance, but to specific acts and information supplied by witnesses, more particularly a single witness called to testify in the court procedure.

Several witnesses were called to the stand during the progress of the hearing, the climax being reached shortly before court closed when one of the witnesses, perhaps inadvertantly, was specific and furnished evidence wholly compatible with theories advanced by Prosecutor Hitch, making for positive proof supporting the main point in contention, fully establishing the principles advanced by the prosecutor, that of delivering illegally a quantity of intoxicating beverage to a second party.

That the testimony given at the hearing was conclusive to the court is evidenced by the decision rendered by Judge Cooper who bound Mr. Baker over for appearance at the May term of court, the defendant to furnish a good and sufficient bond in the sum of $2,000 for such appearance, otherwise to remain in charge of the sheriff.

A REAL HEROINE

Edith May Adams of Barrington, N. J., the first American School girl to be entered as a candidate for the American Youth Award. The American Youth and Teacher Award was established by the Board of Directors of the Sesqui-Centennial International Exposition in Philadelphia as a tribute to the youth and teachers of the nation. Miss Adams is a candidate for the Golden Eaglette, the highest gift in the hands of the Girl Scouts. She was cited recently for exceptional bravery for remaining inside a blazing building helping physicians to give first aid treatment to injured firemen.

NEW AUTO FERRY

For Charlevoix County Road Commission

IS BUILT OF STEEL

To be Powered with Pair of Big Deisel Type Engines.

The Johnson Bros. Boiler Work in Fernsburg are building a steel automobile ferry for the Charlevoix county road commission completion of the ship being assured within a very short time. Steamboat Inspector Eckhiff has already gone over the craft.

The ferry which is to be of less than 100 tons in order that its operation will not come under the seamun's act, will be driven by two Deisel engines built at Three Rivers, Wis. Propellors are to be at both ends of the craft so that she will be very easily navigated in close quarters. The boat is of shallow draft and will have four automobile tracks aboard.

The new ferry will be operated on Pine Lake, where recent heavy increases in auto traffic have rendered the old wooden ferry almost obsolete. Pine Lake is one of the large inland lakes of the north being about 14 miles long.—Grand Haven Tribune.

Captain H. J. Gellick, government inspector of hulls for this district who resides at Grand Haven, informs us that he has on various occasions visited the Johnston Bros. plant and observed the workmanship, progress made and material used in the construction of the ferry above referred to and that everything pertaining to the craft including workmanship is first class and that when placed in commission the same in so far as the hull is concerned will stand for all time if properly cared for. He also stated that this job was inserting one breadth but does not call for tracks as mentioned in the above article, nor that it was to be understood that these were the only days on which visitors would be welcome at the camps. Visitors will be welcome at any time and can witness the work in the camps.

Vacancies are still open in the C. M. T. Camps for the Sixth Corps Area for a limited number of high-type young men between the ages of 17 and 24, but it is anticipated that the quotas for all the camps will be filled by June 1st. Information about the camps and application blanks for making formal application to attend the camps will be furnished by the Commanding General of the Sixth Corps Area, 1819 West Pershing Road, Chicago, Ill., to those interested in attending.

Might Have Been Worse

A man committed suicide because he possessed two girls and both of them rejected him. Well, look how much worse off he'd be now if both had accepted him.—New York American.

Conclusive

"Mr. client, is not mentally normal. The fact that he married his wife is partly a proof of that, but the fact that he married Linda is conclusive." —Durchaller, Berlin.

GET THREE TO FIVE YEARS-THEFT

Plead Guilty to Charge of Stealing an Automobile

Three men, Alex Sopranowicz, Cassimer Kalalski and Fred Zarnick were taken in custody by Sheriff Novak last Thursday under a charge of stealing an automobile in Emmet county, the machine being owned by a Mr. Stickler.

Later they were turned over to Emmet county officials, plead guilty to the charge preferred and sentenced by Judge Frank Shepherd—Zarnick to Jackson and the other two to Ionia for from two to five years with a recommendation that each one serve three years.

A prison sentence was also given to John Karamel of Petoskey, for violation of the liquor law, of from six to twelve months in Jackson at hard labor. The latter case attracted considerable notoriety due to an appeal taking the case from Emmet county to the supreme court where confirmation was made of the trial proceedings in the Emmet county circuit.

Pasturage in Marsh

Romney marsh in Kent, England, is protected by a seawall of great thickness and the guardianship and drainage of the sewage is in the hands of a special ancient corporation. The level lands afford pasturage for vast flocks of sheep which form the principal industry of this section.

Father Knickerbocker's Pioneer Telephone Line

The honor of having had the first telephone in the area now comprising Greater New York belongs equally to the boroughs of Brooklyn and Manhattan.

It was in 1877 that the first telephone was installed. At that time the Brooklyn Bridge was under construction. The work of producing the steel cables for the new bridge was in the hands of the J. L. Haigh Steel Company, and to facilitate them in their work a single line was strung across the half finished bridge, connecting their factory in South Brooklyn with their offices. This was the first commercial use of the telephone in New York City.

Boyne City Citizen is Bonded to Appear in Court

Jacob Rickerd, a Boyne City citizen, appeared in Justice Jerome Cole's court to answer a charge for alleged violation of the liquor law. At the conclusion of his examination he gave a bond in the sum of $500 for appearance at the next term of circuit court.

Officers of the county with David Vaughn, deputy sheriff, as leader made a search of the Rickerd premises and secured as evidence five cases of beer or near beer and two quarts of moonshine according to report.

This arrest followed evidence previously secured from a local citizen that he had purchased a quart of some kind of an intoxicant. From this individual as well as from the condition of the witness prior to securing the testimony the officers in charge decided that the case was worthy of investigation, proceeded accordingly, with results reported as above given.

VISITORS' DAYS AT TRAINING CAMPS

NOTABLES TO BE PRESENT

Limited Number of Vacancies Still Open for Young Men

It was announced at headquarters Sixth Army Corps Area, May 15, that final approval of the official Visitors Day at the Citizen's Military Training camps this summer, had been approved by Major Gen. Graves; as Saturday, August 14, at Camp Custer, and Friday, July 30, Fort Brady.

General Graves, in approving of the above dates, emphasized the fact that while these dates were known as Visitors' Days and that special plans would be made to care for visitors on those days and provide demonstrations, drills, parades, reviews, etc., for the relatives and friends of candidates, that it was not to be understood that these were the only days on which visitors would be welcome at the camps. Visitors will be welcome at any time and can witness the work in the camps.

Vacancies are still open in the C. M. T. Camps for the Sixth Corps Area for a limited number of high-type young men between the ages of 17 and 24, but it is anticipated that the quotas for all the camps will be filled by June 1st. Information about the camps and application blanks for making formal application to attend the camps will be furnished by the Commanding General of the Sixth Corps Area, 1819 West Pershing Road, Chicago, Ill., to those interested in attending.

TRACK MEET SATURDAY AT PETOSKEY

SEVERAL EVENTS WERE PULLED OFF

Entrants from Boyne City, Charlevoix and Petoskey

A fair representation of Charlevoix citizens motored to Petoskey last Saturday to attend the track meet in that city in which contestants entered from the schools of Petoskey, Boyne City and Charlevoix. The officials in charge were Starter C. W. Christopher; Field Judge H. C. Spetter; Timekeepers Spelts and Aldred.

Several events were pulled off, the results being as follows:

100-yard dash—Marsh, Petoskey, first; Critchell, Petoskey, second; Dixon, Boyne City, third. Time, 11½.

Mile run—Kalbleisch, Petoskey, first; Loughlin, Boyne City, second; Love, Petoskey, third. Time, 5:12.4.

120-yard hurdles—Critchell, Petoskey, first; Rothenberger, Boyne City, second; Pierce, Charlevoix, third. Time 19.3.

Half mile run—Sayles, Boyne City, first; Knowlton, Petoskey, second; O'Donnell, Petoskey, third. Time, 2:21.

220-yard dash—Marsh, Petoskey, first; Beer, Petoskey, second; Friedly, Boyne City, third. Time, 25.1.

440-yard dash—Soblesky, Petoskey, first; Hodder, Petoskey, second; Buchert, Boyne City, third. Time, 54.3.

220-yard low hurdles—Beer, Petoskey, first; Marsh, Petoskey, second; Billington, Boyne City, third. Time 30 second.

Shot put—Tripp, Petoskey, first; Comstock, Petoskey, second; Dixon, Boyne City, third.

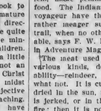
The Ministry of Children

By REV. C. H. BENSON
Director of Religious Education Courses
Moody Bible Institute, Chicago.

TEXT—And He took a child, and set him in the midst of them.—Mark 9:36.

We are so accustomed to look to parents for leadership and to mature years for direction that we quite overlook the ministry of children. Yet it was a little child and not an adult that Christ set in the midst as the objective of His teaching.

We would have pointed the child to the adult, but Christ directed the attention of the adult to the child. Christ honored childhood by coming into this world as a weak, helpless, innocent infant, but He magnified the ministry of children when He placed a little child in the midst of His disciples.



Rev. C. H. Benson.

Children Are the Builders of the Home.

No institution is as ancient or as sacred as the home. Home is the coziest, kindliest, sweetest place in the world; the scene of our purest earthly joys and deepest sorrows. House is the only spot on earth where the faults and failings of fallen humanity are hidden under the mantle of charity. It is children that make the home. Their presence constitutes its inspiration and blessing. The home is not necessary for children, but in the truest and strictest sense, children are necessary for the home. It is the child that binds father and mother together in mutual understanding for more effectively than the marriage tie. Mutual sacrifice and unselfishness asserts itself as never before in the presence of an infant. The birth of a child acts as a deterrent to wrongdoing in the life of the parents. Its very dependence forces them to larger usefulness and its latent possibilities to greater and ambitious effort.

In infancy their helplessness is a strong argument for co-operated effort in maintaining the peace of the community. Patriotism is inspired by the necessary protection that must be guaranteed the helpless in the home. In childhood the physical needs of boys and girls cry out for co-operation in industry, and peace between capital and labor is a fundamental requirement likewise become the source and sustenance of a great public school enterprise. Religious and moral needs of the children have called forth the Sunday school, while the orphans and cripples have built great philanthropic institutions. The pages of history declare that in every age the child has been a large contributor to the peace, progress and prosperity of the nations.

Children, Religious Leaders.

Sir George Adam Smith, when in Palestine, saw a shepherd carrying a sheep. He asked if it had broken a limb or if it was tired. The shepherd replied that there was nothing the matter with it, the lamb was strong and healthy, but he could not trust the sheep trotting at his side and said, "That is the nature of sheep, it has a habit of wandering. The only way I can keep her with the flock is by taking her lamb and carrying it."

How often God has spoken to unbelieving parents through a little child. An atheist was very much distressed when he found his little girl attending Sunday school. So one day he wrote on a piece of paper, "God is nowhere." But the little child could not understand it that way. She took the slip of paper and spelled it out "God is now here." Few unbelieving parents are so hardened in sin that they are unwilling to have their babies' names put on the cradle roll of the Sunday school. A young professional man told this simple story: "A baby came to my home. The little fellow seemed to be a gift from God, and my heart was filled with a reverential reverence which I did not have before. A visitor came to the church and requested the baby's name for the cradle roll, and said they would remember him." Sometimes when I passed the church I said to myself, 'My baby's name is on the walls of that church, and those people are praying for him. I had forgotten God and had wandered far from the church, but this little life led me back to renew my vows. 'A little child shall lead them.' Yes, if the world is to be saved it must be through the door of the golden day approaches when "instead of the thorn shall come up the fir tree." But that day will not be hastened by clearing the wilderness of its brier trees but by filling the land with tender-souled men and women who is becoming childlike have become Christlike.

Reading the Bible

Head your Bible, making it the first morning business of your life to understand some portion of it clearly, and your daily business to obey it in all that you do understand. To my early knowledge of the Bible I owe the best part of my taste in literature, and the most precious, and on the whole, the one essential part of my education.—Ruskin.

Christianity

Christianity has no ceremonial; it has forms, for forms are essential to order; but it disdains the folly of attempting to reinforce the religion of the heart by the duties of the body or mind.—Croly.

Interpretation of Life

The Christian interpretation of life requires and leads us to believe that every experience of life is morticed by our Father to lead us into intimacy with Him, and is only and always meant for our good.—H. A. Hume.

In What Direction?

The great thing in this world is, not so much where we stand as in what direction we are moving.—Oliver Wendell Holmes.

Pemmican Has High Value in Nutriment

The term pemmican, derived from the Algonquin group of languages, signifies "manufactured grease." Its nutritious and lasting properties in cold countries, and the fact that it can be packed in small compass and thus made easy of transportation, when every ounce of weight is a problem, make pemmican valuable as a food. The Indians and many a white trapper have thrived on their own rather meager supply while on the trail, when no other food was obtainable, says F. W. Hodge, in an article in Adventure Magazine.

The meat used in pemmican is of various kinds, depending on availability—deer, buffalo, bear or what not. It is cut in thin strips and dried in the sun, much as other meat is, being, of course, made with narrower instead of ordinary fat, the marrow being obtained by breaking the bones and boiling them in water. Some of the Indians of the Northwest make pemmican with pounded dry fish and sturgeon oil, which does not sound nip the especially savory dish.

But less vile still is a pemmican that the Eskimo makes with chewed venison mixed with deer suet and seal oil, which, says one explorer, "is not agreeable to the taste, probably owing to the fact that the masticators are inveterate tobacco chewers."

An Episode

"Whilst I was in the barber shop in the village of Keller on circuit court," in the crossroads store rotated Gap Johnson of Rumpus Ridge. "He was laying back in the chair and the barber was working on him when a passel of young ladies wearing these yur fashionable short skirts came in and seated theirselves on the bench facing the barber chairs. One of 'em laughed out loud, and the old man rabbed his head and stared at their'n he stared at 'em, and, I heerd tell, kept raising his face bigger and higher, and the barber, engaged in his argyment with another barber, cut the old gent's throat. It didn't kill him, positively, and he said taking it all around it was shore worth it."

"Well, all I know is when the—yaw-haw! haw!—razor slushed his throat?" inquired some fellow setting around.

"I never noticed. I was looking at—well, anyhow, the barber working his mouth the same as my Adam's apple."—Kansas City Star.

The Way to Treat Them

"The way to treat cubism and dadaism and super-realism and all the other catch-penny fads is to ignore them," said Pene du Bois, the art critic, at a dinner in New York.

"A super-realistic painter was giving an exhibition. He buttonholed a well-dressed couple—good enough, they say in the business—and led him up to a picture and began:

"'This will show you, old man, the thing I'm after. We super-realists, you know, are striving for the portrayal of the superfluous, we paint esoterically and not exoterically, portraying nothing but the aura or inner ego. Do you follow me?'

"'Follow you?' said the prospect. 'Gosh, I'm ahead of you. I came out of the baghouse last Monday.'"

German Students Boxing

Boxing is slowly replacing student duels with sabers as a major sport in German universities and high schools. The first intercollegiate boxing matches ever held in Berlin recently took place between pugilists of the University of Goettingen and Hannover School of Technology. Educational authorities in many states, including Prussia, have sanctioned boxing and its popularity is becoming widespread. The lower house of the Baden legislature has passed a bill prescribing the same punishment for student duellists with sharpened sabers as that meted out to those who resort to settle affairs of honor with weapons.

Watchman Comfortable

In South London, England, a roadrepairing job is in progress, and a caravan, complete with stove and curtains, has been provided for the veteran "guardian angel," whose business it is to see that nobody steals the lamps and pokes after working hours. He has taken the somewhat unusual course of bringing his wife with him to share the caravan for the duration of the job. Possibly at her suggestion, he has also fitted a small wireless set, and the other day he was stopping passers-by in the evening and hopefully pleading for advice on some problem of values.

Bird Transportation

Birds no longer use their own wings in at least one type of migration—they travel by airplane. Dr. John C. Phillips of Boston, in a lecture, told how Hungarian partridges are being destined for introduction in American game preserves, are carried from Czechoslovakia to London in special cages on planes, and then transferred to fast ocean liners for the trans-Atlantic voyage. The Hungarian partridge has made itself thoroughly at home in the West, Doctor Phillips said, but so far has not succeeded in the introduction into the eastern part of this country.

Always Lovers of Horses

When Julius Caesar made his incursions into England or the land of the Britons in the years 55 and 54 B. C., he made note of the size and strength of the horses possessed by the Britons.

Beating Her to It

The submissive little husband was stealthily picking his own pockets before going to bed. "A brute of a wife beater, that's what I am," he chuckled softly.

GOWNS FOR THE BRIDESMAID; PARIS SPONSORS TAILLEURS

APPARENTLY modistes think of a bridesmaids' gowns mostly in terms of georgette and lace—if one says "wedding clothes," these materials go without saying. As a material for airy and delicate gowns and frocks georgette drifts naturally into the picture—and the two combined have captured the feminine world.

Georgette and lace are combined in as many different ways as there are stars in the sky; some of them resulting in stately gowns, others in sprightly and youthful models. The pretty gown pictured belongs in the

IN LACE AND GEORGETTE

latter class and is one of many designs for bridesmaids' frocks. It will prove a success in the wedding cortege and a joy ever after—if so long as it does duty as an afternoon or dinner dress. Very georgette was chosen by its designer, with ecru lace for yoke, sleeves and apron flounce, but it would be beautiful in any light color as blue, peach, orchid, rose or green, with ecru lace or lace dyed to match. Since pastel shades harmonize so well all maids need not wear the same color—this is a matter for the bride to consider. She may want all her attendants in one color—or she may put them in various light, flower-like colors.

Besides lace and georgette we have in the front rank of things fashionable the lace and taffeta combinations also used in imitating reptile skins.

And it will not make any difference to a thoroughgoing American daughter of Eve, whether Paris sponsors the tailored suit and the tailored frock or not—they are the fundamentals of her wardrobe and fit her needs and ideas. No American need look outside our own land for the best interpretations of the tailored suit, for there are plenty of examples within it that reach the apex of good taste and artistry.

The most fashionable colors for the practical everyday tailored suit are navy blue beige and black, it twills.

DID REALLY COMMUNE WITH "GREAT SPIRIT"

Billy Dixon's Rifle Bullet Helped Him Do It.

One incident which had to do with the proper settlement of Indian troubles in the Southwest in the early '70s was the pot-shot of Billy Dixon with his old Sharps buffalo gun. It happened in this manner:

Among the several thousand Indians who attacked the handful of scouts at Adobe Walls, under Quanah Parker, was a bend medicine man of the Comanches, who undertook to foretell the destiny of the attacking party. This medicine man told the assembled warriors that the Great Spirit had said that they would be victorious; that they would exterminate the buffalo hunters and suffer no material loss in numbers. To make his medicine more effective he announced that he would ride to the top of a near-by cliff and there commune once more with the Great Spirit. And so he did. Just as he reached the top of the cliff, Billy Dixon, who had sneaked outside the sodhouse, which was Adobe Walls, to reconnoiter, saw the savage silhouetted against the skyline. Quickly dropping to one knee, Dixon took a quick aim and fired. The medicine man of the Comanches dropped from his horse, shot through the heart at a distance of 1,200 yards. Though his prophecy was fulfilled, and he really held communion with the Great Spirit in dead as well as word, nevertheless his enemies did not like the quick taking off, and therefore fought but half-heartedly.

Mrs. W. T. Cobbe, a long-time resident of the district in which the site of Adobe Walls is situated, had a conversation with Lone Wolf, the war chief of the attacking party, previous to the battle in which the latter started his purpose of attacking the party of buffalo hunters and exterminating them, for the preservation of the buffalo in that region. The other chiefs in the Comanche forces at this battle were Satank, Big Tree, Little Raven and Satanta.

Adobe Walls is situated on the old Turkey Track cattle ranch, which now belongs to Tom Cobbe. Billy Dixon died in Clmarron county, Okla., in 1913, and was buried in Textline, near the border of Texas and Oklahoma.

Three of the buffalo hunters were killed in the Adobe Walls fight, the two Shadler brothers and Billy Taylor, who lie buried on the battlefield.—Raymond W. Thorp in Adventure Magazine.

Great Work Undertaken

The Theosophical Society of Adyar, India, has undertaken a task that is taken on the huge work of establishing a library of valuable and rare manuscripts. It has, within a period of 20 years, been able to collect 12,847 manuscripts. The manuscripts and printed books in which the Adyar library is especially interested are those that bear chiefly on religious, religion and philosophy. It is also rich in the collection of works in the Chinese, Japanese, Siamese, Burmese, Pali and South Indian languages, besides numerous works in all the important European languages. During the first half of the year 1925, eight tours were undertaken for the collection of manuscripts, over 60 collections being examined in the course of these tours.

Cost of Reading Book

On the treasurer's books money a statistician with nothing much to do has figured what it would cost a man on a $4,000 salary to read a 5,000-page book, and finds it comes to $30. In the case of a $10,000 salary it amounts to the money-maker for me," this gardener testifies.

Improved Seed Corn Will Swell Profits

More Bushels Can Be Grown With Same Labor.

Use of improved strains of corn is a step toward the efficient and profitable corn production, for when such strains are used more bushels of corn can be grown with the same outlay of labor and thus lowering the cost per bushel and swelling the grower's profits, C. M. Woodworth, chief of plant breeding at the college of agriculture, University of Illinois, points out.

"The discovery of disease-resistant strains is the only permanent means of control of plant diseases. The growing of such resistant strains not only reduces losses from the diseases themselves, but also entails no cost for material and labor in seed treatment. The same holds true for strains resistant to insect attacks. There is an added advantage from the standpoint of quality of product. Resistant strains produce more sound grain than susceptible strains, and there is often a premium in price on this account. "Harvesting and threshing costs are high. How may they be reduced? Types that stand erect throughout the harvest period are to be preferred because practically all the grain can be gathered with less trouble, expense and loss of grain. In corn, this is probably more important than for other grain crops, particularly when harvesting machinery is used. On account of harvesting labor costs more dependence is being placed on machinery. Improved strains may be said, in general, to make the wider use of machinery possible and practicable, and hence from this standpoint, also, they constitute a factor in efficient production."

Heavy Tree Losses Laid to Many Kinds of Bugs

There are 200,000 kinds of bugs preying on the trees of this country. They cause an annual loss of millions and but for the song birds would more than double the cost of their depredations.

Certain experts say that the loss due to the ravages of the insects is far greater than the loss due to forest fires. In a single year 1924 these pests destroyed enough trees to build 8,000 homes, costing $10,000 each.

Pine beetles, borers, timber worms and various kinds of moths and flies that leave eggs on the leaves are to be eradicated if man is to win in his unequal fight.

Bark beetles have killed many spruce in the Adirondacks, but bark has become a victim of the sawfly. The pine beetle has laid waste the pine forests of the beautiful Yosemite national forest and many other sections of the Rocky mountains and western forests.

Courage is so scarce that it is frequently admired when it has no sense.

Cuticura for Sore Hands.

Soak hands on retiring in hot suds of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus Ointment with tissue paper. This is only one of the things Cuticura will do! Soap, Ointment and Talcum are used for all kinds of purposes. Advertisement.

The cynic works at it too much.

"BAYER ASPIRIN" PROVED SAFE

Take without Fear as Told In "Bayer" Package

BAYER

Does not affect the Heart

Unless you see the "Bayer Cross" on package or tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over twenty-five years for

Colds — Headache
Neuritis — Lumbago
•Toothache — Rheumatism
Neuralgia — Pain, Pain

Each unbroken "Bayer" package contains proper directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100.

Cutworms Are Likely to Be Troublesome in Sod

Cutworms are likely to be troublesome in sod land. It is safer to plant a grain crop on such land than corn because the larger number of plants will show the injury so much as the fewer corn plants. Full plowing and early cultivation will be helpful in destroying cutworms. Fall plowing causes many of them to be eaten by frost and cultivation likewise keeps weeds from growing and helps to starve them out. Late planting is also helpful as the worms do most of their damage before June 1 to June 15.

Cultivating Alfalfa to Destroy Noxious Plants

The question of cultivating alfalfa land has been discussed in the last few years, and some careful experiments have been conducted to determine its value. It is now considered doubtful if cultivation actually increases the yield of alfalfa or thickens the stand, or kills out grass and weeds in any amount sufficient to justify the opera tion. The most important cultivation that alfalfa receives is before the seed is put into the ground, when the soil is thoroughly cleaned and thoroughly prepared.

Stock and Fertility

Each spring is seeing more landlords taking definite steps to increase the numbers of the live stock kept on the farms that they are renting to others. Farmers, as a class, have also advantageous to both landlord and tenant. The tenant profits by the increased opportunity, while the landlord is assured of continuous profits through the maintenance of soil fertility and frequently shares in the greater profits usually secured in live stock farming.

Feeding Hens and Pullets

Hens and pullets may be fed the same ration, though the fattening of a flock of pullets to hold a proper balance between egg production and weight, not allowing them to fall off too much in either, is rather a matter of more skill. In general terms, the mash is the egg producing part of the ration, the hard grain the body-maintaining part. It takes "the eye of the master" to see to it that one phase is not overdeveloped at the expense of the other.

WOMAN COULD NOT SLEEP

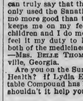
Her Mother-in-Law Knew A Remedy

Mrs. Belle Thompson was in a very weak and run-down condition for four years. She had great difficulty in getting to sleep at night and even then did not sleep soundly. She would wake up again and again. Besides this her appetite was poor. "My mother-in-law told me of Lydia E. Pinkham's Vegetable Compound and Lydia E. Pinkham's Sanative Wash," she writes. "I took six bottles of the Vegetable Compound and I was not the same woman at all. I could sleep and would get up in the morning singing and feeling fine. I am the mother of three children and always after the babies came I had to take treatments, but I can truly say that this last time I have only used the Sanative Wash. It does no more good than the treatments. It keeps me on my feet to care for my children and I do most of my work. I feel it my duty to let you know how both of the medicines have helped me." —Mrs. Belle Thompson, R. 2, Rossville, Georgia.

Are you on the Sunlit Road to Better Health? If Lydia E. Pinkham's Vegetable Compound has helped others, why shouldn't it help you?

In a disturbed mind, as in a body in the same state, health cannot exist. —Cicero.

Young vigor to old folks



"Six years ago had nervous prostration, sleeplessness, constipation, and backaches had me run down. "Tanlac sent my weight up fifteen pounds and now, at sixty-seven, I feel as fine as at forty." W. H. Sowers, 711 North Oakland Av., Indianapolis, Ind.

One of Tanlac's greatest blessings is the new life and vigor it brings to old folks. Every day men and women up in the seventies and eighties thank us for Tanlac's wondrous benefits.

Tanlac is a natural tonic, made from roots, barks and rare herbs. Harmless to man or child. It cleans the blood, stirs up the liver and puts digestive organs in working order.

If your body is weak and run-down, if you lack ambition, can't eat or sleep, you'll be delighted with Tanlac results. Try Tanlac Vegetable Pills for constipation.

ALLEN'S FOOT-EASE

Stops the pain of Corns, Bunions and Callouses

Before putting on your shoes, sprinkle a little Allen's Foot-Ease and work it! Say at once all evening without any discomfort. Shake Foot-Ease into the shoes and gives the feet real comfort. Over 1,000,000 pounds of this powder have been sold. Sold by all drug and department stores. Trial Package and Foot Book FREE. Write today. Allen S. Olmsted, LE ROY, N. Y.

Kill All Flies!

THEY SPREAD DISEASE

Placed anywhere, DANGEROUS DISEASE-carrying flies, mosquitoes, and fly-borne germs will not enter. Made of metal, will not tip over or spill. Guaranteed effective. Lasts all season. Sold by dealers or sent prepaid, $1.50.

DAISY FLY KILLER

DAISY FLY KILLER, attracts and kills all flies. Neat, clean, ornamental, convenient. Can be filled. Lasts all season. Guaranteed. Sold by dealers or sent prepaid, 60 cents.

Enjoy your dealer.

HAROLD SOMERS - BROOKLYN, N. Y.

Queer "Groceries" From the Orient

"Bombu duk" is well-"ripened" fish which, after putrefaction has caused it to fall to pieces, is sun-dried and smoked. The caviar crumbles. It in small pinches over rice dishes as a curry, and leaves a disgusting odor clinging to his fingers.

The ripened eggs of China are also interesting. They are sold in America with the earth in which they were preserved still clinging to them.

Some of the preserved eggs are black to the yolk; the odors of decay have passed away into the earth and the articles have the flavor of oysters. They are a nutritious food, albeit a queer one. Americans who entered odoriferous limburger have nothing to be squeamish about in belittling ripened hen fruit!

From China also come the dried beans of chickens. Only the bases of the birds are imported from the trans-Pacific republic; no other part of the fowl can be dried and used satisfactorily, except the gizzards. After soaking, the bases become plump and delicious, and make these tender.—Progressive Grocer.

White House Innovations

Abigail Powers Fillmore, wife of the thirteenth President of the United States, contributed considerably to the comfort of "first ladies" who followed her. It was she who, possessed of great refinement and gracious manners, installed the first bathtub and kitchen range in the White House. The range caused a bitter controversy, as the colored cook who had reigned 30 years using an open fire, would have none of it. Mrs. Fillmore taught her how to use the range.

Always Poor Excuse

It is only the fool who does wrong and says he "did it for the best."—Ruskin.

SOUTH AND THE TARIFF

According to Arthur Brisbane,the British are planning to supply irrigation for tens of thousands of acres for cotton raising in Northern Africa. He said: "Cotton, of the best quality, produced in a country where men earn 35c a day and children 5 and 10c will make substantial tariff protection for American cotton absolutely necessary."

Mr. Brisbane is right in the belief that the time may not be far distant when a tariff will be needed to protect our cotton growers. So long as cotton is purely an American commodity the protection may not be necessary. But cheap cotton raised in quantities in northern Africa would entirely change the situation. The cotton mills of Great Britain would of course use this cheaply grown British cotton in preference to our own.

When this comes to pass the tariff on American cotton goods will be as important to the producer of raw cotton as to the manufacturer and mill worker. Because if we protect our home cotton goods market and use our American cotton to produce cloth we can use up most of our raw cotton at home. Of course if the competition in cotton growing gets so strong that there is an effort to import raw cotton, protection will be of value there too.

The business revival of the south is the more important that the tariff is no longer a sectional issue. Protective tariff sentiment is growing faster in the South than anywhere else. Southern business needs protection as much as Northern business and the time is coming when the South is going to send its fair share of protectionists to Congress.

Saved What it Earned.

The right of the United States through Congress to alienate territory over which it has sovereignty is likely to be involved in the plea for independence of the Philippines. An article in the Virginia Law Review, printed in the Congressional Record, says: "Since the United States became a nation, not a square foot of territory once brought under the American flag has ever been alienated.—Washington Post.

BUSINESS AS USUAL

An optimistic note was sounded recently by the Federal Reserve Board in announcing that retail trade in the United States was much larger during the first quarter of 1926 than during the corresponding period of a year ago. Department store sales were five per cent larger than in 1925 and mail order houses and chain stores reported a corresponding increase.

At the same time this information was given out the Department of Commerce issued a statement declaring that the dollar volume of business in April this year was nine per cent greater than a year ago. The output of coal and lumber was running ahead of 1925, while the production of crude petroleum had fallen off.

Secretary Davis of the Labor department in a May Day statement said:

"Throughout all the basic industries peace prevails. Except for differences in a very few localities in two lines of industry, there exist no trade disputes of great importance. The building trade reports a few centers where certain trades have not yet reached agreements with contractors, but otherwise there is a marked advance in satisfactory relationship over same recent years. The workers of America enjoy the highest wages ever paid and they will not jeopardize prosperity for dangerous experiments in political agitation."

Chairman Phipps of the Senate Labor Committee, at same time, said:

"It would be difficult indeed to recall a time in our history when labor conditions have been more satisfactory than they are today.

"These optimistic reports ought to have a steadying effect on those who felt that the recent slump in the stock market presaged a bad year. There is nothing the matter with the economic fab'c of the United States and we ought to continue doing business as usual.

—An insurance statistician reports that it costs $6,167 to rear a girl and $6,077 to rear a boy, to the age of eighteen years—but doesn't tell us whether the expenditure should be classed as an investment, or as a speculation.—New Orleans Times-Picayune.

MADE SACRIFICES

There are some alleged Americans who claim to believe that Uncle Sam has made no sacrifices toward disarmament. They overlook the fact that the United States first reduced its army to a peace basis and that it was through President Harding that a naval disarmament conference was made possible.

When this conference was called, Uncle Sam was about to realize President Wilson's prediction of being the strongest naval power in the world. Our navy was nearly as large as Great Britain's in battleships and we had under construction enough tonnage to put us ahead of our nearest rival. The National Republic says:

Neither Great Britain nor Japan was in financial position to match this program of construction. Great Britain and Japan at the Washington conference accepted limitation only on battleships—the class of vessels the United States was about to lead the world. In the construction of cruisers, submarines and other classes of the warship Great Britain and Japan have outdistanced the United States since the Washington conference was held. The United States having limited construction of battleships, we have not kept pace with them either two naval powers in the building of vessels of the remaining types.

Point Military Academy. Much can happen in a quarter of a century, indeed in much shorter time than that but instead of strife and bloodshed in the Philippines now there are peace, security, prosperity, more education, stable business and general well being, while a former belligerent native chief is now a tamed, respectable,prosperous business man.

All of which shows what enlightened, well-organized, free government will do.—Clarksburg Telegram

COMMENT.

—Now that all the war debts are arranged all that we have to do is to get the money.

—Maybe there wouldn't be so many world problems if there weren't so many world experts to discuss them.

—Every cloud has a silver lining. If the British strike forces the girls to walk to work, it will help them to reduce.

—Some college heads declare that college football menaces education. But what's a little education among friends?

—"Can poetry survive modern civilization?" has been defeated. The popular answer is "No."

—Rev. Richard Cabot tells an audience why men work. But the man who is trying to pay for the home, educate the children and keep a motor car does not have to go to a lecture to find out why he is on the job six days a week.—Transcript.

His Dilemma

A tenton candidate in politics never knows whether he has a defeat to live down or a moral victory to live up to.

A FIRST LADY

Mrs. W. Freeland Kendrick, wife of the Mayor of Philadelphia, who also is president of the Sesqui-Centennial International Exposition Association, organized to stage a great celebration to commemorate the 150th anniversary of the signing of the Declaration of Independence. Mrs. Kendrick is shown beside the historic Liberty Bell, which she tapped at a recent broadcasting event when the world was told of completion of plans for the big exposition.

THE THEATRE

"Hell's Four Hundred"

Margaret Livingston's versatility is brought sharply to the attention of theatre patrons in her most recent Fox release, "Hell's Four Hundred" which will be shown at the Palace theatre next Friday.

The picture opens with the star in a police raid and she escapes with the aid of an iceman friend. She is just one jump ahead of the pawnbroker, so she decides to go after "big game" and becomes the lure in a trap set for the district attorney, then engaged in a relentless clean up of New York.

The girl finds Marshall Langham, profligate son of rich parents, more to her purpose than the district attorney, but he has squandered his money and is broke. To buy her an engagement ring he forges the name of John Gilmore, vice gang chief, and the complications start.

The story leads to the murder of Gilmore under such circumstances that the district attorney is suspected and arrested while in fact he has a perfect alibi which he did not want to use because he was engaged to Langham's sister. This alibi was that he was in conference with the cabaret girl about the forged check at the time of the murder.

The iceman is almost run down by Langham as he sends his fast runabout dashing out of the city and in the fight which follows the iceman's narrow escape from death, the exchange of blows shifts the scene of battle out onto a trestle. To escape an oncoming train, both men swing down from the ties but in his weakened condition Langham loosens his hold. In his effort to save him Montgomery's grip slips and both fall into the river.

"A Kiss for Cinderella"

The happy triple alliance of James M. Barrie, famous author, Herbert Brennon, noted director, and Betty Bronson, the appealing star, has come through with another scenic classic, "A Kiss for Cinderella." This new masterpiece is scheduled for next Saturday and Sunday at the Palace theatre.

Next to "Peter Pan" "A Kiss for Cinderella" is Barrie's best known and deservedly most popular story. It has all the imaginative qualities and whimsical touches that distinguish its predecessor, with the added advantage of a charming, altogether modern love theme, an intensely dramatic plot and a lot of real, humanly sympathetic and lovable characters.

In between the two extremes of fantasy and reality are incidents that tug at the heart strings, episodes that provoke chuckles and smiles, and scenes that range from the London slums to a magnificent dream ball.

"Half Way Girl"

Imagine, if you can, a ship on fire at sea. A leopard has escaped from a cage on the deck and is driving the panic-stricken passengers into the water. One man and one woman are left aboard and when they rush to the last remaining lifeboat they find the leopard crouched in it ready to fight for possession.

That is only one of the many remarkably thrilling episodes in "The Half Way Girl" which will be shown at the Palace theatre next Tuesday and Wednesday. Even more thrilling is the spectacle of the ship being blown to atoms, stirring fights between men over a woman, a beautiful love story, colorful settings and extraordinary photography. This is one of the best pictures Earl Hudson has ever made.

In brief, the story is that of an American show girl, who becomes a "half way" girl in a Singapore cafe when she is stranded in that city. There is a struggle between Phil Douglas and Jardine over the girl. Jardine is a brute. Phil is a young man broken by the war and a woman. A fire breaks out on the ship and soon all are fleeing for the life boats. A wild leopard escapes from his cage on board, drives the passengers into the sea and takes possession of the remaining lifeboat. But Phil drives the beast overboard and escapes with Miss Kenyon just before the big steamer is blown to pieces when a cargo of benzine explodes.

BEAVER ISLAND

May 19, 1926

G. McManus and Sargeant of the Petoskey Block Co., spent several days here at their camp.

Mrs. D. D. Gallagher and son Andrew, are home from Detroit where they spent the winter.

John Grill arrived home Saturday from Grand Rapids where he was on business.

Mrs. Albon Smith of Charlevoix is visiting her mother,Mrs. James Mooney.

Mrs. Owen McCauley is home from Detroit, where she spent the winter.

The St. James school boys gave a party Tuesday, and also a dance.

E. Cole has put up an oil station; making the fourth business were rested.

Misses Eva and Rita Lafreniere arrived home from Chicago Tuesday.

C. Barry of Central Lake, was a business caller here last week.

Mr. Tyrell of a Detroit real estate firm, was here last Saturday.

J. J. Fagan of Muskegon, spent several days here last week.

Dr. R. E. Palmer left for Muskegon last Tuesday.

Another Mistake Exploded

The buttercup is another of those little things, that deceive us by their name. It should be its title from the ignorant notion that, when cows ate buttercups, the butter-producing qualities of the milk were improved. The truth of this has not been proved, for the simple reason that cows don't eat buttercups.

Paper Out of Date

What once was known as "butcher paper," the dark, heavy, brown paper used to wrap up meats, is no longer manufactured in any great quantity in the United States. It has been replaced by what is known as "kraft manilla." The old butcher paper was made from straw.

Men's Ingratitude

Do you know what is more hard to bear than the reverses of fortune? It is the baseness, the hideous ingratitude, of man.—Napoleon.

WANT COLUMN

FOR SALE—Will make an attractive price on my millinery stock and fixtures to parties wishing to engage in business. Mrs. R. A. Emrey, Betty Shop, Charlevoix, Mich.

FOR SALE—Those wanting vegetable plants may secure same by calling at 913 State St., or phone 316. 4 tf

WORK WANTED — General housecleaning by day or week. Call at 1216 State Street.

FOR SALE—Cottage very desirably located on Petoskey avenue. Parties interested in a Charlevoix cottage should investigate this offer as an attractive price will be made on this property. Address F. A., care Sentinel, Charlevoix.

FOR RENT—Season 1926, cottage located on Petoskey Avenue, near Michigan, will rent at a moderate price to desirable tenant. Address P. E., care Sentinel, Charlevoix.

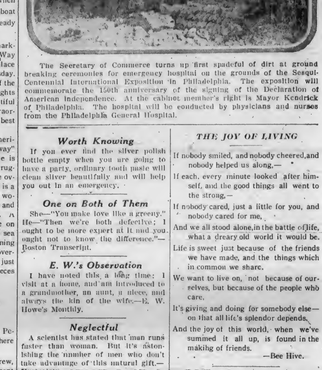
HERBERT HOOVER TURNS SPADEMAN



The Secretary of Commerce turns up first spadeful of dirt at ground breaking ceremonies for emergency hospital on the grounds of the Sesqui-Centennial International Exposition in Philadelphia. The exposition will commemorate the 150th anniversary of the signing of the Declaration of American Independence. At the cabinet member's right is Mayor Kendrick of Philadelphia. The hospital will be conducted by physicians and nurses from the Philadelphia General Hospital.

Worth Knowing

If you ever find the silver polish bottle empty when you are going to have a party, ordinary tooth paste will clean silver beautifully and will help you out in an emergency.

One on Both of Them

She—"You make love like a greeny." He—"Then we're both defective; I ought to be more expert at it and you ought not to know the difference."—Boston Transcript.

E. W.'s Observation

I have noted this, a long time: I visit at a home, and am introduced to a grandmother, an aunt, a niece, and always the kin of the wife.—E. W. Howe's Monthly.

Neglectful

A scientist has stated that man runs faster than woman. But it's distinguishing the number of men who don't take advantage of this natural gift.—Humorist.

Sound Affects Current

Control of electric current by speech is claimed by an Englishman who has perfected a machine that stops and regulates current when affected by sound waves.

Old Southern Institution

The barbecue is an institution of Southern origin, and the word is said to have been used in Virginia prior to 1700.

Vague

The chap who starts his remarks with the words, "Generally speaking," generally is.—Boston Traveler.

THE JOY OF LIVING

If nobody smiled, and nobody cheered,and nobody helped us along,—

If each, every minute looked after himself, and the good things all went to the strong,—

If nobody cared, just a little for you, and nobody cared for me,

And we all stood alone,in the battle of life, what a dreary old world it would be.

Life is sweet just because of the friends we have made, and the things which in common we share.

We want to live on, not because of ourselves, but because of the people who care.

It's giving and doing for somebody else—on that all life's splendor depends,

And the joy of this world, when we've summed it all up, is found in the making of friends.

—Bee Hive.

NOTICE—The playing of golf on the grounds of the Chicago Club course of Charlevoix is strictly forbidden until the season for playing is formally opened by the club owners and members. This regulation must be strictly observed as a huge amount of new work, recent improvements, carried on at enormous financial expense will be wholly ruined for this season; therefore this warning to the public in order to avoid prosecution of parties guilty of violating this regulation. —James Gaskin.

This is to certify that I am not the Anna Brady who received a mother's pension under that name.—Anna Morford Brady, 501 Sheridan street, Charlevoix, Mich.

NEW PALACE THEATRE
Attractions for Coming Week

Friday, May 21th
Margaret Livingston and Harrison Ford in "Hells Four Hundred." A gold rush far from the great open spaces—with Broadway's choicest beauties doing the digging. Broadway after midnight. That's the playground of "Hells Four Hundred." Also a comedy, "Better Movies."

Saturday and Sunday
Betty Bronson and Tom Moore in "A Kiss for Cinderella." The author, producer and star of "Peter Pan" in another great gift to the screen. A story of a little London waif who loved a policeman and cherished a wonderful dream that came true. Also a comedy, "From a Cabby's Seat." And another educational picture "A World of Paper."

Tuesday and Wednesday
Doris Kenyon and Lloyd Hughes in "The Halfway Girl." The biggest thrill show of your lifetime. Only once in a while do they come like this. Follow the league rollers to adventure at the palace with the Half Way Girl, who knew many men, but loved only one. Also a Fox News Reel. Travel the world with the News Reels. The very best form of travel.

REVEALS SECRET OF ROMANOV MALE HEIR

Merchant Says Russ Consul Sought "Magic" Water.

New York—A fantastic "imperial secret" that had its inception on a New York farm and its conclusion in the court of the Romanovs has been told after 20 years of silence by Edward Hatch, a New York merchant, former member of the firm of Lord & Taylor.

The story began in 1903. The ill luck of the Romanov dynasty restrained Mr. Hatch from revealing it for many years. Then it grew dim in memory and retrospection made its details even seem more improbable. He continued to keep quiet until a few days ago when he, he said, he talked with a woman who had been close to the former German court, and she told him an anecdote which corroborated his story.

Tells of Farm Hoodoo.

This was Mr. Hatch's story:

In 1903 a New York newspaper published an account of the insensible state of affairs on the Hatch farm near Brewster, N. Y. Eighty-five per cent of all the animals born there were sickly, said the paper. Public health might have sold for thousands of dollars went to the butcher for what they would bring because the market was flooded. A flock of 30 ewes bore 29 twins. All the chickens were rickety. Even the turkeys and turtle pigeons suffered from the hoodoo. The house and barn and seven kittens, and six were tom cats.

A hired man and his wife on the farm had five sons. Even the corn would grow only on stubs and accidists said it was male corn.

Soon after the story was published, Mr. Hatch said, a stranger, giant-sized him about it at his store. He wanted an explanation. Mr. Hatch said he thought it might be water, which analysis had shown, contained much phosphorus and magnesium.

The stranger then introduced himself as the Russian consul. He wanted a sample of the water. Mr. Hatch agreed.

A few days later the stranger appeared at the farm with two uniformed attendants. With considerable ceremony they filled a keg with the water. The consul insisted on sealing the bung himself, with elaborate ritual. Mr. Hatch asked for what purpose the water was wanted. The only answer he could get was:

"Just an experiment."

Russian Male Heir Born.

A year later cable dispatches reported that a male heir had been born to the imperial Russian throne. The preceding children of the czar had been daughters.

Mr. Hatch called on the Russian consul. His questions were evaded, and when he became insistent the consul politely changed the subject. The merchant's father advised him to keep the episode to himself, and he did so until he heard the recent anecdote attributed to the German court doctor of that day, which seemed to corroborate the implications of his own experience.

"VIEWS" OF AMERICA ON ENGLISH DISHES

Staffordshire Plates Portray Authentic History.

Writing about American history as depicted on old Staffordshire dishes, so popular and cheap 100 years ago in the United States but now costly as antiques, M. L. Fenton, in the Dearborn Independent, says most of the plates which were termed "Staffordshire" were made during the years between 1812 and 1828, although the making of them had begun earlier, in 1780, by Stevenson and Dale at Cobridge. They are distinguished by their remarkably satisfying blue color, by a decorative border, which varies with each manufacturer, and, chiefly, by the "view" of an American scene in the center of the plate. They were made of common clay, in a fairly rough-and-ready manner, and were sold in America at prices less low as fourpence and no higher than a shilling. That price included the cost of transporting them from the center of England across the ocean and thence inland to the dealers in tableware in the various cities.

The potters having determined to make the decoration a matter of views of America, set about securing good small representative scenes, which they did from three sources: from steel woodcuts of "The Beauties of America" which were popular in England at the time, from the sketchbooks of English travelers who had crossed the seas to look upon those beauties for themselves, and from the sketches of itinerant artists whom they sent over to supplement the subjects they had been persuaded to England. We know of one of these men, W. G. Wall, who came to New York in 1818 to make sketches for the Stevenson pottery at Cobridge. When a housewife lifted a Staffordshire plate she had in accurate picture, carried to her land, however, scenes from every part of the country, from the Hudson Shield from which to make her selection. The dinnerware were mirrored upon paper and then transferred to the clay by means of wet lime-soaked made on those paper with prepared colors inlayed with oil. So that, in effect, the plates are copper engravings in reverse, the work, by hand, of skilled artisans.

The ware was sold in America in huge quantities. Every house required a dinner service, so pottery in England, America, this ware was cheap, was reasonably strong and unbreakable. It looked well on the board and stood up under tablecloths.

The principal makers of Staffordshire were Enoch Wood of Burslem, a friend of John Wesley, whose bust he made in 1781; Joseph Stubbs of Burslem; Andrew Stevenson of Cobridge; R. Stevenson and Williams of Cobridge, whose plates are of artistic excellence; Joseph Clews, a very successful potter, of Cobridge, who tried to start a pottery in America at Troy, Perry county, Indiana, in 1838; the Ridgeways, father and sons, at Hanley, and Joseph Heathcut Tunstall. The latter is best known as the maker of tableware which depicts the "Residence of Richard Jordan."

Charlevoix Doesn't Realize
WE SEE so much of Charlevoix' beauty and magnificent facilities for sports and recreation that we do not realize what a wonder we have.
Outsiders exclaim over it. A much travelled man told me he was astonished to find such a place so close to Chicago and Detroit.
Charlevoix real estate will never again be as cheap as it is today.

—— PERSONALS ——

James B. Parsons made a business trip to Leland last Monday.

Mr. C. J. Zoeller, of Lansing, was a business visitor here last Tuesday.

Mr. and Mrs. Richard Lewis of East Jordan, were guests of friends in this city last Thursday.

Francis Donlevy, of St. James, is visiting his daughter, Mrs. Earl Miller and family for a few days.

Stanley R. Swinton of Ann Arbor, spent the week end in this city with his mother and other relatives.

Captain B. J. Gellick of Grand Haven, spent the early part of this week in this city on business for the government

Mr. and Mrs. George W. Weaver, for some days in Grand Rapids, returned from their motoring trip last Monday.

James Bogart was a business visitor in St. James early this week, making the outbound trip Tuesday afternoon.

The ladies of the Church of God will hold a baked goods sale at Wood Bros.' store on Saturday, May 22, beginning at 10 a. m.

Mr. Frank A. Kenyon came down from Mackinac Island Tuesday and spent a day or two here attending to business interests.

Mr. and Mrs. John Harshe, of Detroit, arrived in Charlevoix the latter part of last week and will remain here during the summer season.

Mr. and Mrs. Harrison L. Bedford, visitors in Grand Rapids for the past two weeks are again at home at their Park Avenue residence.

Mrs. Owen McCauley returned from Detroit, Monday, where she had spent the winter. Supplemented her trip to her home, St. James, Tuesday.

Ira A. Adams went to Detroit today where he will attend a meeting of the Mackinac Island State Park Commission scheduled for Friday afternoon.

Mr. and Mrs. Mortimer Orvis, of Chicago, are visiting Mrs. Orvis' mother, Mrs. Charles Zeitler, 303 Sheridan Ave., and other relations and friends.

Miss Margaret Chambers came down from Mackinac Island last Saturday to make her brother, Capt. John N.Chambers and other relatives, a short visit.

Mr. Will C. Bellinger, mother Mrs. Charles R. Bellinger, son Charles and daughters,motored to Saginaw and Bay City last week and returned early this week.

A. T. Jeffery is building a new cottage at 800 State St., and is rushing the same toward completion in order to have it ready for occupancy at an early date.

Mrs. Albon Smith was called to St. James Tuesday where she will take care of her mother, Mrs. Hannah Mooney, who is reported as being seriously ill.

Mr. and Mrs. R. M. Hurr and Mrs. Will E. Hampton motored up from Ann Arbor early this week and will remain some days attending to business interests in this city.

Mr. and Mrs. Ben Campbell, who spent the winter months with relatives in Harbor Springs and Alanson, returned to their home on Park Ave. a few days ago for the summer.

Members of the State Police are appearing on the scene and with their motorcycle equipment have commenced active service along the public thoroughfares in this part of the state.

Mr. and Mrs. Amos Webster, who spent the winter months in Sarasota, Florida, are again residents of Charlevoix. They returned last Friday, making the homeward trip by auto.

King Saunders and mother Mrs. James M. Saunders, for some time past living in California, arrived here Wednesday morning, and will probably spend the summer months in this city.

Milton Larson, a member of the crew on the government tug Chippewa, entered the hospital last Saturday. His case was pronounced appendicitis. An operation followed the same evening with satisfactory results.

Mr. James A. Carnes, recently retired from the Chicago fire department, after thirty-eight years continuous service, motored up from Chicago last Monday and the following day continued his trip to St. James where he will spend the summer at his cottage.

Low S. See, for several years past in business in the State of Oregon, returned to Charlevoix Wednesday, and will remain here several months, possibly permanently, a change that would be most agreeable to his old time friends in this region. Mrs. See is expected within the next few day.

Rev. B. G. Mattson left on Tuesday morning for Grand Rapids and Detroit. He will attend the meetings of the Congregational Conference held May 18-20, and meet some business appointments in Detroit on May 21-22, returning to Charlevoix in time for the church services the coming Sunday.

Mrs. B. G. Mattson has located for the summer at her camp for girls, "Ocoha-of-the-Dunes" where she is superintending some construction work in anticipation of a successful season, beginning July 1st. The camp property is located on the south shore of Crystal Lake, about four miles from Frankfort.

The Methodist Episcopal Church at East Jordan was totally destroyed by fire last Friday night, causing a heavy financial loss to the society. The building was insured for $6,000, but a fractional part of its actual value.

If you are interested in water sports and cruising, Allie Moore would be pleased to furnish information along the lines mentioned. He is in command of the square rigged training ship Golden Rule and will make rates of $20 per week, this price to include berth and good meals. For particulars address Allie Moore, Charlevoix, Mich.

Dr. Russell A. Palmer, of St. James, was a visitor here Tuesday and Wednesday. On the latter day he drove to Sault Ste. Marie to meet Mrs. Palmer who has been at her former home in Canada nursing her mother during a serious illness that recently caused the death of her parent. From Sault Ste. Marie they will motor to Lansing and other southern points before returning to their St. James home.

Chief of Police, W. J. Weikel is paying special attention these days to drivers of motor cars in an effort to advise such drivers as to their duty under the city ordinance relative to stop streets and other regulations under the city ordinance, of which a strict observance is desired. The Chief has patience galore,but even this has its limit, therefore it behooves motorists to keep within the law, otherwise disastrous results may obtain.

Miss Doris Black, an employee in the Michigan Bell Telephone Company's local exchange, entered the Charlevoix Hospital a few days ago where her case was diagnosed as acute appendicitis and an operation performed Sunday disclosed the correctness of the diagnosis.Miss Black is reported as doing as comfortably as can be expected and her attendants report that there is every prospect for complete and speedy recovery in her case.

The launch White Heather that has sailed in local waters for a term of years will for the present be operated in the Petoskey region. Asa Canning the recent purchase became the new owner, Miss Vallier and Capt. Peter D. Anse, sailed the launch to St. Ignace last Monday, Captain Anse acting as pilot during the cruise of the ship to her temporary home port. Later the craft will be taken to Detroit for use by the new owner who is manager of the Great Lakes Welding Co.

The prediction is freely made that the good old summer time will soon be with us. Snow drifts have disappeared, ice floes from local waters have been a nonexistant for several days. Weather conditions are superb. Flowers both wild and cultivated, are in full bloom, bright colored and plentiful. Shrubbery plants and trees are resplandent with verdure, and while there is every indication that winter and a most disagreeable spring season is in the background, all of which fully confirms the expressions of the local public.

Charles Sterritt was taken ill suddenly at an early hour last Saturday morning and soon thereafter his condition became alarming. Dr McMillan was called and pronounced his trouble was being acute appendicitis. During the early forenoon Charlie was taken to the Charlevoix Hospital where the offending little appendix was removed. The operation prove very successful and the lad shows unusual progress toward quick recovery from the operation.

An invitation is extended and parents are earnestly requested to visit the Charlevoix schools Friday afternoon. At this time an exhibition of school work in the several grades will be on display for either criticism or commentation by visitors. The superintendent and teachers of the faculty are anxious and desire a large attendance of visitors to take full advantage of this opportunity which is an annual event and they hope is also expressed that visitors will give full declaration of their opinion as to the exhibit and school work accomplished throughout the year.

Roe Brothers, of Harbor Springs, commenced active operations on some extensive work for the city at the foot of Mason street last Monday. This work includes the building of extensive docking previleges along the shore of Round Lake that will be of inestimable value to the general public and ship owners, particularly those who operate yachts and launches. Several slips will be available and arranged in commodious form for ships in this class all of which can be used simultaneously without inconveniencing shipping facilities or launches tied up in adjoining slips. Aside from the point of convenience the work when completed according to plans and specifications, it will materially improve the appearance of the lake shore and adjoining properties in this location.

Mr. H. J. Johnston, division manager for the Michigan Bell Telephone Company, with headquarters in Petoskey, who retires to assume a like position with the Company at Traverse City June 1st was a visitor here Tuesday for a two fold purpose. First, to call upon many local friends, express his full appreciation for their hearty co-operation during the past five years that he has been associated with them and say farewell. Second, to present his successor as manager, Mr. Lester Johnston, recently of Saginaw, who succeeds to the position vacated by Mr. H. J. Johnston June 1st. He also expressed the desire that local patrons of the Company would cooperate and extend the same courtesy to his successor, the same hearty glad hand as it had been his pleasure to receive from the same body of telephone subscribers.

Attorney Lisle Shanahan attended a term of circuit court held in Leland, Leelanau county, early this week, where he attended to legal matters for clients.

Dr. W. B. Henderson, of the University of Michigan, will give a lecture at the Methodist church Friday evening beginning at 8:00 o'clock. Subject, "Education Steps Out." This is free, and everybody invited.

Mr. and Mrs. John B. Kosh motored in from Toledo yesterday and have located in their cottage the Eureka temporarily until the Min Jon improvement work is completed and the cottage ready for occupancy.

Mr. and Mrs. C. R. Robinson, of Alma, were week-end guests of Mrs. Robinson's parents, Mr. and Mrs. J. H. Parsons. They were accompanied by Mr. Wilbur Curtis, a friend from Melbourne, Australia.

Harry Taylor is putting the finishing touches and redecorating work in the S. M. Rose harbor shop this week, making for decided improvement in appearance and one that makes the shop more attractive to owner and patrons.

The steamship Puritan, Captain John C. Bright, of the Northern Transit Co. line, visited this port last Sunday evening and will hereafter make regular trips from Chicago to Charlevoix and other northern Lake Michigan ports.

Mr. L. P. Adams and family, visitors in the south, the major part of the time at Miami, Fla., returned to their home here last Tuesday. The outbound and return trip was made by automobile which was fully enjoyed the same as in previous seasons.

F. J. Fessenden and son "Billie" Fessenden are on a motor trip to points in northern Michigan where they will spend a few days camping and trout fishing, after which they will continue on to points near Duluth, Minn., where they will visit relatives for a short time before refurbing to Charlevoix.

The program of dances scheduled for the Odfellow hall during the month of June will be continued, the next of the series will be given Friday evening (tomorrow) of this week. All parties in the future will be under an entirely new management with the music furnished by Proctman's Collegiate Orchestra as on previous occasions.

Mrs. Catherine Bacon returned to her home here, 116 East Lincoln street, after an absence of seven months spent in Detroit. Mrs. Bacon was accompanied on her return trip by Mr. and Mrs. Robert Hummell and their daughter Miss Catherine, who will spend the summer at the Bacot home. They arrived Monday evening making the trip over the motor route.

Friends of Dr. R. B. Armstrong, and they are as numerous as an old Roman legion, will be pleased to learn that he is rapidly recovering from an illness that kept him confined to his bed for upwards of three weeks. At the present writing Dr. Armstrong is able to be about the house and with steady improvement for the next few days will be in condition to get out into the open through which still greater benefits will derive.

In Boston Keep Going

Persons who visit Boston are often perplexed by its maze of streets. A visitor was complaining to a resident that he was constantly getting lost. "Never mind," said the Bostonian. "Just keep on going straight ahead and you will always come out where you went in."—Exchange.

Methodist Church.

C. E. Pollock, Pastor.

All Juniors are urged to be present at the hour of worship next Sunday morning. The pastor will speak briefly to them before they go to their Junior room for their story hour. In all probability the Junior feature of the morning worship will be discontinued for the summer after the first Sunday in June. Every Junior should be present the few remaining Sunday mornings.

The pastor will bring a Gospel message at the regular morning hour of worship. The attendance at these morning services has been excellent during the winter and spring. An interesting program is planned for the summer worship hours in the church. The public is always cordially invited.

The annual Sunday School Children's Day program will be a feature of the Vesper service at five o'clock next Sunday afternoon. An excellent program has been prepared and will please and interest all who attend. There will be no seven-thirty service.

The Local Epworthians are planning largely on the District Epworth League Convention which is to meet in the local church May 28-29. A good program is promised. Young people from about fifty churches of northern Michigan are expected.

The Sunday School meets at twelve o'clock each Sunday and has a class and teacher for all who attend. The attendance has been very gratifying thus far this season.

Baptist Church

Rev. Herman Burns, D. D.,
—) Pastor (—

Preparations are being made for Children's Day, to be held June 13th. That day we all become as little children and with flowers and song and exercise try to enjoy a faith as simple as the child's faith in earthly parents.

The Baptist people are planning to do their part in entertaining the hosts of tourists whom we expect and who are planning to spend the coming summer in this vicinity, and at the same time maintain the regular services of the church. We believe this can be done without sacrificing the necessary income or the dignity of the church. It is well to establish the habit at once, and sustain it with determined resolution—begin next Sunday.

We were greeted with a congregation that well filled the house last Sunday evening, and hope to have it still larger one next Sunday. It was worth the effort just to hear Brother Kirby's solo. He will sing Sunday morning and evening.

All persons not otherwise engaged are given a cordial invitation to worship with us at all our services.

The profound sympathy of the entire congregation goes out to the Carrell family in their bereavement. For nearly two years Mrs. Carrell has been in attendance with us when she was able to do so, and we will greatly miss her. To have such a mother is to instill a great heritage.

Church of God

Rev. Paul L. June, Pastor

Only a month until the Church of God will hold a Children's Day exercise at the camp grounds south of town. You are invited to attend and take part in the program.

Attend the regular services of this church—you will enjoy them.

—DRESS MAKING. — Fashionable dress making by Miss Nellie Guild, Charlevoix, phone 7015-F21. 49-tf

Sunday a m., preaching, 10:30.
Sunday School, 12:00.
Young Peoples' service 6:30.
Preaching, 7:30.
Prayer Meeting, Wednesday 7:30.

Congregational Church

Rev. B. G. Mattson, D.D., Minister

At 10:30 morning service at which the pastor will give a report of the 59th annual meeting of the State Congregational Conference of Michigan. The sessions will be held with Park Congregational Church, Grand Rapids, and will be of unusual interest.
12:00 Sunday School.

The WATER BEARER

By J. ALLAN DUNN

Author of "A MAN TO HIS MATE" "RIMROCK TRAIL"

©By Dodd, Mead & Co. WNU Service

HERO AND HEROINE

Here's a new kind of story of the West—a romance of hydraulic engineering. Mining, ranching, lumbering and railroad building have been the favorite subjects of the fictionists and many a good story have they given us. Here's a new kind of hero—a young New Englander born under the sullen sign of Aquarius and destined to be in very truth a "Water Bearer." The heroine is a "native daughter" of California. And around the water-bearing exploit of the Eastern man and the Western girl revolve fascinating adventures "by flood and field" and a story of true love that runs far from smoothly at times. For here is a new novel by J. Allan Dunn, whose Western stories have deservedly won for him a wide popularity. And here Eastmeets West—and a stirring romance grows out of the meeting.

CHAPTER I

The Canyon

Caleb Warner conscientiously fished every foot of the likeliest-looking hole he had seen on Hermanos creek, but there came no rise, no eager lip, no submerged gleam of a rainbow's shimmering flank.

He waded ashore, put up rod and tackle, climbed through the thick, tall ferns and brambly undergrowth to the narrow trail and turned upstream. All the day was his, the best, for that matter, and he fancied the fishing would be better higher up. Caleb walked with his coat tucked between the slings of his creel, his shirt open at the throat; lean, long, well-shouldered and slender-flanked, tanned of skin, springy of action, generally good to look at. By the canons of moving pictures and magazine illustrations he was not handsome. New England ancestry had made him too aquiline of feature, but he had youth and strength, his gray eyes were clear, his forehead high to his straight, close-cropped hair, his lips clean-cut and his chin well forward, not too narrow. His general make-up was typically American, Yankee-American, unmarred by inbreeding.

Below him Hermanos creek sang, half hidden by the undergrowth. His economic, New England brain saw potentially going to waste. In Massachusetts Hermanos creek would long ago have been harnessed. Mills and factories would have sprung up along its banks. There was water for steam, for turbines, for commercial and domestic use, for irrigation; all unused. Its energy seemingly doomed, for there was a peculiar thing about the creek that Caleb, as an engineer, had noted. Contrary to the habit of most well-mannered watercourses, its volume diminished as it flowed.

He was twenty-seven, six years out of the college chrysalis that he had spun at Columbia. He had served in the war, hard, practical service in tasks that were low-grade but necessary, the crude, swift work of building and repairing war-roads and bridges, and in it Caleb Warner had, in large measure, found himself. He had acquired initiative, resource, command of men, if nothing else. And he had come out unscathed, unwounded, ungassed, restored in an sense of coordination, sane mind and sound body. He had been granted wifer hirlmk. So he had come west to find his oyster —and to open it.

Swiftly the wooly cafe of the canyon became a tunnel, the creek now far below him in a water-chiseled gorge. The tunnel became a gut. A suspension bridge, a shivery thing of wire rope and short planks, anchored with wire cables to high walls of rock, crossed the gorge. It shook under his tread and hung trembling as he stopped midway to look at the gush of compressed water surging through the gap, twenty feet down. There were signs on the rock that at times the creek rose close to the flooring.

Before him, to the south, lay Hermanos valley, a green bowl lipped by rolling hills, their crests bronzed by the summer sun, blazoned with great patches of golden poppies, with clumps of purple lupine, the lower slopes furred thick with wild oats waving in the wind, oats as high as Caleb's head, a shimmering sea of emerald and silver.

He stood for a while undecided whether to adventure on to the waterfall or to stay where he was until it was time to fish down the canyon with the hope of better results than the three trout his persistence had lured from the creek. He had a book tucked into his pocket but he was not tired. And he had lunched an hour before.

The view held him. Looking down, he saw that the stream was a vagrant, that, in the ranks one bed was not enough to convey its waters. A second course, now dry and partly grown over, erratically paralleled the actual creek. Willows bordered it.

Along this idle water-track, racing so fast it seemed a gray streak, bend down, brush towered, a coyote ran at top speed, alarmed, not hunting, covering ground at a frantic pace, pressed to its utmost by fear.

After it, perhaps fifty yards away but gaining at every bound, sped a gallant, bobtrfid hound, white-coated, taper-muzzled, bearing its tail like a great plume, overtaking the coyote with tremendous leaps, going at a terrific rate, yet so smoothly that its speed seemed effortless—a Russian wolfhound.

Beyond the willow fringe came her mate, bound for bound, level with the bitch, unseen, though perhaps not unknown to the coyote.

Then, from a thicker growth of trees, obtruncted, but traveling fast, a pinto flashed into Caleb's view, a boy crouched low on the withers, wedded to the horse, urging it on.

Caleb thrilled to the chase as it swept on beneath him, admiring the horsemanship of the figure in breeches, puttees and flattering blouse, a little envious of it.

"Gad, he can ride," he muttered.

A cup blew off, a long tress of chestnut hair, ruddy as a flame, whipped out, was reeshed for and tucked in by its owner, only to stream errunt again. The boy was a girl!

The bitch was almost up with the coyote, the dog, watchful through the gaps in the willows, came circling in, jaws agape, ready for the kill. The coyote made a last desperate effort. The ditch, with one enormous leap, came abreast. She lunged, her white neck like a snake's for speed and sinuousness, her teeth clanging down on the forehead of the coyote. Caleb saw the latter checked, tumbling, heard a broken snarl of defiance, and then the second hound sprang in a white gleam of fury, too swiftly for him to catch the action. Its powerful jaws, bred for the work, crunched through the vertebrae of the coyote's neck. The hunt was ended.

The girl rode up at a gallop, checked the pony in midstride and slid to the turf while the two hounds thrust their muzzle at her. With one steady, not worried, not dashed look at other she strove to cull up her hair, now fairly down her shoulders, reaching to her belt.

"Good boy, Sarafot! Good girl, Stey!"

Caleb heard her faintly but plainly and shouted down his own need of applause. He had left most of his innate reserve behind him in Europe and the stir of the hunt still held him.

"Bully for both of them!" he cried and waved his hat as the girl looked

The Boy Was a Girl.

up. She smiled, waved back an ungloved hand at him in western friendliness, and finished the upwitting of her hair without embarrassment. Caleb started down through the cuts. He loved dogs. He did not know so much about girls. But this one seemed different. And he had left the conventions behind in Massachusetts.

She smiled at him again as he came out on the level, half waded, half jumped the creek and went toward her. The wolfhounds looked at him with their dark brown eyes, sniffed, accepted his pats and turned their heads away, pointedly aloof. The girl laughed at his evident chagrin.

"They are disdainful beasts, my horse," she said. "You must excuse them."

"They are marvelous runners. I did not suppose anything could overhaul a coyote. But it hardly seemed fair up there on the hill. Two to one, I mean."

She looked at him quizzically. She was frankly surveying him. He said that she was about six inches shorter than he was—which made her five feet six—that she was at once slim and rounded, that she had a short straight nose and a mouth that was neither small nor large, neither full-lipped nor narrow, a round chin, a dimple in one cheek, and that her eyes were the exact color of the lupines. Also that there was no nonsense about her. A part of Caleb's curriculum, a majority of his experience, had consisted in the training of his powers of observation. In the brief glances he had permitted himself he had done very well.

"There are not very many coyotes where you come from?" she queried.

"How do you know?" She laughed and he added that and her teeth in the catalogue. Both were, to his taste, perfect.

"How do I know? I am sure now. Does anyone but a Yank reply to a question with another one?"

"Yank! Are you a southerner?"

"There you go again. Wait. I must unsolve your charge against my dogs. If you think it was not sporting to set Sarafot and Siva against one coyote, how about my helpless calf that was butchered last night? And half a dozen others this summer. And a colt! There are probably fifty coyotes who make this valley their larder. Golden shelters scores of them. And these two have accounts for nine of them. It is sheer justice, wholesale or wretfully. The coyote always has the start. It is killed instantly, not worried, not mangled afterward. My horsels don't eat carrion."

"Acquitted," answered Caleb, "I beg their pardons. I am a Yankee from Massachusetts. I am a civil engineer come west to seek my fortune. My name is Caleb Warner. I live in Galilee and I was recommended to Hermanos creek for trout fishing."

She had a trick of looking through long lashes that was a bit unfair, Caleb thought, but they did not hide a twinkle that lurked behind them.

"Did you catch any trout, Mr. Warner?" she asked. He showed her his basket.

"We have trout in New England," he said, "I was hoping to do better later in the afternoon. Did you say you were from the South?"

"I am a Californian." He was certain that she knew he had hoped she would give him her name in return.

"The best fishing is in the canyon back of the waterfall at the head of our valley," she said. "You can easily climb the cliff."

"You own it? The valley?" She opened her eyes a bit in acknowledgment of his persistence and speed to take the opening.

"My father does. His name is Clinton." She had evaded it cleverly, Miss Clinton. That was as far as she would go. Caleb bowed to his defeat.

"Well, then, Miss Clinton, do you think your father would have any objection to my fishing through his meadows, later, after I have been above the fall?"

"I am quite sure he would not. Perhaps you would like to meet him? The house is not very far from here." Caleb lunched and she with him.

"I should be delighted," he said. "And I am very glad to have met you, Miss Clinton." She took his hand and three eggs, one tablespoonful each of butter and sugar, a few grains of cayenne, one teaspoonful of nutmeg, and one teaspoonful of salt. Beat all together until the eggs are broken, set over hot water and stir until it begins to thicken, then add three tablespoonfs of vinegar (hot) to the cream mixture. Cook until it coats the spoon, add one and one-half pounds of finely cut cheese, two green peppers put through the meat chopper and two red peppers also chopped. Add the peppers after the mixture is slightly cool. Use one slices of buttered bread. The cheese and peppers may be used, adding buttering. Now she placed them along its neck, their buckle back of the saddle-horn and, as she and Caleb walked along the stream toward the house the pony followed as closely and sedately as the wolfhounds.

Evidently Miss Clinton is what we Americans call "a nice girl," with individual attractions. Does the Yankee measure up?

(TO BE CONTINUED.)

Undersea Craft Idea Dates Back Centuries

Few an'l evil have been the days of the submarine, though it is thought to banish from the fleets of the world. But experimentarily the idea goes back into a very remote past. Aristotle speaks of some kind of submarine vessel used in the siege of Tyre more than 2,000 years ago, and there are occasional assertions of the idea through history.

In the Sixteenth century we come to the bishop of Upsala's claim to have invented a boat for scuttling ships from below, and in 1620 Charles I gave a Dutch inventor an order for "boates to go under water," though they do not seem to have been used against the French. There were the rudimentary and unsuccessful "turtles" of Bushnell in the Eighteenth century. But an ill fate pursued the early inventors.

Fulton's submarine was rejected by France, England and America in turn.

Origin of Hat Unknown

It is difficult to state just when hats were first worn, and there is no record as to where or when the first hat was made. The first modern hat, as we know this article of men's wear, was made in Paris in 1404 by a Swiss manufacturer, but it was not until 40 years thereafter that the French adopted any sort of a head covering.

Churches in Business

An old Jewish synagogue in Maiden lane, London, is now used as a theater for rehearsals, and a Methodist chapel in Southwark, where Wesley preached, is used as a paper warehouse.

The famous Surrey chapel, where Rowland Hill preached, is today the great bonting rendezvous known as the Ring. At Willesden an old chapel has been converted into a draper's establishment, the pulpit being used as the cash desk; another, in the Hampstead road, has been turned into a picture palace.

The Union Jack club, opposite Waterloo station, stands on the site of a Methodist chapel which had lost its worshipers, while St. Andrew's, Tavistock place, was once a fashionable church, but has been in turn a cycle store and a club.—London Answers.

A man who lives in the mountains thinks the prairies a magnificent sight and he set himself to the more usual work of designing low engines. John son's submersible, which was to have rescued Napoleon from St. Helena, came to nothing. Bauer, who was taken up by the prince consort, drowned the crew of his submarine, though the admiralty seems to have been largely to blame.—Manchester Guardian.

"Jehu" Long Famed

Jehu as a colloquial name for a coachman, or for one who drives recklessly, is derived from a biblical source (II Kings 9:20): "The driving is like the driving of Jehu, the son of Nimshi, for he driveth furiously."

Scriptural Liquors

The words of the Scriptures, translated, which apply to wine or liquors are yayin, fresh juice; urosh, not fully aged but intoxicating; shekar, strong drink.

THE KITCHEN CABINET

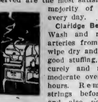
A widespreading, hopeful disposition is your only true umbrella in this vale of tears.

Do the work you have to do
With a purpose strong and true,
Every day.

GOOD THINGS TO EAT

The simplest foods well cooked and served are the most satisfying to the majority of people for every day.



Claridge Beef Heart.—Wash and remove the arteries from the heart, wipe dry and fill with a good stuffing, tie up securely and roast in a moderate oven for three hours. Remove the strings before serving, and also pour a hot gravy around the heart.

Stuffing: Chop one ounce of suet fine, add two cupfuls of bread crumbs, one chopped onion, season with parsley, thyme, pepper, salt, and a grating of nutmeg. Mix well and add one beaten egg to bind it.

Spring Salad.—Grate or put through the fine knife of the food chopper enough carrots to make a cupful, add a little minced celery, a seasoning of onion and enough good salad dressing to season well. Serve on lettuce, dotted with spoonfuls of the dressing.

Rhubarb and raisins make a good combination for a pie.

Plain Custard Pie.—It would seem that any cook might make a most acceptable custard pie, but the proof of the pudding being in the eating, we know they can't. Line a pie tin with a good rich crust having the rim stand up well above the edge of the tin. Fill with a custard mixture, using for an ordinary pie two eggs, one-third of a cupful of sugar, a pinch of salt, and two cupfuls of milk, adding a generous grating of nutmeg or cinnamon if preferred. Set into a hot oven to bake the crust quickly—this avoids soaking it—then lower the heat to bake the custard, as that should not be cooked at a high temperature. Too hot an oven will make the custard whey, and become coarse grained. A perfect pie should be well baked on the bottom and have a filling of rich, creamy consistency. A custard is well baked when a knife thrust into the center comes out clean.

Tapioca well cooked and mixed with any bits of canned or fresh fruit, topped with whipped cream, makes a most delightful dessert.

Dumplings.—Delicious fluffy dumplings may be prepared as follows: Take one beaten egg, one cupful of buttermilk, two teaspoonfuls of baking powder, one-half teaspoonful of salt; sift in flour enough to make a drop batter. Drop from a teaspoon into a kettle of hot meat broth plenty of bones to hold up the dumplings, cover tightly and cook eight minutes. Do not uncover during the cooking.

Everyday Good Things.

If one desires a large quantity of sandwich filling for company, the following recipe will be a good one to follow. For small amounts it may be divided.

Cheese Sandwich Filling.—Mix together one cupful of sour cream, three eggs, one tablespoonful each of butter and sugar, a few grains of cayenne, one teaspoonful of mustard, and one teaspoonful of salt. Beat all together until the eggs are broken, set over hot water and stir until it begins to thicken, then add three tablespoonfs of vinegar (hot) to the cream mixture. Cook until it coats the spoon, add one and one-half pounds of finely cut cheese, two green peppers put through the meat chopper and two red peppers also chopped. Add the peppers after the mixture is slightly cool. Use on slices of buttered bread. The cheese and peppers may be used, adding buttering. Now she placed them along its neck, their buckle back of the saddle-horn and, as she and Caleb walked along the stream toward the house the pony followed as closely and sedately as the wolfhounds.

WHEN YANK SAILORS WIPED OUT PIRATES

Little Brush That Goes Back to Year 1870.

The Asiatic squadron whipped Korean pirates in a battle in 1870. Those were the days of steam and sail, and the Colorado, a wooden frigate, was the flagship of the squadron. She was a full-rigged ship. The sailor boys of that day sang their chanteys like the tads on the Britishers. Tales of piracy and worse, on the part of the Koreans had reached Washington, and the Asiatic squadron was ordered there to put them out of business. Under Admiral Rodgers the squadron went to Koren and laid siege to Seoul. The pirates had four forts and the Americans stormed them. The Colorado had 26 nine-inch guns on her gun deck, and eight similar guns on her spar deck. They were all smooth bore, for the Americans had no rifles at that time.

The Americans didn't use these guns in the fight. They took three-inch howitzers ashore in small boats, and the marines and the blackjackets were armed with Springfield rifles. Those Koreans had never heard of American sailors and devil-dogs, and had the nerve to come out and fight them hand to hand, after the Americans had mussbed down the walls of the Korean forts with their howitzers.

The Americans were in fighting mood, filled with the stories of the Korean massacre of shipwrecked Americans; and the Americans pelted the Koreans with their big guns—they thought they were big—while they were rowing ashore. Down went those forts one after another, and the Americans killed a lot of Koreans with their howitzers. There were heaps of dead bodies behind the walls. The Korean soldiers were white suits and long white hats. The Americans didn't know it, but the Korean uniforms were bullet-proof and knife, proof, too, but not bayonet-proof, which they soon found out. The suits consisted of layers and layers of linen cloth wrapped around their bodies.

The story of the fight is told by James Felker of New York city, to Joseph B. Jordan, in the New York Evening World. Felker was a marine on the Colorado.

Horse Latitudes

This is an old seaman's term of doubtful origin. "Horse latitudes" is the name applied to a region in the Atlantic ocean between 30 and 35 degrees north latitude. It is noted for its calms and baffling winds. In the days of sailing craft many difficulties were encountered in the horse latitudes. One writer describes this ocean belt as follows: "Gales and dead calms, terrific thunderstorms and breezes, fair one hour and foul the next, are the characteristics of these parallels." According to one theory, which is accepted by some authorities and rejected by others, the region received its name from the fact that in colonial times vessels carrying horses from Europe and New England to the West Indies were sometimes obliged, when detained there, to throw part of the cargo overboard.—Pathfinder Magazine.

Prophets Were All Wrong

"All bunk about climatic cycles, says the weather bureau. And it points to the flood of predictions last summer of a fall that this winter would be very cold and severe. It has really been a little warmer than normal. Records of the last forty or fifty years show no radical difference. . . . Our weather is made on the sun. What difference there is from year to year is probably due to the great storms which sweep the sun. They tear such vast holes in the atmosphere of hamlog gases that a handful of planets the size of the earth could be dropped in without touching the sides of the hole and would perhaps not raise an additional blister on Old Sol.—Capper's Weekly.

Phrase Often Misused

The phrase "estates of the realm" is often erroneously applied in England to the king, lords and commons. It is properly given to the lords, the clergy or spirituality, and the commons. These three orders, together with the king (or queen), constitute the parliament of the United Kingdom of Great Britain.

In France the three orders were the nobles, the clergy and the third estate (or commons), and these remained until the revolution of 1780.—Kansas City Star.

Tropical Fruit

The guava grows in tropical America, Mexico and the West Indies, and, as there are over 100 species, the fruit varies considerably as to color and shape. Propagation is nearly always by seed, but some vegetative method is generally used to perpetuate desirable varieties, as the plants do not run true to seed. As a food it is used with raw cream and sugar, and also made into shortcakes and pies, but its most common use is for jam, jelly, cheese and syrup.

Swift Motor Car

A motor car has been developed capable of attaining a speed of more than three miles a minute. Its minimum speed will be more than sixty miles an hour when in high gear.

The engine weighs 800 pounds and develops 600 horse power.

In order to carry out a full mile test at top speed a stretch of at least seven miles will be necessary.

Founder of Georgia

James Edward Oglethorpe, who projected the colony of Georgia and conducted the expedition for its settlement in 1733, remained in America only ten years, returning to England in 1743. He died in 1785.

Moved and Seconded

A foreign exchange suggests that Joan of Arc be chosen as the patron saint of radio, because she was in the habit of listening to supernatural voices.—Boston Transcript.

Ask Your Dealer

ASK your local dealer to recommend a practical decorator. If you are unable to secure one you can do the work yourself, tinting and stenciling your walls to give beautiful results.

Alabastine

Instead of Kalsomine or Wall Paper

Buy Alabastine from your local dealer, white and a variety of tints, ready to mix with cold water and apply with a suitable brush. Each package has the cross and circle printed in red. By insisting Alabastine tints you can accurately match draperies and rugs and obtain individual treatment of each room.

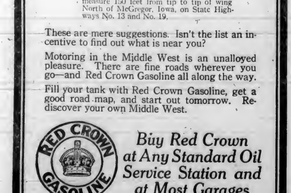
FROM PALETTE TO MORTAR BOARD

Young women artists turn from their jars of color and paint brushes to assist plasterers in setting ornaments in place atop huge pylons which adorn the main entrances to the Palaces of Varieties and Food Products, of the vast exhibition buildings which forms a part of the great Sesqui-Centennial International Exposition being staged in Philadelphia from June 1 to December 1 to celebrate the 150th anniversary of the signing of the Declaration of Independence. Climbing ladders and walking along rickety scaffolds are not for the new to these young ladies, but each time they do it they get a thrill.



Explore Your Own Middle West

Pleasure places, wonderful scenery and unusual sights are within a short distance of your home —wherever you may happen to live in the Middle West. This great, rich section of our country has been unexploited, but no part of the world offers more to see and do.

Leave dull care behind and start out tomorrow in your car to explore your own country. Time? It doesn't matter. A day, a week, or a whole summer—it will be packed with pleasure. Money? It's not important. Camp beneath the stars, stop at rusticlodges, put up at smart hotels—as you wish.

Look over this short list. Check the things you've seen, and those you'd like to:

1—Wyandotte Cave, Crawford County, Indiana, the second largest cavern in the country.
Eleven levels and a passage-way thirteen miles long. Near Corydon on State Highway No. 16.
2—Redwood Falls, a magnificent spectacle, in Ramsey State Park, Minnesota. Itasca Park Highway and State Highway No. 14.
3—Starved Rock, visited by Marquette and Joliet in 1673, the scene of the last stand of the Illinois Indians. A few miles from Ottawa, Illinois. State Highway No. 7.
4—Gorge of the Mississippi in Wisconsin with cancellated heights of weathered limestone bearing a fantastic resemblance to fortresses of old. State Highway No. 35.
5—Mark Twain State Park in Monroe County, Missouri, on beautiful bluffs overlooking Salt River, where Samuel Clemens was born. Near Paris, State Highways No. 10 and 15.
6—Hutchinson, Kansas—a center of the salt industry and an extensive strata of pure rock salt which is probably the largest in the world. Highways No. 59 and No. 32.
7—The Killdeer Mountains, the most beautiful of the scenic spots of North Dakota. Near the town of Killdeer on the Mandan-Killdeer and Denver-Estevan Highways.
8—Miles of shaded shoreline along the Lake in Michigan. State Highways No. 11 and No. 22.
9—Sperrfish Canyon, with its sheer walls and tumbling waters, forty miles of exquisite beauty in South Dakota. Custer Battlefield Highway from Rapid City.
10—Effigy Indian mounds built in the shape of various animals. Several bird mounds that measure 150 feet from tip to tip of wing North of McGregor, Iowa, on State Highways No. 13 and No. 19.

These are mere suggestions. Isn't the list an incentive to find out what is near you?

Motoring in the Middle West is an unalloyed pleasure. There are fine roads wherever you go—and Red Crown Gasoline all along the way.

Fill your tank with Red Crown Gasoline, get a good road map, and start out tomorrow. Rediscover your own Middle West.

RED CROWN GASOLINE

Buy Red Crown at Any Standard Oil Service Station and at Most Garages

Standard Oil Company *(Indiana)*

CHARLEVOIX, MICHIGAN 4362

THIRD OF DRUNKEN DRIVERS ARE FREED

Public Officials Lax, Says Safety Director.

Washington—Thirty-three per cent of drunken automobile drivers go unpunished by the authorities, is the startling statement made here by Marcus A. Dow, director of the Stewart-Warner safety council for the prevention of automobile accidents, who was here to attend the national conference on street and highway safety, called by Secretary Hoover of the Commerce department and which opened its sessions in the United States Chamber of Commerce building.

Mr. Dow, who presented to the Hoover conference many other startling facts he has discovered in his many years of safety work, has just completed a survey of the death-dealing automobile with the assistance of the chiefs of police in 185 cities and towns which he is compiling for the Stewart-Warner safety council of Chicago to be used in his nation-wide campaign to help cut down the tremendous death toll due to automobile accidents. In an interview prior to the opening of the three-day conference Mr. Dow revealed some of the high spots in his investigation.

Are Contributing Factor.

"In the survey of the contributing causes to automobile accidents, said Mr. Dow, "it has been made clear that drunken and reckless drivers of automobiles are numerous enough to be a big contributing factor to the street and highway accident record of the United States. The record of arrests against this class of drivers to be an actual and grave menace throughout the entire nation, while adequate punishment of offenders is conspicuously lacking. The failure to punish is the most regrettable part of this serious situation.

"I have just received reports from the chiefs of police of 185 cities and towns which show that 14,566 persons were arrested for driving automobiles while intoxicated in 1925 and 146,796 arrests were made for speeding or reckless driving where no intoxication was charged. These cities covered in my survey represent 34 states and the District of Columbia. The population of the towns and cities on which this estimate is made totals 15,000,000.

"The most amazing fact revealed in these reports is that 33 per cent of the drunken drivers arrested received no punishment, their cases being either discharged or sentence suspended. We found that only 21 per cent arrested for intoxication were sent to jail and 46 per cent fined. Of those arrested for speeding or reckless driving and who were not drunk only 46 per cent were fined and 1 per cent sent to jail.

124,000 Drivers Drunk.

"Assuming that the same conditions exist in all the other cities and towns of the United States as are found in those covered in the Stewart-Warner safety council survey, which is a reasonable assumption, there were at some time last year more than 124,000 persons driving automobiles in the streets and highways of the country while drunk. The number guilty of speeding and reckless driving where no intoxication was involved would include 5 per cent of the motorists of the United States.

"Every automobile with an intoxicated driver at the wheel becomes a potential death car, and every car in the hands of a reckless driver is deadly weapon. It is obvious that if the automobile death and injury record is to be improved and the streets and highways made safer for the people there must be a decided tightening up in the enforcement of law against drunken and reckless drivers, which our survey demonstrates is sadly lacking throughout the country generally."

Mr. Dow found just one bright spot in the course of his investigation. That was in Florida. At Jacksonville 192 persons were arrested for driving cars while intoxicated and every one of them was punished.

Bear Trees Man, Holds Him Captive All Night

Winchendon, Mass.—Exhausted and almost frozen after a night passed in a swaying tree top in the woods near the Beaman farm, Joseph Stone, a woodsman, was brought into town in the morning by Daniel P. Morlock, a passing autoist, who rescued him from his precarious position.

Stone explained that he had occupied his chilly perch all night because a big black bear had insisted on occupying a spot near the bottom of the tree. A hastily organized lumbjue party started at once for the scene. The bear was reported headed for the vicinity of Monadnock mountain, but the hunting party expected the dogs to tree him.

House of Noted Roy Roy Is to Be Modernized

Glasgow, Scotland.—Roy Roy's Glenglyle house on the borders of Perthshire and Stirlingshire, where the famous highland outlaw died in 1734, is to be modernized. It is to have electric call bells for the servants and incandescent light for the benefit of its occupants and visitors. The idea of doing away with candles and ancient oil lamps is that of the Glasgow municipality. Some of the townspeople regard the innovation a sacrilege. Robby MacGregor still having a romantic hold on the imagination of those persons familiar with the writings of Sir Walter Scott.

His Last Laugh

An Arizona man went to the gallows laughing, but he didn't come back that way.—Indianapolis News.

Sends Cent to Pay Income Tax; Has Change Coming

Oklahoma City, Okla.—Officials at the internal revenue collector's office here are faced with the problem of making change for a man whose license for the light watched their approach and followed their departure until the ship dropped below the horizon or its lights were extinguished in the dark of night, leaving only intensified solitude in its wake.

Even today visitors are almost unknown at many lights that dot New England's broken coast. Only an occasional visit by a tender ship that brings supplies breaks the monotony that makes all days seem like one. In the case of lighthouses and lightships, however, the periods of isolation are liable to extend over months. Newspapers and magazines are weeks old and their news, as such, has long since ceased to be.

The picture he lays before the landlubber could leave its setting in the desolate Great Point light, miles from the mainland, or in the famous Minots ledge light that rises from the water without apparent support. Minot's foundation is cut in the solid rock of one of the most dangerous submerged ledges on the entire coast line.

The last visit of a tender is weeks back. Overhead the signal light flashes and blinks in unceasing rhythm. In the season of gales and out of the black north sweep unleashed winds that scourge the Atlantic and froth its surface in foam. Spray turns to ice and coats the glass protection around the flashing light with sleet. The observation loft whistles in the gale.

The keeper's "trick" is up and he is relieved by an assistant.

He now retires to his room. He turns a knob on his radio set. The room shifts as he takes a new picture. The winds subside and leaves no longer pound. It is a peaceful night and strains of Beethoven's "Moonlight Sonata" fill the room. Soon the lonlier of the Philharmonic orchestra in New York or Philadelphia surrenders his baton to a "jazz" outfit in Pittsburgh or Chicago. As for the news of the day, in fact of the hour, he needs but turn his dial to another station and instantly he is listening to despatches that under ordinary circumstances he would not have long to wait for racks.

In all there are about 120 lights scattered along the fury state coast. Of these, 60 are "watched" lights and some 75 keepers are employed to see that their beacons are kept burning. Most of them are illuminated by gas lanterns as lighthouse officials believe it to be even more dependable than electricity for their need.

Almost without exception these stations house one or more radio sets which the keepers themselves have purchased.

On board the lightships the change is even more pronounced in the facilities. There are 17 of these vessels looking at sea from points of agreed set hidden danger. A few miles off the coast is stationed the Nantucket shoals ship, the farthest inland lightship in the world. Fifteen men comprise its crew and it is often months at a time that they see the land.

An especially posed and approved portrait of Representative George Russell Stobs, Republican of Massachusetts, a member of the house committee on judiciary.

LIGHTHOUSE BLUES BANISHED BY RADIO

Music From Air Now Comes to Lonely Isles.

Boston.—Adoption of the radio by keepers of lighthouses and lightships has given brilliant touch to a new chapter in the romance of the Atlantic ocean.

Since the days when first wooden fires were kindled in the tower of Pharos light to warn and guide mariners entering the ancient harbor of Alexandria, the life of the lighthouse keeper has been one of dreary monotony and isolation.

For ages the keepers have tended their wooden fires, huge wax candles, oil, gas or electric lanterns, never allowing them to burn low or cause their dimming.

Pilots seeing the beacon altered their courses to steer clear of rocky ledge or treacherous hidden shoal. The keeper of the light watched their approach and followed their departure until the ship dropped below the horizon or its lights were extinguished in the dark of night, leaving only intensified solitude in its wake.

Even today visitors are almost unknown at many lights that dot New England's broken coast. Only an occasional visit by a tender ship that brings supplies breaks the monotony that makes all days seem like one. In the case of lighthouses and lightships, however, the periods of isolation are liable to extend over months. Newspapers and magazines are weeks old and their news, as such, has long since ceased to be.

The picture he lays before the landlubber could leave its setting in the desolate Great Point light, miles from the mainland, or in the famous Minots ledge light that rises from the water without apparent support. Man Worth Million Takes Two-Sou Tips

Paris—Although he has $1,000,000 awaiting him across the ocean, a middle-aged man in Bordeaux is still receiving tips and pocketing them with thanks. He is Noel Soulain, a cafe waiter.

It was only the other day that a notary advised him that his brother had died in Sao Paulo, Brazil, leaving him a fortune amassed in cattle breeding. Noel has not been thrown off his balance by the news and pending his departure for Brazil to take over his legacy continues serving beer, wine and coffee to his patrons who, when they give him the inevitable 2-sou tip, little dream they are entertaining a millionaire.

Noel Soulain was born in Brazil, but left with his parents when a baby. The waiter refused afterward that he heard from his brother until he was informed by letter asked him to send him $50 worth of liquor. Noel complied and shortly thereafter never reimbursed him or even acknowledged receipt of the shipment.

LEGAL NOTICES.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Frederick Yahr and Sophia Yahr, his wife of Detroit, Wayne County, Michigan, unto Mary Zipp of the county of Charlevoix, Michigan, dated January 30th 1921, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 26th day of January, 1921, in Liber 48 of mortgages on page 279, on which mortgage there is claimed to be due at date of this notice the sum of One Thousand Three Hundred Seventeen and 66-100 Dollars, including the principal sum due with interest; and a Fourteen and 67-100 Dollars, being taxes and interest thereon paid by the mortgagee on the land and premises herein described, together with an attorney fee of Thirty Dollars as provided for in said mortgage, and no proceedings at law or equity having been instituted to recover the money secured by said mortgage, or any part thereof, and Whereas, the taxes required by the statute to be paid on said mortgage was duly paid prior to the recording thereof;

Now Therefore, notice is given that by virtue of the power of said contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by said mortgage, and also including the taxes paid by the mortgagee, at Public Auction, to the highest bidder therefor, at the front door of the Court house in the city of Charlevoix, Charlevoix county, Michigan, (that being the place where the circuit court for the county of Charlevoix is held), on Friday, the 25th day of June, 1926, at ten o'clock in the forenoon on that date.

The premises described in said mortgage being the lands and premises situated in the Township of Hayes, county of Charlevoix, state of Michigan, viz: The east one-half of the Southwest quarter of section Eleven in township Thirty-four, North, Range seven west, containing eighty acres of land, more or less, according to the government survey thereof.

Dated March 19th, 1926.

D. S. PAYTON
Deputy City Clerk,
City of Charlevoix, Michigan.

THE CHARLEVOIX SENTINEL

Volume 37 Charlevoix, Michigan, Thursday, May 27, 1926 Number 5

FERRY SERVICE

At Ironton to be Operated Soon

NEW CRAFT ON WAY

Capt. Rose Left Wednesday Will Return with the Boat

There is every prospect at this time that ferry service at Ironton will be reestablished within a few days, possibly as soon as the new ferry arrives at Ironton which will be some day early next week.

Last Tuesday Captain S.M. Rose was notified by the builders of the new craft were ready to make delivery of their work upon receipt of which Captain Rose arranged with his crew to bring the ferry to Charlevoix and left for Grand Haven Wednesday morning, where he will procure a life boat to be used in connection with the Ironton service.

Some short delay will be necessary at Ferrysburg for placing the housing over the engine after the same is installed. This will not be done until Captain Rose arrives in Ferrysburg. This delay will be of short duration according to information received here. With the work completed and the new ferry accepted Captain Rose will bring the craft to Charlevoix and Ironton where it will be placed in commission as soon as approaches are completed.

Patrons of the Ironton route have been wholly without ferry service since last fall when the old ferry was discontinued, therefore local people and those on the east side of the lake have considerably inadequate in effort to carry on business as opposite sides of the South Arm of Pine Lake.

This route is popular with local and transient people and during the spring summer and fall months there is a heavy traffic along the route. With the new ferry in commission the public will have decided advantages over past conditions. A satisfaction to all.

GEORGE R. STOBS

First Resort Special Leaves Chicago for The North June 9th

The first resort special over the Pere Marquette leaves for the north June 9th and due to arrive in Charlevoix the morning following and is put on for the benefit of parties desirous of making the trip early. Other specials will make the run at regular intervals until the full summer schedule becomes effective. The service over the Pere Marquette system throughout the season will be practically the same as last year in so far as the number of trains and time of arrival is concerned, making a most decided improvement over the service given for the past few months.

INDIANS HELD CORN AS HEAVENLY GIFT

One of the Four Original Celestial Blessings.

The Indian is the real advocate of corn. To him it was the staff of life. He ate it and it was distinctly American. The sailing vessels which carried back to Europe news of the discovery of the one bore also samples of the other. Corn has meant so much to the Indian in his economic life that he came to reverence it. It was one of the four original celestial blessings sent down to him from heaven, the Indianpolis News says. The others were squash, beans and tobacco. Corn meal is used by the Pueblos and other Indians in all their religious ceremonials. No tribal undertaking is complete, no official pronouncement is effective, unless they are accompanied at their reception, by the sprinkling of the sacred meal. The medicine man finds in the meal, blessed and sanctified by his own hands, the chief ally in imploring the blessing of the good spirits which rule the Indian world, or in driving away the evil spirits which threaten to warp the functions of the good. Growing corn will wither and die, seeds will not sprout, horses and sheep will perish, families cannot prosper and the evil spirits of misfortune and disease will sweep the villages unless the sacred meal is sprinkled at the beginning of all undertakings. The chief fetich of the Pueblo medicine man is an ear of spotless white corn, adorned with a plume of downy white feathers bound to the top. Known as the mother, this ear of corn represents the mother of all mankind. With it the medicine man performs wonders. Dishes of corn-and squash, especially among the Pueblos, forms also an important function in sanctifying all undertakings. It is to them the most spiritual of material offerings and no ceremony connected with growth is complete without it. Its symbol, as well as that of growing corn, often appears in the sand paintings made so famous by this artistic people. The ancestors of the Indians, the so-called cliff dwellers, cave dwellers and mound builders, used corn. Among arrowheads and pottery, stone implements and other artifacts found in the caves, cliff dwellings, mounds and ruins of communities unknown to the history of people, little ears of corn are often discovered. To them people the great American community probably was as essential as it became later to their descendants.

ADDITIONAL LOCALS

The Michigan State Fair management have selected the week September 5-11 for their 1926 exhibition. This is the big show of the kind for Michigan, draws people from all parts of the state, making for an exhibition of national importance both for exhibitor and attendance. The fair is under a new management this year and officers and directors are making special effort to supply the public with a worthwhile show such as will be superior to as well as eclipse all previous exhibitions for this noted ground.

Memorial services Sunday in which local denominational societies will unite, will be held at the First Congregational Church, Rev. Bernard G. Mattson officiating. The Indianpolis News says. The soldiers were sailors, lassis and tobacco. Corn meal is used by the Pueblos and other Indians in all their religious ceremonials. No tribal undertaking is complete, no official pronouncement is effective, unless they are accompanied at their reception, by the sprinkling of the sacred meal. The medicine man finds in the meal, blessed and sanctified by his own hands, the chief ally in imploring the blessing of the good spirits which rule the Indian world, or in driving away the evil spirits which threaten to warp the functions of the good. Growing corn will wither and die, seeds will not sprout, horses and sheep will perish, families cannot prosper and the evil spirits of misfortune and disease will sweep the villages unless the sacred meal is sprinkled at the beginning of all undertakings. The chief fetich of the Pueblo medicine man is an ear of spotless white corn, adorned with a plume of downy white feathers bound to the top. Known as the mother, this ear of corn represents the mother of all mankind. With it the medicine man performs wonders. Dishes of corn-and squash, especially among the Pueblos, forms also an important function in sanctifying all undertakings. It is to them the most spiritual of material offerings and no ceremony connected with growth is complete without it. Its symbol, as well as that of growing corn, often appears in the sand paintings made so famous by this artistic people. The ancestors of the Indians, the so-called cliff dwellers, cave dwellers and mound builders, used corn. To them people the great American community probably was as essential as it became later to their descendants.

TRAINING CAMPS

Michigan's Quota Fast Filling Up

SEND APPLICATIONS

Upper Peninsula Boys to be Trained at Fort Brady.

Youths between the ages of 17 and 24 years in good physical condition, who are planning to attend this year's camp at Camp Custer, are urged to send their applications to 204 New Telegraph Bldg., Detroit, if they want to be enrolled for camp this summer.

Michigan's quota is fast filling up and when it is reached there will be no more boys enrolled, as there will be no more money then to pay their expenses in camp, and no boy can pay his own expenses.

All Upper Peninsula boys will be trained at Fort Brady and they will be in camp during the month of August. Everything is furnished the boys without cost, and every boy who is an American citizen or has his first papers, is eligible for this years camp. There is no question asked as to whether his father is a millionaire or a day laborer, and he is not asked what his religion is or what his politics.

Every boy will have the same chance as this camp will be democratic in every respect. Colonel Sheldon who will be the commanding officer at Camp Custer says every boy will be treated alike and every boy will have the same chance. "I shall exert special effort to see that every boy who comes to camp this summer really has a good time and a vacation," he said. "I will see that we have first class food, and that every boy is properly taken care of, so that when he returns home he will reflect the good training he has received. Be fair with your son and give him a square deal."

Lt. Colonel Mills is asking his county committees to get their quotas before June 10, so there is a possibility that recruiting of students for this year will close on June 10. If that is decided upon no boy will be admitted after that date.

Breaks Arm When Cranking Automobile

Last Sunday forenoon Daniel Green, sixteen year old son of Mr. and Mrs. John Green, of Ironton, had the misfortune to break his right arm while cranking up an automobile engine that he was making an effort to start, preparatory to having the Holy Cross church, where the family attended the Sunday morning service. Arrangements to start a car were made with Fayette Brown to bring the young man to Charlevoix for treatment. The trip was made in a top owned by Mr. Floyd and upon arrival in this city Dr. G. W. King attended the case, reduced the fracture and made the young man comfortable for the return trip which was made the following day.

SHIP TO EXCEL IN TELEPHONE PLANT

BUILT FOR HAWAIIAN SERVICE

This Vessel to Have Most Complete Equipment Installed.

Part of the equipment of the largest and fastest high-powered passenger steamship ever built in the United States, will be one of the most complete systems of teleponic communication ever installed in a vessel of her kind.

The vessel is the new 29,000 ton Malolo, which is Hawaiian for flying fish. It is now under construction in a Delaware River shipyard for the Matson Navigation Company and will be completed in the spring of 1927, when it will be placed on the San Francisco-Honolulu run, where she will make the round trip in eight days, or four days less than the fastest ship now plying between these two ports.

The telephone system of the vessel will consist of approximately 325 telephones, one of which will be in every passenger and crew stateroom. In addition to the service telephones there will also be a loud-speaking telephone system for communication between the bridge, after-docking bridge, forecastle, crow's nest and main engine room. A second loud-speaking telephone system will be installed for communication between the chief engineer's stateroom and the main engine room.

Student Nurses to be Given Training in Tuberculosis

Hereafter all student nurses will be given special training in tuberculosis if the wishes of the State League of Nursing Association as expressed in a resolution passed at the recent convention at Grand Rapids are brought to reality. The resolution urges that training schools be affiliated with sanitoriums so that the nurses may have actual training in the care of the tubercular sick.

Miss Lake, president of the Nursing Association, and director of nursing education at the University hospital at Ann Arbor, expressed herself as in favor of the plan.

Mrs. Hansen is to Operate Alhambra for the Season

Late advices concerning the Alhambra, for the past two seasons and since its opening under the management of Mr. H. F. Hansen, who passed away in Grand Rapids recently, will be carried on for the present at least under the supervision of Mrs. Hansen who will attend to business affairs.

Mrs. Hansen has had a vast amount of experience in hotel work, understands the requirements essential for the comfort and convenience of guests. She has a wide acquaintance with tourist and traveling public, prime requisits for making the Alhambra popular and successful.

GOVERNOR ASKS TO HONOR HEROES

Gov. Groesbeck Tuesday issued the following Memorial Day proclamations:

"Our nation since its creation has established many customs far different from any other country. One is the observance of Memorial Day, a day set apart for the honoring of those who sacrificed that its liberties and advantages created at the time of the founding of our government might continue. In the past one of the events of the day has been this parade of the victorious army of '61-'65. In the memory of the present generation the tramp of the vast throng was as grim and as inspiring as the grand parade of the World war army following its victory for mankind. However, time has been relentless and when Memorial day is observed this year there will be but a handful of Civil war veterans in any of the civic demonstrations that are to be held but the nation for which they fought and suffered is all the greater because of what they did. To those who belonged to that Grand Army of the Republic, to the veterans of the Spanish-American and the World wars we owe a lasting tribute.

Therefore in order that we may honor fittingly the memory of those warriors who have fallen before the advance of time and to respect the valor of the survivors I earnestly appeal to the people of Michigan for hearty cooperation in the proper observance of Monday, May 31, 1926 as Memorial day."

AUTOMOBILE MIX

Sheriff of Emmet County in Smash

INSANE MAN CAUSE

Was Taking Prisoner to Reformatory when it Occurred

Sheriff Carpenter of Emmet Co., accompanied by one of his deputies with a prisoner for delivery at the Michigan reformatory at Ionia and an insane man committed to the State hospital near Traverse City, escaped serious injury and narrowly escaped being killed when the automobile in which they were making the trip left the concrete highway a short distance this side of Bay Shore last Tuesday, crashed into the guard posts and railing and plunged down a steep embankment, making a wreck of the sheriff's machine and cutting and bruising the occupants of the car with the exception of the insane man, more or less, but fortunately not of a serious nature.

Upon leaving Petoskey the deputy sheriff and prisoner were occupying the rear seat with the sheriff at the wheel and the insane patient by his side. All went well until the party had reached a point about one mile south of Bay Shore when the insane man suddenly took hold of the steering wheel making the machine swerve from the highway causing the accident that an instant later left the machine a complete wreck, the sheriff, deputy and prisoner more or less cut and bruised and the insane man, the direct cause of the accident without the slightest injury.

DR. OESTEN UNDEN

Dr. Oesten Unden, Swedish minister of foreign affairs, who was the only statesman to return from the extraordinary assembly of the League of Nations with an enhanced reputation. Though not yet forty years of age he demonstrated his skill and diplomacy to the older members of the league and they praised him for his courage.

PIONEER PASSES AWAY MAY 18TH

At The Charlevoix Hospital After Several Weeks of Illness

Mrs. Samuel Whiteford, a well-known resident of this city for the past forty-six years, passed away at the Charlevoix hospital at an early hour Tuesday morning, May 18th, where she had been the past two weeks for treatment. Mrs. Whiteford was stricken with a stroke of paralysis some ten weeks ago, from which she never recovered.

Emily Jane Edmonds was born at DeKalb, New York, Sept. 9th, 1850. She grew to womanhood at that place and on July 4, 1876 she was united in marriage to

YOUNG-UN TAKES THE LAVA

By BERNARD LONG

(©, 1931, Western Newspaper Union.)

"EASY, Pardner; easy, boy!"

"The Young-un" drew gently on ethe reins, bringing the big "full-paint" stallion from the tremendous space-devouring run to a canter. He turned in the saddle and looked back over the hard gravel floor of the mesa. Far in the distance a band of horsemen were approaching steadily, partially veiled in a cloud of white dust.

"Ten miles. Good! Take it easy now for a spell, Pardner; you'll need to save wind for the last few trail sweeps of Elfego's Place, good old boy!"

The Young-un, cow hand cut-up, fancy shot and daredevil of the Bar Double Bell, ran his hand through the luxurious white mane caressingly. The great pinto understood. The rider, grim-visaged, knowing well what those four parsmen meant, chuckled none the less at the progress of the race thus far. Pardner had all the better of it. "Cholo" Haight and his men did not have a chance—this side of Elfego's Place. Beyond? The Young-un frowned. It would not be a fair race of horseflesh south over the lava trail. There it would be a battle of wits.

Another backward glance and the Young-un perceived that Haight and his riders were gaining. Let them gain—a little. Ten miles to the good. At the word, Pardner would make it up, and to spare. But it would not be necessary. Just yet, Elfego's Place, with its cluster of shacks, lay in the sunshine, straight ahead, two miles.

"Thought they stole you, didn't they, Pardner?" the Young-un mused aloud, in clear tones, as was his custom in addressing his gorgeously spotted mount. "Well, they had another guess comin', didn't they, boy?"

Again the Young-un chuckled, this time more softly bending low over the beautiful mane of the steed, still pounding out rod and rod with his easy rhythmic canter. He patted the painted horse into a walk. Elfego's Place was at the foot of the ridge before him.

"Well just appear like to loaf, boy," the Young-un said. "In town there's goin' to be folks watchin' us, Pardner."

The stallion took the trail into the crooked road of the hamlet. At the O. K. livery barn the Young-un turned in.

Leisurely the cowboy dismounted, stretched his legs, watered and fed his horse.

"Some hawse you'll get there," the stable man commented.

"He's the pride of the Bar Double Bell for a fact!" the Young-un returned. "Look after him a little, will you, while I get a bite to eat?"

The Young-un went out into the street. His glance swept over the level mesa stretching into the pink-white distance. Plainly his eye caught the steadily moving objects for which it was seeking. Haight's men were drawing nearer. The Bar Double Bell rider looked at his watch, crossed the road, and entered the one-man lunch counter restaurant. Presently he emerged, leisurely treated a slot machine, and crossed again toward the livery barn. But his eyes were always out on the mesa. His margin of time was about up.

"On the way to th' Bar Double Bell, are you?" asked the man at the stables as the Young-un prepared to remount. Something in his tone told the cowboy he was not friendly.

"Yeh."

"What trail are you makin' south, stranger?"

"Figgin I'll take the lava trail. It's gettin' some cooler, I reckon."

"The ridge over the Pajaritas is a mile shorter, stranger."

"A mile. I've tried it once. But I'm takin' the lava this time."

"I'd shore hate to be under that hawse ish yourn."

It was only a matter of minutes until Cholo Haight's men swung off in front of the O. K. barn in a cloud of dusky dirt. Elfego's Place was stirred out of a morning's drowsy tranquility by the dashing entry of the four-mounted excited riders. A handful of idlers gathered quickly. In time to see the newcomers jump in and help the stable man saddle the fresh horses that were put at their disposal at Haight's command.

"Horse thief!" led the leader of the band repeatedly in answer to questions. "Jest went through here. On a big pinto stallion."

In a trembling they were mounted, Haight began to ask questions. Now came the dilemma he had been fearing, on since the race began. What trail south would the Young-un take? Over the mountain, the short cut to the Bar Double Bell country? Or around the base of the ridge on the lava trail?

"What did he say? Anything about what road he was taking?" demanded Haight of the O. K. liveryman.

"Yeh," replied the other, eager to be of assistance. "Said he was takin' the lava trail. I seen him start that-a-way. Said it was gettin' cool-er now; cloudy comin' up, so he would make it on the lava."

Haight chuckled. Turning in the saddle to face his followers, he gave them a knowing look, winked a shrewd eye, and delivered himself:

"She's the ridge trail, boys! He was mighty careful to let it out he was takin' the lava, you notice. Even started that way. Foxy, he thinks he is!"

Cholo Haight wheeled, and the pursuers started on a furious gallop up the gradually rising trail over the slope of the ridge. Ahead, edge of town.

From a protruding cleft of rock on the lower sweep of the valley, called the lava trail, the Young-un looked out over the scintillating heat waves back toward Elfego's Place.

"Gobd old Loy!" he was saying to Pardner, stroking his neck and nose. "I wonder how—"

His eyes caught the rising puff of dust on the high ridge above where a scrub oak and juniper were making in on the everlasting monotony of chamiso and cactus and creosote bush.

"Pardner, we'll be amblin' along now. I reckon we'll rest up goin' back to the Bar Double Bell."

He mounted easily and the painted stallion champed his bit and started in a mild canter. The first lap was over.

"Now, Pardner, don't get mad," soothed the Young-un. "If I let you stretch her out a spell. Let's go!"

Amazon Is Widest

The Amazon river is the widest in the world. It is between one and two miles wide where it enters Brazil and gradually increases in breadth to fifty miles at its main mouth. Where it enters the sea the distance across the mouth—headland to headland—is fully one hundred and fifty miles.

His Occupation

She wanted to shine. At a hotel dance, when asked what her husband did, she stated that he was a hypnotist man. That brought other questions and she then said: "He is engaged in compiling a volume of addresses."

"Works for the telephone company," explained her uncle.

BLOUSE OF CHECKED SILK

BLOUSES IN IMPORTANT ROLE; SILK AND WOOLEN TAILLEURS

IN THE drama of the mode this season blouses are not top-liners—the one-piece frock is in the lead, followed by jumper frocks and other two-piece affairs that rival the blouse. But the distinctive part played by the blouse is important. It is indispensable with tailored suits and in dressy clothes and it is a part of more for and modes.

In tailored blouses there are some very interesting novelties and some new developments of familiar types. Among the former, high-necked overblouses of silk, in plaid pattern, with four-in-hand ties to match, are featured along with similar blouses of printed silks in other patterns. These include blouses with scarf collars and it is noticeable that scarfs are featured in other types of blouses. Long and narrower scarfs are wound once about the throat, crossed at the back, and tied at the front. Strictly tailored, mannish overblouses of cotton or-fabric-cloth are represented, and in this and other styles the shirt bosom and vestee effects at the front are popular.

Striped and bordered silks and cottons are handled ingeniously in blouses of simple design for sports wear. Three are cut on lines similar to the white and black blouse of checked silk shown in the picture. In series particularly pique vestees, which are introduced in a variety of designs, a third novelty appears in fancy weaves in tweeds and in the use of lively colors in sturdy tweeds and homespuns. Skirts of a more formal type are developed in smooth cloths.

Even when an unusual model compels a second and a third glance, one cannot always determine whether to class it as a two-piece dress or a suit. An example of this kind is shown at the left of the sketch; it is presented by its designer as a two-piece tailored dress, made of three-colored crepe, with gunsmoked gray for the skirt, and a delightfully dainty and dignified ensemble of printed crepe, with tailored suits and to the mode salvation to every one that believeth.

WHAT PARIS OFFERS

Treat Wheat Seed to Control Smut

Single-Bath Hot-Water Method Gives Better and More of Crop.

(Prepared by the United States Department of Agriculture.)

The modified hot-water treatment of seed wheat for control of loose smut is somewhat difficult of application by the individual farmer. The seed is soaked, and, when there are broken coats, germination is reduced, says the United States Department of Agriculture. Because of this objection experiments were undertaken for the purpose of developing a more acceptable method of treating wheat, the results of which have been published in Department Bulletin No. 1383, "Single-Bath Hot Water and Steam Treatments of Seed Wheat for the Control of Loose Smut."

Single-Bath Treatments.

Single-bath hot-water treatments were applied by immersing wheat in half-filled sacks in water held at a constant temperature during definite periods, the duration of treatment extending from 30 minutes to 4 hours, and the temperature from 49 degrees to 51 degrees centigrade. A number of single-bath treatments with different durations and temperatures controlled loose smut and bunt, but the treatments at 49.5 degrees centigrade for 1 hour 50 minutes and at 49 degrees centigrade for 1 hour 35 minutes gave best results.

Wheat given the latter two treatments is comparatively untreated and seed showed poorer germination, the seedlings emerged more slowly, the plants protected unsatisfactorily, and the yield was more adversely affected by unfavorable soil conditions. The stem wheat treated by the single-bath method variably germinated better, the seedlings emerged more rapidly, the plants yielded relatively more grain, and the yield was not so adversely affected by unfavorable soil conditions. Experiments in steam treatment of wheat gave somewhat similar results.

Study of Treatment.

The single-bath hot-water and steam treatments were studied only from the viewpoint of application at co-operative or community seed-treatment plants or at establishments handling large quantities of seed wheat. A perusal of the bulletin giving details of the experiments may be obtained free, as long as the supply lasts, from the United States Department of Agriculture, Washington, D. C.

Device for Determining Water in Commodities

Methods for determining quickly the moisture content of rice and other grains have been perfected by the United States Department of Agriculture. The methods are an improvement of those employed with the Brown-Duvel moisture tester used in connection with official grain standards. They may be applied to rice, seeds, flour and meal, and other commodities which contain a large percentage of water.

A single moisture determination on grain can be made in 25 or 30 minutes with the improved methods and, with a six-compartment tester, six tests can be made in approximately the same time as for a single test. One man and a helper, using six-compartment machines can make 200 or more tests in eight hours.

A description of the apparatus and construction specifications have been published in Department Bulletin No. 7375, "The Brown-Duvel Moisture Tester and How to Operate It." Copies may be obtained, as long as the supply lasts, from the Department of Agriculture, Washington, D. C.

Reduce Cost of Ration

A liberal use of good legume roughage reduces the cost of dairy rations by lessening the concentrates fed and lowering the amount of high protein feed that must be purchased. In addition to properly cured legume roughage is a satisfactory source of lime as well as supplying many of the vitamines that are necessary in a dairy ration.

Protein is the most expensive and most important part of a dairy ration.

Keep Hogs Healthy

Good feed, an abundance of pasture, clean water and plenty of exercise have a great deal to do with keeping the hogs in health, but there are specific precautions that may be taken against some of the more common ailments that beset swine. With the exception of losses the intestinal round worm is probably the greatest enemy of the hog raiser. A system developed by this department has been found to be very successful in keeping pigs free of these parasites.

Farm Hints

Are the tile-drain outlets clear?

Straw lofts in poultry houses serve as insulation to keep the poultry house warm in winter and cool in summer.

• • • •

Roup may be caused by dampness or drafts in roosting quarters, or poorly ventilated roosting quarters. Underlying causes may be poor nutrition, lice, mites, or other parasites.

• • • •

In that cold brooder pet so that he can help with the spring work? It will be fun breaking him but that pleasure can't be put off much longer if he is to pull his share in the traces along with old Molly.

• • • •

Geese should be mated for a considerable length of time before the hatching season so they will get accustomed to each other. They mate in pairs, though sometimes an extra goose may be added.

Persian Legend Tells of the Origin of Pearls

The people of Manaar on the Persian gulf, famed for centuries as pearl fishers, are experiencing a period of prosperity. And as they are turning to culture and art. An extensive literature has grown up of recent years and most of the works have been translated in French. They are collections of legends and folklore. One of them tells of the discovery of pearls by a member of the race named Prakasma. All is a charming legend. Prakasma came from India and fell in love with a rich merchant's daughter. The latter returned the love of the lad's poverty. Desperate, the boy decided to drown himself. By the bright moon he went out in his skiff, tied a stone to his foot and jumped overboard. Suddenly the sea became illuminated with a strange light. The daughter of the sea god appeared. She offered her hand, her heart and beauty to the young man. He refused. She showed him mountains of pearls. He grabbed a handful, cut the string that held the stone on his foot and started to swim away. But evil fates gave pursuit. They, however, Krishna, the god of lovers, classed by raising a tempest that carried Prakasma ashore. He was rich and he was able to marry his earthly sweetheart. But henceforth the secret hiding place of the pearls was known to man.—Pierre Van Paassen, in the Atlanta Constitution.

Old European Race

The origin of the Basques is unsettled. The name is applied to a peculiar race, dwelling on the slopes of the Pyrenees. They occupy the provinces of Biscay, Alava, Guipuzcoa and Navarre in Spain, and two French departments, Bayonne and Mauleon.

Families Live Together

In Damascus it is the custom for families to live together. In fact, the bridegroom carrying bring their brides to the house of their father as a matter of course.

Glorifying the Apple

A combination suit of apricot-colored voile is trimmed with apples in shades of green and red, appliqued on the surface.

Pressing the Sweater

When you finish knitting a sweater you can press it beautifully by laying it out flatly on a newspaper spread on the floor. You should then wring out a Turkish towel in water, lay this over the sweater and spread a newspaper on top. Place heavy books on this to weight it. When the towel is dry the sweater is pressed.

Pansy Shades Shown

Pansy shades and pencil blue, especially the former, are occupying a prominent place in the autumn showings in the shops. Pencil blue is not a royal, nor is it a bright, but something between; possibly what an artist would call ultramarine, or very likely derives its name from the color of the indelible pencil.

The Gospel of Christ

By REV. F. T. CONNER
Extension Department, Moody Bible Institute, Chicago.

TEXT—I am not ashamed of the gospel of Christ; for it is the power of God unto salvation to every one that believeth.

Rev. F. T. Conner.

In a day when greatness was measured by wealth and strength and standing, armies Paul wrote to the Christians at Rome: "I am not ashamed of the gospel of Christ; for it is the power of God unto salvation to every one that believeth."

There are four things mentioned here: "The gospel of Christ," "the power of God," "salvation," and "belief." In the face of all the facts of Roman decay and decline, Paul declared the gospel of Christ to be the panacea for her ills. Rome had wealth, learning, and standing armies, but these could not keep her from the paralysis which sin was working into her innermost life. The great restorative for any declining civilization is the gospel, if, only it is applied.

What is the gospel of Christ? First, "Christ died for our sins, according to the Scriptures." There is the substitution fact of the gospel. The Old Testament economy looked forward to the "Lamb of God that taketh away the sin of the world" (John 1:29), and Christ constantly set forth His death as an essential in God's plan for saving men from their sins. "Who his own self bare our sins in his own body on the tree" (II Peter 2:24). He bore them in his own glorious divine personality.

When God the mighty maker died,
For man the creature's sin.
Thus might he in darkness hide
And shut his glories in.

It was God who laid our sins on Him in that hour of great extremity when he cried, "My God, why hast thou forsaken me?" All we like sheep have gone astray; we have turned every one to his own way and the Lord hath laid on him the iniquity of us all." (Isa. 53:6). The sinless one took the sinner's place. Only in this way so sin was made sin for us that we might be made the righteousness of God in Him" (II Cor. 5:21). That is distinctly the first fact of the gospel of Christ. There is nothing like it in all the numerous religions of the whole world.

Second, "and was buried," following as a sequel of His death. But the tomb cannot hold Him. "He arose again the third day, according to the Scriptures." A dead Christ is of no value to a believer. Here the Christian religion is differentiated from all the religions of the world. "He is not here, He is risen."

This crucified and risen Christ is the power of God, the great dynamic whereby God saves the believer from sin and death. Christ gave His life for the believer. "No man taketh it from me, I have power to lay it down and have power to take it up again." He showed Himself alive after His passion by many infallible proofs.

Third, the gospel of Christ "is the power of God unto salvation." Salvation is the keynote of the Scriptures, not greater than the term of deity, but the all-inclusive word embracing all that God did through Christ for us. The sum total of God's work in and behalf is in the word salvation. Salvation can be defined as deliverance from the penalty, pollution and power of sin. All is accomplished in the death and resurrection of Jesus Christ.

Lastly, "to every one that believeth." The sealing virtue is faith. "Through faith man is preached unto from the forgiveness of sins: and by Him all that believe are justified from all things from which ye could not be justified by the law of Moses" (Acts 13:38). In addition to our deed we need more to reinforce the place belief has in the Christian scheme. This gospel of Christ, "the power of God unto salvation," is secured only "to every one that believeth." That is God's final touchstone so simple, yet so sublime.

Peace

Peace is not a commodity with circumstances. It does not come out of an intercostatin which runs after this fashion: "Let me alone: if you will be quiet, I will be quiet; let us proclaim a truce." Rest is not a compromise—it is a Divine reality in the heart. Righteousness is rest, holiness is rest, obedience is rest. Peace comes through trust in the atonement of God the Son, means tranquillity deep and unchanging as the peace of God which passeth understanding.—Doctor. Parker.

Real Remedy for Doubt

What then is the best method? It is the method of practical experiment. Making actual experiment of the Christian life, one soon finds the experiment working out. Instead of arguing for a time that he was right, he does that he may know, and the word of Christ is fulfilled—he that willeth to do the will of the Father knows by the doctrine whether it be true. This is the real remedy for doubt.—W. J. Dawson.

Lesson That Death Brings

Under the prospect of the greatest of all farewells God has been pleased to make the world more kindly. Death has touched all relationships and hallowed them. It is the sorrow and the spring of more than half life's gladness. In a father's care, in a mother's love, in the devotion of husband and wife, and in the bond of friendship, there is a sweet solicitude, a depth, a grasp, a hunger, that the world would never have dreamed of but for death.—Rev. G. H. Morrison.

"BAYER ASPIRIN" PROVED SAFE

Take without Fear as Told in "Bayer" Package

BAYER

Does not affect the Heart

Unless you see the "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over twenty-five years for

Colds — Headache
Neuritis — Lumbago
Toothache — Rheumatism
Neuralgia — Pain, Pain

Each unbroken "Bayer" package contains proven directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100.

Woman's Novel Weapon

Awakened by the breaking of glass, Mrs. Helen Hayen of Newark, N. J., heard the moving of some heavy object in the store below her apartment. She went to the window and saw two men emerging with a small safe. She drenched them with the contents of her dishpan and hurled the pan after them. The men dropped the safe and fled. The safe contained about $350.

Says He Felt Drunk Most of the Time

Brooklyn, Mr. Fred G. Merguart writes:—"I felt drunk most of the time. My head was dizzy. I couldn't think clearly. One day I dropped a coin and when I stooped to get it I got so dizzy I almost fell. I later found out that the cause of this condition was constipation. This was overcome by a few doses of Carter's Little Liver Pills. My appetite has doubled, and my dizziness has entirely left me."

Carter's Little Liver Pills move the bowels and relieve the system of its poisonous matter.

Druggists, 25 & 75c red packages.

Woofer From Afar

Some years ago when the last pair of white-tailed eagles were nesting in Scotland, one of the birds died. There was not another eagle of that species in the country, yet within a few days the remaining bird had signaled her loss by a continuous howl and it came over and they mated.

THE CLINTONS

Synopsis.—Idly fishing Hermanos creek, in California, Caleb Warner, civil engineer, and a New Englander, is witness of the end of a coyote pulled down by two wolfhounds, urged on by a girl rider. Admiring the hounds, he introduces himself, and learns her name is Clinton. With western hospitality she invites him to the ranch to meet her father.

CHAPTER II

El Nido and Padilla

The Rancho El Nido, which means The Nest, was well named. Behind the low adobe hill rail overpasses, built in two rows at right angles, nestled the buildings of the ranch-house, built in old Californian fashion of adobe brick, red tiled, in the shape of a hollow square inclosing a patio-garden. It was on a rising ground above the stream that ran through it, and heavily mantled with wild grapevines. About the house, and its barns and sheds and corrals, grew orchard trees, peach and apricot, almond, cherry, walnut. There were some orange and lemon trees and a few olives, but there was a vineyard and the patio was a riot of flowers. A spring bubbled up in the exact center of the court and had been confined within a stone basin with one scatter out of which the overflow rippled and ran under an archway in the foundation of the house.

The place was above all a home, long-settled, well-rooted, if a-nest, built on the ground, as some nests are, may be fancied to have taken root. The place was well styled El Nido.

Back to it, in the twilight, at the urgent suggestion of the girl's father, a suggestion that was half command, holding such spontaneous invitation that it could not be refused without a touch of churlishness, came Caleb, returning from the stream above the waterfall, for it's a well-fitted crest.

The girl sat, from an outer porch as he came, from the stream and met him at the steps. She was transformed. A rich gown of white had replaced the khaki and corduroy of the morning. Caleb's surprised and frankly admiring glance appraised, opened the lid of the creel for her inspection.

"You know how to cast a fly in Massachusetts," she said, "and you've taken California from Pico. He was on the shores of Monterey bay when the British landed from their frigates and found they were too late. My father was then ten years old. I was one when he went back to Virginia and fought in the War of the Secession. For the South. I beg your pardon, sir."

Caleb caught Betty Clinton smiling, at him.

"Not at all, sir," he answered. "My own grandfather fought for the North. But that was two generations ago. Now I know," he added with an answering smile, "why you, Miss Clinton, called me 'Yank' with such unction."

"My grandfather used to say," said Clinton, "that he was always cautious when he fought the Yanks but that he downright feared them when it came to business. But you are right, sir. That is all past. I fought in the Spanish war side by side with many gallant gentlemen from New England. One of them was major in my company. If I had not been for him I might have lost more than this." He touched his empty sleeve.

"You held rank, sir?"

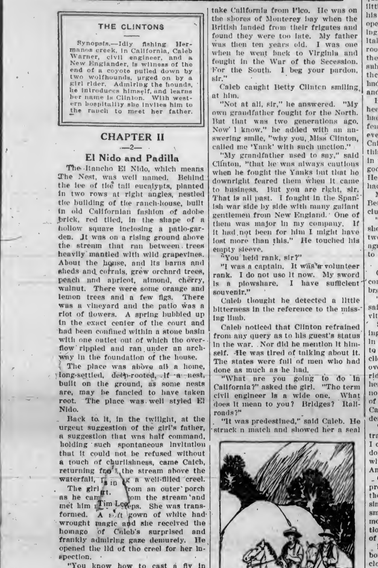
"I was a captain. It was a volunteer rank. I do not use it now. My sword is a plowshare. I have suffered no discomfort."

Caleb thought he detected a little bitterness in the reference to the missing limb.

Caleb noticed that Clinton refrained from any query as to his guest's status in the war. Nor did he mention it himself. He was tired of talking about it. The states were full of men who had done as much as he had.

"What are you going to do in California?" asked the girl. "The term civil engineer is a wide one. What does it mean to you? Ridges? Railroads?"

"It was predestined," said Caleb. He struck a match and showed her a real



Caleb chuckled at the little severe frown. "Oh, sir," he said, "you must see it tomorrow. Then you will understand. Miss Betty—Betty Clinton!" He had her name at last and thought it suited her.

"You'd want to wash up. Maria will show you to your room."

"My room?"

"You are to stay here tonight. Father would not hear of you going. There is no moon. It is three miles down the trail to the station at Heyward. Seven by the road. And there are no trains that you could catch conveniently."

She led the way in and delivered him to Maria, fresh towels, the spade of bread, triple of chin, Spanish of look and accent.

"Maria," said the girl, "is the actual ruler of El Nido. You must pass inspection by her. She is the autocrat. You have fifteen minutes. We shall be in the big room at the north end. You can come in through the patio."

It was altogether a little astounding. Caleb reflected, as he made what toilet he could. He had come to the valley unheralded, without mutual acquaintance, without introduction, and here he was, pressed as a guest, almost as a friend. In Massachusetts—he laughed at himself in the mirror as he fussed with his tie. This was California, a country to itself, with very distinctive customs. And he was aware that his welcome would be as his behavior. But it was all very pleasant, very Western.

The big room ran the full length of one side of the house. At either end a quarter was raised by two steps, arched off, one part a library and study, the walls covered with books, the other and more distinctly feminine with a piano, flowers, inviting chairs of wicker and good rugs, some pictures on the walls. The intermediate space was common ground, dining room and living room combined. The place was lit with oil lamps in wrought-iron brackets and with candles in branching bobbins for the long table. The meal, with the rustling, bestarched Maria, in black gown and white apron, superintending Wang, the servant as well as he had cooked, was perfection.

The girl presided over the main dishes. Her father, tall, erect, gray-haired, gray of close-clipped mustache and goatee, had one sleeve tucked in the side pocket of his coat.

"I shall put that to the test, sir," he said to Caleb. "How do you find the West?"

"I like it. And I like it. We baste in the East but our ways and means are settled."

"Enjoy? I like your term. And I am glad you like the West. We shall hope to see more of you."

"You have lived here long?" asked Caleb.

"My grandfather settled here in eighteen-forty. He was one of Fremont's cavalry legion. He helped to take California from Mexico. He was on the shores of Monterey bay when the British landed from their frigates and found they were too late. My father was then ten years old. I was one when he went back to Virginia and fought in the War of the Secession. For the South. I beg your pardon, sir."

Caleb caught Betty Clinton smiling, at him.

"Not at all, sir," he answered. "My own grandfather fought for the North. But that was two generations ago. Now I know," he added with an answering smile, "why you, Miss Clinton, called me 'Yank' with such unction."

"My grandfather used to say," said Clinton, "that he was always cautious when he fought the Yanks but that he downright feared them when it came to business. But you are right, sir. That is all past. I fought in the Spanish war side by side with many gallant gentlemen from New England. One of them was major in my company. If I had not been for him I might have lost more than this." He touched his empty sleeve.

"You held rank, sir?"

"I was a captain. It was a volunteer rank. I do not use it now. My sword is a plowshare. I have suffered no discomfort."

Caleb thought he detected a little bitterness in the reference to the missing limb.

Caleb noticed that Clinton refrained from any query as to his guest's status in the war. Nor did he mention it himself. He was tired of talking about it. The states were full of men who had done as much as he had.

"What are you going to do in California?" asked the girl. "The term civil engineer is a wide one. What does it mean to you? Ridges? Railroads?"

"It was predestined," said Caleb. He struck a match and showed her a real

Caleb chuckled at the little severe frown. "Oh, sir," he said, "you must see it tomorrow. Then you will understand. Miss Betty—Betty Clinton!" He had her name at last and thought it suited her.

"You'd want to wash up. Maria will show you to your room."

"My room?"

"You are to stay here tonight. Father would not hear of you going. There is no moon. It is three miles down the trail to the station at Heyward. Seven by the road. And there are no trains that you could catch conveniently."

She led the way in and delivered him to Maria, fresh towels, the spade of bread, triple of chin, Spanish of look and accent.

"Maria," said the girl, "is the actual ruler of El Nido. You must pass inspection by her. She is the autocrat. You have fifteen minutes. We shall be in the big room at the north end. You can come in through the patio."

It was altogether a little astounding. Caleb reflected, as he made what toilet he could. He had come to the valley unheralded, without mutual acquaintance, without introduction, and here he was, pressed as a guest, almost as a friend. In Massachusetts—he laughed at himself in the mirror as he fussed with his tie. This was California, a country to itself, with very distinctive customs. And he was aware that his welcome would be as his behavior. But it was all very pleasant, very Western.

The big room ran the full length of one side of the house. At either end a quarter was raised by two steps, arched off, one part a library and study, the walls covered with books, the other and more distinctly feminine with a piano, flowers, inviting chairs of wicker and good rugs, some pictures on the walls. The intermediate space was common ground, dining room and living room combined. The place was lit with oil lamps in wrought-iron brackets and with candles in branching bobbins for the long table. The meal, with the rustling, bestarched Maria, in black gown and white apron, superintending Wang, the servant as well as he had cooked, was perfection.

The girl presided over the main dishes. Her father, tall, erect, gray-haired, gray of close-clipped mustache and goatee, had one sleeve tucked in the side pocket of his coat.

"I shall put that to the test, sir," he said to Caleb. "How do you find the West?"

"I like it. And I like it. We baste in the East but our ways and means are settled."

"Enjoy? I like your term. And I am glad you like the West. We shall hope to see more of you."

"You have lived here long?" asked Caleb.

"My grandfather settled here in eighteen-forty. He was one of Fremont's cavalry legion. He helped to

at the end of his watch chain. On the green stone two parallel zigzags were graven.

"The Zodiac sign of Aquarius, the Water Bearer. It is the eleventh sign and the second summer sign of twenty-first of January, the day that I was born. So I am a water engineer, both by choice and by predestination."

She gave a little cry as she bent forward to look at the seal. The flight of the swift-burning match brought her face out of the darkness like a picture.

"Isn't that altogether curious and delightful?" she said. "I remember—I don't know what will offer," Caleb said. "I cannot wait too long. I have been out of work since the completion of my last job. I have not had very much experience—as such things go—but I should rather tie up with a new enterprise than work with a completed project. Of course, I should like above everything to be able to inaugurate some scheme, plan it, develop it. I must look for my opportunity."

"Let us what I should prefer, if I were a man," said the girl, and Caleb sensed a growing approval of him in her tone, and warmed to it. "To create something, to be a Water Bearer, to

This Padilla seems to be an intense sort of person. What's his purpose with Warner?

(TO BE CONTINUED.)

Old Abraham Stuck to Middle of Road

A man and his wife took in an aged and supposedly wealthy relative to live with them, thinking they would profit when the old fellow passed away. Later they learned that he hadn't much money, and they were anxious to get rid of him.

They agreed between themselves that they would start an argument at dinner. The husband would claim that the soup was too salty; the wife would declare that it was not salty enough. They would leave the matter to old Abraham. If he agreed with the wife, the husband would throw him out. If he agreed with the husband, the wife would throw him out. Consequently, at dinner, the husband said: "Rachel, this soup is too salty."

Rachel tasted the soup, and said, "No, my dear, the soup is not salty enough."

"Then," said the husband, "we will leave it to Abraham, and see what he says about it. Abraham, what do you think: Is the soup too salty or is it not salty enough?"

Old Abraham, who was enjoying his soup, didn't hesitate, but said, between sips, "Well, it suits me."—Los Angeles Times.

Seek More Nicotine

Nicotine, not less of it, but more, is wanted by tobacco-breeding plant scientists at the state agricultural experiment station at Geneva, N. Y. This reversal of usual tobacco requirements is being sought for the benefit of the insecticide industry, which makes large use of nicotine in the manufacture of insect poisons. Certain "wild" tobaccos are being found more promising than the cultivated varieties and are being experimented with to learn ways of increasing their already high nicotine content.

THE CLINTONS

Synopsis.—Idly fishing Hermanos creek, in California, Caleb Warner, civil engineer, and a New Englander, is witness of the end of a coyote pulled down by two wolfhounds, urged on by a girl rider. Admiring the hounds, he introduces himself, and learns her name is Clinton. With western hospitality she invites him to the ranch to meet her father.

CHAPTER II

El Nido and Padilla

The Rancho El Nido, which means The Nest, was well named. Behind the low adobe hill rail overpasses, built in two rows at right angles, nestled the buildings of the ranch-house, built in old Californian fashion of adobe brick, red tiled, in the shape of a hollow square inclosing a patio-garden. It was on a rising ground above the stream that ran through it, and heavily mantled with wild grapevines. About the house, and its barns and sheds and corrals, grew orchard trees, peach and apricot, almond, cherry, walnut. There were some orange and lemon trees and a few olives, but there was a vineyard and the patio was a riot of flowers. A spring bubbled up in the exact center of the court and had been confined within a stone basin with one scatter out of which the overflow rippled and ran under an archway in the foundation of the house.

The place was above all a home, long-settled, well-rooted, if a-nest, built on the ground, as some nests are, may be fancied to have taken root. The place was well styled El Nido.

Back to it, in the twilight, at the urgent suggestion of the girl's father, a suggestion that was half command, holding such spontaneous invitation that it could not be refused without a touch of churlishness, came Caleb, returning from the stream above the waterfall, for it's a well-fitted crest.

The girl sat, from an outer porch as he came, from the stream and met him at the steps. She was transformed. A rich gown of white had replaced the khaki and corduroy of the morning. Caleb's surprised and frankly admiring glance appraised, opened the lid of the creel for her inspection.

"You know how to cast a fly in Massachusetts," she said, "and you've taken California from Pico. He was on the shores of Monterey bay when the British landed from their frigates and found they were too late. My father was then ten years old. I was one when he went back to Virginia and fought in the War of the Secession. For the South. I beg your pardon, sir."

Caleb caught Betty Clinton smiling, at him.

"Not at all, sir," he answered. "My own grandfather fought for the North. But that was two generations ago. Now I know," he added with an answering smile, "why you, Miss Clinton, called me 'Yank' with such unction."

"My grandfather used to say," said Clinton, "that he was always cautious when he fought the Yanks but that he downright feared them when it came to business. But you are right, sir. That is all past. I fought in the Spanish war side by side with many gallant gentlemen from New England. One of them was major in my company. If I had not been for him I might have lost more than this." He touched his empty sleeve.

"You held rank, sir?"

"I was a captain. It was a volunteer rank. I do not use it now. My sword is a plowshare. I have suffered no discomfort."

Caleb thought he detected a little bitterness in the reference to the missing limb.

Caleb noticed that Clinton refrained from any query as to his guest's status in the war. Nor did he mention it himself. He was tired of talking about it. The states were full of men who had done as much as he had.

WHY THEY ADVERTISE

Newspapers of the United States carried $720,000,000 worth of advertising during the year 1925, according to Wm. A. Thompson, director of the bureau of advertising of the Newspaper Publishers' Assn., who testified recently before the Federal Trade Commission. Of this amount $500,000,000 was spent in local advertising, the remaining $250,000,000 representing the amount spent in advertisements of national circulation.

These figures show something of the faith that the American business man has in the value of newspaper advertising. This form of publicity must pay, or the advertisers would not be spending three-quarters of a billion dollars annually on it. The keen business leaders of America do not put money into losing ventures.

It is doubly significant that two-thirds of this [great sum, a half billion dollars, went into the socalled local newspapers, while only one-third of the amount went into the national publications.

Evidently it pays not only to advertise, but to advertise in your local newspaper. When we think of the value of the local newspaper, we usually measure it in terms of its worth as a collector of news and a moulder of sentiment in the community. But the value of a newspaper as an advertising medium is great, too, not only to the business man, but to the general public. It is through advertising in his local paper that the progressive merchant gets his goods before the people. And it is by reading the advertisements that the public learns where it can spend its money economically for reliable goods of the kind wanted

—Jess Denious of the Dodge City Globe has decided that it is physically impossible for him to run for Congress. "During the past twenty years," he points out, "the voters of this district have refused to elect as Congressman any Republican weighing less than 250 lbs. There is no precedent for the acceptance by the district of the Globe editor's very peculiar type of build. In view of the standards that have been set up, his avoirdupoise is much too scanty, his shoulders too narrow and his pipe stems too skinny.—Kansas City Star.

EUROPEAN LEAGUE

In a speech at Buffalo recently, Sir Esme Howard, British Ambassador to the United States, undertook to lecture certain Americans who, in his judgement, want to destroy the League of Nations. Sir Esme said:

"I have always said, in speaking of the league in this country, that we in Europe now entirely understand that the United States objects to joining the league, and I think that most well informed people understand the why and wherefore of their attitude and accept it without question.

But I must say I am surprised at times to note that there are still people in this country who write and speak as if the league was an invention of the devil which should be combatted by all honest men and the disappearance of which would be heartily welcomed. We in Europe who believe in the league have no wish to see this country adopt any policy which goes against the grain in regard to the league, but we cannot understand the attitude of those who, standing outside it, are not satisfied with that, but also wish to destroy it."

We do not believe the situation in America is as dark as Sir Esme believes. There may be some people in the United States who would rejoice if the league were entirely destroyed, but they are certainly no more numerous than those who desire to see Uncle Sam plunged neck deep into the league himself, and that isn't so many.

If, as the British ambassador states, the people of Europe now understand and acquiese in our position of aloofness from the league, it is equally true that the great majority of Americans now regard the league itself as a purely European institution. Now it is Europe which need to be prevented from going to war, not America. Bet if the league can prevent war in Europe or can in any way make the path to peace easier, why all well and good. The average American will wish it success in the undertaking, so long as it leaves Uncle Sam alone.

If there is any sentiment in America which would rejoice at the destruction of the league, the intemperate friends of the league itself are responsible for this. The average American does not relish hearing the pro-leaguer in this country call Uncle Sam a militarist and an international slacker, and, when the runs across propaganda of this kind which is being kept up in the face of a ninety-eight per cent nationalist sentiment in the United States, he naturally takes it out on the league.

In short, the average American will be pleased at any good the league may be able to do in Europe. But he regards it as a European institution and does not want Uncle Sam dragged into it. And he especially objects to having a two per cent minority in America tell him he is all wrong in thinking as an American rather than an internationalist.

—If some people would apply the same effort along business lines that they devote to differences in social, religious and lodge "leanings," would it not serve a better purpose for all parties concerned? Parties accustomed to doing things worth while catalogue the differences enumerated as "small-town" stuff.—Tipton Times

GOOD ENOUGH

A fervent prayer of citizenship well might be, "God keep the schools of America American!" As yet, notwithstanding insidious effort to promulgate peace propaganda in the public schools, they remain distinctly and distinctively, patriotically American.

Peace essays, debates and peace culture are well enough, provided they do not tend to weaken the spirit of patriotism. But this spirit never will be weakened if the sentiment of its love school miss of seventeen years become embodied in the consciousness of American youth. Her creed is good enough for all of us. Here it is:

"I believe in the flag of the United States—the living emblem of our great republic.

It symbolizes the freedom, equality, justice and humanity for which our forefathers sacrificed their lives and personal liberty.

I believe in its encircling protection, its guidance and its strength.

Its mighty arm is forever raised in our defense.

I believe that it shields us and will continue to do so until earth and time shall be no more.

Here is pure patriotism, intelligent national understanding, faith in the all-inclusive symbolism of the national standard. It is a faith that should shame and confound the gnawers at the foundations of the constitution.

It is a ringing challenge to the Bolshevist and Fascist urges. It is the voice of America, speaking from the lips of American youth. It suggests a summons to the manhood of America to flout and defy all the cohorts of internationalism.

It proves that patriotism still rings true in the public schools of America. It is not the phrase of bombast or bluster, nor of militarism, but the fine, free, confident expression of confidence in and fidelity to all that American should mean to the millions who are sheltered under the protecting folds of its incomparable banner.—Cincinnati Enquirer.

—London printers struck because they didn't like the editorials, and we wouldn't blame some of the New York stage carpenters if they struck because the show was so rotten.

With the practical common sense for which the citizens of her country are famous, Princess Juliana of Holland, heir to the throne, says on her seventeenth birthday that she is studying law because when her turn comes Holland may not want a queen and she wishes to be equipped for the career of one not born to the royal purple. The dynasty at the Hague, though feminist, seems to have a durable foundation in the love and loyalty of Queen Wilhelmina's subjects, and the Princess need not anxiously contemplate the prospect of eviction. But whether she becomes a queen or accepts the status of a commoner, her knowledge of the law will serve her well. Indeed, it is difficult to imagine any field of human effort in which at least the elements of a legal education are not of value. The throne of Wilhelmina, which Juliana will probably inherit, is, like that of Victoria, chiefly endeared to the people by the fact that the domestic life of the palace in its essential simplicity is like that of every household in a home - loving land. — Philadelphia Public Ledger.

SITE OF THE FIRST PHONE MESSAGE

Walter S. Gifford (left), president of the American Telephone and Telegraph Company, and Leonard H. Kinnard (right), president of the Bell Telephone Company of Pennsylvania and Associated Companies, are shown standing on the exact spot where Alexander Graham Bell first talked over his invention at the Centennial Exposition 50 years ago. In the background can be seen Memorial Hall, relic of the Centennial, and which is now being used as a museum. It was on this spot that Don Pedro, then Emperor of Brazil, met the 29-year-old inventor and exclaimed, "My God, it talks!" when he heard Bell's voice come over the wire. The exhibits to be staged by the organization these men represent will be one of the great features of the Sesqui-Centennial International Exposition, which opens in Philadelphia June 1 and continues to December 1 to celebrate the 150th anniversary of the signing of the Declaration of Independence.

AMERICAN YOUTH

Elizabeth ("Betty") Clark, 13, of Cedars, Delaware, is one of that state's girl candidates for the American Youth Award, established by the directors of the Sesqui-Centennial International Exposition, to be held at Philadelphia from June 1 to December 1 in observance of 150 years of American independence. If "Betty" is finally chosen to represent Delaware she will be given a week's trip to the Exposition and to Washington and the White House, where she will receive a medal from the hands of President Coolidge.

COMMENT.

—Doug and Mary are in Germany and the people over there are hearing "The Star Spangled Banner" played for the first time since the war. Doubtless they are hearing it under more comfortable circumstances than when the doughboy began playing it for them.

—The proof reader and the society editor are not taking their usual chummy lunches together. She wrote it that a certain society was giving an informal party and it got by everybody else "informal party."—Newton Kansan.

—A famous plastic surgeon says that Chicago is the home of the truly classical nose. Probably it is because with the stockyards and everything, the average Chicago nose gets lots of exercise.

—It is said that the United States imported 61,000,000 pounds of tomatoes from Mexico last year. We didn't know they raised anything that soft down there.

—It is said that Princeton students do more reading in March than any other month in the year. Probably this is because March is between athletic seasons.

—Fashion reports say that the new wall papers for this year show very brilliant colorings. This will give us another excuse for staying away from home.

—The freshmen at Harvard recently spattered the seniors with tomatoes and eggs, showing again how the spirit of revolt is growing in our colleges

—Judging from the way everybody wants to do something for him, the American farmer must be nearly as popular right now as Santa Clause.

—Moscow says that the British strike was a mere curtain raiser, and doubtless the Soviets would like to provide the show with a red fire tableau.

—Peace negotiations between France, Spain and the Rifs have been broken off. The League of Nations must have been asleep at the switch.

—Sinclair Lewis has refused the $1,000 Pulitzer prize offered him for writing "Arrowsmith." Maybe he feels that he was not worth it.'

—A survey shows that there are only 147 workers in Paris who are out of a job. And these are doubtless all ex-cabinet makers.

—A Viennese artist is over here trying to find the loveliest girl in America. It will take more than one man to complete that job.

—It is said that potatoes grow wild in Chile. And the price of them makes people wild in the United States.

—In most American cities just now the crying need of the hour is a couple of home run hitters.

Power of Vibrations

A Boston violinist says he can put out a flame with the vibration of his fiddle. Bet that's nothing. A saxophone slightly off key can put out an entire orchestra.—Cleveland Plain Dealer.

THE THEATRE

"The Golden Princess"

"The days of old, the days of gold, the days of '49" live once again in all their rollicking, romantic and riproaring glory, in the stirring, adventurous melodrama, "The Golden Princess," which introduces Betty Bronson as an honest-to-goodness movie star. It will be the main feature at the Palace theatre on Friday.

History repeats itself in parallels that rival its heroism and hardship, its daring and daredevilry the tremendous rush that followed the discovery of gold in California. Men suffered and sacrificed, fought and bled to wrest from Mother Earth the shining, yellow metal. What a background around which to weave a story of flashing action, compelling action drama and tense thrills! And that's precisely what film fans may expect in this spectacular production.

"The Vanishing American"

The tensely dramatic story of the love of a white girl for an Indian and his almost hopeless love for her is told against the gorgeous background of the Painted Desert and the mysterious Navajo Mountain with a cast including ten thousand Indians in "The Vanishing American."

This story, Zane Grey's tribute to a crumbling race of proud kings, which opens at the Palace theatre on May 29-30, was many long months in the filming on the Navajo reservation. Briefly and dramatically the story of the history of the forefathers of Naphaie, the last of a long line of chiefs, played by Richard Dix, is unfolded on the screen. First comes the original man, a squat, ape like creature, shambling along with his mate and young trailing behind. As he disappears into the forest another and higher type of being follows, and so the race is traced down through the coming of theSpaniards the battles with the whites, until the present day.

The modern story opens on the Navajo reservation in the winter of 1916-17. Dix, young, strong, self-educated and a champion of his people's rights, has incurred the ill will of Noah Beery, the crooked assistant to the Indian agent, a man too occupied with the red tape of his office to pay much attention to his work. The trouble between Dix and Beery reaches a climax when the Indian whips the assistant for attempting to force his attentions upon Lois Wilson, the young white school teacher.

"Stage Struck."

"Stage Struck" an Allan Dwan production starring Gloria Swanson, at the Palace theatre on June 1-2, is unique in that the first and final sequences are done in natural colors, the color being used to suggest the periods of happiness in the heroine.

"Stage Struck" is the story of a drab little waitress in an Ohio river town who determines to become an actress because the boy who fries the wheat cakes in the restaurant likes actresses. The little waitress, as played by Miss Swanson, is both humorous and pathetic. She is a bedraggled, down-to-the-heels little figure always getting into trouble and always being the butt for the laughter of everyone. But with all this comedy, there is something touching about the girl, something that keeps the tear close behind the laugh. The scenes on the boat and in the cheap restaurant are "slapstick" comedy, and Miss Swanson reveals comedy gifts hitherto unsuspected.

All this is in color, one of the most gorgeous pieces of Technicolor work ever done. It is photographed in vivid crimson, gold and purple, the great banquet hall set being especially striking. This fades into the shabby waitress in the cheap restaurant, only to come back to color again for the final shots when the waitress and the wheat cake cook, happily married, have their own restaurant—a lunch wagon—set in the midst of a garden of their own making.

PRONUNCIATION AID

Jane Webster, descendant of the famous lexicographer, Noah Webster, presents a copy of her ancestor's work to the Publicity Department of the Sesqui-Centennial International Exposition Association to help them in pronouncing properly the name of the big events which opens June 1 to celebrate the 150th anniversary of the signing of the Declaration of Independence. There are many types of pronunciations heard but there is just one proper way Noah says. It is "Sesk-wih-cen-ten'-nial" with the accent on the first syllable of the "Sesqui" and on the second syllable of the "centennial."

Power of Love

If there is anything that keeps the mind open to angel visits, and repels the ministry of ill, it is human love. —R. T. Willis.

Changed in Meaning

"Rival" originally meant "one who lives on the opposite bank of the stream." The word is taken from the Latin "rivalis" and is related to our "rivulet."

NEW PALACE THEATRE
Attractions for Coming Week

Friday, May 21th

Betty Bronson in "The Golden Princess." Less than a year ago Betta Bronson leaped into fame as Peter Pan. Now she's a full fledged star. You'll love her as the Girl of the Golden West in Bret Harte's stirring gold rush romance. Also a Pathe comedy, "Sheez-ing Breezers." This picture is for the benefit of the Ho-de-os-eh Camp Fire Girls.

Saturday and Sunday.

Richard Dix in "The Vanishing American." The screen's mighty tribute to the American Indian, first lord of the Western continent, showing the parade of civilization from the first man and his mate down to the modern Indian. The Red Man's gradual eclipse before the irresistible sweep of white civilization. His final stand in the barren wastes of the far west. His retreat into the desert fastness marked by a trail of blood. All against the gorgeous background of the chasms and gorges of northern Arizona. Even Zane Grey's mastery of language could do scant justice to these awe inspiring scenes. With a cast of 10,000 Indians and 100 principals, "The Vanishing American" is the final epic of the fast disappearing Red Man.
Also a Fox comedy, "Held for Investigation."

Tuesday and Wednesday

Gloria Swanson in "Stage Struck." She took a correspondence course in acting—and thought she'd make the Barrymore's jealous. The story of thereee million girls' dream. Gloria Swanson's supreme achievement in comedy. Loves, laughs, gowns, gasps, gayety and novelty. Woven into a fascinating story of a girl's bid for fame behind the footlights.

BEAVER ISLAND

A son of Supervisor J. W. Green broke an arm when cranking a car last Sunday. He was taken to Charlevoix on the Floyd Bros. boat for treatment.

Mr. and Mrs. Garret Cole went to Charlevoix Monday. Mrs. Cole went on to Big Rapids to visit her mother, Mr. Cole returning to St. James.

Buddy McCaulay and Earl Gallagher spent Sunday and Monday at Charlevoix and Harbor Springs.

Jerry Palmer is at Charlevoix this week having been drawn as a juror. Geo. Rickers was also drawn.

Peter H. Bovle of the U. S. lightship, was in St. James a few days this week.

Olaf Nordrum, of the Booth Fisheries, called on our fishermen last week.

W. J. Gallagher was at Charlevoix Tuesday and Wednesday of this week.

Omer McCann is in Charlevoix on business pertaining to his teeth.

J. C. Gallagher is in Charlevoix attending Probate Court.

Mr. and Mrs. Tim Leonard of Chicago, are at their bungalow.

Joseph Schmidt made a trip to Charlevoix on Tuesday.

Mrs. John McCann went to Charlevoix on Tuesday.

Miss Rose Roddy is home from Chicago for a visit.

Robert Bridge was at St. James last Monday.

W. L. McManus of Petoskey, is here on business; making the trip from Charlevoix on the S.S. Sanford Wednesday.

Dr. and Mrs. R. A. Palmer returned to Northern Michigan.

James Donlevy, for some time past in Kalamazoo, returned to his home here a few days ago.

U. S. local inspectors was at St. James Wednesday to inspect the Rambler.

Remarkable Linguist

Sir William Ramsay Hamilton, the celebrated English mathematician, who died in 1865, had an extraordinary faculty for learning languages, and is said at the age of twelve to have mastered 13 languages, besides English.

Matter of Views

If you want to make a larger view of life," the way to begin is to take a smaller view of yourself.

—PERSONALS—

Holley Gift Shop—flowers for Decoration Day.

Miss Belle Roy of East Jordan, was a visitor here Wednesday.

Neal W. Newman, of Lansing, was a business visitor here last Monday.

Mrs. Harry Belding and daughter returned Friday to their home, Muskegon

W. J. Gallagher, of St. James, was a business visitor in this city last Monday.

Mrs. Isadore Lacroix was a business visitor in Traverse City early this week.

Attorney E. N. Clink of East Jordan, spent part of the week here on legal business.

Mr. John Green, of Pesine township, was a Charlevoix visitor early this week.

John C. Gallagher, of St. James, spent the early part of the week in this city on business.

Mrs. Josephine Atwood, of Chicago, is a guest at the home of her brother, R. N. Faulkner and family.

The Congregational Young People have an Experience Social scheduled for next Monday evening at the church.

Mrs. Joseph Howard entered the Charlevoix hospital for an operation of a minor nature early this week.

"Game Warden Charles Smith, with his Michigan Patrol ship, was in Charlevoix harbor Tuesday and Wednesday.

Mr. and Mrs. Gafret Cole, of Nomad, were visitors here early this week. Mrs. Cole continued her trip to Big Rapids.

Frank A. Kenyon returned to Mackinac Island last Monday after spending some days in this city and other southern points.

The families of Messrs. I. N. Kline and E. Reinhold, of Chicago, are spending the week end at their cottages on Park Avenue.

L. P. Adams is getting his place of business, 115 Bridge street, polished inside and out preparatory for opening for the summer season.

Mont Withers has had some painters at work on his business property, 317 Bridge street, and as a result the front takes on a fresh new appearance.

Mrs. Harry G. Parker of Owosso, spent the early part of this week with her cousin, Mrs. Willard A. Smith, 208 Park avenue and other relatives.

Mrs. Nellie Wood left for Lincoln, New Hampshire, last Tuesday, where she will spend the summer season with her daughter, Mrs. Elbert Goddard.

Mr. and Mrs. F. A. Fielder, of Chicago, open their cottage on the Belvedere Club grounds today and will remain here for an indefinite length of time.

Attorney Thomas D. Meggison, of Traverse City, is here this week attending to legal matters for clients at the court house while circuit court is in session.

Smith Brothers' tug from Sheboygan, Wis., entered this port last Monday afternoon, and the captain and members of her crew were upward bound with the poin of destination given as Duluth, Minn.

Miss Theckla Greenfelder, of Chicago, arrived here Tuesday morning for the purpose of looking after business matters in connection with the Greenfelder cottage, 217 Park Avenue.

Dr. and Mrs. Frank H. Wilkinson attended to May festival held in Ann Arbor last week. They made the trip by motor leaving this city last Tuesday and returned during the early part of this week.

Mrs. John G. Clark, of Toledo, is a guest of her mother, Mrs. H. L. Iddings and will remain here for the summer. Mr. Clark accompanied her to Charlevoix and returned to Toledo early this week.

Union Memorial service to be held in the Congregational church at 10:30 a.m. Sunday, May 30th. All Baxter W. R. C. ladies are urgently requested to attend in a body. Everyone is cordially invited.

Mr. and Mrs. George W. Priest returned last Monday from a vacation of several months spent in Florida and other southern points and have taken up their residence at their cottage, 201 Clinton street.

Mr. and Mrs. Lester A. Cameron left for Flint Tuesday and will return later this week, making the trip from Flint to Charlevoix over the motor route with a new automobile, a recent purchase of Flint manufacturers.

The fronts of the Charles R. and Will Bellinger's places of business are being brightened up this week. The paint applied by W. C. Bellinger makes a decided improvement in the appearance of the two business properties.

Mrs. Harry Bloch, of New York, has been in Charlevoix some days attending to matters pertaining to the Bloch summer home, 214 Park Avenue, which probably will be leased for the season on account of Mr. and Mrs. Bloch's arrangements to spend the season abroad.

Mr. and Mrs. T. J. Leonard motored up from Chicago last Sunday, remaining here until Monday afternoon, when they continued their trip by boat to St. James, to attend to business interests and enjoy their summer cottage for a season.

Frank G. Hines can now make his trips about the country independent of railroads or train service, having recently purchased a new Willys-Knight sedan.

The front of the store occupied by Milton Block, 324 Bridge street, has been improved in appearance by the application of new paint during the past few days.

Mrs. James Gaskin went to Detroit last Friday upon receipt of information that her daughter, Mrs. Russell Blakslee was seriously ill and that an operation would be necessary before relief could be obtained from an acute case of appendicitis.

Mrs. Frank A. Hull, a former Charlevoix resident, passed away at Highland Park, Mich., at 5:30 a. m., Wednesday morning, according to information received by friends here yesterday forenoon. Her maiden name was Henrietta House, under which she will best be recognized by many local citizens.

A large number of members of the Masonic fraternity throughout the state made the trip to Kalamazoo early this week for the purpose of attending the annual Grand Lodge meeting held Tuesday and Wednesday of this week. Roy Ashdon, W. M., of Charlevoix Lodge No. 282, F. & A. M., was in attendance as local representative from this city.

Members of the local American Legion will receive on Saturday, May 29th, as Poppy Day, and in accordance with arranged plans a sale of poppies will be conducted for the benefit of the local Legion throughout the day. An abundance of poppies have been procured and they will be exposed for sale by a committee appointed to look after this special Legion feature which hereafter will be continued as part of an annual observance.

Charlie Sterrett a patient in the Charlevoix hospital since the 15th inst., when he underwent an operation for appendicitis has so far recovered as to be able to return to the family home. The change was made today. Due to this action Charlie loses the benefit of attending school during the last school month of the year, but he is not worrying about the loss this being counterbalanced by his present improved condition and the further fact that he is in the land of the living where he can stick around and enjoy his friends.

Mr. and Mrs. Archie F. Batters, of Pellston, were Charlevoix visitors last Sunday and states that his uncle, Hon. Archibald Buttars of this city is seriously ill in San Diego, California. Mr. and Mrs. Buttars have for many years spent the winter season in California, where a daughter, Mrs. Ed. F. Parmlee resides permanently. Due to his advanced age friends here are greatly alarmed over Mr. Buttars' physical condition and express grave doubts concerning an early recovery from his present illness.

The government cable between this place and St. James is again in service after several months idleness due to one or more breaks that disrupted this branch of communication between the points mentioned. Citizens particularly at the St. James end of the line, have been greatly annoyed during the winter period since the cable parted late last fall. Due to the and the infrequent mail service residents at St. James were without communication with the outside world for several days at a time with a recurrence of this condition at frequent intervals. This cable is a matter of considerable importance and of great convenience to the public hence its restoration to its former condition is a matter of local rejoicing.

"Divine Rights"

George F. Baer was known as Divine Rights Baer because of a statement in which he is alleged to have said: "The rights and interests of the laboring man will be protected and cared for—not by the labor agitators, but by the Christian men to whom God in His infinite wisdom has given the control of the property interests of the country."

Notice to 7th and 8th Graders

Many pupils were either sick or in quarantine at the time of the regular seventh and eighth grade examination. A special examination will be held for these pupils on June 14th and 15th. Seventh grade subjects will be given on the 14th, and the eighth grade subjects will be given on the 15th. Only those pupils who were sick, in quarantine, or for other unavoidable reasons were unable to attend the regular examination will be allowed to write the special examination.

Pupils wishing to write this examination should notify the Commissioner of Schools, A. C. Belding, Charlevoix, Michigan. 5-2t

Congregational Church

Rev. B. G. Mattson, D.D., Minister

Special announcement for Memorial Sunday, May 30th: Morning service at 10:30. The day will be observed by a union service in this church in which the other churches of the city will participate. The patriotic orders will also be present, representing the G. A. R., the Spanish War Veterans and Veterans of the World War. The Woman's Relief Corps is co-operating with the pastor and choir in the arrangements for this service. This service will take the place of the regular morning services of the churches co-operating and all the congregations together with the general public are cordially invited to be present. Special music for the occasion will be rendered by a combined choir, singers from the various churches uniting with those of this church under the direction of Mrs. A. J. Stelter. The sermon will be preached by the pastor of this church on the theme, "The Shrine of Memory in the Temple of Prophecy." The other pastors attending will assist in the conduct of the service.

The Sunday School session will immediately follow and the young people's societies will meet at the usual time 6:30 p. m. The meeting of the juniors will be led by Ruth Smith on the topic, "Children's Prayers." The pastor will be present to assist the Juniors. Gwendoline Miller will preside at the piano. The Senior Society topic will be "What We Read and Why" and the leader is Paul Sloan.

PLANS AHEAD

Children's Day will be observed by the Sunday School the following Sunday at the morning service hour, 10:30, with an enjoyable program, June 6th. The Sunday School will begin the same Sunday with a change of hour for the summer to 9:30 for the regular session. Full announcement of program for Children's Day will be made in next week's issue.

The Society of Christian Endeavor will hold an Experience Social on Monday, May 31st at the church at 7:30 p. m. All young people are invited to come and bring their friends to enjoy the fun and a good time and to help by their experiences to raise a fund to enable the society to send two delegates to the Young People's Summer Conference at Olivet.

The Summer Conference at Olivet occurs June 25—July 2nd, and will bring together a fine group of some one hundred fifty or more picked young people from the Congregational churches of the state for cultural study and fellowship in the interest of religious education and the training of young people for the work of the church.

We shall seek the co-operation of all the church in raising a fund to enable this church to be represented this year at this valuable Conference.

The pastor gave an interesting report last Sunday of the meeting of the State Conference held at Grand Rapids. During the coming week he will be away from the city—Monday until Friday—on a missionary tour assisting three members of our state staff in visits of inspiration and help two groups of Congregational missionary churches in the upper peninsula.

Methodist Church.

C. E. Pollock, Pastor.

"The Decisions of Jesus"—sermon subject at 7:30 p. m. next Sunday. Every member of the church is urged to be present at this service. Interesting features of the service will be a pulpit editorial, "Silent Cal' and Senator Edwards" and special music. The public is invited.

There will be a union Memorial Day service in the Congregational church next Sunday morning. On account of this there will be no preaching service in the Methodist Episcopal church at ten thirty.

Sunday School will meet at 12-m. as usual next Sunday.

The Epworth League devotional hour is 6:30 p. m.—a good attendance is expected next Sunday.

This is the week of the Grand Traverse District Epworth League Convention in the local Methodist Church. The program begins with a banquet at six p. m., Friday, followed by an address by Dr. J. O. Randall of Traverse City, who is the District Superintendent. This address will be delivered in the auditorium of the church and is open to the public. The Saturday program begins at 8:30 and the convention closes with a noon day luncheon in the church dining room. A large attendance of young people from the various Methodist churches of northern Michigan is expected.

Next Tuesday and Wednesday, June 1-2, the Woman's Home Missionary Society of Grand Traverse District will meet in the Methodist Episcopal church at Harbor Springs. Several from the Charlevoix church plan to attend.

St. Mary's Catholic Church

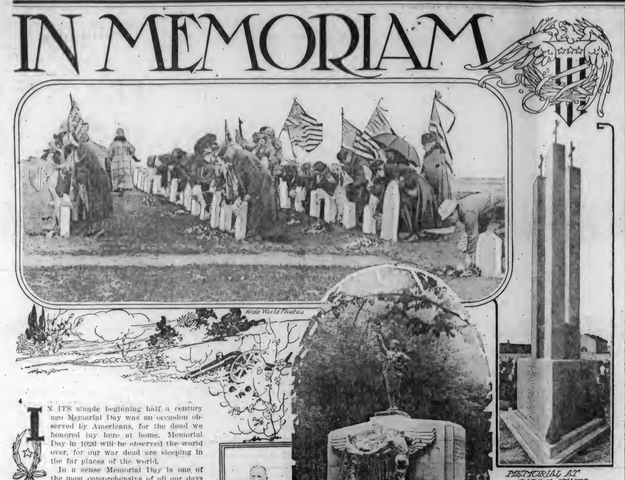
IN MEMORIAM



Wide World Photos

PICTORIAL AT PARIS, 1918
Times Wide World Photos

IN ITS simple beginning half a century ago Memorial Day was an occasion observed by Americans, for the dead we honored lay near at home. Memorial Day in 1926 will be observed the world over, for our war dead are sleeping in the far places of the world.

In a sense Memorial Day is one of the most comprehensive of all our days of national observance. It has grown as the United States of America has grown, as the American people have grown.

Memorial Day will be observed this year at the very ends of the earth. In the eight American war cemeteries in Europe flowers will be strewn and tribute paid by eloquence in France, Belgium and England. Closest to our memories are the heroes of the World war and the Spanish-American war, for in these fell our brothers and fathers and husbands. But what of our grandfathers? Shall these later conflicts, terrible as they were, dim our memory of those heroes of 1861-65? They fought battle after battle on home ground in four years of warfare more awful, more soul-rending to Americans of that time, than the far more brief and far further-removed warfare of 1917-18.

Sixty-one years have passed since peace was made between the North and the South! More than a million boys in blue and a force of 175,000 in gray set out for home sixty-one years ago this month. Of these, both blue and gray, scarcely 120,000 are with us as Memorial Day, 1926, approaches.

With the swift passing of these veterans we may write finis to records of public service as notable in peace as in war, says the New York Times. For the men who fought for the North or the South have played leading parts in bringing about the present unity and prosperity of our country. South or North, they have ordered the course of the political and economic life of the nation through its greatest period of growth.

They, like the nation, are themselves united. For years both camps have made moves to strengthen North and South fellowship. By 1925 good feeling had been restored sufficiently for the Grand Army of the Republic to hold its annual national encampment south of the Mason-Dixon line. Northern veterans went to Louisville, Ky., and that city made every effort to show them true southern hospitality. Forever memorable in American history will be the welcome of the men of the North by the people of the South.

The North also showed its good feeling in 1917, when the remnants of Lee's army took the national capital by storm and marched through its great avenues as guests. Only two years before nearly 20,000 Union men had returned to Washington to march as they once marched before President Johnson and General Grant. This time the drummer boys were whiskered and gray, the once erect soldiers were bent, their firm step had become weary and slow, but they marched just the same, in their old uniforms and carrying their old flags.

The Wisconsin Eighth infantry even brought its mascot that had gone through the war, "Old Abe," the eagle, now stuffed and mounted.

Then, two years after that celebration, the survivors of the Confederate army paraded over the same route, reviewed by the same cheering crowds. Old wounds were healed, indeed. A delegation from the G. A. R. brought its respects and a United States flag, which the commander in chief of the Confederate veterans ordered hung with the Stars and Bars. And when the Southerners went to the field of Gettysburg next day to unveil a statue of Lee many of their former foemen went with them and stood with heads bowed in reverence through the ceremony.

As the ranks grow thinner the disposition to forget the old bitterness increases. At the G. A. R. encampment at Attleboro, Mass., in 1925, gray mingled with red, white and blue in the decorations of the town, and Captain Bisbee, Confederate veteran of Petersburg, Va., was received into honorary membership in the northern organization. At the funeral of General Sherman, Confederate veterans living in New York attended in a body. Similar exchanges of courtesy have gone on ever since. Both sides join in exercises on battlefields, North or South. Captured battle flags are returned. In many parts of the South Memorial Day is observed at the same time as in the North.

Through four long years the armies of both sides went through trial by fire and sword, by hunger and prison camp and scourge. The survivors were tested men, trained to take up the burdens of peace. To those who had commanded in war fell the mantle of leadership afterward. Even to those who had fought as privates came leadership of a distinct sort. Through the '70s and the '80s, and even down to the present century, the counsel of the veterans was weighty in every community action. In all parts of the country and in all vocations men of the '60s were prominent.

For decades after the war scarcely a man ran for President who had not served with the colors. Except Cleveland, every President elected between 1865 and 1900 had a Civil war record. General Grant was the first, President Hayes and President Garfield were both ex-generals. President Arthur had helped organize the New York state militia, and, as quartermaster general, had equipped state troops for the front. President Harrison had risen from colonel to serve as a general. President McKinley had enlisted as a private and at the age of twenty-two had come out of the war a major. McClellan, Burnside, Lew Wallace, Carl Schurz, Justice Holmes, Major Putnam and Henry A. du Pont were names as distinguished in civil as in military affairs, and they are but a few of many thousands.

On the other side the leaders were no less leaders after the end of the conflict than before. It is only necessary to mention the Lees, Braxton Bragg, Pickett, James R. Gordon, Wade Hampton and Kirby Smith to show the influence of Confederate veterans on the peace-time history of the southern commonwealths.

Bitterness had divided the nation, but the soldiers of the North and of the South had Manassas, Vicksburg and the Wilderness in common. Even while bullets whizzed overhead friendships were made across the lines. Those who had shouldered muskets were the first to put the passions of war behind.

The first overtures were made at Appomattox sixty-one years ago, when Grant left the southern officers their side arms and their horses, and when Lee recognized this as a friendly gesture and suggested that the cavalry troops, as well, needed their horse and mules. Lee was thinking not only of the fields to be plowed, but also of the people to be reconciled to defeat. When Grant agreed, Lee assured him that the step would engender good feeling. Later in the day, when the word had passed through the ranks and victory celebrating began, Grant issued this message to his men:

"The war is over; the rebels are our countrymen again. The best sign of rejoicing after the victory will be to abstain from all demonstrations in the field."

In the series of running battles across the South, Sherman and Johnston built up great esteem for each other's ability. Sherman referred to his antagonist as the skilful and experienced Joe Johnston." He did not hesitate to express his belief when General Hood was appointed to take Johnston's command. When Johnston was reinstated, Sherman's papers showed that he realized that the situation had grown serious for him. When General Hayes, upon becoming President, considered making Johnston his secretary of war, General Sherman took the opportunity to let it be known that as head of the army he would willingly receive the President's orders through the man who had surrendered to him. The appointment was never made, but Sherman's attitude engendered good feeling. Admiration was not all on one side, Johnston, too, held Sherman in high regard. At Sherman's funeral Johnston acted as an honorary pallbearer.

Many are the instances where men who had worn the blue and the gray came to honor their former antagonists when hostilities had ceased. President Hayes had on a number of his cabinet a Confederate veteran, David McK. Key of Tennessee, postmaster general. Grant had shown the tendency to forget the past when he appointed "Old Pete" Longstreet, whom Lee looked upon as his right-hand man after Stonewall Jackson's tragic end, to the post of surveyor of the port of New Orleans, and later supervisor of the internal development of Louisiana and postmaster of New Orleans. Longstreet was advanced by other ex-soldier Presidents. Hayes sent him as minister to Turkey, and Garfield appointed him United States marshal for the district of Georgia. McKinley carried on the same tradition when he retained Wade Hampton as commissioner of Pacific railroads, to which position Cleveland had appointed him. Longstreet was appointed later to fill this post.

Whenever opportunity was given, Confederate leaders spent themselves wholeheartedly to promote the interests of the Union they once had fought to destroy. To them war and defeat quickly became a thing of the past. Fitzhugh Lee served well as consul general in Havana. He organized an army corps for service in the Spanish-American war, and in 1898 commanded the American military forces in the district of Havana. Later he commanded the department of Cuba. He was one of the first of the many ex-Confederate soldiers who appointed themselves emissaries to win for the South the good feeling of the North. Ere a decade had passed he had ventured on a mission into once hostile territory, and the next year he pleaded for friendship at the centennial celebration at Bunker Hill.

Colonel Henry Watterson, too, stood for pacification and reconciliation. Possibly he was the first Confederate veteran to come with a gathering of Union men. Surrounded by his former enemies at the annual banquet of the Army of the Tennessee in Chicago in 1891, he delivered an address on the text, "Let Us Have Peace."

The work of the survivors of the Civil war in the sixty years since its close can hardly be dissociated from that of their veteran organizations. The conflict was still at its height when the first veterans' society was formed to raise money for sending officers' bodies home.

Peace was only a year old when the Grand Army of the Republic was organized. Because many veterans took active part in the campaign of 1868 the idea soon gained currency that the G. A. R. was a political organization. Thereby it suffered injury. Members dropped out, total disruption was threatened in the West. But in 1871 a rule was adopted prohibiting the use of the body for partisan purposes.

Meantime, southern soldiers were coming together. In June, 1885, the United Confederate Veterans became a south-wide organization. Its purposes are "to endeavor to unite in a general federation all associations of Confederate veterans, soldiers and sailors now in existence or hereafter to be formed; to gather authentic data for an impartial history of the war between the states; to preserve relics or memento of the same; to cherish ties of friendship that should exist among men who have shared common suffering and privations; to care for the disabled and to extend a helping hand to the needy; to protect widows and orphans."

For many years both organizations have performed noteworthy historic, philanthropic and patriotic service to their country. They are still carrying on, though the Great Destroyer is busy making furrows in their ranks. According to the December, 1925, report of the pension bureau only 126,566 Union soldiers are left on the rolls. Records of the men who fought for their Southland are scattered and incomplete. They are listed as pensioners only at county courthouses. Thousands, feeble, blind, perhaps have dropped out of sight in the home of relatives and friends. General Hampden Osborne, adjutant general and chief of staff of the United Confederate Veterans, puts 10,000 as the maximum of living Confederate survivors, whether within organizations or not. Very few of those are as young as seventy-seven.

Predicts Quakes for State of California

Los Angeles, or its immediate vicinity, will experience a severe earthquake, probably more violent than that at San Francisco in 1906, in from one to ten years, Dr. Bailey Willis, the seismologist and geologist emeritus of geology at Stanford, said.

Professor Willis stated three years ago that Santa Barbara would feel severe earth tremors, a prophecy that was fulfilled in the past summer. He bases his present prediction upon the fact that Los Angeles is situated in an angle between Elsinore and San Gabriel faults and at this time a severe strain is resting upon them, which must be relieved in the near future.

The last severe earthquake in southern California was in 1857, and since then there has been almost prolonged quiet, broken by slight shocks in 1890 and 1918. The Santa Barbara earthquake last summer was purely local and did not relieve the general strain, Doctor Willis said.

The faults in southern California are undergoing a severe strain was shown, the professor asserted, by a triangulation recently resurveyed by the United States coast and geodetic survey, which showed that Gaviota pass, near Santa Barbara, had moved twenty-four feet in thirty years.

Doctor Willis stated that northern California does not need to fear a severe shock for at least a generation to come.—New York Times.

Happy in Contentment

I have been a great deal happier since I have given up thinking about what is easy and pleasant and being discriminated because I cannot have my own will.—George Eliot.

Milton's "Arcades" was written on request of Lady Derby of Harefield.

THE KITCHEN CABINET

(©, 1926, Western Newspaper Union.)

People have to live first before they can see, and they don't think of that until they are fed, and one needs always to have had enough turnips to see 16 them anything except food.—Mrs. Wiltstra.

FOOD FOR THE DAY

The French are wonderful cooks, but they look with dismay upon our huge, juicy roasts and steaks. Mark Twain said: "There is here and there an American who will say he can remember rising from a European table d'hote perfectly satisfied; but we must not overlook the fact that there is here and there an American who will lie."

Onion Soup With Eggs and Cream.—Cut up six white onions fine and fry in a tablespoonful of butter until a light brown. Add a quart of water and a pint of milk. Season with a teaspoonful each of salt and sugar, a dash of red pepper and a pinch of mace. Cook slowly for an hour and strain; beat four eggs until light, add a cupful of cream and a tablespoonful of cornstarch, mixed with a little cold water; cook until the starch is well cooked before adding the eggs, as the soup must not be boiled after adding the eggs or it will curdle.

Jellied Chicken.—Dress, clean and cut up a four-pound fowl. Put in a saucepan with two slices of onion; cover with boiling water and cook slowly until the meat falls from the bones. When partly cooked add half a teaspoonful of salt. Remove the chicken, reduce the stock to three-fourths of a cupful, strain and skim off the fat. Decorate the bottom of the mold with parsley and hard-cooked eggs cut into slices. Pack in the meat, freed from skin and bones, and sprinkle with salt and pepper. Pour over the stock and place the mold under a heavy weight. Keep in a cold place until firm. In warm weather add a teaspoonful of gelatin to the stock.

Merridale Pie.—Take two cupfuls of drained crushed pineapple, one-half cupful of red currant jelly, one tablespoonful of confectioner's sugar, and one stiffly beaten egg white. Mix the pineapple, jelly and sugar and beat vigorously with an egg beater, then fold in the beaten egg white and turn into a baked pastry shell. Sprinkle with one-half cupful of grated cocoanut and place in the oven until brown.

Baked Chicken With Bananas.—Melt one-fourth of a cupful of butter, add one large onion thinly sliced, cut two young chickens into pieces for serving, cover and cook slowly, turning often; after cooking ten minutes add one cupful of chicken stock and cook until the meat is tender. Remove the chicken, put stock and onion through a sieve and add one and one-half tablespoonfuls each of butter and flour cooked together until smooth. Season with salt, pepper and a bit of cayenne. Arrange the chicken on a platter, pour the sauce around it and garnish the rim of the platter with sliced bananas which have been fried in butter. A teaspoonful of lemon juice and one-half teaspoonful of sugar may be used to baste the bananas while cooking.

Choice Cakes.

Wise mixing and careful baking are important points in successful cake making. If the cake is to bake an hour, watch the oven the first quarter or twenty-five minutes to see that it begins to rise; the second quarter it should finish rising and begin to brown; the third quarter it should finish browning and begin to shrink from the sides of the pan; the last quarter finishes the baking. If the cake begins to brown in the first quarter, it will not rise sufficiently, so careful following of this rule will insure a good cake, provided it has been well mixed.

A cake filled with large holes has too much of the rising agency—baking powder or soda and cream of tartar—or it has not been well blended. Careful mixing to thoroughly blend all the ingredients is vital in good cake-making. If a cake cracks open in the middle, humping itself up into an unsightly shaped loaf, it may be caused from too hot an oven or too much flour. The first five minutes in the oven a cake may be turned and shifted without injury, but after that leave it until it has fully risen before moving it.

Wedding Cake.—Take one cupful each of white sugar, brown sugar, molasses, coffee and butter. Stir eggs, one teaspoonful of soda, two pounds of raisins, one pound of currants, one-half pound each of finely sliced citron and chopped dates, the same of figs, one pound of walnut meats chopped, one-half ounce each of orange and lemon extract, one teaspoonful of cinnamon, one-half teaspoonful each of cloves, nutmeg and allspice. Two cupfuls of chopped apples and salt to taste. Add four cupfuls of flour and steam three hours, then bake one. This fruit cake will keep for months and is better made at least two months before it will be served. Steaming the cake first insures a moist, good-flavored cake.

Natural Wood Best

It is generally admitted that wood finished in its natural shade cannot be worked as successfully into color schemes of decorations as the stained wood. It is also true that color brings out the grain and enhances the natural beauty of most woods.

Watch Your Step

When you begin to feel that you're one of the best people your office has turned out, be careful that doesn't happen to you.

Fishing

FISHING from the banks of a sunny stream in springtime! Delightful. Fully comparable to catching, for the first time, the fragrant aroma of a cup of Monarch Coffee or Monarch Cocoa. High in quality — low in cost.

If you want to buy a car on time

IT is to your advantage to buy the car that you can comfortably afford, on a payment plan that gives you a sure margin of safety.

General Motors has its own finance company, the General Motors Acceptance Corporation, operating the GMAC Plan. Through its service more than 1,000,000 families have purchased cars comfortably out of income.

On August 1 last, the price of this service, which had always been low, was further reduced. And the automobile-buying public is now saving millions of dollars annually as a result of this reduction and the influence of General Motors' leadership.

The purchase of automobiles on time is a universally accepted practice. The car is a utility and it is sound business to conserve capital and use credit. But buy on sound terms and at low rates. Any General Motors dealer will explain the advantages of the GMAC Plan.

Airships and Great Guns

According to the occasionally reliable Mercury and Conveyancer, the United States has the greatest military aviation service in the world. Russian newspapers are trying to find out American dirigibles, each mounting 20 cannon. The United States also has 14,000 military airplanes, according to the information on which the Russian commissar of war and marine based his comparison to show the needs of the Soviet union, though giant dirigibles capable of mounting 20 machine guns have not progressed beyond the drawing board stage in the army department designers' office, they have become an everyday affair in Russian newspapers that have printed pictures of them, cannon and all. "A country where peace is highly esteemed!" is the sarcastic line of explanation under the pictures.

Cuticura Soothes Baby Rashes

That itch and burn, the baths of Cuticura Soap followed by gentle anointings of Cuticura Ointment. Nothing better, purer, sweeter, especially if a little of the fragrant Cuticura Talcum is dusted on at the finish. 25c each.—Advertisement.

Epworth League

Epworth league gets its name from the name of the town in Lincolnshire, England, which was the birthplace of John Wesley, founder of Methodism. The Epworth league, Cleveland says, should know, was born in this city in May, 1889, at a meeting of representatives of various young people' societies in what was then Central M. E. church.—Cleveland Plain Dealer.

SAYS FRENCH HAVE MASTERED MEASLES

Nation's Health Declares It Can Be Controlled.

Washington.—Development of an anti-measles serum-prophylaxis by French scientists promises to make possible the preventing and control of measles, "the most serious acute disease in existence," according to The Child Health Organization of The Public Welfare Administration of Paris, France, has established two centers for the production of serum from measles convalescents and for its application in accordance with epidemiological and clinical studies of Prof. Louis Bernard and his pupils, Robert Debre and Pierre Jeanneau.

Already the work is considered to have demonstrated the practicability of laboratories of anti-measles sero-prophylaxis attached to children's hospitals and hospitals for infectious diseases and the effective nature of preventive work in measles as developed by these research workers, especially in institutional fields, says the writer. It is stated, that no untoward accident or criticism has arisen during the progress of the work.

Preventive Properties Known.

"Everyone is aware of the preventive properties of the serum of measles convalescents," the writer continues, "but heretofore conditions have not been determined controlling the practical application of this property in the prevention of measles, the doses to be injected, the moment at which it must be taken from the convalescent and the moment at which the serum should be injected into the threatened individual for its protective action to take effect and the contagion to be rendered powerless.

"The method recently applied has been to inject the serum from the first to the fifth day of incubation. This prevents the lingering attack of measles and confers a transient immunity from the disease.

"Discarding the traditional methods, Robert Debre proposes as an improvement the use of sero-attenuation to reduce sero-prevention. The serum is injected at the end of the period of incubation. The measles is not prevented, but it appears in a greatly attenuated form. Mucous catarrh is either totally absent or very slight. Ocular catarrh hardly ever occurs. Persistent well-being characterizes the patient throughout, the dread complications of otitis or pleuro-pneumonia have never arisen, and a permanent or greatly prolonged immunity conferred by the prevention methods formerly used.

"Experience has not extended over a sufficiently long period for an estimate of statistical results on the measures of prevention, but Professor Bernard's method of inducing immunity has been successfully utilized to prevent epidemics in institutions, and in the families of children exposed, and the memorandum of Professor Bernard reported by the health committee of the League of Nations, declares that the effectiveness of sero-prophylaxis is now definitely established and the practical value of sero-prophylaxis centers is fully proved by results so far achieved.

Most Serious Acute Disease.

"Measles is the most serious acute disease in existence. In the last 25 years, the total mortality due to diphtheria has fallen off in ten of the principal European countries by 67 per cent, scarlet fever mortality by 46 per cent, and whooping cough by 43 per cent. Mortality from measles over the same period has fallen off only 10 per cent. It is so prevalent that hardly anyone in any part of the world can hope to avoid it.

"The figures adduced recently by the American Journal of Hygiene go to show that more than 90 per cent of urban populations in England, Canada and the United States contract measles at some period of their lives.

"To go back to Professor Bernard's figures, in the whole of Europe with the exception of Russia and the Balkans, measles caused 700,107 deaths in the ten years from 1900 to 1910. In the United States, in the zones subject to notification, measles has caused more than 100,000 deaths in the 20 years from 1901 to 1920.

"The epidemiological aspects of measles are interesting as brought out by the pupils of Professor Bernard. The reason the seriousness of measles is not fully appreciated is that the disease has quite a different effect according to the categories of children it attacks. As a general rule, measles is mild in the country and in the small towns. It is much more dangerous in the great crowds of the large city. Thus, in France, measles-mortality is three times greater in Paris than in communes of less than 5,000 inhabitants. This difference is negligible in the case of diphtheria and whooping cough."

If This Is a Sample

She—"I hope you will like my new hat, Roberto. I bought it on your account." Roberto—"Oh no account. Not yet, my dear; this is still on your dark."—Boston Transcript.

Copper 5,000 Years Old

Copper tools, razors, a copper hand mirror, copper razors, tools, fishhooks and harpoons have just been found in Mesopotamia by workmen excavating the five thousand-year-old palace of the kings of Kish. Copper is truly the everlasting metal.

Love Attracts Love

1ST AMERICAN YOUTH ENTRY

Edith May Adams, eighteen-year-old Parrington, N. J., girl, presenting her entry blank to Mayor Kendrick in his office at City Hall, Philadelphia. The American Youth and Teacher Award was established as a tribute to American youth and teachers by the Board of Directors of the Sesqui-Centennial International Exposition, through which the people of the United States and the world at large will celebrate the 150th anniversary of the Declaration of American Independence. The exposition will run from June 1 to December 1. Miss Adams' entry blank cited her for heroism displayed recently when she remained inside a burning building helping doctors render first aid to injured firemen. She is a candidate for the Golden Rachette, the highest gift within the hands of the Girl Scouts. Each state will elect a girl and boy and one teacher to represent them and the successful candidates will be the guests of the Sesqui officials from June 28 to July 4 at the exposition. This will also include a trip to Washington where they will be received by President Coolidge and presented with medals.

Moscow's Many Cats

Moscow is about twelfth among world cities as population is recently computed, but based upon the number of pussy cats it is first in the world. Living conditions that limit each person to 88 square feet of space or less are largely responsible, for under those conditions the cat has replaced the dog as a household pet. In many apartments where each family has room and the use of a corner in the community kitchen the cat population is larger and noisier than the human. Statistician —in this case, dog-fanciers—show that Moscow has 750,000 cats. Nevertheless, rats cause damage aggregating $2,500,000 in Moscow every year and about $250,000,000 in the entire country. This figure compares with $40,000,000 in France, $75,000,000 in England and $100,000,000 in the United States.

The Eternal Search

"Oh, dearie me," sighed Miss Highlite Flighte, "these evolutionists are simply too annoying! Just after I had researched, and located an ancestor who would admit me to membership with the Colonial Dames and the Daughters of the American Revolution, and was resting secure in the belief that the status of my family was settled once and for all, up comes those evolutionists with their far-flung notions of heredity. It isn't that a very exclusive 'Pre-Adamite Ancestral society' is being organized, and before one can break into it one must trace one's pedigree right back to the prototype, mail primordial simple globule. More research, more research. If only those evolutionists had kept quiet!"—R. L. P. in Kansas City Star.

Little Girl to Neighbor—Please, Mrs. Smith, one of the eggs my hen rowed from me has hatched and she sent it back.—The Progressive Grocer.

LEGAL NOTICES

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Frederick Yahr and Sophia Yahr, husband of Hayes township, Charlevoix county, Michigan, unto Mary Zipp of the city of Petoskey, Michigan, dated January 26th 1921, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 26th day of January, 1921, in Liber 48 of mortgages on page 279, on which mortgage there is claimed to be due at date of this notice the sum of One Thousand Three Hundred Seventeen and 66-100 Dollars, including the principal sum due with interest; and a further sum of four Hundred and Eighty-Nine and 17-100 Dollars, being taxes and interest thereon paid by the mortgagee on the land and premises herein described, together with an attorney fee of Thirty-Five Dollars as provided for by the said mortgage; and no proceedings at law or equity having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas, the taxes required by the statute to be paid on said mortgage was duly paid prior to the recording thereof.

Now Therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by said mortgage, and also including the taxes paid by the mortgagee, at Public Auction, to the highest bidder therefor, at the front door of the Court house in the city of Charlevoix, Charlevoix county, Michigan, that being the place where the circuit court for the county of Charlevoix is held), on Friday, the 25th day of June, 1926, at ten o'clock in the forenoon on that date.

The premises described in said mortgage being the lands and premises situated in the Township of Hayes, County of Charlevoix, state of Michigan, viz: The east one-half of the Southeast quarter of section Eleven in township Thirty-four, North, Range seven west, containing eighty acres of land, more or less, according to the government survey thereof.

Dated March 19th, 1926.

MARY ZIPP,
LESLIE SHANAHAN, Mortgagee
Attorney for Mortgagee
Business address: 108 Clinton Street,
Charlevoix, Michigan. 49 13t

Order For Publication.

Reuben Hetson, or his unknown heirs, devisees, legatees and assigns; John Verly, or his unknown heirs, devisees, legatees and assigns; John R. Struthers, Andrew C. Struthers, Charles W. Struthers, Robert K. Struthers, Amelia Howe, Lucinda Haggerty and Viola Peterson, known sons and daughters of Andrew R. Struthers, deceased, and all the unknown heirs, devisees, legatees and assigns of the said Andrew R. Struthers, deceased; Elizabeth Struthers, widow of Andrew R. Struthers, deceased; Matilda C. Liscomb, or her unknown heirs, devisees, legatees and assigns; Howard Brooks, and Francia I. Griffith, known children and heirs at law of Fanny I. Brooks, deceased, and all the unknown heirs, devisees, legatees and assigns of the said Fanny I. Brooks, deceased; Michigan Mortgage Company, limited; Anthony DeLong, or his unknown heirs, devisees, legatees and assigns; and Richard C. Lewis, Defendants.

Suit pending in the Circuit Court for the County of Charlevoix, in Chancery at the city of Charlevoix on the 14th day of April A.D. 1926.

In this cause it appearing that it is not known whether the said Reuben Hatson, or the said John Verly, or the said Matilda C. Liscomtor the said Howard Brooks, or the said Francis I. Griffith or the said Anthony DeLong, each or any of them is living or dead, or where each or any of them may reside, if living; and it appearing that Viola Peterson and Charles W. Struthers are residents of the state of Oregon and that it is unknown whether Amelia Howe or Lucinda Haggerty reside in the State of Michigan or not; and it appearing that it is unknown whether the Michigan Mortgage Company, Limited is in existence or not and it also appearing that none of its officers or any person upon whom service or process may be made; It is ordered on motion of Little Shanahan, attorney for the Plaintiff, Joseph W. Locke, that the defendants, Reuben Hatson, John Verly, Matilda C. Liscomb, Howard Brooks, Francis I. Griffith and Anthony DeLong or each of their unknown heirs, devisees, legatees or assigns, and all the unknown heirs, devisees, legatees and assigns of Andrew R. Struthers and Fanny I. Brooks, or either of them, Viola Peterson, Charles W. Struthers, Amelia Howe and Lucinda Haggerty and the Michigan Mortgage Company, Limited, enter each, his or their appearance in said cause on or before three months from date of this order; and that within twenty days the plaintiff cause this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulated in the said county of Charlevoix once in each week for six weeks in succession, or that said plaintiff cause a copy of this order to be personally served on said defendants at least twenty days before the time above prescribed for their appearance. The above cause is for the purpose of clearing and quieting the title to Government Lots One and Two in Section thirty and the south one half of the northwest quarter of Section twenty-nine in township thirty-four north, range seven west in the said plaintiff.

Notice of Commissioner's Sale on Foreclosure of Mortgage in Chancery

STATE OF MICHIGAN—The Circuit Court for the County of Charlevoix—In Chancery.

Richard E. Walker, Plaintiff,
vs.
Wellington P. Walker, and Katheryn M. Walker, Defendants.

Notice is Hereby Given, That by virtue of a Decree duly made and entered in the above entitled cause, directing the undersigned acting Circuit Court Commissioner, to sell the premises herein described to satisfy so much as may be the amount due on a certain Real Estate Mortgage given by the Defendants to the Plaintiff, including interest and costs, and pursuant to the Statute in such case made and provided, I will sell at public auction or vendue to the highest bidder at the front door of the Court House in the City of Charlevoix in said County and State on Saturday, the 19th day of June, A. D., 1926, at one o'clock in the afternoon of the following described premises or so much thereof as shall be necessary to satisfy the amount specified in said Decree, viz: 53361.38, plus taxable costs, and interest from March 19, A.D. 1926, to the entry and expenses of said sale, said premises being described as follows: The South east quarter of the Southwest quarter, and the Southwest quarter of the Southeast quarter of Section 29, Town 33 north, Range 7 west, in Charlevoix township, Charlevoix county, Michigan.

Dated Charlevoix, Mich., May 4, 1926.

Sargent Door Closer No. 520

This screen door closed—*without a slam!*

To have the screen door closed every time it is opened and to have it close in *absolute silence*—what a comfort that would be, what freedom from annoyance!

Now you have only to apply Sargent Door Closer 5201. This closer is small in size—exactly suited for use on the screen door and doors inside the house. It is reasonable in price. Yet it works as silently and surely as the larger Sargent Closers you have often seen on commercial buildings. It may be used on the outside of the screen door, or between the screen door and the house door. It is quickly put up. A diagram with every closer explains its easy application to any door.

Use Sargent Door Closer 520, also, on the back-stairs door, the refrigerator room and lavatory doors; and on the storm door in winter. It will add much to the safety, convenience and silence of your home.

"520" is for sale at this store.

PEEPING TOM IN EVIDENCE AGAIN

Two Shots were Sent After Fleeing Party Monday Night

Clinton street residents have been more or less annoyed by some one with the proclivities of a Peeping Tom at frequent intervals during the last week, the latest appearance of the adventurer taking place last Monday evening, when an effort was made to capture the individual who proved to be something of a sprinter, easily outdistancing his pursuers, and also escaped being wounded by either of two revolver shots from a heavy calibre gun that was fired in the direction of the fleeing person.

If another opportunity presents itself there may be a different story to report in so-far as accuracy in shooting is concerned.

THE CHARLEVOIX SENTINEL

Volume 57 — Charlevoix, Michigan, Thursday, June 3, 1926 — Number 6

MOST IDEAL DAY

FOR MEMORIAL PROGRAM

Brookside Cemetery by War Veterans and Citizens Generally

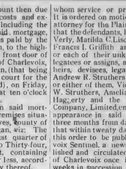
Monday was a most ideal day for carrying out the Memorial day program by veterans of the Civil, Spanish-American and World war veterans, W.R.C. and citizens in general. The program carried out at Brookside cemetery was well attended by local people with a goodly number present from distant points, some even from outside the state.

During the forenoon several hundred automobiles made the trip and parked in the vicinity of the cemetery and throughout the major part of the day a vast number of people visited the spot leaving beautiful floral tributes and potted palms as tokens of their unending love for departed friends and in this the heroes, those for whom the day was consecrated, came in for a full share of reverent remembrance, not one was overlooked not a single one forgotten there being a national flag and display of floral offerings at the grave of each departed soldier.

A splendid oration by Rev. C.E. Pollock is worthy of special mention from the standpoint of soldier or civilian regardless of denominational creed, religious or non-religious affiliations or creed, full of patriotic sentiment, a high tribute to those gone before, of the present and future generations—a fine exposition of 100 per cent Americanism—recognized and appreciated as a most worthy effort in complete conformity with the spirit of the day and of the occasion.

Music for the occasion was furnished by the Charlevoix City band. In this their first appearance created many complimentary expressions while the rendition of the musical selections was of a superior order, and the numbers offered specially suited to the day.

MAJ. WALTON GREEN



A new portrait of Maj. Walton Green, chief prohibition investigator for the United States and the right-hand man to Sen. Lincoln C. Andrews, assistant secretary of the treasury, in charge of prohibition.

CAMEL WILL WAIT LONG FOR REVENGE

Vindictiveness Trait of "Ship of the Desert."

The qualities of the camel are seldom, if ever, appreciated on a slight acquaintance, writes Hasseneh Bey, the African explorer.

He is as clever as a horse. If not more so, and in some ways more human. "Patient as a camel," is an Arab saying, and a very true one.

If you ill-treat a camel he will never forget it, but he will not attack you on the spot. He will wait, and if you repeat the offense again and again, he finally makes up his mind to get his revenge. Not, however, when there are many people about. He watches his chance until you and he are alone, and then he goes for you, either by snatching at you with his mouth and throwing you to the ground, or by kicking you and then trampling upon you.

There is a case known where a camel trampled a man and then sat on him, refusing even to move after the rendition of the musical selections was finished. Lafrenier having filed in said court his final administration account and his petition praying for the allowance thereof and for the assignment and distribution of the residue of said estate.

His Ordered, That the 3rd day of June, A.D. 1926, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for examining and allowing said account and hearing said petition;

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing in the Charlevoix Sentinel a newspaper printed and circulated in said County.

SERVETUS A. CORRELL,
3-3t Judge of Probate.

STATE OF MICHIGAN—The Circuit Court for the County of Charlevoix—In Chancery.

Joseph W. Locke, Plaintiff

ERRORS NOTED IN SHAKESPEARE PLAYS

Find Bone Skates Used in Fifth Century B. C.

Prague, Czechoslovakia.—The oldest ice skates in the world, so archeologists assert, have been discovered in a museum here. They date back to the Fifth century B. C. The skates are fashioned from the bones of cattle, the bone being fattened off on one side along its length and perforated at each end to admit leather ankle bands. The natural curve at either end of the bone toward the joints served to keep the foot in place and formed the upward bend of the running edge.

Let Your Baby Howl, Says Child Specialist

London.—"If the baby wants to howl let it howl."

"If baby wants to take risks (of breaking his neck, perhaps) parents must allow it to do so, as a 'safety first' policy is likely to kill the spirit of adventure and weaken the desire for achievement."

So says Doctor Evelyn Saywell, one of London's few women doctors.

Incidentally Doctor Saywell is recognized as one of Britain's leading authorities on child welfare, and there were many striking points in her lecture recently on "The Psychology of Infancy" at a meeting organized by the National Society of Day Nurseries.

In the matchless works of Shakespeare we look instinctively for exactness in time, place and circumstance, but, great poet that he was, he certainly did in several instances misplace the chronological order of events.

In "Julius Caesar" occur the following lines: "Brutus—Please count the clock." Cassius—The clock has stricken three." Brutus and Cassius must, however, have been endowed with prophetic vision, for the striking clock was not introduced into England until more than 800 years after they died.

If "King Lear," while commanding his cook to slow him a certain letter Gloster says: "Come, let's see; if it be nothing I shall not need spectacles." Now, Lear was king of Britain in the early Anglo-Saxon period of English history, and spectacles were not known in Europe until the end of the Thirteenth or beginning of the Fourteenth century.

Macbeth speaks of "cannon overcharged with double cracks, and King John says: "The thunder of my cannon shall be heard." As a matter of fact cannon were first used in 1346, whereas Macbeth was killed in 1054, and John did not begin to reign until 1199.

In the play of "Coriolanus" Titus Lartius, addressing Marcius, is made to say "thou wert a soldier even to Cato's wish." It is a little curious how Marcius could have been a soldier to "Cato's wish," for Marcius, Caius Marcius Coriolanus, was banished from Rome and died more than 200 years before Cato's eyes first saw the light.

AUTOS COLLIDE, TOO MUCH SPEED CAUSE

Monday afternoon a Ford car containing two citizens of Elmira and a young man named Hammond of this city was coming north on Boyne avenue trailing another car when near the intersection of Main street the Ford started to turn west on Main St. About the same time a new Dodge sedan, containing two men was going south on Boyne avenue at from 18 to 35 miles per hour. The Dodge swung to the right to pass in front of the Ford but it was not to be, the Dodge headed into the middle of the Ford and struck her sideways until her tires rolled off, her wind shield broken and one of her passengers was cut up about the face until it was necessary to cover his face with bandages. The Dodge crumbled her front end and sprung an axle. Mr. Peck, the owner, had a wrecking truck come up from Traverse and take the Dodge back for repairs. What was the cause? Why, too much speed of course. Anyway that is what bystanders said.—Boyne Citizen, May 28th.

GIVES GOLDEN RULE POTATO CULTURE

M.S.C. EXTENSION MAN LISTS Important Points in Profitable Tuber Production

A set of "golden rules" for the potato producer has been issued by H. C. Moore, extension specialist in crops at the M.S.C. In discussing the high price of seed potatoes this spring, Mr. Moore recently warned state farmers to follow the very best cultural methods, and not to expend their acreage in a gamble that the high 1925 potato prices would be repeated this year. The factors essential to profitable potato production, according to More, are as follows:

1 Plant only the best seed available from some reliable, inspected, certified seed.

2 Treat the seed with corrosive sublimate for the control of scab and black scurf.

3 Cut the seed so that the pieces average one and one half to two ounces. Space the hills close in the row to overcome the production of oversized, rough, hollow potatoes. Members of the Michigan 300 Bushel Potato Club plant an average of 19 bushell of seed per acre. They space the seed to 8 inches apart, the distance between hills is from 12 to 18 in.

4 Plant potatoes on fertile, light loamy soils that are well drained and well supplied with humus. If possible, plant on an alfalfa, sweet clover, or clover sod. Avoid planting on poorly drained, heavy soils and old grass lands that may be infested with wire worms and grubs.

5 Plow early and keep the soil cultivated until planting time to conserve moisture and control weeds.

6 Give thorough, shallow cultivation after the plants are up.

7 Spray the vines with Bordeaux mixture and arsenicals to control foliage diseases and insects.

8 Harvest and store the potatoes carefully to prevent bruising.

9 Use extra care in grading the potatoes for market.

Write the Farm Crops Dept. of the M. S.C., East Lansing, for detailed information on better production methods.

RECORDS FOUND IN OLD FAMILY BIBLE

We sometimes let ourselves be amused at our country cousins who cling to the custom of having a large old family Bible enthroned in state on a table in the parlor—furnishing on some unprinted leaves bound between the Old and New Testaments various sundry vital statistics relating to the family to which it belongs, says a writer in the Boston Globe. It is barely possible, I suppose, that one reason some of us don't like that old custom is because many family records might be found the day and month and year of our own nativity. We may not be small enough to wish to lie about our ages—but what is the good of advertising the fact that we are nearing 40 when we look at least 50 years younger?

Perhaps it was some such sentiment as this that put the old-time family Bible definitely out of fashion—as far as its statistic-recording went. And of course in more than one case those pages have been torn from the old Bibles or figures have been erased or altered by some member of the family who resented their truthfulness.

Still it is from those self-same family Bibles that most of our family records have been obtained. Genealogists could tell us how meager would be the facts of many family histories were it not for the records contained between the Old and New Testament in some old family Bible.

In place of the old family Bible, it would be a good idea to get a fireproof lockbox in which to keep various birth certificates, marriage records and any papers relating to your family or personal history that would prove interesting in the future.

PIONEER CITIZEN

OF SAINT JAMES DIES SUDDENLY

Daniel T. Gallagher Passed Away Last Sunday Evening

Mr. Daniel T. Gallagher, a pioneer citizen of St. James, passed away at his home at an early hour last Sunday evening, his death was unexpected and is attributed to heart failure.

Mr.

Scientists Find Village of the Ancient Indians

Archeologists of the Heye foundation, Museum of the American Indian, in New York, have unearthed the ruins of the oldest Pueblo Indian civilization yet found in the Southwest, in the so-called lost city, two miles from St. Thomas, Nev., from the extent of the present excavations it is evident that the city once had a population of perhaps a hundred thousand persons who had reached a state of civilization where they raised corn for food and cultivated and wove cotton garments for raiment. The picture shows the remains of a 56-room house in the lost city.

U.S. Documents Eagerly Sought

Public Purchases 7,770,782 Government Publications in a Year.

Washington—The document division of the government printing office, which, under the superintendent of documents, has charge of the distribution and sale of nearly all government publications, except those allotted to members of congress, last year made sales amounting to $487,-922.03, an increase of $47,037.79 over the preceding year, and $104,351 more than for the fiscal year 1923, according to George H. Carter, United States public printer.

In the fiscal year 1925 the document division sold 7,770,782 copies of various government publications, an increase of 526,041 over the sales for 1924. Most of these publications were ordered by letters, of which 375,071 were received during the year. A large number also were sold over the counter of the government publication office on the ground floor of the Document building.

The increasing sale of government publications is especially noteworthy, says Mr. Carter, in view of the fact that the office has no funds for advertising its products and has to content itself with free distribution by members of congress and other officers of the government.

"The sale of government publications could be greatly increased, believes Mr. Carter, by ending the present wasteful method of free distribution which cuts supply all the demand for and is therefore of benefit only to comparatively few persons. The charge for government publications issued division has to carry a regular stock of fully 50,000,000 copies, including almost every publication issued by the government in the last half century. During the year the superintendent of documents received and stored 55,138,327 copies of the products of the government printing office.

"Not all of the copies printed annually ever reach the public. During the year 2,645,531 obsolete and useless copies, which had been ordered by the departments in former years, had to be disposed of as waste paper. Millions more of government publications will have to be consigned to the scrap heap year after year, if the present excess printing for free distribution continues and no additional space is provided for their storage.

"The superintendent of documents also conducts an extensive information service concerning government publications. Last year his office received and answered 101,852 letters of inquiry and aided several thousand other inquiring persons who visited the office. The fact that the document division possesses a remarkable library of government publications, consisting of 375,000 books, pamphlets and maps, for which there is also a complete reference catalogue, makes it possible to furnish information which could not be obtained as readily and accurately from any other source.

Better Library Service.

"Better service is being rendered the depository libraries than ever before, as indicated by the increasing number of libraries that have found it advantageous to secure congressional designation as depositories of government publications. By the new law allowing depositories to select the items of publications to be furnished by the government, the depository libraries have been relieved of the unbearable burden heretofore imposed in having to receive and store copies of every publication printed by the government.

"Under the selection plan only 59 of the designated depository libraries elected to take copies of all government publications; 230 libraries receive more than 50 per cent of the list, and 173 of the smaller libraries less than 50 per cent, or only the publications of special interest to their patrons. This plan has effected a saving in the printing of thousands of publications, which heretofore the libraries had to discard after a time owing to lack of space or usefulness.

"Another agreeable service to the depository libraries is the immediate delivery of all congressional documents and reports that are of sufficient size to be bound separately. Formerly it was necessary to hold all these publications until after the close of a session of congress so that they could be bound in sets. Many publications of congress were obsolete or useless before they were sent to the libraries. The more prompt delivery was made possible through the co-operation of the joint committee on printing in adopting the new method of distribution as proposed by this office."

Many obstacles are encountered by the document division which are unknown to most mail-order houses, it is pointed out by the superintendent of documents. The question of stock is always an uncertain quantity, he states, since, as a general rule very little information is had on which to base requirements. Publicity from unanticipated sources often exhausts the supply and adds from crowding delays while reprints are made, if the publication was run from type and not plated, refunds have to be made.

Would Facilitate Payments.

"The selection by the government of a legal tender of small amounts along the line of the Canadian postal note would be a great convenience, not only for the public in ordering government publications, but for any one patronizing a mail-order house where small remittances are involved," declares the superintendent in his report to the public printer.

"Although we advertise that postage stamps will not be accepted, last year more than $12,000 worth were received as remittances. If we could not find an outlet for these stamps it would be necessary to return them as unaccountable for the reason that they cannot be converted into cash. Fortunately our foreign business has grown to such an extent that we were able to use all of them. I am convinced that advertising of stamps as unacceptable keeps a great many people from ordering publications.

"The generous policy of the United States government in its free distribution of publications has no doubt served to depreciate their value. Those opposed to a restricted free distribution might be interested in knowing that Great Britain since the war has discontinued even its yearly war limited free distribution, and now all libraries have to purchase their sets.

Better Binding Service.

"The British government, recognizing the value of its publications, in 1887 passed a resolution permitting the reprinting of information contained in a majority of them. The policy is similar to ours, in that we do not allow copyrighting. The two countries also entertain similar views in their method of charging the prime cost to the government, so that the public may purchase at a nominal cost for paper, presswork and binding."

Lonely Husband Seeks Wife Missing 23 Years

Cambridge, Mass.—A lonely man of seventy-five has appealed to newspapers to help him find the wife of his youth, who deserted him 23 years ago.

William B. Fellows married Anna Morton 50 years ago. After three years of happy married life she disappeared. A score of years passed and Mr. Fellows returned home one day to find her there. He asked no explanation for her absence, he says, and they took up life together again.

Three years later, with the same suddenness as at her first departure, he found himself alone once more, with only a brief note saying she would come back in the spring.

That was in the fall of 1903. Several years ago a nephew of Mrs. Fellows told the deserted husband his wife had died in Chicago, but he was never able to verify this, and today he asked newspapers to broadcast his appeal.

Married Illegally

Providence, R. I.—Ninety-five years folks in the state have been illegally married. A law passed in 1789 says persons with a former wife or husband living cannot wed again.

THE PIECE OF CHEESE

By M. and R. M. TERRELL

(©, 1925, Western Newspaper Union.)

MR. HARROWBY eyes grew round with awe and surprise as he gazed fraudulte card on his desk by the ruddy, lean young man lounging at the opposite desk.

"You're Avery Anstyne, Jr.," he stammered.

"Not a word to anyone in the office, understand?" the far-from-pampered-looking young man went on briskly. "Not a word to anyone in town. I'm just plain Anstyne, the new manager of the branch, a cousin of the old man's. I'm here to work anyway, not to for trot. Business is rotten here. Besides I'm sick of New York. I don't want a lot of high-faced society dames trotting out their daughters and doing flapflops for me. Or for the money I'm supposed to get some day."

"Sure, Mr. Anstyne, I understand," agreed Barrows, who didn't understand at all, but felt the tiresst under young Anstyne's bristling words. Fancy being super rich and not wanting anyone to know it. Ah, probably a subtle pose, thought Barrows suddenly. Dealing yourself out at the psychological moment; surely. After you've seen them first.

"Now, about quiet, my private secretary," young Anstyne broke into the Barrows ruminations. "Send in your best, Your smartest girl."

"There's two now. Both efficiency plus. Miss Peach and Miss Cheese," recited Barrows in three puffs.

"Peach! Cheese? See here, Barrows, I'm serious. I'm running a grocery but an office and—"

"I should say Miss Peachley and Miss Cheeseborough," coughed Barrows. "Nicknames, Mr. Anstyne. Just all."

"Call a spade a spade after this," admonished Young Anstyne.

"Yes sir. Both are tiptop typists, I see Peach—Peachley. She's easier on the eyes. Miss Cheeseborough, well, sir, she wouldn't win—"

Young Anstyne was from New York. "Send in the good looking one," he ordered. "Er, Barrows, send 'em both in. Pip Judge myself."

In the outer office Barrows took pretty stately Miss Peachley aside. "Look here, Peach, you're always scheming about marrying a millionaire. I'm going to play Santa Claus for you."

"And take me to lunch, at the best spot, and tell me your salary's been raised and that you and your wife aren't really congenial; aw, Barrows, I've heard that line before and often. You pulled it last week; remember? Lay off. Grab a pen and work it. I'm busy."

"Forget your lines," snapped Barrows. "Anstyne's a new one. He's against liking the goods. . . . You're class, girl, strong. Go—go—go away with it, Peach." His eyes expressively estimated her small crepe gown with its inexpensive fur trimmed shoes of her stockings, the cut of her slippers, the gloss perfection of her coiffure, the smartness of her fashionable vanity case, rouge box and cigarette case.

For contrast Mr. Barrows turned and gave Miss Cheeseborough a split once-over. She was clicking away at her machine and, to the Barrows eye, not to the Barrows ear, unmelodiously. You pulled it last week; remember? Lay off. Grab a pen and work it. I'm busy."

"Forget your lines," snapped Barrows. "Anstyne's a new one. He's against liking the goods. . . . You're class, girl, strong. Go—go—go away with it, Peach." His eyes expressively estimated her small crepe gown with its inexpensive fur trimmed shoes of her stockings, the cut of her slippers, the gloss perfection of her coiffure, the smartness of her fashionable vanity case, rouge box and cigarette case.

For contrast Mr. Barrows turned and gave Miss Cheeseborough a split once-over. She was clicking away at her machine and, to the Barrows eye, not to the Barrows ear, unmelodiously. The two countries also entertain similar views in their method of charging the prime cost to the government, so that the public may purchase at a nominal cost for paper, pressworck and binding."

"Not a word to anyone in the office, understand?" the far-from-pampered-looking young man went on briskly. "Not a word to anyone in town. I'm just plain Anstyne, the new manager of the branch, a cousin of the old man's. I'm here to work anyway, not to for trot. Business is rotten here. Besides I'm sick of New York. I don't want a lot of high-faced society dames trotting out their daughters and doing flapflops for me. Or for the money I'm supposed to get some day."

"Sure, Mr. Anstyne, I understand," agreed Barrows, who didn't understand at all, but felt the tiresst under young Anstyne's bristling words. Fancy being super rich and not wanting anyone to know it. Ah, probably a subtle pose, thought Barrows suddenly. Dealing yourself out at the psychological moment; surely. After you've seen them first.

"Now, about quiet, my private secretary," young Anstyne broke into the Barrows ruminations. "Send in your best. Your smartest girl."

"There's two now. Both efficiency plus. Miss Peach and Miss Cheese," recited Barrows in three puffs.

"Peach! Cheese? See here, Barrows, I'm serious. I'm running a grocery but an office and—"

"I should say Miss Peachley and Miss Cheeseborough," coughed Barrows. "Nicknames, Mr. Anstyne. Just all."

"Call a spade a spade after this," admonished Young Anstyne.

"Yes sir. Both are tiptop typists, I see Peach—Peachley. She's easier on the eyes. Miss Cheeseborough, well, sir, she wouldn't win—"

Young Anstyne was from New York. "Send in the good looking one," he ordered. "Er, Barrows, send 'em both in. Pip Judge myself."

In the outer office Barrows took pretty stately Miss Peachley aside. "Look here, Peach, you're always scheming about marrying a millionaire. I'm going to play Santa Claus for you."

"And take me to lunch, at the best spot, and tell me your salary's been raised and that you and your wife aren't really congenial; aw, Barrows, I've heard that line before and often. You pulled it last week; remember? Lay off. Grab a pen and work it. I'm busy."

"Forget your lines," snapped Barrows. "Anstyne's a new one. He's against liking the goods. . . . You're class, girl, strong. Go—go—go away with it, Peach." For contrast Mr. Barrows turned and gave Miss Cheeseborough a split once-over. She was clicking away at her machine and, to the Barrows eye, not to the Barrows ear, unmelodiously. The two countries also entertain similar views in their method of charging the prime cost to the government, so that the public may purchase at a nominal cost for paper, pressworck and binding."

FOR TRAVEL AND SPORTS; NEW HEADWEAR ATTRACTS

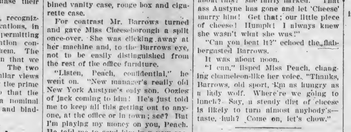
AN ATTRACTIVE company of summer coats, the latest (and last) offerings of the current season, are making their entry. Those new arrivals have a "travel," "pastimes" and "vacation" expressed in their designing as plainly as if they bore placards with the printed words and they include some novel, semiformal types that are unusually interesting.

For midsummer there are unlined cape-coats of light-colored flannels and similar coats of crepe-satin in light colors. A little heavier than these are the sleeveless coats, with capes that wrap about the arms at the front. These are made of lightweight mate-

Two Midseason Coats.

rials and lined with thin silk; polka-dot silks or other printed patterns, used for lining, also serve to make a long scarf to be wrapped about the throat. These may be classed as sunsports styles and are all attractive and practical. But cheerful colors are not confined to pastime coats; they appear, in deeper tones, in tweeds and homespuns, among the usual mixtures and neutral colors. This innovation in color, with shoes of the same, goes that are buttoned about small, high collars, on some models, and hoods attached at the back on others, are outstanding new features in midseason styles.

Tweeds in fancy weaves, sometimes introducing lively colors, appeared in



Some of the New Millinery.

coats and suits early in the season and have been well received. A novel addition of this new type of tweed mixture is shown at the right of the two models illustrated and is a smart garment for travel and general wear. It has emphasizing of sunset-surfaced cloth on the collar, pockets and sleeves. For those who like mannish types the coat at the left is shown. It is a swagger affair, in blue and gray, with red buttons, and is as plain as possible.

The pendulum of fashion which, finally swung to the extreme of simple and unimportant styles in winter millinery started in an opposite direction this spring. It is rapidly

French artist of acknowledged genius for designing. From them we can gather the high-lights of the new modes—the higher crowns, the introduction of wide brims, the combinations of straw braid and millinery braids by the construction of shapes, the revival of flower and feather trimmings. This millinery is pretty to be worn by women of importance.

The group does not include some prominent additional shapes and styles brought out for midsummer. Among these the square-crowned Spanish sailor, with stiffer straight or drooping brim, narrower at the back, seems destined to be a great favorite. Wide-brimmed sailor hats, bullhounts, bangkoks and hair braids are shown

in quantities and in varied shapes, close-fitting shapes are favorites for the street and for traveling and combinations of straw and silk, so early that they can be conveniently carried in a suitcase are to be had for themselves and are called "luggage hats." The two more important developments of the season in millinery are the increased demand for straw hats and straw braids and the ever widening brims. In the latter are millinery fashions are that fashion will go to extremes by the time midsummer arrives.

JULIA BOTTOMLEY.

Evening Capes of White Fur

White curved evening capes are worn by fashionables this season. One no longer feels the cull for ermine or costly furs at evening time. Many of the best families are appearing in white rabbit. Thus carnival is not to be sniffed at.

If You Wear a Hat

Very wide delft blue betting ribbon is used to fashion some of the smartest hats for spring. Helmet shapes, berettas or bolero toques are effectively made of this wide ribbon and cord for trimming. This bright blue goes well with navy or with black, and is sometimes effectively combined with gray.

Black and Brilliants

Black for evening is the latest word from Paris, and black chiffon dance frocks are worn by the smartest women. One frock is covered with glittering brilliants so attached as to give the effect of a pattern. There is no other decoration.

Phrases Long Noted as Tongue Twisters

The British Medical association is revising its list of tongue-twisters used as tests of intoxication. Among items have been suggested such phrases as "British constitution" and "truly rural," which, it has been held, a man cannot properly pronounce unless he is sober. It is not surprising that alumni of that fine school, the Massachusetts Institute of Technology, usually abbreviate the title in conversation to "Tech" or "Boston Tech," for those who first put the name together evidently paid no heed to considerations of euphony or ease of pronunciation.

In the letter part of the Seventeenth century the recitation of the Lord's Prayer was a test of witchcraft in Massachusetts. If you were a witch, the court held, you could not say it properly. A woman was hanged because the judge insisted that she said "hollowed" instead of "hallowed," thereby making the correct name of the Deity null and void.

A writer in the London Athenaum once observed: "He cannot hope to scale the topmost heights of Parnassus who crams his mouth whilst slinging mud at it with a handful of consonants"; and Lowell said of Matthew Arnold's line on Shakespeare:

"Self-schooled, self-scanned, self-honored, self-secure,"

that it "biased like an angry gander." What shall be said of the libretto of an opera, written in pursuance of the ideal of bold, free, English, which gives the public donna this cashing collocention of "certain-sole certitude," or at another point fills the mouth with the phrase, "A pair of stanch English thoroughbreds"? Those things are difficult to say and still harder to sing. What can the librettist have been thinking of when he concocted them? Was he tone-deaf as well as ignorant of lubbi and lingual processes?—New York Herald-Tribune.

Joseph Cartier of Biddeford, Maine, has not missed a Democratic caucus in his ward for 48 years.

Custer's Last Fight

50th Anniversary of Most Famous Indian Battle to be Observed This Year

By ELMO SCOTT WATSON

THIS year marks the fiftieth anniversary of the best known, most talked about and most written-about Indian battle in all American history. Officially it is known as the battle of the Little Big Horn river, Montana, but the picturesque figure of Gen. George Armstrong Custer, whose dashing career as a cavalry leader in the Civil war and as a successful Indian fighter on the western plains, has so caught the popular fancy and so dominates this engagement that it probably will never be known generally by any other name than Custer's Last Fight, or Custer's Last Rally or more commonly (albeit inaccurately) the Custer Massacre.

Plans for the semi-centennial celebration of this famous engagement are under the direction of the National Custer Memorial association, organized last year in Montana but including in its membership a score of persons nationally known who are prominent in the work of patriotic societies and perpetuation of historical spots. One of them is Gen. E. S. Godfrey, U. S. A., retired, who was a lieutenant in Custer's regiment, the Seventh cavalry, on that fateful day fifty years ago.

The chairman calls for participation in the celebration by the present personnel of the Seventh cavalry, now stationed at Fort Bliss, Texas, and Sioux and Cheyenne Indians, descendants of the savage warriors who overwhelmed Custer's men on the Little Big Horn. The United States government is co-operating, $30,000 having been appropriated by congress recently for the transportation of the survivors and for the celebration. Congress has also passed a bill authorizing the secretary of the interior to acquire a tract of land of 100 acres on the site of the fight between the Indians and the detachments commanded by Major Reno and Captain Benteen, which was a part of the Custer battle, and to erect on it a suitable memorial to the participants, the dedication of which will be a part of the part of the responsibility for the disaster upon the "cowardice" of Major Reno failing to the support of Custer. E. A. Brininstool, a historian who has made a special study of this campaign and who has published a book entitled "Troopers with Custer," does not agree with this opinion. Custer, he says, was "the goat" in this unfortunate affair in reality was something of a hero.

It has been pretty well established that he was not with his whole command when the last stand on the bat ren hillside over which the red wave of destruction swept to blot out five companies of the Seventh. The only genuine "survivor" of that last desperate struggle was not a human being, but a horse, Comanche, the chestnut sorrel charger ridden by Capt. Myles Keogh of I Troop of the Seventh. Comanche was found after the battle, wounded in seven places but with tender care his life was saved and he lived to an honored old age.

Despite indisputable evidence that there was only one survivor, a horse, and one human being who had a faint claim to being a survivor —Curley, the Crow—during the last half century there have come to light innumerable "survivors" whose claims have been easily exploded by competent authorities but who have succeeded in deceiving many persons not familiar with the Custer battle. In the same manner innumerable "Custer secrets" have gained wide publicity. They lish up at such regular intervals that the beginning the 'Last of Custer Scouts Dies" has become a commonplace. Evidently there is no literary or other civilian employee of the army, who ever lost any remote connection with Custer's command, some time before he dies gets the lies—or his friends get it for him—that he was a "Custer scout" and either he enjoys or permits a brief moment of fame. If all of the men who have claimed to be with Custer actually had been with Custer on the Little Big Horn on June 25, 1876, it is difficult to see how ten times the number of Indians who were there could have been able to have wiped out Custer's command!

One of the favorite pieces of fiction about the Little Big Horn battle is that the Indians were led by Sitting Bull and that Rain-in-the-Face personally killed Custer. While it has never been definitely established just how prominent a part Sitting Bull had in the battle (some authorities say he was not even in the fighting) it has been fully proved that the leaders who were principally responsible for murders of the Indians on that day were Chief Gall of the Hunkpapa Sioux, Chief Crazy Horse of the Oglala Sioux and Chief Two Moons of the Cheyennes. As to Rain-in-the-Face's claim to distinction—it is true that there was a feud between him and Capt. Tom Custer, brother of the general, and that he had threatened to cut out Tom Custer's heart. It is also true that Tom Custer's body was found after the battle thus mutilated and, although Rain-in-the-Face is accused of having done this, in the general scheme of his life he denied it. His denial was made to a man of his own race, Dr. Charles A. Eastman, and under all the circumstances it is reasonable to believe that he told Doctor Eastman the truth.

Within the last year there has been much dispute over the arms which Custer and his men carried into the battle. Many artists who have painted pictures of the Custer battle have shown the soldiers using swords, when as a matter of fact there was not a saber in the entire command. The men of the Seventh were armed only with ancient single shot Springfield carbines and Colt revolvers and it was partly because of the ineffective single shot carbines that Custer's command perished.

Another favorite piece of misinformation has been the question of whether or not there were any survivors of the Custer battle. The center of the controversy over this point for many years was the Crow Indian scout, Curley, whose claim to the title of "survivor" depends entirely upon an interpretation of what that term means. Curley was with Custer after the general had separated his command and was with him when he first came into contact with the Indians. Just when he left Custer—at the order of the commander, by the way—is not known definitely, but it has been pretty well established that he was not with him when Custer made his last stand on the bar

HOME TOWN BOOST

Quite often we get good sound advice to the effect that we ought so far as possible to buy goods made in America. It is the theory of the protective tariff advocates that when American goods are bought and consumed the money goes to keeping the American workers employed and American capital active.

And if it is true, and it undoubtedly is, that we ought to favor American goods whenever possible, it is also true that we ought to in the same measure favor the goods which are manufactured and sold in our home community. For just as we are in favor of building up American industries as a whole, we should strive for the progress and prosperity of the town or city in which we live. It is a good rule, therefore, to patronize the business men of our own community and to purchase so far as possible goods manufactured and in the home community.

A great many American cities feature this home consumption campaign. They ask the people to buy from local merchants, and they ask the merchants to push, so far as possible, the goods manufactured at home. And communities which feature this patriotic rule are always numbered among the most progressive in the whole country. Their business slumps are few and far between and they are often prosperous and progressive when communities with less civic consciousness are floundering in the slough of depression. After all, it is the community in which we live that shapes our character and the character of our children. If the community is clean progressive, with a fine sense of civic pride, and with good local institutions, we are apt to be happy and progressive ourselves. And to form such a community we must keep the civic consciousness alive, and so far as possible keep our money at home for local development.

—Now that the Norge has come safely back to land, we are sorry that we didn't have the opportunity to make the trip.

THE DIFFERENCE

A European student of world economic affairs, after a trip to the United States, has said that the chief difference between the average American and the average European worker is that the American has no illusions about the social revolution as a remedy for social and economic ills, and sees a better way out of the difficulties than by an appeal to arms.

The reason this is true is that there is no class consciousness in America such as is to be found in Europe. The American laborer knows that he has the same rights and privileges as any other American and he realizes that in the next generation his son may be a captain of industry rather than a private in the rear rank. He feels that he is, above all, an American and he is able to visualize both sides of the problem. Being able to do this, he knows that there is a better way up the ladder than by revolution. And he is steadily finding his way up the ladder, too. If he is industrious and thrifty, he knows that he can have a home of his own and the comforts which go with American home life, and he is getting them in increasing numbers each year as he goes after them.

There are some so-called economists of the old school who decry this situation and wonder who is going to do the rough work if we all keep going up the ladder. But the progressive American knows that science will meet this problem as it has all others of a practical kind. That is why the ruling spirit of America today is, "come on, let's go."

—We don't know who is going to claim the zone around the North Pole, but we know who will finally get it, and his name is John Bull.

CARE OF CHILDREN

Somebody is always discovering the contrast between the excellent care we take of our livestock and the neglect to which our children are subjected. Man's inhumnnity to children compared to the tenderness toward hogs makes countless welfare workers mourn.

And well it may. When we think of all the thousands of little pigs tucked in between freshly ironed sheets every night by fond farmers while little children are left to root out a soft spot in the earth to lie upon, it almost makes us weep too. And the mothers—you can fairly see them standing over the hot stove preparing appetizing ham and eggs, hot cakes, pies and doughnuts and cookies for the little calves and colts, while their own offspring are turned out to gnaw the green from the surrounding fences as best they can do it passes comprehension, but they must. You can prove it by any uplifter who makes a specialty of children.

What the situation calls for undoubtedly is a corps of government inspectors who will go about telling people how to care for their young ones. Then probably we shall reach the millennium where it will be the hogs and cattle who are subjected to the torture of reading, writing, arithmetic, spelling and geography, while the little children are stuffed with corn and hustled off to the packing houses when they are ripe and the market is right. And when our horse breaks his leg we'll send him to a hospital, but if the same thing happens to the baby, we'll shoot the darling.—Omaha World-Herald

—We have to buy our characters on the installment plan, a beginning down and a little something added unendingly all the rest of our lives. And it has been the unhappy lot of most of us to realize now and again that we are getting way back in our payments.—Arkansas Gatette.

Selling Indiana corn through the marketing of Hoosier grown hogs is the best way out just now for Indiana farmers. There is a surplus of corn in Boone county and every other corn center of the state. But there also is a strong demand for hogs on all the large markets.

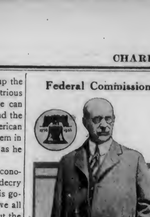
There is every reason to believe that the hog market will remain firm throughout the spring and summer months. It is generally agreed that ten bushels of corn are required to make 100 pounds of gain in the average Indiana hog. With corn at even seventy cents a bushel (and it can be bought at less than that just now) and light hogs at $12.00 a hundred, the farmer who markets his corn through hogs will receive at least $1.20 a bushel for his corn.

Here is one measure of farm relief that can be had at once without waiting for or even soliciting Congressional approval or financing.—Lebanon Reporter.

Conclusive

"My client is not mentally normal, The fact that he murdered his wife is partly a proof of that, but the fact that he married again is conclusive."—Overhartlett, Berlin.

Federal Commissioner



Rear Admiral H. O. Stickney, retired, who has been appointed by Secretaries Hoover and Kellogg as Federal Commissioner to the Sesqui-Centennial International Exposition commemorating the 150th anniversary of American Independence and which will be held in Philadelphia from June 1 to December 1. Admiral Stickney will be in full charge of the United States Government exhibit, which will be the largest of its type ever made.

COMMENT.

—Smith and McAdoo are said to be in favor of abolishing the two-thirds rule in the Democratic convention. But what they ought to do is not to find some easier way of nominating Democrats, but of electing them.

—Count Skrzyneski has been invited to be the new foreign minister of Poland. We don't know anything about the good count except that you have to have hay fever to be able to pronounce his name.

—Somebody maintains that New England farmers are not so sagacious as they were once, and, to tell the truth, they haven't the hostrading now to keep their minds up to grade.—Boston Transcript.

—A Brooklyn judge suggests that the day may come when rights of way in the air may be matters of legal contest. Well, we're willing to give our right away with out any lawsuit.

—Regardless of the general opinion of Mussolini, it must be admitted that he displays great intelligence in confining his dictating to the male sex.—Indianapolis News.

—The new premier of Greece says that his people want want to be neighbors to all the surrounding nations. Now the question is, what kind of neighbors?

—Judging from the reports now coming out of London, that the British strike was one of those affairs where everybody had a good time and went home satisfied.

—The little girl from down the country says she would like to exchange her woman's rights for a seat in the street car.—Memphis Commercial Appeals

—Capt. Amundsen reports that the undiscovered country he traversed was absolutely uninhabited—he didn't even spot a single filling station.

—The Baptists of the South in convention denounced all beauty contests, but it is our private opinion that there ain't no such thing anyhow.

—A British publicist says that only a dad would write a true autobiography. Our own opinion is that he would have to be a hero too.

—Now it is said that London is the pepper center of the world. We had supposed this distinction belonged to Hollywood.

—Wouldn't it be tough to be a schoolboy in Poland and have to learn to spell such names as Pilsudski and Skrzynski?

—It doesn't really make much difference to the outside world what flag Germany adopts as official, just so it isn't red

—Judging from police reports of the latest plot, these German Fascists must have been all dressed up and no place to go

—It's too bad Idaho potatoes are too big to be used as settings for engagement ment rings and stickpins.

—None of the proposed farm relief bills makes any provision for Congressional free seeds.—Boston Globe.

—Now let some American win fame by going forty-four days without gasoline —Baltimore Sun.

Woman's Important Position

Dame Adelaide Anderson, who is accompanying Lord Willingdon and Prof. W. E. Soothill to China as a member of the commission which is to determine how the remaining Boxer indemnity payments due Great Britain are to be expended in China for the betterment of education, is an Australian, but was educated in England and has had a long and varied career as an educator and sociologist. So she was graduated from Girton college, Cambridge, and for many years was connected with the home office as principal woman inspector of factories.

She has held many offices which had to do with the study of child labor. Professor Soothill is professor of Chinese at Oxford and was for many years a missionary in China.

Little Money; Much Work

Trouble is beginning to develop among Shanghai's hundreds of rickshaw coolies. Always living on the slender edge of starvation they see increased hardships in the schedule for hire rates, which are to be raised to 50 cents, Mexican, a day—an increase of 5 cents over the present rate. Although seemingly small this additional 5 cents looms big to the coolies, but it means that the coolie must get another fare each day and run at least another half mile to make up for the day's increase. Coolies rent their vehicles by the day and work day and night. In the native city, Shanghai streets are reported to have raised their schedules to and 15 cents.

Motor Fuel From Sugar

A French girl, daughter of a well-known chemist, has succeeded in making a powerful motor fuel by dissolving 1kg. beet sugar in 1 liter of engine solution, says Floyd W. Parsons in the Saturday Evening Post.

The product is being hailed in France as an epochal discovery, because it is more powerful than gasoline and can be manufactured at a low cost.

The experiments being carried on in Australia to extract alcohol from the prickly pear, of which there are tens of thousands of acres, also hold forth hope for an additional supply of motor fuel.

THE PHILOSOPHER

When he learned that President Coolidge had made a speech on state rights, Harold Quince, our popular young school teacher and candidate on the Democratic nomination for Congress, exclaimed, "He's stealing my stuff."

After he read one of Senator Tom Heflin's speeches the other day, Uncle Billy Gamester remarked: "If Columbus had known what this country was coming to, I don't believe he would ever have discovered it."

Henry Martin says that he is glad Amundsen didn't find any Round Eskimo girls at the North Pole, so that he won't have to look at their bare knees in the Sunday supplements for the next six months.

The new milliner at the Bosson Store got back from Chicago yesterday and when Sam Smith jokingly asked her what was the latest thing in silk hose, she said, "runners."

Nowadays when you see a girl in knee dresses standing on the corner with a bunch of posies in her hand, you can't tell whether it's a little flower girl or a June bride.

A FAIR COLORIST

This young woman ascends a giddy ladder every day to put finishing touches to the "Rainbow City"—the Sesqui-Centennial International Exposition, opening in Philadelphia June 1 and continuing until December 1, to celebrate the 150th anniversary of the Declaration of American Independence. She is one of an army of young artists who are making the Sesqui a colorful success.

THE THEATRE

"The Eagle"

Rudolph Valentino will make his first screen appearance in some time in "The Eagle," a glamorous picture of Russia before the revolution, which will be shown at the Palace theatre June 8th. This is the star's first production since he slightly demself with United Artists Corporation.

Valentino appears in three distinct guises in this fast moving action story, which is also filled with comedy. He is seen first as a Cossack lieutenant, garbed in dashing uniform, then as the mysterious bandit, known as the Eagle because of his swift and marauding movements. While a bandit he masquerades as a French tutor and enters the home of his mortal enemy.

In "The Eagle" the star is supported by Vilma Banky, the beautiful Hungarian actress whom Samuel Goldwyn discovered in Budapest and brought to America, and by Louise Dresser, for many years a stage star, who has recently scored a great success on the screen, following her appearance in "The Goose Woman." Even the minor roles are played by actors of distinction.

"The Eagle" is based on "Dubrovsky," a Russian classic by Alexander Pushkin, "the Shakespeare of Russia." The screen version was prepared by Hans Kraly, who wrote "Passion," "Deception," "Her Sister from Paris" and many other notable successes.

"The Road to Glory"

"The Road to Glory," which opens a one night run at the Palace theatre June 4th is the road that leads to glorious entertainment. With May McAvoy in the leading feminine role, this Fox Films production of Howard Hawks' original story is one of the most dramatic things that has ever been put on the screen.

The story is based upon an unusual theme, showing the big part Chance plays in the moulding of human lives. Judith Allen, played by May McAvoy, is the center figure of the story. She is a happy, contented girl when the picture opens, with an adoring father and a boyhood sweetheart with whom she looks forward to an ideal future.

Then Chance steps in. Her father is killed by Chance. She sits as a witness by Chance, which leads to blindness. From the heights of ecstacy this little girl is drawn to the depths of despair until, her faith in everything lost, she becomes an agnostic.

Judith, concealing her affliction, drives away her sweetheart rather than let herself become a burden upon him. Then she turns to the burning highway—the bright soul-searing lights.

How this beautiful young girl is brought back from despair and near destruction makes for high powered drama and in the end it is the same Chance that saves her.

"Little Annie Rooney"

Standing at the old "Five Points," when that section was notorious as the crime center of New York City, non-descript representatives and members of all the nations and all races could be seen passing by.

On a dingy tenement "set" in the shadow of Hollywood Hills, several thousand miles from the present day "Five Points" of New York, the same nations and the same races were represented in the making of Mary Pickford's new picture, "Little Annie Rooney," a United Artists Corporation release coming next Saturday and Sunday to the Palace theatre.

"Little Annie Rooney" deals with life—life—in the tenement house district of New York's famous lower East Side, with its teeming population, its thousands upon thousands who crowd into that section of the city from all parts of the world. With but just a few exceptions the whole picture was produced in Hollywood at the Pickford-Fairbanks studio, the cast is made up from the hordes of film extras there.

Graduating Gifts, Mottoes, Handkerchiefs, Hosiery, Greeting Cards, Beads, Autograph and Birthday Albums and many other articles at Holley Gift Shop. 5-21

BEAVER ISLAND

Wilbur Martin is home for the summer

Mrs. Margaret McCann is home on a visit.

Mrs. Meda Jensen of Garden Island, is in Charlevoix.

Mrs. James J. Gallagher is in Chicago for a short visit.

James P. Gallagher, wife and family, are here on a visit.

Mr. and Mrs. Dan P. Burgh went to Chicago for a visit.

Glen See, undertaker, was called here Monday, professionally.

Mrs. Dan J Martin returned from Charlevoix on Mondays boat.

Mr. and Mrs. Neal P. Gallagher of Fountain, arrived here Tuesday.

Mr. and Mrs. Harry K. Bundy of Detroit, are at their bungalow for the season

J. J. Tweddle, prosecuting attorney of Grand Traverse Co., is here on business.

Capt. John Chambers, wife and daughter, spent the week end here visiting relatives.

James, Grace, Sarah and Lizzie Gallagher of Chicago, arrived Tuesday to attend the funeral of their father.

Mrs. Chas. P. Gallagher arrived home from Fountain, having been called on account of the death of her nephew.

In Memoriam

In Loving Memory of our "Dear Uncle" Henry Gorsuil who passed away June 5, 1925.

While on earth he did his best,
His heart was truly kind,
His memory will be forever dear
To those he left behind.
His nephew and niece.
Mr. and Mrs. Joseph Gorsuil.

Political Announcement

To Republican Electors:

I am a candidate for nomination to the office of Sheriff for Charlevoix county on the Republican ticket, such nomination to be made at the September primary election and will appreciate your support. Yours,
EUGENE E. STROUD.
6-21.

Notice to 7th and 8th Graders

Many pupils were either sick or in quarantine at the time of the regular seventh and eighth grade examination. A special examination will be held for these pupils on June 14th and 15th. Seventh grade subjects will be given on the 14th, and the eighth grade subjects will be given on the 15th. Only those pupils who were sick, in quarantine, or for other unavoidable reasons were unable to attend the regular examination will be allowed to write the special examination.

Pupils wishing to write this examination should notify the Commissioner of Schools, A. C. Belding, Charlevoix, Michigan. 5-21

CHAS. R. BELLINGER

Rev. B. G. Mattison D. D. is spending a part of this week north of the straits in matters of importance in connection with the Congregational Society.

Albert Cook resumed his position and former duties at the Standard Oil station Tuesday, following an enforced vacation of just twelve months due to a serious illness from which he has but recently recovered.

Mrs. B. G. Mattison, who has been at her girls camp near Crystal Lake, superintending the preparatory work necessary for opening the camp for the season, spent several days at her home in this city this week.

Mrs. I. Z. Merriam and niece, Mrs. Amelia Goffer who spent the winter season in Seattle, Wash. and other west coast cities, returned to this city late last week and will spend the summer months in Charlevoix.

Mr. John W. Keiler, of Paducah, Kentucky, arrived here last Monday and is at his cottage, 407 Michigan avenue for the season. He was accompanied by Dr. Taylor who will spend some days a guest of Mr. Keiler.

Joseph Fitzpatrick, purser on the S. S. Algomah, on the Mackinac Island-Mackinaw City route, and connecting with all trains arriving at Mackinaw City during the summer season, was a Charlevoix visitor yesterday in the interest of his steamship company.

Mr. and Mrs. A. M. Cook spent the week end with Mrs. Cook's parents, Mr. and Mrs. Andrew Ross and other relatives in this city. They returned to their home, Howard City early this week via the automobile route, accompanied by two young girl friends who were guests during the trip.

Mrs. Grace Algulamaji and the Misses Sarah A. and Elizabeth A. Gallagher arrived here from Chicago last Tuesday to spend the summer in their cottage on the Boyne City road, which they recently purchased from Mrs. Ida Jaggi.

Mr. and Mrs. E. C. Rutz, and daughter, Harriett, of Flint, were guests at the Hooker home over the week end.

Miss Mary O'Leary returned to her home, Detroit, last Saturday, following a short visit with friends in this city.

—Mrs. Francis McCafferty spent the latter part of the week with friends in Charlevoix. She came from St. James Thursday.

Mrs. Sherman Wheeler, of Hanford, California, is visiting her brother, Mr. Joseph R. Cooper and other relatives in this vicinity.

Mrs. Nat Burney, of Detroit, spent a few days her with her mother, Mrs. Julia Shier, returning to her home Tuesday morning.

Daniel Roddy was a visitor here last Thursday, coming over from St. James. He was on his way to Chicago on a business trip.

Mrs. Alpon Smith, for several days with her mother, Mrs. Hannah Mooney, at St. James, returned to Charlevoix last Thursday.

Mrs. J. F. Cooper, a former Charlevoix resident arrived here a few days ago from Sidney, N. Y., and will spend the summer in Charlevoix.

Mr. and Mrs. J. A. Noble have transferred their place of residence to Bay View where they will spend the summer attending to business interests.

Mr. and Mrs. D. Boyle came over from St. James a few days ago, visted friends here for a short time and then continued their trip to Chicago.

Miss Dorothea Hooker had an arm broken last Saturday by the falling of a window, the arm being caught between the heavy sash and window sill.

Lawrence H. Chase left for Chicago last Friday where he will spend a short time attending to business matters in connection with his real estate interests

Mr. and Mrs. Leo Powers left for Detroit last Saturday in response to a message informing them of the death of their brother-in-law, Harry D. Lake.

Capt. James H. Gallagher, wife and children, of Boyne City, motored down last Friday afternoon and were guests of Mr. and Mrs. M. J. Bonner for the evening.

Interior decorators are brightening up the offices of the Western Union Telegraph Company this week, all of which adds to the appearance of the building.

Mrs. Frank N. Metcalf and daughter, Suzanne, returned from Central Lake a few days ago and are occupying their cottage at 221 Park avenue for the summer.

Mrs. Emma Crocket arrived here from California a few days ago and will spend the summer season in Charlevoix looking after local business interest and recreation.

Mrs. George Trammel, of Chicago, arrived here early this week and has opened her cottage, No. 21, on the grounds of the Belvedere Club, for the summer months.

Mr. and Mrs. William Campbell motored up from Flint last week, spent the week end and Memorial day with friends here and returned to Flint after Memorial Day service.

Mr. and Mrs. William B. Marshall and daughter, of Lansing, returned to their place of residence early this week after spending the week end with relatives and friends here.

W. C. McConnell, of Grand Rapids, was a business visitor in this city Wednesday.

Members of the W. R. C. will meet with Mrs. Charles E. Bellinger Friday evening, June 4th.

Mr. and Mrs. L. A. Hoyt, of East Jordan, and Mr. and Mrs. George Brown, of Cadillac, were guests over the week end of Mr. and Mrs. A. F. Bridge.

Miss Isabelle W. Mitchell who was called to Detroit last week on account of the death and funeral of her friend, Mrs. Frank Hull, returned to Charlevoix early this week.

Mr. and Mrs. George Hyres motored up from Grand Rapids last week and spent Sunday with Mrs. L. B. Bartlett and Charles Hyres, sister and brother respectively of George.

Mr. and Mrs. Ellsworth Dutton, of Saginaw, returned to Saginaw early this week after spending a short time here with Mrs. Dutton's parents, Chas. R. Bellinger and wife.

The appearance of the Van Allsburg store building, 312 Bridge St. has been treated to a new coat of paint during the past week and now takes on a neat, clean, tidy appearance.

Mr. J. W. Harris, of Oak Park, Ill., spent the week end at the Harris summer home, Ironton, looking after some improvement work. He returned to Oak Park early this week.

Mrs. Charles Gallagher, of St. James, spent a few hours here last Thursday with friends. She was on her way to Fountain, Mich., to attend the funeral of her nephew, Charles Sterling.

John Hull has been laid up for some days and at present is nursing three or four broken ribs, the result of an accident when he fell from a load of hay which he was working at the time of the accident.

Mr. George C. Jackman, former lighter of the government land office at Marquette, but at present with the state department of Labor and Industry has been in this city on official business for a day or two.

The tourists in the city are not many of them yet—but more and more we hear the "honk" of his car, and suggest that he take a little time off on Sunday and visit and worship with the church of his choice when he is at home. He can thus give good cheer and encouragement to his brethren in this northern country. Last Thursday evening two shared the prayer service. We had a good time and good fellowship. We would like to see more share the devotional hour in the middle of a stressful week of business and toil.

Our ladies are today holding their monthly Missionary meeting with a good attendance and interest at the home of Mrs. Charles Carey.

Methodist Church.

C. E. Pollock, Pastor.

There will be a meeting of the official board of the church this Thursday evening at the close of prayer meeting.

A growing attendance at prayer meeting is a matter of joy to the revival. Be sure to be on hand at 7:30 p. m. this evening.

Sunday School is announced for 9:30 a. m. next Sunday morning, according to the action of the Sunday School board. Be on time and stay for the morning worship.

Miss Hermina Creek, Field Secretary of the Woman's Foreign Missionary Society, will be the speaker next Sunday morning at 10:30. She is a graduate of Northwestern University, she did educational work abroad, taught in India under the Indian Educational Code prepared by English educationalists and prepared pupils for Oxford and Cambridge entrance examinations. Miss Creek has traveled extensively in Japan and Korea. She is a good speaker, and has a message of interest to young and old. The public is invited to attend this service.

The pastor will preach at the Indian Mission next Sunday afternoon at 2:30.

Epworth League meets at 6:30 p. m. next Sunday.

Rev. Herman Byma, B. D., —) Pastor (—

Jesus taught his disciples that the field of the church is the whole world, and thus it follows that the true concept of Christian Mission is "my church at work in world fields." This church is rejoicing in the fact that it went "over the top" in meeting its apportionment almost 50 percent the last year. This gives courage to think we can "over the top" in meeting its apportionment this year. This gives courage to think we can share with our great Baptist denomination in its "world wide Mission."

The services next Sunday will consist of preaching in the morning; Bible School at noon; B. Y. P. U. service at 6:30 in the evening. There will be no pre-aching service in the evening on account of the Baccalaureate service at the Congregational church. The week-day service will be as usual.

The tourists in the city are not many of them yet—but more and more we hear the "honk" of his car, and suggest that he take a little time off on Sunday and visit and worship with the church of his choice when he is at home. He can thus give good cheer and encouragement to his brethren in this

Says Bobbed Heads Cause Loss of Hair

New York.—Women who bobbed their hair seven years ago have 50 per cent less hair now than they had then, Frank Parker, hair expert, told several hundred members of the American Master Hair Dressers' association.

The association opened its two-day annual convention at which was hounded the keynote, "Denth to the bob!"

Tight hats worn by women with short hair, duplicating the condition to which common headwear of men is attributed, was the cause of the loss of hair by women, Mr. Parker said. Charles Nessler, president of the association, made the same statement.

"Nature must compensate for this discouragement to hair growing on the head, and it has been predicted that a race of short-haired women will be a race of bearded women," said Mr. Parker. "I think the bob is doomed, however. In 1878 women did the same thing. They cut off their hair and numbered the hair-dressing business. In 1893 they did the same. Both times they got over it. They will now."

Street Names, Like Kins', May Live or Die

Baltimore, Md.—The longevity of the names of city streets is much like the longevity of family names, says a writer.

In song families a name is handed down unchanged from father to son; in others, the name is quietly lost through the marriage of daughters or perhaps died through lack of living descendants.

So with the names of city streets. Some live sturdily on, others disappear frequently or are connected, link by link, with other streets, and the name of the most important of them becomes the name of several sections.

Take Broadway as an example of the changing names of thoroughfares. It was originally called "Point road." In course of time the "Point road" was called "Market" street, the thoroughfare was widened and the 20 blocks of stately avenue became known as Broadway.

Baltimore street has experienced three changes of name and has absorbed other titles.

Three lovtally named alleys—Cider alley, Whisky alley and Bottle alley—adorn the map of 1801. Whisky alley has lost its identity, doubtless through interference of prohibition laws, but Cider and Bottle alleys still gaily hold their own.

All Is Vanity!

"Vanity of vanities, saith the preacher, vanity of vanities; all is vanity."

Morris Fishbein, editor of the Journal of the American Medical association, agrees with the preacher.

"America's 'beauty bill,'" he told the Des Moines Federation of Women's Clubs, "is $10,000,000 a year." And he attacked vigorously plastic surgery, cosmetics, "beautilcians" and "cosmetologists" who share in this great vanity fund.

"The doctor finds no merit in rouge or even beauty creams. Venus didn't have any, nor Cleopatra, he said triumphantly.—New Orleans Item-Tribune.

Sun and the Weather

The chief of the weather bureau, Dr. C. F. Marvin, is not one of those who believe that solar variation is of importance in forecasting weather. He thinks variation in the intensity of solar radiation is of small importance to the government meteorologist in prognosticating future climatic conditions. So far, says Doctor Marvin, he and his colleagues in the weather bureau have found little to substantiate the contentions of certain students in the Smithsonian institution to the effect that the fluctuations in weather can be ascribed to the variation of the rays of the sun.—Pathfinder Magazine.

Fearful Effect of Eclipse

Stirred to frenzy of a purely religious character by the sun's eclipse hundreds of thousands of Hindus from Calcutta congregated on the banks of the sacred Ganges river, where they bathed and prayed for protection from the demon believed to be swallowing the sun, which, being too hot to retain, is causing it extreme anguish. The Hindus believe their lives are profoundly affected by this demon unless they bathe in the sacred river. Business and household activities were at a standstill during the eclipse and evening intends were broken and sleep and travel were suspended.

Judges in Russia

Of 2,000 judges on the bench in the Union of Soviet Socialist Republics, 1,446 are peasants and 882 are workingmen, according to data furnished by the people's commissariat of justice. Among 1,000 judges of lesser rank, 627 were peasants and 276 are workmen. Eighty-three per cent are members of the Communist party, candidates for membership, or members of the komsomol (preparatory membership under twenty-four years of age). Presumably the other 700 judges are of the intelligentsia. Only 112 women are in responsible positions—one on the bench—in the judiciary establishment.

Baptist Church

Rev. Herman Byma, D. D., —) Pastor (—

Jesus taught his disciples that the field of the church is the whole world, and thus it follows that the true concept of Christian Mission is "my church at work in world fields." This church is rejoicing in the fact that it went "over the top" in meeting its apportionment almost 50 percent the last year. This gives courage to think we can "over the top" in meeting its apportionment this year. This gives courage to think we can share with our great Baptist denomination in its "world wide Mission."

The services next Sunday will consist of preaching in the morning; Bible School at noon; B. Y. P. U. service at 6:30 in the evening. There will be no pre-aching service in the evening on account of the Baccalaureate service at the Congregational church. The week-day service will be as usual.

Fighting Prairie Dogs

Prairie dogs, when they are allowed to feed their normal lives, always bury their dead by filling up the holes in which death has occurred. The majority of these little denizens of the plains dig in their holes and their habit of sealing the openings with dirt is nature's way of preventing the spread of disease from the dead bodies. Prairie dogs are looked upon as pests by ranchers and homesteaders, for they insist on a clear view of the surrounding plain for their scouts or outlooks and so cut down with their sharp teeth grass, weeds, sagebrush, corn stalks and grain within a radius of several hundred yards of their towns. This precaution is taken so that a roaming coyote or other quiet-footed enemy may be detected in time for the little animals to scuttle down into their houses. Government rangers are now endeavoring to exterminate them by the use of gas and poison.

Hydrophobia Kills Wolves

Hydrophobia is spreading among the wolf packs of Russia, according to an announcement of the Pasteurzsky Institute of Moscow. It may hasten the extermination of the prey ravagers whose number heretofore has been increasing rapidly. Twelve persons from the Moscow Voronejsend district, northeast of Moscow, are in hospitals being treated for hydrophobia. They were in a party which believed that its numbers would provide safety from attack by the wolves and attempted to walk to a neighboring village. One peasant was killed by the wolves and five died from hydrophobia and wounds before they could be transported to Moscow.

Only on Three Stamps

Only three stamps bear the image of the late queen dowager, notwithstanding her long connection with England. In the Newfoundland issue of 1897 the portraits of which included the four generations of the royal family, Queen Alexandria appeared on the three-cent orange, a finely executed stamp. In the coronation issue of the same colony she was portrayed on the green ten-cent stamp. In the Quebec tercentenary issue of 1908 she shares the two-cent carmine stamp with King Edward, but it is the least of her three philatelic portrayals.

Double Birthday Celebrated May 20th

The Misses Leona Smith and Dorothea Hooker entertained at a seven o'clock dinner at the latter's home on May 20th, the occasion being both their birthdays. A delightful four course dinner was served to the senior Senior Class and their sponsor who were their guests for the evening. The house was tastefully decorated throughout with blue and white streamers, those being the Senior Class colors. Flowerards and bouquets of sweet peas with table favors added much to the appearance of the table.

A huge birthday cake with 17 candles made a proper center piece. The guests were then presented with very unique favors consisting of paper umbrellas, horns and colorful balloons, after which Miss Duprey presented in behalf of those present each hostess with a memory book.

The evening was spent in dancing and playing games, which caused much mirth. Miss Freda McMillan captured the first prize and Mr. Carlyle Hansen won the gentleman's first prize.

The guests departed at a very late hour, declaring it the biggest party of the year and wishing their charming hostesses many more such happy occasions.

$1,000 to Invest

For the man with a thousand to invest, I have a very good thing, right now.

For the man with more to invest, I can offer a choice among seven and a half miles of lake frontage, or 25 houses here in town, or a dozen good farms, to say nothing of some fine lots.

Charlevoix real estate will never again be as cheap as it is today.

NEW PALACE THEATRE
Attractions for Coming Week

Friday, June 4th

May McAvoy and Ford Sterling in "The Road to Glory"
A picture of today. A highway of thrills, a trail of romance. A vivid drama of love with a beautiful girl as its victim. Once seeing this play you will remember it. Also a Pathe comedy "His Marriage Wow."

Saturday and Sunday

Mary Pickford in "Little Annie Rooney." The world's sweetheart in the tomboy role of leader of a band of boys in New York's East Side slums never was more sweetly impishly, nor fascinatingly beautiful. As Little Annie Rooney her wonderful eyes of gold are flung free as she romps through a story so splendidly heart compelling that the tears of sympathy are driven away by swift wrinkles of laughter.
Also a comedy, "A Bankrupt Honeymoon."

Tuesday and Wednesday

Rudolph Valentino in "The Eagle." The greatest lover in the greatest love role of his career, where his heart leads him into a mass of conspiracy and intrigue. Daring skill, intrigue and mystery, plus a two that never falters and rattled sensual flowering plants about June 10th. and romance that stirs the senses, mystery that baffles, over all a love theme that sweeps the heart.
Also a Fox News reel. Travel the world with the News Reels; the very best form of travel.

The Water Bearer

BAXTER

By J. ALLAN DUNN

Author of "A MAN TO HIS MATE" "RIMROCK TRAIL"

© By THE Stead & Co. WNU Service.

Synopsis.—Idly fishing Hermosa creek, in California, Caleb Warner, civil engineer, and a New Englander, is witness of the end of a coyote pulled down by two wolfhounds, urged on by a girl rider. Admitting the hounds, he introduces himself and learns her name is Clinton. With wonderful hospitality she invites him to the ranch of her father, Colonel Clinton. Some Warner learns his new friend's name is Betty. He is welcomed by her father, Southern Civil war veteran and owner of Hermosa valley. Warner tells them something of his ambitions and his feeling that he is destined to be a "Waterbearer."

CHAPTER II—Continued

"Thees knife is for all the enemy of El Nido." He patted the hilt of the weapon with a nod of complacency and a keen look at Caleb, who was wonderingly amused. Was the man half crazed? Did his crushed brain consider the stranger he had been ordered to escort in a possible menace to El Nido?

"The puma was an enemy?" he asked.

"Si senor. Est by there on that bough that overhangs the stream. He ees more. He eat lamb on the turf, below, play in senorita Betty. Her mother he then dead one year, in senorita she is two. Ithos! She-lets charge of Maria an' she. Thees Maria, has lik her by one long reebbon to the trunk so she shall play weeth her flowers an' not fall een the creek. May the Mother of God forgeev Maria! An' me also, Luis Padilla?: Senor, I am in love with Maria, we are to wed. I hav' leave my work. I hav' follow down the canyon to talk weeth Maria! We has' a leetle quarrel, jus' to make up. She rim a leetle way from me. I fol-low. It, the wood we make up. Si. An' we forget the senoritas."

"Thhe! Of a sudden Maria scream-an' point. There is the puma on the bough. Het crouch to spreeng. The beest she look up an' laugh at the great cat. An' I make to leap. Then I am young an' very quick, senor. Sanctissima Maria, eet is my bueno, eet is ver' good that I am!"

Now Padilla was rolling a cigarette with a murmured, "eef you persuit, senor." Riffing out of the water up to the little plateau where the thing had happened with a face as suddenly void of emotion as if a light had been switched off behind a shade, Interest only upon inhaling the smoke of his cigarette, seated with one leg across the saddle horn. Caleb and the Don had followed him. The last puff taken, Padilla flung away the wisp of the cigarette end into the stream with a savage gesture and slid to the ground. Again he was in his role, now giving pantomime to all his words in conjuring up the happening.

"Set he by the mercy of the Good God that Maria the the child, senor. I could not reach the leetle senorita in time but I reach that reebbon an' match her back—so! Jus' as that puma spreeng. I see beam above me, all spread. He blot out the sun an', as I snatch back the baby, he yell, like El Diablo himself. His eyes shine, his teeth, I see his red mouth, I smell the steenk of his breath, I try to dodge as he strike an' I too strike, weeth my knife. He come on me like the fall of the cleef. We roll over like two beast, Senor, I cannot tell jus' what happen. Eet is not the one who fight who can tell the story. Maria, she did not see. She hol' the baby in her arm, an' she see only the end.

"But I know I am all blood, my blood an' the blood of that thee, hot. The smell of eet make us both mad. I theenk he flas empty my belly. Ithos, he daw me like thees!" And Padilla raked himself down his shrunken side with suggestive fingers. He stuck up face one time when I dodge. One time I am down an eet is growin' all dark. He take up arm like a dog take a bone, Senor, I hear those teeth on my bone. Ah! I stab, I steek, I cut! We roll into the creek. Me, I theenk I am almost gone that time, but the water bring me back. Eef flow from me red with my blood. But eet flow red from the puma also.' Senor, he is dead—mueerto!

"When I get better I find the vaqueros who breeng me back to El Nido take also the body of that lion. They her for me that skin. Senor eet is not much good, that skin. My knife has spoil' eet. But there is enough to make two little rug'. One for Maria, one for me. Those rug' each in our two room'—Maria an' mine—beneath the cruzifix. When we pray we kneel on those rug' an' we never forget our oath."

Again the fire of his speech subsidedly died out and he rolled another cigarette.

"You are not married to Maria?" asked Caleb.

"No, senor. That was seventeen years ago. We wait. Eet was the great fault of Maria, also of me, that we leave in senorita. Senor Clinton did not punish. He gave me praise an' offer me money which I do not take. But we—we punish each the other. We punish that love which make us careless. We take the oath to God and the Mother of God that we watch always over the senorita. Some day perhaps she marry, then Maria an' Luis marry also, eef she is marry the good man who take care of her. But—eef any man try to harm the senorita I Luis Padilla, who keel the puma, I am still strong an' I still hav' this knife?"

Once more he half, drew the steel from the sheath and thrust it back. Then he caught the horn of the saddle with one hand, twisted the fingers of the other in the mane of the mustang, set foot in stirrup and, as the bronc swung in a plunging half-circle, held himself close-pressed to its withers before, with a lithe move, he mode the saddle.

"We mus' go along," he said. "The senor mus' not lose his train."

Those were the last words he spoke until they reached the station a few minutes before the train pulled in. He walked until Caleb mounted the platform, then, with an "Adios, senor," was gone, inserting the curvetting mustang and leading El Don.

Caleb, in the smoker, concluded at last that the Mexican's fidelity, tinged perhaps, by some injury in the fight from which he had never recovered, some slight lesion in his brain from the strain and excitement, had made him a monomaniac concerning the safety of his young mistress. He possessed a jealousy that he shared with Maria. It was an obsession with both of them.

"I'd hate to be the man who had Luis Padilla on his track," he told himself, wondering if the major boulevard resort, The "pouch," it appeared, was a blood stenographer who was a "thoroughbred sport and a whiner." By which Caleb tactfly understood that the young lady had acquiesced in every suggestion of Baxter's without demur. Caleb broke the tale to make his own change of clothes, to shave and take his bath. Baxter ordered luncheon at the club over the telephone, to be ready in half an hour, then scuttled to the garage for his car to be brought round in twenty minutes.

While they waited he rounded on Caleb and demanded a statement of what he had been up to.

Caleb told his story. He saw no reason why he should conceal anything and yet he had some reluctance about his visit at El Nido in detail. He did not fancy that Baxter would see—or would have seen—the place and its people in the same light that he did. His reservations betrayed him, tapping two mighty values, too far away to serve Golden with surety.

Opposite Golden, across the narrow street, where the city meets sea, looms that great mount of Sereno, covered with mansions that extend back of it, up to the northern boundary of the state, a region, half exploited, of great beauty, vast bagging prospects, partly developed, of small, rich valleys.

Leading to the sea, to Sereno, across the bay to the mainland. Golden queens it over an unsurpassed pomerium. On Semaphore hill, where ships were signaled in the earlier days, Caleb left Warner shaved, the apartment of Ted Baxter, on the top floor of an ambitious apartment building.

Caleb, with none too large a capital, would have chosen a less expensive, less pretentious dwelling, but he had come there first as a guest of Baxter and now they divided two bedrooms, a bathroom and a tiny sitting room, at equal expense. In the old Columbian days the two had become fast friends and it had been to a large extent the attraction of opposites. Caleb, studying with enthusiasm, taking his work seriously, Baxter, handsome, irresponsible, generous, blessed with an array of superficial qualities that made him a universal favorite. And with a tendency to dissipation that Caleb fancied—he had somewhat checked.

But that was years ago and he found Baxter fairly embarked upon the pastime of spending all the money he could get hold of in the pursuit of amusement—"getting all the fun he could out of life"—he styled it. Caleb fancied he inherited this facility from his mother, a widow who spent her time at fashionable resorts, West and East, as fashion demanded, who tried to forget her age and who let her son, to a great extent, travel his own path while she followed hers. Mrs. Baxter held the command of the Baxter estate. She made her son a fairly liberal allowance but kept the larger portion for herself. Ultimately, it seemed, it would come to Baxter, if his mother remained unmarried.

The two met perhaps four times a year, all told, for brief sequestrances-ships. The relationship between them seemed unsatisfactory, but Caleb put the time at having her son appear at the fashionable resorts where she was stopping. That was a tacit understanding between them. Doubtless the widow objected to having a twenty-six-year-old child reject himself into her realm of arrested maturity, she had deliberately set back her clock of life. The presence of Ted corrected Time with tact-delicate hand.

Caleb reached the apartment a little after noon and found his friend still in bed. Baxter survived him with a grin that turned into a yawn.

"Nice time for you to be coming home," he challenged. "Where's your New England conscience? Stopping out all night! Give an account of yourself, you reprobate. Never preach to me again. You're degenerating, Cal, my son. Have a gin fizz! I was out to the beach last night. With a peach. With two peaches, in fact, and another cahallero. The party gathers again this evening and I'm flat. What time is it? I think I'll get up. We'll have lunch at the club. Cox is in town. The man I've wanted you to meet. One of the big Siege Guns of the coast."

Baxter regaled Caleb with an account of the trip of the night before and himself, wondering if the major boulevard resort. The "pouch." It appeared, was a blood stenographer who was a "thoroughbred sport and a whiner." By which Caleb tactfly understood that the young lady had acquiesced in every suggestion of Baxter's without demur. Caleb broke the tale to make his own change of clothes, to shave and take his bath. Baxter ordered luncheon at the club over the telephone, to be ready in half an hour, then scuttled to the garage for his car to be brought round in twenty minutes.

While they waited he rounded on Caleb and demanded a statement of what he had been up to.

Caleb told his story. He saw no reason why he should conceal anything and yet he had some reluctance about his visit at El Nido in detail. He did not fancy that Baxter would see—or would have seen—the place and its people in the same light that he did. His reservations betrayed him, tapping two mighty values, too far away to serve Golden with surety.

"You sly fox," he cried. "A beauty with chestnut tresses, riding like a female Valkyr heroine, chasing a coyote—and retailing Caleb Warner! She has you on the hip, Caleb. Romance has blossomed in your sterile Massachusetts soul. Sir Galahad and the Princess of the Hidden Valley! It's a moving picture.

"I've heard of the Clintons," he retorted on. "Seen the girl, too, at the dog show, though I don't remember the chestnut locks. Next time you go a-fishing, my wandering gallant, I go with you."

"Here's your car," said Caleb dryly, looking out of the window.

Baxter gave him a battering look and dropped the subject.

The club known as The Altruists is situated downtown, an institution grown from an early membership of writers and artists, with two big rooms and free-and-easy privileges, to influence and influence.

Of all of good-natured men starting a camaraderie that was new to Caleb's conception of club life. And with Baxter and Baxter was half-fellowwell-met. A dining-room steward sought him out and informed him that lunch would be on the table in ten minutes.

"We'll look around a bit," said Baxter. "And I must get you a card. Later we'll have you up for membership." He led the way to a great room with a gilded ceiling and sunny tables and easy corners between it. The walls were covered with cartoons drawn by the artists of the club, commencing 13. Probably every one who has sincerely studied faith and hope has had considerable satisfaction in arriving at his intelligent conception of what they are. We know that they are here and now, and that we will have no need to understand them hereafter, for then will have passed, as Paul says. But who was ever satisfied that he fully understood love? The only abiding thing is love. Of these three graces abiding to the end of life, indeed a group of men at a round table not far from them.

Padilla's story indicates that he is an unknown quantity to be reckoned with. What sort of factor is Baxter?

(TO BE CONTINUED.)

Famous "Flat Arch" in Church of St. Domingo

One of the objects which attracts the visitor in Panama is the "flat arch" in the ruins of the church of San Domingo. The edifice itself was built by Dominican monks in the palmy days of Spain's power. According to tradition, when the supports were removed from one of the chief archways it tumbled to the ground. Another was built in its place, but it too fell. The experiment was repeated the third time with a similar result.

At last an old monk, who was not supposed to know anything about architecture or engineering, had a dream in which was presented to him a plan for constructing an arch which would stand, relates a writer in Pathfinder Magazine. A structure was built according to the plan thus evolved. The arch was almost flat and made of ordinary brick. Everybody in Panama—with one exception—expected to see this arch fall as the others had done. But the old monk who had conceived it had faith in his dream. When the supports were removed he stood under the arch with folded arms. It did not fall, and it never has fallen, for to this day it stands there amid the ruins of the church in a wonderful state of preservation.

Pigeons Long Popular

For thousands of years pigeons have been favorite birds with the people of many countries and in many climates, and the popularity is as great today, or greater, as in any other period of which history speaks. Rameses III loved pigeons, donated some of the finest for use in the temple of Thebes, and Pliny told in his writings of birds selling for sums that would be about $25 in money of today. He thought that price rather high, but pigeons have sold in this country within the last year for $1,000. Pigeon racing is the popular sport of Belgium.—Ohio State Journal.

"Bore Waves"

A high tidal wave, or succession of two or three, rushing up a narrow estuary or tidal river, as at change of tide is called a bore wave. They occur in places where the tides rise and fall a considerable number of feet, as in the Bay of Fundy and various river in Europe and other parts of the world. As the tide advances the water is suddenly thrown in as it in a mass and then pursues its course up the estuary or river and in opposition to the current, presenting a volume of water moving with great rapidity and resistless force and with a height varying from two to three feet to more than twelve feet. In the case of the Talon-Tangkiang the bore is said to have a rise of twenty feet and to advance with a loud roar at the rate of ten miles an hour.

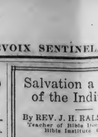
"I should like to see any kind of a man, distinguishable from a gorilla, that some good and even only pretty woman could not shape a husband out of," Holmes' "Professor at the Breakfast Table."

Salvation a Matter of the Individual

By REV. J. H. RALSTON, D.D. Teacher of Bible Doctrine, Moody Bible Institute Chicago.

TEXT—He loved me, and gave himself for me.—Gal. 2:20.

Galatians 2:20 is a great nugget of spiritual gold. There you have Christ,



J. H. Ralston, D. D.

you have the cross, you have Christian life, you have faith, you have the struggle and defeat of the flesh, you have Christ and His work of giving Himself, and you have yourself as the most interesting personality. Let us break off a little bit from that golden nugget of

gold piece of toast is knowledge which is invaluable.

For a convalescing patient who needs to be coaxed to eat, a tempting tray with the prettiest china and the daintiest linen should be used. When the invalid tray cannot be provided, use a large tray and support it on each side with books to hold the weight from the patient, and keep it from tipping.

Gruels are such important foods that it is fitting that proper thought be given to their preparation. Use two to three tablespoonfuls of cereal to a quart of water and cook for at least three hours, strain before serving; this is used in the liquid diet.

Chicken Broth.—A good broth may be prepared from the neck, wing tips and feet of the chicken. Scald the feet, removing the skin. Cover the meat with cold water, adding a stalk of celery for flavor; simmer for two to three hours. Season, strain. Offer no pepper and very little salt is allowed.

Lemon Jelly.—Soak a tablespoonful of gelatin in three tablespoonfuls of water, add three-fourths of a cupful of boiling water, four tablespoonfuls of lemon juice and five tablespoonfuls of sugar. Stir until dissolved. Pour into a wet mold and put on ice to harden. This will make two servings. With the prepared gelatins of different flavor one may, with little labor, have a dish of jelly always ready.

Baked Custard.—Beat lightly two eggs, add a pint of good rich milk, and flavor with nutmeg, adding three to four tablespoonfuls of sugar. Pour into custard cups, set in hot water and bake just long enough to set. Thrust a knife into the center of the cup; if it comes out clean the custard is done.

Summer Salads

Skill in garnishing and arranging colors is as important in salad-making as in arranging bouquets. Bright splashes of red, green or yellow give zest to the appetite

(stuffed, green or ripe), slivered, chopped or in halves. Capers, green peppers, tomatoes, olives, all add to the appearance and flavor of salads.

Lemons sliced in various shapes, sprinkled with minced parsley, makes most attractive garnishing for fish.

Beet and Potato Salad.—Take six beets and six potatoes, one cupful of chopped olives and chives with one minute dressing. Cut the cooked beets into small bits with potato center, also the potatoes. Cover with mayonnaise dressing to which has been added the chives and olives. Dip the beets into vinegar and serve in mounds on lettuce.

Poinsettia Salad.—Take six tomatoes, a stalk of celery, a sweet green pepper, three apples, one-half cupful of nut meats, and one-half cupful of mayonnaise dressing. Scald the tomatoes, chill them and with a sharp knife mark five divisions from the top center over half way to the base. Carefully turn back the skin to form the petals, scoop out the pulp and fill with the apple, celery and nuts. Drop a little extra dressing on each and garnish with a ring of green pepper.

Jellied Egg Salad.—Take one quart of chicken jelly—this may be prepared from half a dozen pairs of chicken feet, or from the bones of a roasted fowl. If the feet are used, scald them, and the skin will peel easily; cover with cold water and simmer in a quart of water until the flesh falls from the bones. Slice the eggs—using six—and stir them gently into the cooling jelly, so they will be evenly distributed. When cold serve on lettuce garnished with mayonnaise and water cress.

Joe's Dressing.—Take one teaspoonful of salt and mustard, two tablespoonfuls of sugar, a dash of cayenne, one whole egg, one and one-half tablespoonfuls of flour, two tablespoonfuls of corn oil, one-half cupful of evaporated milk, one-fourth cupful each of vinegar and water. Mix the dry ingredients and cook all together in a double boiler.

If the farm woman would realize that nine-tenths of her friends' who come from small cities or large, would appreciate a farm dinner of fresh eggs, cream, butter and the vegetables that are so plentiful, fresh and delicious, and not try to prepare some fancy foods, both she and her guests would be happier. Such things as pickles, preserves, jellies and conserves are usually found in the fruit cellar of most housekeepers.

H. L. Mencken was complaining recently about an attack that had been made on one of his essays.

"This kind of criticism," he went on, rather disdainfully, "makes me feel as bad as the farmer's wife.

"A farmer's wife sat with her husband looking at the unlit ads in the back of a magazine. The ads were illustrated with photographs of the loveliest girls. In silk stockings and high-heeled shoes these girls, carrying diaphanous and costly muffs, lounged before mirrors or reclined on vast couches or smoked cigarettes and drank tea with their young husbands.

"The farmer's wife was thrilled. She pointed to a ravishing girl in the most ravishing undies and said:

"'Don't you think them undies would become me, Bill?'

"'Yes,' Bill grunted, 'and so would that stripe.'"

Log Formed "Gas Pipe"

A reminder of the first attempts at "modern conveniences" in Lincoln, Neb., was found when a hollow-log gas pipe laid in 1872 was unearthed recently in excavations for a new building. The pipe was made of an eight-inch log. The walls were two inches thick and had been soaked in pitch. According to gas-company officials, all of the gas mains were made of wood. The pipe unearthed was still in use and in sound condition. It was replaced with iron pipe and has been put in a local museum.

Couldn't See a Reward

On New Year's eve, 1921, George Lacy of Chester, Pa., was robbed by a highwayman of $1,000 hidden in the tiled stove, among other things, a bunch of keys. A short time ago Lacy received a brass check had been attached to the keys, from a Hajdeng Junk dealer, who explained that the brass check had been received in Germany in a consignment of junk from the United States. The junk dealer asked if there was any reward. There was not.

Cuticura Soap for the Complexion. Nothing better than Cuticura Soap daily and Ointment now and then as needed to make the complexion clear, scalp clean and hands soft and white. Add to this the fascinating, fragrant Cuticura Talcum, and you have the Cuticura Toilet Trio.—Advertisement.

Humming Bird's Food

Any humming bird will be pleased to find a gladiolus, as its flowers contain the nitrate insects which the bird craves. Perhaps it would be impolite to be able to tell the little ones that the bird is "paying for honey," but the fact is that it eats insects. According to authorities, the bright color of the "lady" is what attracts the humming bird, the creature knowing, from long experience, that where there is nectar there will be insects, and that when it finds such colors it will discover its favorite food.

Cloth From Human Hair

A section of a large factory located at Amiens, France, is being fitted up for the manufacture of cloth from human hair. The cloth is used for the filtering of honey oil and similar products—the phenomenal strength of the hair enabling it to withstand high pressure. The hair used comes from China and Japan, as the coarser hair of the Occidental is far too thick strong enough for this service.—Compressed Air Magazine.

RESERVE OFFICERS' ASSO. AT BATTLE CREEK JULY 9-10

Detroit, June 2th.—The fifth annual state convention of Michigan Chapter, Reserve Officers' Association of the United States will be held at Battle Creek, Mich., July 9th and 10th. From present indications the convention this year will be the largest ever held in Michigan, and every Reserve officer is urged to attend.

There are many matters to be considered at this year's convention of vital importance to the national defense of this country, and for that reason every Reserve officer in Michigan ought to be present, and participate in the consideration of these important matters.

In addition to the business session of the convention an entertainment program is being arranged by Battle Creek Chapter, Reserve Officers' association of the United States, and Colonel Raymond Shedoud, commanding officer at Camp Custer is arranging to entertain the visiting officers at Camp Custer. The entire 85th Division staff will be on duty at Camp Custer at the time the state convention is held, and the officers will take part in the convention.

Among the noted speakers will be, Colonel James H. Reeves, of the general staff, Washington, D. C.; Brigadier General Charles W. Harsh, Congressman John B. Sosnowski, Major General Guy M. Wilson, Flint, commanding officer of the 32nd Division, and many other men who are influential in affairs of this country. It has been decided by the executive council of the Michigan Chapter to make every Reserve officer who is a member of the association a delegate to this year's convention as the advice and counsel of every citizen holding a commission in the army of the United States is needed.

MINERS FORGOT OLD STORIES OF GHOSTS

Anthracite Workers Joyous Over End of Strike.

Conspicuously absent from the conversation of the anthracite workers who recently returned to work was the old superstitious talk of ghosts and skeletons seen in the mines upon return after suspension of work.

In former years not a strike ended, but that trouble was not experienced at some of the collieries by miners' refusing to go into certain pits in the mines because they alleged they had seen a ghost or had heard some unearthly rumblings. At one of the operations near Ashland, Pa., three miners came rushing up a gangway one hour after they had returned to work at the end of the 1902 strike, and absolutely refused to return to their pit because they had seen the ghost of a mine mule which had been beaten to death at the mouth of the pit by a cruel driver on the day before the suspension went into effect. The three men were given work in another portion of the workings and others sent to the pit where the ghost of the donkey had been seen.

In years gone by such superstitious tales were especially prevalent among the newly arrived foreigners in the mines and they spread rapidly among all the men. In the Lorain Gap district the story of how a youthful miner one afternoon went back to his pit to get a watch which he had forgotten and never returned, was received with the first day of work. The young man never returned to the surface of the earth and a systematic search failed to reveal the body. The compensation department of the state refused to pay compensation in the case.

The men went cautiously into the pits which had marked the grave of the other miners before the suspension started. In the underground caverns, dug out of solid coal, where there is no light except the flickering flame of a carbide lamp, superstition is certain to breed and develop. There are still miners who will swear that they have seen the tortured ghosts of men who died at their work.

Especially are brutal accidents breeders of superstition. In the sections of the mines where a fall of top crushes the life from a miner's body or where a sudden rush of water carries a man down an almost perpendicular slope to his death on the floor of the next lift hundreds of feet below whole gangways can be transferred to other sections in order to prevent the dangers of a growing superstition.

Such superstitious talk, however, was absent on this occasion, for the miners were joyous over the end of the long strike.

Nothing Stops Mail Boat

No stress of weather ever prevents mail boat service from taking off for ships sun from Ironsides ships in New York harbor. Day and night, every day in the year, the staunch little fleet is ready to take off from 1,000 to 14,000 bags of mail. The idea is that the mail can be transferred while the public health inspection of passengers and crew is taking place at quarantine.

The saving in time in expediting the mail is from 24 to 40 hours over the old method of handling on the pier and, in the case of mail for the Far East, the saving is often from eight to ten days. Chutes and nets are in readiness when the incoming vessels drop anchor. When the mail is transferred, word is flashed to the post office and trucks are entrained to handle the mail.—Scientific American.

Law Hits Barnyard King

Friends of Leon Barthou, a well known artist of Paris, who is recovering from a severe illness and who has been unable to sleep at nights recently because of the barking of a neighbor's dogs, wanted to take legal proceedings to stop the annoyance. But M. Barthou informed them that the characteristic noises of all animals are tolerated in Paris except the crowing of the cock. Other birds and animals may make the night hideous with their noises, but chanticleer, proud symbol of the nation's awakening, must not crow. The rigors of the law are reserved for him alone and if he heralds the dawn he does so under pain of death.

Styles in Russia

Owing to Russia's isolation from foreign countries, styles in women's gowns, footwear and hairdress are taking a long time to reach the Moscow stores. So the Russian women and girls, who heretofore depended for the latest fashions upon Paris and London, now are creating their own styles. These styles usually follow the simplest lines. Silks and satins are rarely seen, and picture hats, silk stockings, afternoon frocks and evening dresses are luxuries. Dresses are so plain and devoid of trimmings that there is almost a note of masculinity in them.

Fever Serum Success

"Dochez," the name of the new scarlet fever serum, has been used with outstanding success it is stated at the New Haven hospital, where 72 patients were treated with it and all recovered but one. Dr. Francis G. Blake of Yale university school of medicine was in charge of the cases and the success of it was so marked that the legeum of standards at Washington has authorized its use and a supply will soon be available.

Walks 43,800 Miles to Toll Clock Each Hour

Luray, Va.—Walking 43,800 miles all in the night time—is the record established by H. Monroe Duncan of Luray, for the past 30 years night watchman at the Deford Tanning company of this place. During that time Mr. Duncan has tolled the Deford company's night clock every hour from 8 o'clock in the evening until 6 o'clock the following morning—a total of more than 131,400 times. He has been dubbed "Luray's walking night beacon-ter," often deciding disputes as to the character of the weather at certain hours of the night. J. W. Smith, an egineer at the same place for the past 35 years, has walked approximately 25,640 miles in the discharge of his duties between midnight and noon. Mr. Smith, It is estimated, has blown the concern's whistle a total of 900,000 times, not counting the time he has sounded alarm at outbreaks of fire in the town.

Clams Good Mousers

City residents who are bothered by mice in their household variety of the furry night take a hint from the inhabitants of Cushing, Maine, who have found that the ordinary clam is a mouser superior to either cats or traps.

The discovery was made by Mrs. O. W. Creamer. She kept a basket of clams in her cellar one night, and the next morning "e found three dead mice held firm and fast between the shells of as many clams. She relayed the news to a neighbor, who obtained the same results.

Now all the Cushingites who have been troubled with mice are putting clams on their trail, and the mousetrap business is experiencing the worst slump in years.

Sermon Touched Burglar

A burglar entered an Oakland (Cal.) home and stole a $300 radio outfit. The first thing he tuned in on was a sermon by Dr. Frank M. Silsby on reasons why all transgressors against the moral law, burglars included, should seek the path of righteousness and virtue. After the sermon the burglar tucked the radio under his arm, returned to the home where he had stolen it, again broke in and placed the set on its stand. Then he fixed the ground wire, closed the window after him and disappeared. At least he made all this in a letter received by Doctor Silsby, signed only "Ex-Convict."

Novel Metal Mixture

Metallurgical experts claim to have produced a metal alloy nearly as hard as the diamond. The difference in the scale of hardness is merely one-tenth of a degree.

The alloy consists of a fused mixture of metallic tungsten and tungsten carbides.

Tests have shown that this tungsten alloy, while somewhat softer than a diamond, offers many practical advantages. It is said to have metallic structure and to retain its cutting power much longer than the diamond

GREAT SESQUI STADIUM OPENED AT PHILADELPH

Photo by ARIO Service Corporation.

The giant arena in the centre of the Sesqui-Centennial International Exposition site in Philadelphia was built in approximately 260 working days. It was completed and in use a month before the opening of the big exposition which celebrates the 150th anniversary of the signing of the Declaration of Independence. This photograph, made from the air, shows nearly 3,000 boys on the playing field, massed there for the dedicatory exercises on May 1 which formally opened the structure. In the stands are seated 10,000 persons watching the program. A group of 10,000 persons in a large crowd but they are only a drop in the bucket in the big Philadelphia stadium. The boys paraded onto the field to the accompaniment of fourteen bands and there went through their drills and athletic exercises for the benefit of city officials and parents.

BIG BRAIN OFTEN UNDER SMALL HAT

Size of Head Nothing to Do With Intellect.

A few months ago a brilliant woman died in Washington. When her attorneys opened her will they found she had left her brain to Cornell university for study. Mrs. Helen Hamilton Gardener, famous as a writer, and the first woman United States civil service commissioner, made this strange bequest in the hope of throwing light on the age-old question, "Are women as smart as men?"

In death she proved at least that the brain of one exceptional woman is as big as that of one exceptional man, for her brain was found to weigh 1,350 grams—exactly the same as that of Dr. Burt G. Wilder, distinguished scientist, who for many years was a member of the Cornell faculty.

With further study of Mrs. Gardener's brain help establish the truth of the old belief that all great thinkers have big brains and that a man's mental capacity may be judged by the size of the hat he wears?

Probably not, says Popular Science Monthly. Informed scientists now agree with the saying of Oliver Wendell Holmes that "You can't tell by looking at a man's head what kind of mind is inside it, any more than you can tell by lobking at a safe how much money it contains." So if your hat size is small remember that a large lend may seem large cranial capacity, but not necessarily a large or well-developed brain. And remember, too, that great men's heads, on the average, are no larger than those of the rest of us.

The average American wears a 7¼ hat. How does that compare with the size of his fellow citizens who have achieved fame? Very well indeed. Lincoln, for example, men who have been elected to the Presidency. James A. Garfield wore size 7¾; but Thomas Jefferson wore size 7¼, slightly below the national standard.

Elihu Root, perhaps the most brilliant American statesman of his time, wears 7¾. William G. McAdoo goes him a split size better by wearing 7 7-8. Secretary of the Treasury Andrew Mellon wears size 7⅜.

The same variation is noticeable in the hat sizes of the famous and successful in other fields of endeavor. John L. Sullivan, mighty man of his hands, wore a 7¼ hat. James J. Jeffries, almost as famous a ringman of his day, wears size 7¾. Christy Mathewson, who was baseball's most famous pitcher, wore size 7¼.

Chauncey M. Depew, who has brains enough to have lived well over ninety years and to have enjoyed them all, also wears a 7¼ hat. Robert D. Ingersoll, one of the greatest of orators, wore size 7⅛; but so does Harry K. Thaw.

It is probable that the wide variation in men's mental powers is caused by varying qualities of brain rather than by differences in the size of brains. The Cornell scientists who examined Mrs. Gardener's brain found it to be not only as large, but as well formed as the brain of Doctor Wilder.

Arkansas Deed Gives Land to Jesus Christ

Hardy, Ark.—The most singular instrument ever recorded in Sharp county was filed a few days ago. The instrument is a warranty deed executed by Clarence H. Powell of, Jefferson, Iowa, to the Lord and Savior, Jesus Christ, conveying 160 acres several miles northeast of here.

The deed is regular in every way except that it reads "for and in consideration of the death and penalty all people inherited being hereby acknowledged paid by our Lord, Redeemer and Savior, Jesus Christ, who bought the right to possess and control the earth and all things pertaining thereto, I hereby surrender all claim of right and ownership to the lands herein described."

After giving a description of the lands conveyed, the deed recites: "The Savior secured the right of possession and control of the earth by all proper methods known. First, by purchasing in the creation of all things; second, by inheritance; third, by gift; fourth, by purchase at the cost of His life."

The deed was made on February 12 and acknowledged before J. L. Lindsey, a notary public of Greene county, Iowa, and witnessed by J. R. Watson and W. H. Young.

To "Inspect" Air Routes

Tanotsu Aihara, head of the Japanese civil aviation school, costumes a unique air tour of the world. Being anxious to inspect the latest developments of commercial air traffic abroad, with a view to stimulating developments in Japan, it is his idea to visit most of the European capitals and air centers, traveling from one to another by the regular air services. He hopes to visit Berlin, Paris, Rome, Moscow, Stockholm, Constantinople and other important centers, and when he has flown over all the commercial air routes in Europe he will cross the Atlantic and try to cover the North American continent from New York to San Francisco in similar fashion.

LEGAL NOTICES

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Frederick Tyler and Sophia Tyler, his wife of Marion, unto Mary Zipp of the city of Petoskey, Michigan, dated January 26th 1921, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 28th day of January, 1921, in Liber 48 of mortgages on page 579, on which mortgage there is claimed to be due at date of this notice the sum of One Thousand Three Hundred Fifteen and 06-100 Dollars, including the principal sum due and interest; and no further sum of Four Hundred and Eighty-Five and 17-100 Dollars, being taxes and interest thereon paid by the mortgagee on the land and premises herein described; and Section Eighteen (18) Township Five Dollars as provided for by the said mortgage, and no proceedings at law or equity having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas, the taxes required by the statute to be paid on the recording of this notice,

Now Therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due on said mortgage together with the costs and expenses of the foreclosure, including the attorney fee provided by said mortgage, and also including the taxes paid by the mortgagee, at Public Auction, to the highest bidder therefor, at the front door of the Court house in the city of Charlevoix, in Charlevoix County, Michigan, (that being the place where the circuit court for the County of Charlevoix is held), on Friday, the 25th day of June, 1926, at ten o'clock in the forenoon on that date.

The premises described in said mortgage being the lands and premises situated in the Township of Hayes, county of Charlevoix, state of Michigan, viz: The east one-half of the Southeast quarter of Section Eleven in township Thirty-four, North Range seven west, containing eighty acres of land, more or less, according to the government survey thereof.

Dated March 19th, 1926.

C.H.S. CLASS '26

Class Motto—"Give to the world the best you have and the best will come back to you."

Members of C.H.S. graduates, Class of 1926, thirty-eight consisting of nineteen each, young men and young women were presented with diplomas at commencement exercises held in the Palace theatre last Thursday evening, at which time the theatre was crowded to full capacity by local citizens, friends of the class members.

The program for the exercises as carried out consisted of several musical numbers; a duet-instrumental by Mrs. Marguerite Swinton and Miss Lucile Belding, the latter of the graduating class and a piano selection by Miss Lucile Pollock, also a member of the class. Miss Henrietta Baldwin, salutatorian and Mr. Gilbert Saltonstall, valedictorian reached the part of the program was good splendidly carried out, the rendition of the musical numbers was of a high order, well performed and especially appreciated by those of the audience who are musically inclined, all of whom were delighted with the selections given and perfection in the method and performance of the same.

Miss Baldwin as salutatorian and Mr. Saltonstall, valedictorian reached the degree of superexcellence in their productions, each having their topics well in hand, the delivery and construction of their addresses showing that they had been carefully prepared and that such preparation had been made by careful study and painstaking effort. They are each entitled to high and worthy praise for the manner in which they fulfilled their duties which was an honor to the entire class and fully repaid the class members for their confidence in selecting Miss Baldwin and Mr., Saltonstall for the positions of salutatorian and valedictorian respectively.

An address by Professor Charles N. Barnes of the Northern Michigan State Normal was well received. This address was more or less of a humorous nature, some personal reflections and some of the more sombre side of life, with the attendant joys and disillusions. All in such a manner as to convey to the class members that the duties of life are to be entertained by a smile and that the big things connected therewith are all in the future and that in order to attain the best that the world has to offer was a matter of personal judgment close application to business and a constentious effort for worthy achievements.

The exercises opened with an invocation by Rev. Herman Baron D.D., pastor of the local Baptist society, after which came the regular class program and this was followed by Superintendent of Schools, Lewis Woodworth who delivered the diplomas as they were presented by the class president,

MISS MORGAN

Synopsis.—Lily fishing Hermanos creek, in California, Caleb Warner, city engineer, and a New Englander, is witness of the end of a coupe pulled down by two wolfhounds, urged on by a girl rider. Admiring the hounds, he introduces himself, and learns her name is Clinton. With westcan hospitality she invites him to the ranch to meet her father. At the Clinton home Warner learns his new friend's name is Betty. He is welcomed by her father, Boutwell Clyl war veteran and owner of Hermanos valley. Warner tells them something of his ambitions and his belief that he is destined to be a "Water-Bearer." In the town he meets Baxter Morgan, a supercilious youth with old-fashioned clothes chum, Ted Hinckley, and two old servants, dissipated youth, only child of his widowed mother, who controls the family fortune. At a club luncheon Baxter introduces Caleb to Wilbur Cox, leading business man and president of the water company which supplies the needs of Linden. He gives Cox an inkling of his ambitions, and Cox, impressed, invites him to dinner that night.

CHAPTER IV—Continued

The dinner was served in one of the private dining rooms of the club, known as the Red room. The guests were those of the luncheon, with the addition of young Cox and Caleb. It appeared that they had been in some conference that afternoon and that the dinner marked the end of satisfactory arrangements. The talk was all of mutual interests, Big Business.

It appeared that the afternoon's conference had been called in connection with the threat of other Californian cities to wrest from Golden its supremacy as the metropolis of the Pacific coast. The great fire, following the earthquake, had given them opportunity to creep up in population and general progress. Los Angeles was the most formidable competitor, with Oakville, across the bay from Golden, once only thought of as a suburb of the peninsular city but now, as the actual terminal of transcontinental railroads that ended at deep water, an active rival.

With so small a party Caleb was in easy earshot of the conversation. His interests naturally centered on Wilbur Cox and they quickened at the mention of water supply.

The board of public works will approve the plans for filling the marsh with salt water from the bay in case of any big conflagration," said Cox. "That will not only obviate any respection of disaster through the conduit freezing between here and the reservoirs, as they did in the quake, but will prove a saving."

Jack Cox turned back to Caleb.

"The governor insists that the vital thing the matter with Golden's growth is the question of adequate supply," he said in an undertone. "Naturally he concentrates on that point."

"Is there a shortage?" asked Caleb. "Likely to be, they tell me. Better quiz the governor if you're interested. He'll pour out information on that subject like a waterspout once he gets started."

Here was food for thought. Water shortage meant water development. It might mean an opportunity.

"The government project will take years to put through," the host was saying. "Meantime we've got to get busy."

"We're leaving that end of it to you, Cox," said Winton. "Conserving water, treating and selling water—at a profit is your business."

"A reasonable profit."

"And a reasonable dividend," capped Winton with a dry smile.

The dinner was not protracted. And it broke up completely. These men seemed all to have definite things to do even at the close of the day. The guests shook hands affably with Caleb.

"An engineer? Intending to locate here? You'll find plenty to do." Such was the consensus of their greetings. The result was heartening. Out here in the West they seemed to accept a man as efficient until he proved himself otherwise, he decided. In the East it was different. A stranger would stay years on approval, almost under suspicion, until he made good.

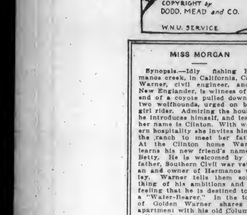
Jack Cox invited him to visit Imperial valley, as his guest, to see what had been done there and Caleb responded in kind to the cordiality and evident earnestness of the solicitation. But he had an idea—Baxter would have called it a hunch—that he would do well to stay in Linden for a while. And cultivate Cox. His Yankee mind suggested that here was a direct opening.

Cox widened it.

"I am in town for a few days," he said. "You must come up to my office for a chat over things. And perhaps you would like to look over the Crystal Springs property? Our head engineer makes regular tours. He goes Tuesday, by the way. I can arrange with him to show you round. We have some dams there that he is justly proud of. The line of earthquake fault ran right through them and—you can see for yourself how they stood it. How about it?"

Caleb accepted eagerly. He had heard of the Crystal Springs dam. Its resistance to the tendrior had been the world talk of engineering.

"I shall be glad to come and see you," he said. "And glad of the chance to see the property. Thank you."



Soon He Was Deep in the History of Golden.

"Good! I shall expect you then, hope you have enjoyed yourself."

Young Cox paired off with his father as the guests dispersed, and Caleb decided to walk home. An attendant gave him an envelope with his coat and hat. It was a card to the club good for six weeks, applied for by Baxter and countersigned by Wilbur Cox. Caleb slipped it into his pocket gratefully. It was late before he returned in. Baxter was still out—playing his "game."

On his mahogany bureau there was ranged a galaxy of youth and beauty, the faces of about a dozen girls—the number varied—whimsically framed.

Baxter styled them the "Gallery of the Three Fs." Past, Present and Possible. "Mr. Mere the past is gunmetal," he said, "symbolic of spent ammunition. The present partners in the game, snubs at you from silver, indifferive of fortune. At a club luncheon Baxter introduced Caleb to Wilbur Cox, leading business man and president of the water company which supplies the needs of Linden. He gives Cox an inkling of his ambitions, and Cox, impressed, invites him to dinner that night.

He had breakfast alone in the apartment house dining room. It was Sunday. He thought of visiting El Nido but old custom precluded the idea of a Lord's day social call. He wondered if the public library would be open, thinking that he would like to read up the water history of Golden, of Oakville and Los Angeles, and then he remembered the card in his pocket. The club library should prove adequate. The Altruists was a literary as well as an artistic institution. So he walked down town, to find the place almost deserted. Everyone in Golden, it seemed, made the most of holidays out-of-doors.

There was no one in the library with its easy chairs and big tables, its desks and deep lounge in front of a mammoth fireplace. The walls were lined high with books, well arranged, so that it was little trouble to find what he wanted. Soon he was deep in the History of Golden; with a big map of the Bay region close beside him.

He went to bed early. Sometime in the night Baxter came home. Caleb found him sleeping the next morning, his head tucked on a forearm, handsome but jaded, settled until noon. Caleb waited until Cox should have had time to answer his mail and then presented himself at the offices of the Crystal Springs corporation. Cox's greeting was cordial.

"Do you mind waiting a few moments?" he asked. He pressed a desk button and a shrewd-appearing young man entered whom Caleb rated as Cox's secretary.

"Send me a stenographer, Henry, will you?" asked Cox. "I have given you all you can handle and I want to get out some instructions on that cement matter. The stuff is far from standard or contract quality."

The stenographer entered, a girl, quiet, dressed in a dark business suit, deftly taking the dictation given her by Cox in a low, unhesitating voice, Caleb, looking over an engineering journal, hardly noticed her.

"Take this letter," said Cox, then turned to Caleb, as the girl changed a page in her notebook. "I find that Hinckley, our engineer in chief, is not coming in this morning. He will be at Crystal Springs tomorrow, so I am going to give you a letter to him. A car will be here for you in the morning at eight-thirty. If that suits you, I am sorry I cannot give the time to go with you myself."

It was said graciously, with a certain air of assurance that Cox would actually have gone with Caleb if he could have spared the day.

"Now, Miss Morgan," said Cox. "To E. H. Hinckley, introducing Mr. Caleb Warner."

The girl's poised pencil wavered for a second, while her face lifted and her eyes gazed wide at Caleb, then it dipped and automatically inscribed stenographic characters. They were blue eyes and the face one he had seen before. Where? The dress was more demure, the broad hair less fancifully arranged, but there was no mistaking the features, the general expression, startled from-business calm to personal interest.

Miss Morgan was Baxter's "peach," the girl whose photograph now occupied one of the silver frames on Baxter's bureau. Baxter was home, asleep, the girl was on duty. There were shadows under her eyes but there was a flush in her cheeks as she stared at Caleb with an interrogation that was almost a challenge, before she bent to her work as Cox went on with the letter.

Caleb imagined what she was wondering. He had been mentioned to her by name by Baxter. She was trying to guess whether Baxter had done the same by her, whether Caleb had seen her photograph, what chance had brought him to the private office and her into it on the same occasion?

Caleb's face showed nothing and, when the letter was ended, he was again reading the Journal. Nor did he look up when the girl left at Cox's what is all. Miss Morgan." He did not wish to embarrass the girl. What she did in her own time was, if it did not prove detrimental to her duties, her own affair—most certainly not his.

She did not return. A few minutes later the secretary came quietly in with the letter of introduction which Cox read, signed, slid into its unsealed envelope and passed to Caleb.

Miss Morgan is evidently Baxter's "peach." A smart girl with a grievance?

(TO BE CONTINUED.)

Idea of Inferiority Not at All Uncommon

The feeling of inferiority in an experience so nearly universal that it cannot be considered abnormal or evidence of disease, declares a writer in Hygeia Magazine. Most of us have had this feeling at some time in our lives, such as when making a speech, undertaking a new job, or taking a prominent part in some social function. The stammering, trembling, palpitation and emptiness of mind which comes at being called on to face a new situation are familiar to all of us.

However, by establishing habits of courage and self-reliance and by learning to attend to the matter in hand rather than to our feelings, most of us have been able to overcome these difficulties. The feelings of inability to meet the situation are not faced frankly and overcome, one establishes a habit of fear. Then the sense of failure and the feelings of inferiority become habitual, and one's lot will be indeed unhappy.

No More Rejection Slips

At last I have discovered the secret. After all these years of heart-breaking, back-breaking, almost fruitless toil to hind my manuscripts in print I see ahead the road to success. I have discovered a method of eliminating the rejection slip.

I do not assume all the credit myself. I cannot truthfully say that I am entirely a self-made man. Many are the conscientious editors whose wise words have pointed out the way. Yet it has been my ready comprehension of basic truths, my ability to read between lines, that has brought it all about, and I modestly take myself for all I am worth.

For, at last I have discovered the secret, the true method of eliminating the rejection slip. I am going to stop writing.—Kansas City Times.

Doctor Was Right

"Buy a car," said the doctor, "and get out more. You ought to take off pounds."

Speaking of the results obtained by this prescription, the patient says:

"I got a car and got out more. I got out six times between London and Coventry and took off flesh in four different places. Once I got out through the windshield. That seemed to take off the most flesh."—London Tit-Bits.

NERVE, AND NOTHING ELSE BUT

By M. and R. M. TERRELL

(©, 1926, Western Newspaper Union.)

JULIUS LICHTENSTEIN was reputed the wealthiest and shrewdest merchant in Thunder Falls. If Julius had had a mouth-piece to match it would have been that the end justified the means, said our town's always more money. No greased pig ever avoided the hands of a purser more easily nor with more subtle turns and twists, than did Julius avoid being caught by the law, for the very good reason that he usually stayed inside the legal fences.

And he intended that his daughter Miriam should follow in her father's footsteps by marrying money. Therefore, when he saw her out riding with handsome young Sammy Lomberg he came down on her like the proverbial ton of irish confetti.

"What for you waste your time with that young good-for-nothing?" he demanded.

"I like Sam," said Miriam, who might truthfully have used a stronger verb. "He's just the kind of young man you ought to like, papa. He's such a good business man."

"Huh?" shrilled out Lichtenstein.

"Well, he has such splendid qualities," she insisted.

"Huh! Splendid nerve, you mean!" growled her father. "What's he worth? Nothing at all. Little, out-of-the-way store up over a big empty warehouse."

"He's only just starting out," defended Miriam, her soft black eyes sparkling.

"Oy! Nerve, that all he's got! Nothing else but! Don't you let me catch him comin' down our front steps again, you hear me?"

Miriam said nothing, but her eyes sparkled more than ever.

Julius watched, but he did not see his daughter and Sammy again, which does not, however, mean that he saw her goings and comings.

"Just as I thought," muttered Julius to himself. "Gevalt! Sam is a fool. No come-back, no courage. Spineless! I would like to have seen the man that could have got me from Miriam's mother when I was a young man, and I didn't have no more to my name than the big yong mish." Whereupon Julius began to think of young Sam for a purpose which required untidity and humbleness. He could think of no one else whom he could trust.

In short, Julius was planning one of those coups which had netted him a big lump sum. He was building a big new store and it was his principle to never expend a large sum of money—of his own. He was a wily old fox at dodging the low hounds, the traps and pitfalls of law, he neglected to note that familiarity breeds contempt, and, consequently, the law is a dangerous thing.

Julius went to New York with his wife and daughter and bought large supplies for the new store, everything of the best and newest. The goods duly arrived in Thunder Falls and were stored in the capacious basement of Lichtenstein's old warehouse. Julius promptly called up his insurance people, explained his doubled stock and risk and took out added insurance.

The following day young Sam Lomberg was invited to see old Julius, like a merchant king, entering his humble door. He was very affable to the young man and even invited him to lunch.

Several lunches ensued and young Lomberg was highly flattered. After a few weeks of shrewd hints and questions Lichtenstein finally exposed his purpose. He wanted the use of Sam's huge empty basement for a short time for a strictly private transaction. Young Lomberg agreed, after bargaining shrewdly for a stipend proportionate to the secrecy. Julius groaned, but he was forced to agree. Sam was no other lassoomed so large, nor one so conveniently situated in an out-of-the-way part of town, among shabby back streets filled with warehouses and storage plants that at night were in the suburbs. And Sam, poor, spineless, shabby, with his forlorn little store, was just the person to use. Sam would never dare to offend the mighty Lichtenstein by blabbing of what went on. In spite of his brash manner, previous to the finishing of the new store over on Commerce street, Besides, he was well paid. No one would ever suspect.

Sam was right in his thereafter. In the safe hours post midnight, trucks piled high with goods left Lichtenstein's old emporium and Sam's basement, and very nearly all of the new stock was transferred there.

A week later, on a stormy night when no one could see a terrific fire practically destroyed the old emporium.

Julius, called from his bed, was a sight to bring tears to the eyes—a

Odd Things Left in London "Tube" Trains

Many strange things are lost and found in trains, and from a statement recently issued by the Underground Railway company of London the underground trains are just like others in this respect. Indeed, in view of the fact that the majority of underground passengers carry no luggage, the number of articles dealt with by the lost property office during the last twelve months is surprising. The total was 41,078, of which 25 per cent were restored to their owners.

A stethoscope and a stuffed wolf were two of the articles lost, while a basketful of cigars—over a year old—is still awaiting a claimant. A performing rat was caught on one of the tube trains and restored to its owner, while a number of white mice were "mislaid" on one occasion. Other live stock found included a cat, which became three cats while in the lost property office. One of the three is still there, keeping an eye on the mice.

Of shoes, human bones and skulls, a set of false teeth, a woman's new hat, and a bottle of champagne were other finds. And one pair of crutches were lost and restored to their owner three hours after the loss.

Bed Used in All Ages

The bed is the oldest article of furniture we have. The Egyptians had high bedsteads on which they ascended by steps, and the Assyrians, Medes and Persians followed the same custom. The Greek bed was a wooden frame with a board at the head. The Romans first began the use of metal beds, using bronze to make them.

The Spider's Harbor

A species of spider inhabiting the shores of the Pacific may be found at low tide crawling around on the rock and coral reefs, but when the tide rises you search for them in vain. Each spider, when the tide starts to come in, takes refuge in a crevice and spins over her retreat a sheet of silk, impervious to water.

LOOT!

The Pirate of the Gulf

ALTHOUGH he was a native of France, Jean Laffite is regarded as a strictly American pirate, and down along the coast of the Gulf of Mexico there is some element of pride in that claim. In the state capitol at Baton Rouge, La., hangs a large oil painting of Andrew Jackson's famous victory at New Orleans, and in the thickest of the fight, directing the work of a battery, is a gigantic figure which is pointed out to the visitor with pride as "Jean Laffite, the pirate."

His was a romantic career, and although there are enough gaps in the record to make him something of a man of mystery, sufficient is known about him to make an interesting and picturesque figure in American history. Natives of Bordeaux, Jean Laffite and his brother, Pierre, came to New Orleans early in the Nineteenth century and followed their trade of blacksmiths. Gradually they drifted into the smuggling trade which was not then looked upon as a very serious crime. This was followed by the even more lucrative trade of slave running, after the importation of slaves into this country was forbidden in 1808, and Laffite soon became the head of a veritable slave rumner trust.

He established headquarters at a town named Barataria on Grand Terre Island off the coast of Louisiana, and from this comes the famous name of Barataria pirates as applied to those who plied their trade in the Gulf of Mexico. In 1813 the Baratarians, before their smuggling and other operations became so notorious, were publicly proclaimed as pirates by the governor of Louisiana, who secured the indictment of Jean Laffite and his brother. They retained the best lawyers in the state and were acquitted.

At about this time Carthagena (now a part of Colombia) and other South American republics were at war with Spain and began commissioning privateers to prey upon Spanish commerce. Laffite had an old grudge against the Spaniards to satisfy, and he gladly accepted such a commission. It was partly on account of his deeds as a privateer that he fell into favor with the governor of Louisiana, although he always declared that he never preyed upon English, French or American shipping, and he proudly claimed that he was an American. He justified his right to call himself this by citing the fact that a commission from the British at the opening of the war of 1812 and offering his services to General Jackson. They were accepted and the pirate leader served gallantly at the battle of New Orleans, as previously noted. Laffite died in Texas shortly after the war until 1823, when a British warship captured a pirate ship with a crew of 80 men. Among those who fell fighting was the famous pirate of the gulf, Jean Laffite.

The Utopian Pirate Republic

NO SOONER had Captain Mission and his lieutenant, Caraccioli, set out under the white flag for the strange career of piracy in history, than they had a chance to put their policy of "piracy without tears" into practice. They captured an English sloop, and after helping themselves to some rum and a few other articles which they needed, they let the unarmed sloop go without further trouble. Then in return the English gave those strange pirates three rousing cheers at parting.

After this, Misson sailed to the coast of Africa where he took a Dutch ship laden with gold dust and slaves. Such an opportunity could not be passed up, so Captain Misson gave his crew a long harangue on the evils of slavery. In fact, that became a regular part of his procedure. His captives were invariably forced to listen to a long-winded sermon before they were released and sent on their way. That did not prevent his making his operations profitable, however, for those gentle pirates always helped themselves to whatever they liked in the cargoes of the ships they stopped. From one English vessel they took the sum of 60,000 pounds sterling.

Misson next sailed to an island in the Indian ocean to make his home. Here he married the sister of the pirate chief, while Caraccioli took for his bride her niece. After several years of piracy from this base, Misson transferred his men to a sheltered bay in Madagascar, where he established a regular socialistic state and named it Libertatia. Everything was held in common and a form of government arranged with Misson as "Lord Conservator." Caracciol became secretary of state, and the famous Captain Tew, an English pirate, who joined Misson was made admiral of the fleet. The council was made up of the ablest of the pirates without discrimination as to race or color.

There for many years this pirate Utopia where any genie-nuiled pirates might have "some Place to call their own" and a Receptacle, when age or Wounds had rendered them incapable of Hardship, where they might enjoy the Fruits of their Labour, and go to their Graves in Peace," flourished. But eventually the hostility of the natives brought trouble down on Libertatia, and Misson and a few surviors were forced to seek safety on board a ship. This vessel foundered in a hurricane and Misson and all of the crew were drowned.

Nature's Anesthetic

Carbon dioxide is the nonpoisonous anesthetic used by nature itself. If you are hurt badly in an accident, your breathing is lessened, and an excess quantity of carbon dioxide in your blood makes you fall asleep.

Ink Eradicator

When your fingers become inkstained wet the end of a match and rub it over the spots, wash your hands in cold water and watch the ink disappear.

Toothache — Rheumatism
Neuralgia — Pain, Pain

Each unbroken "Bayer" package contains proven directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100.

Daily Dose of Iodine as Goiter Preventive

Iodine as a preventive of goiter is no new thing under the sun, according to Dr. Gilbert 4). Harris of Cornell university. In Science, he quotes from the Indian chemist, Nilratan Dhar, who wrote in 1855. In one place the author states that "till now, Iodine is the only specific known for goiter." Elsewhere he continues, regarding certain mineral springs in Colombia, "In the province of Antioquia no other salt is used, save that from these peculiar springs, whose waters I have analyzed and convinced myself that, though the composition of their salts is variable, there is in all an appreciable amount of Iodine. Hence the reason that there is no goiter in Antioquia. Each inhabitant takes every day a dose of Iodine with the salt he consumes." Again: "It is a singular fact that for more than a century those waters have been recognized as a sure specific for goiter."

Some girls marry for money because it is necessary to have some excuse.

THE KITCHEN CABINET

(©, 1926, Western Newspaper Union.)

Life is not so complex if we do not persist in snarling it so. We need faith; we need to be brave. We need chronically to keep the corners of the mouth turned up and not down. And, after all, it is only a step at a time.—Isabel Waldo Trios.

SEASONABLE FOODS

Those acquainted with only the cultivated and canned mushroom, do not realize the rare flavor of the fried variety. They are found in abundance now and up to the time the frosts which kill them. It is better to buy them

in the market, if you have no knowledge of the edible varieties, than to risk being poisoned. The field mushroom, if furnished and peeled, the cap dressed with a spoonful of butter and broiled over coals or under gas, is delicious. Served alone on buttered toast, the nasubroom is at its best, as many food flavors confuse its delicate taste. Cooked in butter for five minutes, added and served as a supper dish, it is unsurpassed as a delicacy.

Ham.—Take chopped beef either cooked or raw, add butter and a chopped onion to a hot frying pan, now add twice as much chopped cooked pasta as meat; a teaspoonful of grated horseradish, or less, and salt and pepper to season. Add cream from time to time to moisten and cook until well blended. Serve hot as omelet, rolled out on a hot platter and garnished with parsley.

Cheese and Olives Canape.—Cut stale bread into one-quarter inch slices. Shape with a small cookie cutter with rounded corners. Cream butter and add an equal quantity of soft rich cheese; season with salt. Spread the bread and garnish with one-quarter inch border of finely chopped olives and pieces of red and green pepper cut into fancy shapes in the center of each.

Moravian Apple Pie.—Core and peel six cooking apples. Place in a covered pan with a teaspoonful of lemon juice, a little of the grated rind, a cupful of sugar and water enough to cover the bottom of the dish. Stew until tender. Line a deep pastry plate with rich pastry, place the apples in it, fill the center with peach marmalade and cover with latticed strips of pastry. Bake in a hot oven and serve with cream.

Berry Cake.—Sift together a teaspoonful of soda with two cupfuls of flour. In another bowl put one cupful of sugar, one-half cupful of shortening and warm it enough to cream it easily; add the yolk of one egg, one whole egg, beat well, add one teaspoonful of vanilla and one-half teaspoonful of cloves. Mix well and add one cupful of canned berries, juice and fruit, stir well. Now add the first flour mixture and bake in a loaf. Ice the cake with the white left, using one cupful of sugar, one-fourth cupful of water and boil until it hairs, pour over the beaten white and continue beating until cool and stiff enough to spread over the cake.

Soups of Summer Fruits.

With those who are used to serving fruit soups they are considered a very important part of the menu. They are not difficult and all Americn, but we are beginning to like and appreciate them.

Cherry Soup.—The old world the prince and peasant enjoy them summer and winter. Chilled with whipped cream they appeal to our taste, and serve an attractive beginning to a summer meal. With fruit soups the ingredients used with the fruit juice make them more or less nourishing.

Strawberry and Orange Soup—Sprinkle a dozen strawberries with sugar and let stand on ice for an hour. Make a strup with one and one-half quarts of water and a pound of sugar, then with a quart of fresh berries and the juice of a lemon. Mash and strain, add a cupful of orange juice and the prepared berries and serve ice cold.

Apple and Rice Soup.—Core and slice very thin eight unpeeled apples. Cook them with a half cupful of rice in two quarts of boiling water until both, rice and fruit are soft. Put through a sieve, add juice and one-half cupful of orange or grapefruit marmalade. Serve hot.

Prune and Peach Soup.—Take one-third of a pound of dried prunes and two-thirds of a pound of dried peaches, soak over night. In the morning add a pint of cold water and let them cook until boiling, add two tablespoonfuls of sago and cook until the sago is clear. Add a cupful of cherry, cranberry or other tart juice. Serve hot or cold.

Cherry and Quince Soup.—Stem and stone a pint of deep-red cherries; place them in a saucepan with the juice and rind of a lemon, half a cupful of quince juice and a pint of water. Cook until boiling, add two tablespoonfuls of sago and cook until the sago is clear. Add a cupful of cherry, cranberry or other tart juice. Serve hot or cold.

WRAPS HAVE FLOWING LINES; PARIS SENDS SPORTS CLOTHES

THE current of the styles in outer garments blows toward graceful lines—partly influenced by the success of the cape. This adaptable wrap began its wayward, but charming, career in the smart winter, resorts and caused even coats to follow its alluring ways—hence the fad for wearing coats flung about the shoulders with the sleeves hanging loose. Then the cape-coat, combining grace and comfort, began to grow important and now the latest word from stylists tells of cape-coats and dolmans that

resemble them, with the cape-coat plunging in all types.

Coats with regulation capes, for summer wear, like the model pictured, are made of rep, flannel, crepe, georgette and lamé, but in the sheer fabrics for warm summer days the cape portion is shorter and more graceful. Rep and the heavier crepes are the choice for capes that must provide some measure of warmth. The model shown here, if made up in navy blue rep and lined with bright red crepe, or shantung, will prove dashing and useful. In black or gray crepe it will

serve almost every purpose for day or evening wear.

Everyone who appreciated the charm of last summer's georgette coats will welcome this year's cape coats made of the same exquisite material. They are made with a flare and are made usually with rounded capes of varied lengths, single, double or triple, and sometimes scalloped at the edges. Their only rivals in sheer beauty are those large georgette scarf shawls, made of a square of georgette, surrounded by a deep border in black or other contrasting color.

For sports wear or travel, tweeds in new weaves and new patterns are the first choice.

Perhaps women have come to regard the summer time itself as a sporting event and mere living as a pastime. Anyway, when the good old summer time comes, they seem inclined to get into sports clothes, morning, noon and night, and summer belongs almost to many types of these that they are well dressed for almost anything the day may bring. Comparatively few sports clothes are designed for actual sports wear—most of them seem destined for the gallery and for pastimes not at all strenuous. For instances, here are two rather dainty outfits which Paris sends over labeled "Toilets de sport"—they might be as appropriately called two pieces

A Graceful Summer Wrap.

daytime dresses or even informal afternoon frocks. Therefore we will discuss sports clothes by putting our actual sports wear and talking of informal clothes instead.

Pastel colors in flannel, jersey, kasha or rayon mixtures, or in crepe de chine, might be chosen for either of these frocks and the plaited skirt goes without saying—it is taken as a matter of course that a sports dress has a plaited skirt. In the dress at the left the jacket is secured with buttons piped with silk in a contrasting color and has an odd shaped belt fastened with a buckle. The embroidered medallion in the same color might enclose one's monogram, as an elegant finishing touch. For the frock at the right, crepe de chine will prove a good medium and buckles play a conspicuous part in its adornment.

One can hardly say "sports dress" without being understood to mean Jumper dress, just now, two-piece costumes are so far in the lead of others. Jersey is the most popular material but kasha, flannel, rayon mixtures, crepe de chine and satin silk are memorable are all in the knowing class. Checks, stripes and plaids play a conspicuous part in the sportly costumes.

Cotton fabrics in flannel, jersey, kasha or rayon mixtures, or in crepe de chine, might be chosen for either of these frocks and the plaited skirt goes without saying—it is taken as a matter of course that a sports dress has a plaited skirt. In the dress at the left the jacket is secured with buttons piped with silk in a contrasting color and has an odd shaped belt fas-

Cameo Pendants Are Smart

Quaint and charming are pendants made of a composition resembling jade or carnelian and outlined with pearls. The centers have intricate designs in exquisite carving.

Lace Is Revived

There is a decided revival of feeling for tulle and for fine net laces with thread patterns. Often it is combined to advantage with chiffon of exactly the same shade.

Only One Scottish Lake

Scotland has but one lake—Lake Menteith. All other so-called lakes of Scotland are lochs.

HOW TO KEEP WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(©, 1926, Western Newspaper Union.)

ACCIDENTS TO YOUNG WORKERS

THE children's bureau of the United States Department of Labor has just issued an exhaustive report on industrial accidents to young workers. For many reasons young persons are more apt to be injured in shops and factories than are older persons. This is the principal reason why many of our states have passed laws forbidding the employment of children under sixteen or eighteen in certain kinds of work. From a careful study of industrial injuries to minors in Wisconsin, Massachusetts and New Jersey the bureau concludes that there are still a large number of accidents occurring which should be prevented and that the age limit in most of our states is still too low.

The records of accidents for one year in each of these three states show a total of 7,478 accidents to minor employees, resulting in 38 deaths, 950 cases of partial disablement for life and 6,490 cases of temporary disablement. As this record only covers cases of minors who were disabled more than ten days, under the workmen's compensation act, there were probably many more cases in injuries to minors that were treated by a physician only twice as many.

Of the 7,478 cases reported, 30.2 per cent, or over one-third, were caused by machinery. This was twice as high a percentage as the machine accidents which happened to workers over twenty-one years of age.

Most of the machinery now used is power operated. Most of the accidents to minors occurred in starting and stopping the machinery.

Handling of goods was a second most frequent cause of injury. This resulted in strains, sprains and ruptures.

Falls were the third most frequent cause of injury, either by slipping or stumbling over objects on level surfaces or falling down stairs or elevator shafts.

The fourth most frequent cause was accidents, principally from cranking automobiles. Other causes were tools, stepping on nails or wires, falling objects and flying particles and substances.

As a result of its investigation the children's bureau concludes that the danger of injuries to minors can be reduced by requiring more guarded machinery and safer working places, but that even with the best of safeguards, there is greater danger of accident for young workers than for adults and that to prevent many such accidents greater care for boys and girls of sixteen and seventeen is necessary.

LIGHT AND HEALTH

THE old sun worshipers weren't so far off, after all. In the search to abate the existence of life itself on the earth, says Dr. Emery R. Hayhurst of the Ohio State university, depends on the sun. So the earliest instincts of our primitive ancestors and the latest discoveries of science agree that the sun is the center of life and the source of all life.

Light and weather unlimit or vegetable, exists only because of the sun.

One would think, from the amount of attention and discussion now given to the subject, that light was a recent discovery, and, in a way, it is. We know more about light and its various forms than has ever been known before.

It has long been known that light is a series of ether waves. What has only recently been found out is that there are many forms of light that are highly beneficial to human beings and so their very existence was unsuspected until instruments could be invented which would measure them and render them visible. We now know that the human body, like any other optical instrument, has its limitations and that, of all the many light rays given off by the sun, it uses only a part. These rays vary in length, and in speed of vibration. The long rays and the short rays are invisible, the eye seeing only those of medium length. The longest rays are those used in radiotelegraphy. Then come the best rays of medical rays, which become visible at a length of about 700. Then come the visible rays in order: red, orange, yellow, green, blue, indigo and violet. The shortest of these visible rays have a length of about 390. Then come the ultra-violet rays, so short as to be invisible. These rays are the light rays that have the most penetrating effect on the skin, more than the best rays. It is these short, ultra-violet rays, rather than the long best rays, which are of great value in the treatment of disease and

THE TWO-THIRDS RULE

Evidence is piling up that the Democratic Party is preparing for a fight to a finish in its convention of 1928. This, of course, will be hailed with some glee by the brethern in the Republican Party who remember what easy sailing the Democratic convention fiasco of 1924 gave them.

And the best evidence that a finish fight is being prepared lies in the fact that there is now a sincere movement on foot to abolish the time-honored two-thirds rule which has long been necessary for a choice of candidates in a Democratic convention. In fact this rule has been in effect since 1832, when the convention met to nominate Andrew Jackson for the Presidency.

It seems now that the followers of William G. McAdoo and Governor Al. Smith, bitter rivals in 1924, are in favor of abolishing the two-thirds rule, so that a majority of the delegates can name the candidates, as is the rule now in Republican conventions. This, if true, can only mean that the followers of William G. McAdoo and the followers of Al. Smith, who are as far apart as the poles on many issues, are determined to have a real show-down of strength for the purpose of seeing who is the real boss of the Democratic Party.

In 1924 McAdoo might have been nominated had the majority rule been in effect. Evidently Governor Smith's friends believe that by 1928 he will have grown so in the party councils that he can command a majority of the delegates. Supporters of McAdoo, remembering his strength in 1924, doubtless feel that the Californian can be nominated in case of a majority choice.

In the two-thirds rule where kept in effect, it is very likely that neither man could be nominated, and another compromise would be forced, as was the case in 1924. The most significant fact therefore is that the supporters of McAdoo and Smith seem to have decided that they prefer a finish fight to another compromise, with the elimination of either one or the other from a commanding place in the councils of the party.

Such a finish fight might easily wreck the party so far as the 1928 campaign is concerned, but on the other hand, there is no alluring prospect of victory in another long-drawn-out convention with a compromise candidate as the result, after everybody has become tired and disgusted with the whole affair.

The Republican Party has its troubles, too, but they are not so fundamental as those which split the Democrats into two hostile camps. The moves made on the political chessboard within the next few months will be worth watching.

AFTER HIS PRESIDENCY

John Quincy Adams was one President of the United States whose most heroic work was performed after he had left the Presidency, according to Frank P. Litchert, who writes in the current issue of the National Republic, under the subject "John Quincy Adams, the Man Who Came Back."

After Mr. Adams served one term as President he was defeated for a second term and retired broken hearted firm in the belief that his public work was over. But he came back to Congress from his native state of Massachusetts and for years keep up a heroic fight in favor of the abolition of slavery. At first he fought almost alone but proved himself more than a match in debate for his opponents, both North and South. His great fight was to secure the right of petition for the abolition of slavery and he finally won it. As Mr. Litschert says:

"The story of John Quincy Adams might well be called the story of the man who came back. Having represented his country with honor in Europe as a diplomat and as Secretary of the State in Washington, where he assisted in the framing of the important Monroe Doctrine, John Quincy Adams retired from political life after one term in the Presidency, discouraged and, as he thought, discredited through no fault of his own. Old age was creeping on him and it seemed that his sun was setting. But he was yet to enter into his period of greatest usefulness as a leader in the House of Representatives and as the champion of human liberty. Hated and feared at first as the spokesman of the abolitionists, he lived to win the respect of even his bitterest enemies and to die in the harness, as it were, at a ripe old age and with the knowledge that his efforts had not been in vain."

PROTECTION

Many years ago, when the United States bought its steel in Europe, Abraham Lincoln said: "If we buy steel in a foreign country, you get the steel and the foreign country gets the money, but if you buy steel at home, you have in your own country both steel and money."

Here is a truth as simple as two plus two equals four. It is a statement that a six-year-old child could understand and appreciate. Building its economic structure on this policy the United States has become the greatest and richest nation in the world. Even England, for ages incurably addicted to free trade, is at last getting tired of being the dumping ground of the world, for protection sentiment in England is growing by leaps and bounds. Over fifty counties have raised their tariffs in recent years. Only in Canada are there wooden-headed politicians who cannot see the wisdom of giving the manufacturer the first right to sell in his own home market. If we had world-wide free trade it would, no doubt, be a wonderful thing, but when the United States raises an impregnable tariff barrier against us, let us fight them with their own weapons. Not to use those weapons is plain, unadulterated suicide. Canada imports five hundred million dollars worth of goods which should be made in our own country by our own people.—From O'Brien and Williams Circular, in Montreal Star.

A ROYAL ENTERTAINER PERFORMS

Amir Ilux, a genuine East Indian conjurer, produces a Liberty bell from a reporter's hat. He is one of the artists in the India Building at the Sesqui-Centenial International Exposition, which opened in Philadelphia June 1 to December 1 to celebrate the one hundred and fiftieth anniversary of the signing of the Declaration of Independence.

"Fishing by Telephone

Apparatus somewhat in the nature of a telephone is used by the herring fishermen at Stavanger, Norway, to locate shoals of fish. A microphone is attached to a sunken wire and it is stated that the movement of the shoal is audible through a telephone receiver in the boat.

Basis of All Art

A great deal of the joy of life consists in doing perfectly—or at least to the best of one's ability—everything he attempts to do. It is this conscientious completeness which turns work into art. The smallest thing well done becomes artistic.—William Matthews.

Seasoned Knowledge

Talk about those subjects you have had long in your mind, and listen to what others say about subjects you have studied but recently. Knowledge and timber shouldn't be much used until they are seasoned.—Oliver Wendell Holmes.

Modern Fable

Four animals went to a circus—a duck, a pig, a frog and a skunk. All of them got in except one. The duck had a bill, the pig had four quarters and the frog had a greenback, but the skunk had only a "cent."—Exchange.

Nature's Anesthetic

Carbon dioxide is the nonpoisonous anesthetic used by nature itself. If you are hurt badly in an accident your breathing is lessened, and an excess quantity of carbon dioxide in your blood makes you fall asleep.

Origin of Word "Boss"

The word "boss" is said to have come from the early Dutch settlers in New York, in whose language the word bass—the "a" being pronounced like "a" in all—meant an overseer or an inspector.

Such Is Life!

A blurb writer advises every man to have a hobby, a friend, a job and a savings account. His life work, then, would be to hold the first over the opposition of the three.—Arkansas Gazette.

Zulu Death Chamber

Near Durban, South Africa, is the "Place of Death," a funnel-like cleft in the coast rocks, into which, in times gone by, the Zulu chiefs were accustomed to place the victims of their wrath to die.

Not Less Worthy

She—"Before we were married you called me an angel." He—"I know it." She—"But now you don't call me anything." He—"That shows my self-control."—London Opinion.

Ink Eradicator

When your fingers become inkstained wet the end of a match and rub it over the spots, wash your hands in cold water and watch the ink disappear.

Forming Our Opinion

Many people say a thing the first time because they have heard someone else say it, and stick to it because they have said it themselves.—Dean Inge.

Prevent Corks Sticking

The corks of bottles containing gum, liquid glue and other sticky substances should be rubbed with grease to prevent them from becoming fixed.

Brother Williams

Trying to pull through is half the battle, and the fact that we pull through is the rest of it.—Atlanta Constitution.

Padlock the Door

When jealousy comes in through the door, philosophy flies out through the window.—The Outlook.

Acclimated Chinese

The Chinese are said to stand change of climate better than any other race.

THE THEATRE

"Black Paradise" the thrilling melodramatic picture written and directed for Fox Film Corp. playing at the Palace theatre Friday, and the dramatic scenes and desperate battle between Edmund Lowe as Graham the detective, and Edward Peil as Murdock the brutal ship and South Sea Island owner, will send the audience to exclamations of excitement and a genuine burst of applause.

It is a real thriller, this tale of rumrunning on the Pacific, with splendid views of SanFrancico's magnificent harbor and wonderful scenes in the tropics.

"Tumbleweeds"

The finest picture of his career to date, is generally said by those who have witnessed "Tumbleweeds," Wm. Hart's first production for the United Artists Corp.

In the role of Dan Carver, Bill Hart is the typical character with which he has become identified—a portrayal of the formidable but chivalrous westerner. He, looking and acting the role of the cowpuncher with a predilection to roam—styling himself a "tumbleweed" and indicating the squash as an odious comparison, because of its inability to leave its home—a part that was made to order for him, but in addition he has surrounded himself with a highly competent cast of players.

"Tumbleweeds" will be seen for the first time in this city at the Palace theatre on Saturday and Sunday.

Olive Borden, southern beauty, is a living proof that convent-training is of inestimable value to dramatic work. While attending convents in the Southland, Miss Borden made a close study of drama. At the age of fifteen she resolved to become a great actress. Shrewd directors declare she is the greatest find they have encountered in pictures. She is appearing in "Yellow Fingers" at the Palace theatre next Monday and Tuesday.

"Wild Justice"

Peter the Great, giant German shepherd dog, came to America in 1923, he did not know a word of English. Under the tutelage of one of the best dog trainers he began his education, and at the end of thirty-two weeks he was able to understand anything said in English.

It was then that he was given a contract to star in "Wild Justice." The picture was completed after the company spent weeks in the lonely snow country of the High Sierras, where snowstorms and mountain scenery formed a vast background for the dogs dramatic action. Feats never before attempted were accomplished by the dog with apparently little effort.

"Wild Justice" comes next Wednesday and Thursday to the Palace theatre.

Fur From Weasel

Palmol fur is obtained from an animal of the weasel family, found in central China. It has a heavy pelt of light yellow underfur, with top hair of grayish brown. A white line runs down the back from the neck to the tail. It is improperly known under the name of Chinese stone marten and grey marmot.

If This Is a Sample

She—"I hope you will like my new hat, Robert. I bought it on your account." He—"Why, accountant? Not yet, my dear; this is still on your dad."—Boston Transcript.

The Drawbacks

The two great drawbacks to the happiness of the married state are the billboard and the board bill.—The New Yorker.

Washington, D. C.,—

Gentlemen with soft hands and well fed bodies, who for a number of years have been filling comfortable government positions in Washington, are beginning to complain that the Coolidge governmental economy system has gone too far, and that it was time a halt was called. Their outcry is becoming louder and more insistent as they see their comrades rooted off the payroll, and as they personally begin to sense the probability that the time is not far distant when they will also be separated. So to forestall this catastrophe, they have begun to argue that the axe and knife have been used enough, that the Coolidge hand be stayed. Others attempt to argue that all the reforms possible have been accomplished."

It is just as well to scotch this at the source. Great and important retrenchments have been made in government expenses, but government today is still costing too much. This is not the time to halt. Not only must the Coolidge program of the elimination of useless expenditures be continued, but state and municipal governments should follow suit. Government of all kinds in the years 1924 cost the people of the country almost eight billions of dollars, close on twenty per cent of the total income of the people of the nation. This means that the people of the nation out of the 313 working days of the year spent 46 days working to meet the expenses of government in taxes. Mr. Average Citizen, these are facts worth bearing in mind when the cry is raised that a halt should be called on the program of thrift and economy in governmental expenditures.

New York's Old Guard Coming to Sesqui

At an imposing ceremony before their headquarters in New york City the famous Old Guard of New York under the command of Major E. Havemeyer Snyder, commandant of the organization, received the invitation from the officials of the Sesqui-Centennial international Exposition, opening in Philadelphia June 1 and continuing to December 1, to celebrate 150 years of American Independence, to attend the Flag Day Exercises on June 14, when all the historic military commands of the thirteen original colonies will assemble for a big military display and parade headed by General Pershing. Captain James A. B. Franeteux, of the Old Guard Sixth Fencibles, of the Sesqui city, is presenting the invitation to Major Snyder. At Major Snyder's left stand the commanding officers of the Philadelphia organizations, while the members of the two famous commands are grouped about their leaders in their striking dress uniforms.

Where Women Rule

An even greater independence than that enjoyed by American women prevails among the women of the Tuaregs, a nomadic semi-Arabite tribe inhabiting the southern districts of the Sahara desert. Although the Tuaregs are Mohammedans, their women enjoy the prerogative of going about with their faces unveiled, whereas the men invariably have their faces well covered. Among the Tuaregs it is the women who choose their husbands, and throughout their married life they remain the sole owners of all their possessions. They alone rear the children, and at all times are invested with supreme authority as head of the family.

New Golf Game

Handicapped in his golf game by rheumatic pains that troubled him every time he swung at the ball, N. E. Warwick of Cleveland, Ohio, refused to give up his favorite sport. Instead, he invented a remarkable new form of golf, using Pygmie bowling balls. Mostly, in which the ball is hurled with a whipping motion above the head instead of being driven from the ground.

With light, whiplike sticks he now claims he can make a better score than ever before. The heads of the sticks are cups that hold the ball. Warwick has developed three kinds of clubs—the hurler, for the long shots ordinarily made with driver or brassie; the midhurler, corresponding to the midiron, and the stinker, corresponding to the putter. With the hurler Warwick claims to get more distance than the ordinary golfer gets in the average drive of a tee.

Riviera Monkey Farm

Doctor Voronoff, of monkey gland fame, has arrived at Nice to found a monkey breeding establishment on the Riviera. He says that the monkey is the only animal possessing the same anatomical constitution as a man and subject to the same illnesses and diseases.

The famous surgeon hopes to continue his experiments, and will devote much time to cancer and consumption research. He has tried dogs for his experiments, and has obtained good results, but with other animals has been less successful.

Doctor Voronoff is founding a monkey-breeding establishment on the Riviera because he considers the Pasteur station at Gutiera too far away.

The Lullaby

Emma Goldman, who is spending the winter on the French Riviera above Nice, refused to be interviewed the other day.

"I'd only scold," she said, "and we radicals and reformers scold too much. The thing gets monotonous in the end. It has no effect except a soothing one.

"There was once a man who was married to a chronic scold. Singing comfortably down under the blankets one bitter night this fellow purred:

"'Now, then, wife, start your cussing lecture, or I won't be able to get to sleep.'"

Healthy Appetite

Seventy-two buckwheat cakes, buttered and flavored with strap, followed by five cups of coffee, constituted a breakfast for Louis Martan, of Williamantic, Conn. Martan, who has a local reputation for wholesome eating, walked into a restaurant with a friend who had wagered that Martan could not eat 60 buckwheat cakes at one time. The friend had to pay the check, which amounted to $4.00.—Boston Herald.

Order Appointing Time for Hearing Claims

STATE OF MICHIGAN — The Probate Court for the County of Charlevoix.

At a session of said court, held at the probate office in the City of Charlevoix, in said county, on the 15th day of June, A. D. 1926.

Present: Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Robert Stuart, deceased.

The above estate having been admitted to probate and Albert F. Bridge appointed administrator thereof.

It is ordered that four months from this date be allowed for creditors to present their claims against said estate, and that such claims will be heard by said court on Wednesday the 20th day of October, A. D. 1926, at ten o'clock in the forenoon, at the Probate office in the City of Charlevoix.

It is further ordered, that public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel, a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
8 4t Judge of Probate.

NEW PALACE THEATRE
Attractions for Coming Week

Friday, June 18th—

"Black Paradise" with Madge Bellamy, Edmund Lowe. One of the most thrilling detective stories this year. She was at the mercy of the owner of a volcanic island of exile in the South Seas. Her only friend lay at her feet stunned by the owner's murderous blow. Then came a terrific detonation. The volcano was erupting again. Also a good two-reel comedy, "Caretaker's Daughter."

Saturday and Sunday—

William S. Hart in "Tumbleweeds." Big in action; big in thrills. In every way the biggest picture William S. Hart ever made. A realistic romance of the West by a man who knows the west; knows its ways and its people. A heart story of the greatest land rush in history as thousands stampede for homesites in the famous Cherokee land strip. Extra—A 2-reel comedy, "Starvation Blues."

Monday and Tuesday—

Olive Borden in "Yellow Fingers." A tragic romance of the South Sea Islands. The story of a beautiful little half caste girl who had been reared to believe she was white. One of the greatest love stories ever written brought to life on the screen. Extra—"Felix the Cat" and a two reel comedy, "Somewhere in Somewhere."

Wednesday and Thursday—

Peter the Great in "Wild Justice." Love and hate ruled this dog's life—love for his friends, hate for his enemies—and never did he falter in his lavish devotion or punishing with vengeance. The greatest dog hero ever seen in any photo play. His intelligence will amaze; his bravery awe; his splendid beauty charm; his great strength and fearlessness startle you. A tender love story. Extra—A Fox News Reel.

COMING—Douglas Fairbanks in "Don Q, Son of Zorro." The greatest picture Fairbanks ever produced.

—) PERSONALS (—

Mrs. John Grill, of St. James, was a business visitor here early this week.

Attorney J. M. Harris, of Boyne City, was a business visitor in Charlevoix last Tuesday.

Rev. C. E. Pollock made a trip to Evanston, Ill., last Saturday and returned home Tuesday.

Olaf Nordrum went to St. James last Tuesday on a business trip for the Booth Fisheries Company.

James, B. Parsons spent some days at St. James this week in connection with his life insurance business.

Lawrence R. Chase, for about two weeks in Chicago on business, returned to Charlevoix last Thursday.

James Hall, of Superior, Wis., is spending the week here, a guest of Mr. and Mrs. T. J. Brady, 501 Sheridan Rd.

Rev. Fr. Wegmar, for several months a resident of Chicago, spent some time with friends in this city early this week.

Captain Owen Gallagher, one of the old time citizens of St. James, spent a day or two here on business this week.

Mr. I. Rosenberg and family, of Detroit, are occupying the Harry Block cottage, 214 Park Avenue for the season.

Captain C. C. Allers was a business visitor here last Tuesday, making the round trip from St. James in a seaplane.

Mrs. William T. Driggett and two son went to St. James last Tuesday where they will visit relatives for a few days.

Murray Glasgow, a student at Notre Dame, returned to Charlevoix last Saturday and will spend his vacation here.

The Misses Mary Margaret Orlowski and Berdene LaBlanch are guests of Mrs. Fred Sendenberg at St. James this week.

W. E. Hampton motored in from Ann Arbor a few days since and is spending a little vacation in Charlevoix with old time friends.

Lou Briggs, of St. James, was a business visitor here Friday and Saturday. He returned home Saturday with a new Chrysler car.

Mr. and Mrs. Henry Jacobs and Mr. and Mrs. Chas. Lamphear were visitors in Gaylord last Sunday, the trip being made by auto.

Guests at the home of Mr. and Mrs. George Eagleton last Sunday were Loren Eagleton, a nephew and his mother, of Traverse City.

E. Y. Smith, piano tuner, will be in Charlevoix about June 26th. Leave orders at Holley Gift Shop, Wm. Bellinger or Bartlett Hotel.

Cecil Byers, of Central Lake, has taken a position in the store of F. S. Myers and will be on duty the same as for the two past summers.

Dr. L. D. McMillan, of Onaway, accompanied by his mother, was a visitor at the home of Dr. F. F. McMillan, 219 Park Avenue, yesterday.

Mr. and Mrs. Jonas Hiller, of New Orleans, arrived here a few days ago and are occupying their Michigan Ave., cottage for the summer season.

Mrs. Hannah Mooney, who spent about two weeks with her daughter, Mrs. Albon Smith, returned to her home, St. James, last Tuesday.

Mrs. S. T. Gilbert, her mother Mrs. Flora Goodman and Julius Gilbert, all of Detroit, are at the Gilbert cottage, 210 Park Avenue, for the summer.

Mrs. Isaac Gilbert and daughter, Bobbie, arrived on the resort special from Detroit Wednesday morning for a short visit and to attend to some business.

Arthur J. Weiss, secretary of the firm of Goetbie, Meyer and Weiss, freelators, of Hammond, Indiana, spent some little time here on business last week.

Mrs. Rosa Nettleton, a visitor in Florida for several months, returned to Charlevoix early this week and will spend the season with her friends in this city.

Miss Florence Gibron went to Grand Rapids where she spent several days last week, she returned to Charlevoix Saturday accompanied by Miss Mary Lemieur.

Mr. C. J. Winder and son Paul motored up from Eaton Rapids Saturday. Mr. Winder for a short visit, with Paul remaining at the Hotel Charlevoix for the summer months.

Mrs. William Graves, of Chicago, arrived here last Sunday and will spend the season at their cottage on the north side. Mr. Graves will arrive tomorrow according to present plans.

Mr. and Mrs. C. C. Tuxberry, Mrs. Ira T. Kutsche and son William, of Grand Rapids, arrived here for the summer last Friday and will occupy the cottage located at 209 Burns St.

A county Sunday School rally will be held Friday June 25th at the M. E. church Boyne City, with afternoon and evening sessions, and a picnic supper in the city park, weather permitting.

Mrs. A. R. Stumer and children, of Chicago, arrived here Wednesday and are occupying the F. H. Wood cottage on Petoskey Avenue. Mr. Stumer will join the family later in the season.

A communication from Edna Adams Hall furnished the information that she will return to Charlevoix soon and that she will resume her regular work in this city about the last of this month.

Mrs. H. Goldberg, of Detroit, has taken a lease on the E. Reinhold cottage, 215 Park Avenue, and will occupy the same for the summer season, probably arriving here within a very few days.

Mr. and Mrs. A. Salem Musselman and children are located in their cottage, 106 Park Ave., for the season. They spent the winter at St. Augustine, Florida, returning to Charlevoix last Friday.

Mrs. Lena Levinson and daughter, Miss Ida Jarvinson, after spending several months in Cincinnati, Ohio, returned to Charlevoix a few days ago and are occupying their cottage on Dixon Avenue.

Mrs. Lon Hallaway, of Ludington, joined Mr. Hallaway a few days ago and has taken a position with Captain O. E. Wilber, and with her husband will work in an official capacity at the local steamship office.

Rev. Herman Burns, pastor of the Baptist Society was called upon last Saturday to perform a marriage ceremony in which Robert Campbell and Miss Beatrice May Haines, both of Boyne City were the contracting parties

Mr. and Mrs. Frank A. Kenyon, of Mackinaw Island, motored down from Mackinaw City last Saturday. Mr. Kenyon returned the following day, but Mrs. Kenyon will remain with relatives and friends here for some days before returning home.

Gerald Left, a recent graduate of the law department, Notre Dame, visited friends here for a short time this week. He was returning to his home, St. Jannette, and was accompanied by his brother Joseph Left, who attended the class graduating program at Notre Dame.

Messrs. Howard H. Hamlin and R. D. Gifford, of Eaton Rapids were guests of Mrs. J. C. Winter at the Hotel Charlevoix for a day or two last week. The gentlemen are engaged in the printing business and old time friends of Mrs. Winter, who formerly resided in Eaton Rapids.

Mrs. Franklin Weaver, of Farmington, Mich., is spending a short vacation here with her parents, Mr. and Mrs. Frank M. Glasford,. She will continue here a few days until Dr. Weaver completes a fishing trip to Silver Lake, in Canada, and will return to Farmington with her husband when he concludes his excursion.

Mr. R. C. Hammet is working in Antrim county today and will probably attend the Antrim County Republican Club banquet tonight, at Fisherman's Paradise when Governor Groesbeck, Attorney General Andrew B. Dougherty and Congressman Frank D. Scott will be present and some other prominent national figures will be in attendance and participate in the arranged program.

Messrs. Joseph Obenfelder, Walter Obenfelder, Robert Mandel, William Cahn and George W. Anderson, of Chicago, Charles Rice and Irving Bellman, of St. Louis, Mo., entered on the yacht a. m. on board the splendid yacht Marj III, Commodore Joseph Obenfelder owner. The gentlemen have been on an extended cruise through the lakes in points north where the enjoyed a vacation in a region remote from the gay pleasures of city life where nature was in its primeval state, wild animals in abundance and fishing superb.

Metal Base of Red Fire

The base of the red fire produced by skyrockets, railroad flares and roman candles is a mixture of strontium, alum, which is yellowish in color. A promising deposit of this metal was recently found in Nevada.

Put Up Good Fight

Sir Richard Grenville, vice admiral of a British fleet, surprised off the Azores by a Spanish squadron, tried to pass through the enemy and maintained a 15-hours' hand-to-hand fight before he surrendered.

All Have Their Place

Despise not any man, and do not spurn anything, for there is no man that has not his hour, nor is there anything that has not its place.—Talbi Ben Azir.

Perseverance Wins

It's the way a man decides to a thing that marks him as a success or a failure. Many a fellow has won out at the eleventh hour just because he wouldn't let go. Don't be a quitter.—Farrington.

Mexico City's Subsurface

As the ground on which the City of Mexico stands was once the bed of a lake it is not considered safe to build skyscrapers in that city. The highest building there is seven stories.

Go-Getting Is Not All

But with our industry we must likewise be steady, settled and careful and oversee our own affairs with our own eyes and not trust too much to others. —Benjamin Franklin.

Anger Well Defined

If anger proceeds from a great cause, it turns to fury; if from a small cause, it is peevishness; and so it is always either terrible or ridiculous.—Jeremy Taylor.

Tutoring done by experienced teacher. References given. Inquire at Library or call 464.—Adv. 1-6.

Position wanted as stenographer. Address Marian Meech, 115 Park street, Boyne City, Mich.

Built House in Treetop

In a treetop near Mauquan, N. J., an enterprising man built himself a home five feet square. There he has lived, rent free—now he must abandon his primitive abode. The tree stands in a lonely spot near the beach. The city is planning to extend an avenue and the tree, in the way, must come down. The tenant must look for another tree or life himself to a boarding house or apartment. The tree man is employed by the street department. Five years ago he became enthusiastic over trees and life. He built a frame structure in the tree, 5 feet wide, 7 feet-long and 5 feet high. It is 12 feet above the ground and supported by sturdy branches. On both sides are openings large enough for a man to crawl through. He enters his nest by means of a ladder.

The Actor

Consider the life of a photoplay actor—now he is hero and now malefactor.

There are millions to gasp at the twitch of his eyebrow—there's Nathan to call him a pip-threwing baleful brow.

He sails for France amid kisses in geysers—he rides the shoulders of princes and rioters.

From Renaults on Fifth he disdainfully scans us—his autographed photographs clutter up Kansas.

Newspaper writers deny that he moans well—they certainly have to admit that he groans well.

The road to success has its twistings and strictures—but it's certainly grand to be famed for your pictures. —The New Yorker.

China Easily Mended

By applying a little carriage varnish with a camel's hair brush to the edges of broken china, the parts being neatly joined together, the fracture will, when thoroughly dry, be hardly perceptible and the china will stand fire and water.

Trade-Marks on Fruit

Electric fruit branders are in general use on oranges, grapefruit, lemons, cantaloupes, watermelons, apples, pecans and walnuts. They brand the trade-mark to prevent substitution and to link the product with advertising.

Challenge Climber

Canada's mountain throw out a challenge to mountain climbers the world over—climbs without number for the nearest amateur—virgin summits which defy the skill and endurance of the most experienced mountaineer.

Hot Lead Experiment

A hand, if moist, can be safely dipped into molten lead at a temperature of 400 degrees above that of boiling water. The vapor surrounding the hand will prevent it if it is not held in the lead too long.

Ancient German Legend

The "Pied Piper of Hamelin" is supposed to have led away the children of the town of Hamelin in Hanover, Germany, in the year 1284. He led them to Koppenberg hill, into which they disappeared.

Wren's Monument

The London monument, which is more than 200 feet high, was originally designed by Sir Christopher Wren to serve as a tube for a mammoth telescope.

Seldom Squeal

A critic says that modern girls are just educated dolls. He may be right, but they don't squeal for "pa-pa" and "ma-ma" when they're squeezed.—Humorist.

Odd Plea Wins

In England a man convicted of burglary has had his sentence reduced by the court on the ground that his objection to women on the jury was ignored.

Minds and Education

To provide equal educational facilities for unequal minds is like providing equal buttonholes for unequal buttons.—Lord Robert Cecil.

Eating Wool

"I wish you wouldn't knit at meals. I can't tell where my spaghetti leaves off and your sweater begins."—Washington Columns.

In a Bad Way

Clerk to Boss—This rheumatism has me going, sir. I can't get my arm to my head, and it's the same with my leg.—Good Hardware.

Appalling Waste of Wood

From the time the tree is turned into planks and applied in construction, nearly 65 per cent of its wood has been wasted.

The Hard Part

A word to the wise is sufficient, but you have to find the wise first.—Hartlewille Enterprise.

One Thing Missing

The modern home today is supplied with everything except the family.

Thanking the Women of Charlevoix

The housewives of Charlevoix have been hard at it, early and late, for weeks, making ready a proper welcome for Charlevoix's summer visitors.

This welcome of theirs is a thorough one. They have painted and varnished, swept and scrubbed, beaten and dusted and let in the Spring sun and air.

It is a wonder that our merchants have a broom or a can of Dutch Cleanser left in stock.

For my part, I owe the women of Charlevoix much, and I thank them here and now. The many cottages they have placed with me for rental certainly do shine like a schoolboy's face on Monday morning!

LAWRENCE R. CHASE
SUMMER COTTAGES
FOR RENT
230 Bridge Street. Telephone 113

CHURCHES

Methodist Church.

C. E. Pollock, Pastor.

"True To Our Home" is the Sunday School theme for the 9:30 a. m. study next Sunday. The early morning study hour is proving more and more popular with church people, and it is hoped that a much larger attendance than usually is present in summer will find it desirable to boost the Sunday School this summer. This arrangement makes it possible to have Sunday dinner about noon, and leaves the afternoon for other wholesome purposes.

"A Spiritual Trunk Line", sermon subject 10:30 a. m. next Sunday. Features of this hour of worship will be the sermon by the pastor, a brief scripture word study from the Greek record, a junior sermon, and special music by the choir.

The Reverend Dr. J. O. Rindall is the preacher next Sunday evening at 7:30. Dr. Randall is the District Superintendent of Grand Traverse District, an eloquent preacher and a popular church leader. This will be a great hour of religious uplift.

The Epworth League meets next Sunday evening at 6:30.

Prayer meeting each Thursday evening at 7:30 at the church with the pastor in charge.

Baptist Church

Rev. Herman Burns, D. D., Pastor (—

At the Northern Baptist Convention in Atlantic City in May it was decided that from October 1st to March 31st, there should be a moratorium on money raising, an agreement to declare an armistice on controversy, and a rededication of the denominational machinery and agencies to the one task of winning men to church. We are sure that a profound "amen" has gone up from the whole denomination, and a nation-wide effort to win men to Him and a better life here and hereafter will justify its existence. There is no justification for the existence of a church that becomes simply a religious club.

Sunday morning the theme of the sermon will be "The Trial of Abraham" but on the evening "The Value of Courage." We are pleased with the steady dependable congregations that have been attending those services.

The Bible School enjoyed a delightful Children's Day program last Sunday and have decided not to attempt another in competition with commencement week in the public schools. The school will study "Judah's Plea" and we hope all members will be present next Sunday.

The ladies are meeting today with Miss Correll and are enjoying a large attendance.

The pastor addressed a large congregation at the Federated church in Eastport last Sunday afternoon, and was delighted with their musical program.

Congregational Church

Rev. B.G. Mattson, D.D., Minister

Dr. Mattson expects to return the last of this week and will preach as usual next Sunday at 10:30 a. m. here and at 2:30 p. m. at Ironton.

The Church School meets at 9:30 a. m. for the summer months. There was a good attendance last Sunday and several new workers to take the place of those who are not able to serve during this summer.

The Endeavor Society will meet at 6:30 p. m.

Reserve the following dates:
Thursday, June 24th—Monthly church night.
Friday, June 25th—County Sunday School Rally at Boyne City.
Monday, July 5th—Pilgrim Circle picnic.

St. Mary's Catholic Church

Low Mass 8:45 a. m.
High Mass 9:00 a. m.
Saturday and Monday 7:00 a. m.
Rev. Knute Lowenski, Pastor.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Is the Universe, including Man, Evolved by Atomatic Force."
Sunday School 12 o'clock.
Wednesday evening service 7:45.
Reading room, Tuesdays and Saturdays, 2 to 5 p. m.
The public is cordially invited to attend our services and use our reading room.

Ripe Butter for Riffs

The natives of Tangier are reputed to be extraordinarily fond of butter, but not the fresh, sweet kind that Americans like. To satisfy the taste of a Riff his butter must be at least a year old before it attains the proper strong and tang.

Laying Cornerstone of Harding Memorial

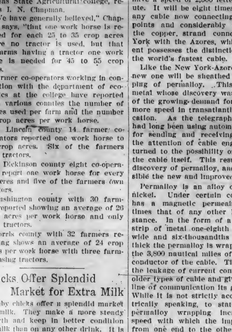
Over forty thousand persons paid homage to late President Warren G. Harding and his wife, Florence, when the cornerstone of the Harding memorial, at Marion, Ohio was laid. Vice President Charles G. Dawes laid the cornerstone and made the dedicating speech.

Dredging Gold From a Washington Highway

Motorists who use the Yellowstone Trail highway, fourteen miles north of Cle Elum, in the state of Washington, are forced to make a detour when they find a huge gold dredger at work in the middle of the road. The highway runs over what was the bed of the old Swauk creek. The gold-bearing gravel was worked by white and Chinese miners many years' ago, who stopped work there when the big strikes were made in the Klondike. Recently a group of men in eastern Washington incorporated and came to work, as they hold the mining rights to the land the highway runs over. The dredge is taking out over a thousand dollars a day.

Getting Ready for Atlantic Flight

HEROINE OF WAR

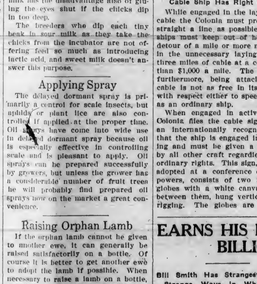


Rene Fonck, noted French aviator, at Roosevelt field, Long Island, N. Y., inspecting his uncompleted plane in which he will try the New York-Paris flight.

Summer Brings Seals to Avalon Bay

Here's a sure sign of summer. The world famous seals of Santa Catalina island, off the southern California coast, have migrated to the waters of Avalon bay ready for the handouts from the thousands of summer visitors. No one knows what they use for a calendar, but they're punctual to the day, when the summer season opens. Many of the seals are known by name.

WINS YALE PRIZE



Paul Mellon, son of the secretary of the treasury, who was awarded the Lanfilli prize for excellence in English composition, for which members of the Yale freshman class are eligible to compete. Young Mellon's essay was entitled "Dum Byrne, His Place In Literature."

OF INTEREST TO EVERYBODY

Eagles on United States bills were copied from birds in the National zoo.

The huarizo is a recently developed animal, a cross between the llama and the alpaca of Peru.

Bad characters of children often result from improper feeding, according to government dietitians.

Some astronomers believe that the moon is made of material that was once part of the earth's crust.

Much Harm Done to Winter Wheat

Losses Nearly as Heavy as Caused by All Other Diseases.

(Prepared by the United States Department of Agriculture.)

Winter injury to wheat causes nearly as heavy losses to that crop as do all wheat diseases combined, says the United States Department of Agriculture. The acreage of winter wheat annually abandoned, largely because of winter-killing, averaged 9.9 per cent during the 23-year period from 1901 to 1922, inclusive, according to Department Circular No. 375, "Comparative Hardiness of Winter-Wheat Varieties," just issued by the department.

During the 14-year period from 1909 to 1922, inclusive, frosts or freezing caused an average loss of 3.5 per cent of the wheat crop and plant diseases 3.5 per cent, according to crop correspondents of the department.

With a view to developing winter wheat varieties of greater hardiness, investigations were conducted at 26 experiment stations in the United States and Canada during one or more of the six years from 1920 to 1925, inclusive. In the experiments 45 winter-wheat varieties and strains were grown in uniform nurseries.

Data as to comparative hardiness show that the varieties Minturki, Buffum No. 47, Minturki and Odessa are considerably more cold-resistant than the standard Kharkof used as a check. Fedul, Turkey (Alliss No. 1439), and Beloglinn are somewhat more hardy than Kharkof. Kanred and Nebraska No. 60 are probably slightly hardier than Kharkof. Nebraska No. 28 and Blackhull are much less winter hardy than Kharkof. The results obtained in these experiments are being used as a basis for breeding wheats to combine winter hardiness with other good qualities.

A copy of the circular may be obtained free as long as the supply lasts, by writing to the United States Department of Agriculture, Washington, D. C.

One Work Horse Needed to Care for 35 Acres

How many acres will one horse take care of and how many horses are needed on a 320-acre farm? These are questions which are now being studied by economists at the Kansas State Agricultural college, reports I. N. Chapman.

"We have generally believed," Chapman says, "that one work horse is required for each 25 to 35 crop acres where no tractor is used, but that on farms having a tractor one work horse is needed for 45 to 55 crop acres.

Farmer co-operators working in conjunction with the department of economics at the college have reported from various counties the number of horses used per farm and the number of crop acres per work horse.

In Lincoln county 14 farmer co-operators reported one work horse to 34 crop acres. Six of the farmers own tractors.

In Pottawatomie county eight co-operators report one work horse for every 33 acres and five of the farmers own tractors.

Washington county with 30 farmers reported showing an average of 29 crop acres per work horse and only four tractors.

Morris county with 32 farmers reporting shows an average of 24 crop acres per work horse with three farmers using tractors.

Chicks Offer Splendid Market for Extra Milk

Baby chicks offer a splendid market for milk. They make a more steady growth and keep in better condition on milk than on any other drink, it is better to give than sell cream. The lactic acid of the milk is a foe to white diarrhea; it is tonic in its effects. Also, the chicks like it better than the sweet, separated milk. The sweet milk has the disadvantage also of causing the eyes shut if the chicks dip in too deep.

The breeders who dip each tiny beak in sour milk as they take the chicks from the incubator are not offering feed so much as introducing lactic acid, and sweet milk doesn't answer this purpose.

Applying Spray

The delayed dormant spray is primarily a control for scale insects, but aphids or plant lice are also controlled if applied at the proper time. Oil sprays have come into wide use in delayed dormant spray because oil is especially effective in controlling scale and is pleasant to apply. Oil sprays can be prepared successfully by growers, but unless the grower has a considerable number of fruit trees he will probably find prepared oil sprays now on the market a great convenience.

Raising Orphan Lamb

If the orphan lamb cannot be given to another ewe, it can generally be raised satisfactorily on a bottle. Of course it is better to get another ewe to adopt the lamb if possible. When necessary to raise a lamb on a bottle, it will need to be fed several times a day at first. The number of feedings can be reduced until, by the time the lamb is six weeks old, three or four times a day will be sufficient. A lamb creep should be provided where some ground grain can be kept for the lambs. They will soon learn to eat grain and this will help a great deal in getting faster growth.

Pullets for Breeders

Although breeding from pullets is not generally recommended, frequently very good chicks can be obtained from them. On an average old hens will probably give thriftier chicks but pullets which have not been greatly forced for egg production should also give very satisfactory results. If pullets are used, only the best matured ones laying good-sized eggs should be selected.

They Marry Them Off Quickly in Valparaiso

Valparaiso, Ind., now claims the quick marriage ceremony championship of the United States. The young people are wedded and hustled away at a great rate. In this picture Judge J. E. Borhold, the "marrying justice," is demonstrating his speed-'em-up methods with three couples.

Fastest Cable to Span Ocean

New Strand Will Have Speed Rate of 2,500 Letters a Minute.

New York.—Early this summer the work of laying the world's "fastest" cable will be started. Slipping away from the stern of the ship Colonia a copper strand 3,800 nautical miles long will drop to the bed of the ocean to lie in the perpetual darkness of the depths. By the end of summer all of it will be in place. The shore ends will then be connected and another line of communication will have been established between the old world and the new.

The new line, which will afford direct communication between New York and London, and will be the twentieth transatlantic cable, will have a speed of 2,500 letters per minute. It will be eight times as fast as any cable now connecting those two points and considerably faster than the copper strand connecting New York with the Azores, which at present possesses the distinction of being the world's fastest cable.

Like the New York-Azores cable the new one will be sheathed in a wrapping of permalloy. This is a new metal whose discovery was the result of the growing demand for speed and more speed in transatlantic communication. As the telegraph companies had long been using automatic devices for sending and receiving messages, the attention of cable engineers was turned to the possibility of improving the cable itself. This resulted in the discovery of permalloy, and made possible the new and improved lines.

Permalloy is an alloy of iron and nickel. Under certain conditions it has a magnetic permeability many times that of any other known substance. In the form of a continuous strip of metal one-eighth of an inch wide and six-thousandths of an inch thick the permalloy is wrapped around the 3,800 nautical miles of the copper conductor of the cable. This prevents the leakage of current common to the older types of cable and gives the new line of communication its great speed. While it is not strictly accurate, electrically speaking, to state that the permalloy wrapping increases the speed with which the impulses pass from one end to the other, it makes possible, however, the sending of such sharply defined signals that the intervals at which they follow each other are considerably reduced without overlapping.

Cable Ship Has Right of Way.

While engaged in the laying of this cable the Colonia must proceed in as straight a line as possible and other ships must keep out of her way. A detour of a mile or more might result in the unnecessary laying of two or three miles of cable at a cost of more than $1,000 a mile. The cable ship, furthermore, being attached to the cable is not as free in its movement with respect either to speed or course as an ordinary ship.

When engaged in active duty the Colonia flies the cable sign. This is an internationally recognized signal that the ship is engaged in cable laying and must be given a wide berth by all other craft regardless of their ordinary rights. This sign, which was adopted at a conference of civilized powers, consists of two red canvas globes with a white canvas diamond between them, hung vertically in the rigging. The globes are about two feet in diameter and are hung six feet apart. By night the cable sign consists of lanterns hung vertically, red at top and bottom and white between.

According to international law ships flying the cable sign are supposed to be given immunity in time of war. During the World war, however, the rights of cable ships disappeared. Relying on this presumed neutrality one was fired upon by a submarine during the early days of the war and badly damaged. Managing to make temporary repairs, she was limping into port when again attacked and sunk. During the remainder of the war the immunity of cable ships was purely fictitious.

While cables usually function without interruption, careful records of cable laying are kept so that if any breaks occur in the copper strand it may be picked up for repairs with a minimum of trouble and delay. Cable interruptions can usually be traced to one of several causes. In deep water far from the shore these interruptions are often due to armor decay. The steel protection around the cable becomes rusted, leaving only the gutta percha covering over the copper wire conductor. This protection is subject to chafing and soon the copper conductor comes in contact with the water, is grounded, and communication fails.

Most Breaks in Shallows.

Most of the breaks, however, occur in shallow water near the shore, as there is little to interfere with the smooth working of the cable in the depths of the sea. Near the shore the cable has a host of enemies both animate and inanimate. The worst of these, especially in the warmer waters, is the toredo, the boring sea worm against whose ravages ships' bottoms are copped sheathed and wharf piles are corrected. As a protection against the toredo the shore ends of cables have a layer of brass tape wound about them between the gutta percha insulation and the galvanized sheathing wires.

In northern waters icebergs grounding on shoals often grind the cables flat, exposing the conductor or severing it entirely. Once the carcass of a whale, entangled in many loops of cable, was hauled up by a cable ship. It was evident that the animal's death struggles had parted the cable. At another time the story of what happened to the insulation was told by the hauling of a shark's tooth embedded in the cable's covering. Closer in shore cables are often caught by the trawls of fishing boats, which drag the ocean bottom to a depth of 1,200 feet or more. The first international cable, laid from Dover, England, to Calais, France, was picked up by a fisherman who thought he had caught a new kind of eel.

To grapple for a broken cable in the depths would seem an almost hopeless task; yet so carefully are the records kept, showing the exact position of every mile of the cable, and so expert have the cable layers become, that it is an everyday job to pick up a particular section of cable in a depth of two or three miles. The job is always accomplished, although sometimes with difficulties multiplied by storm and cold.

Problems of Repair.

Sometimes in the course of laying a cable, more often when cable repairs are under way, the cable ship is obliged to cut loose and run before the storm for safety. Cable laying is planned in advance for seasons when fair weather may be reasonably expected; cable repairs have to be made when the break occurs, which is more likely than not to be in mid-winter. The cable ship is always prepared to cut the cable and attach a buoy to the severed end, to be picked up again when conditions permit. Throughout the voyage buoys are kept ready, slung in the rigging above the upper deck, with the buoy lines—two or three miles of rope—coiled where they can be used with the least delay.

When a break occurs in a cable it is possible to tell from the shore by electrical measurements and calculations how far from either end the trouble lies. A cable ship then hurries to the spot which is clearly indicated on the chart made when the cable was laid or last repaired.

Having arrived at the place where the cable is to be picked up the cable ship puts over an anchored buoy to mark the point of departure. It then steams back and forth across the line of cable dragging a grapnel which resembles a five-pronged anchor over the sea floor. In shallow water an ordinary grapnel is used. For depths of a mile or more a special form of grapnel has been devised which, when it hooks the cable, cuts it in two and holds one of the severed ends tightly. It is a simple matter, once the cable has been hooked, to splice in a new section and then haul up the other end and splice that on.

Arizona, New Mexico Rated Forest States

Albuquerque, N. M.—Mention of New Mexico and Arizona as forest states would get a laugh out of the average person, because the popular fancy is that this section is part of the "Great American Desert," sprinkled with cacti and cowboys.

Yet figures of the logging division of the United States forest service disclose the fact that one-fifth of the total area of these states is timber, chiefly yellow pine. The total timbered area comprises 30,500,000 acres, estimated to contain 37,000,000,000 feet of saw timber and 68,000,000,000 cords of wood.

An unbroken stretch of yellow pine extends from the country west of the Elephant Butte dam in New Mexico to the rim of the Grand canyon and across into the Kaibab national forest.

Last year 988,000,000 board feet of lumber was taken from the two states.

Relics of Washington Given to Mount Vernon

Washington.—Antiques associated with George Washington's home at Mount Vernon are to be lived in it, are gradually being returned.

The Mount Vernon Ladies' Association of the Union, the organization which cares for the historic homestead and which has just held its annual meeting, also announced that its regent accepted an invitation to serve with the British ambassador at Washington and the American ambassador at London as an "ex-officio custodian trustee" of Sulgrave manor, the Washingtons' ancestral home in England.

Included in the articles restored to Mount Vernon this year are a dinner napkin used by Washington; a satin sleeve from a dress worn by Mrs. Washington, and a pair of the first president's spurs.

Hugged Wrong One

New York.—Slipping his arm about a blonde woman in a motion picture theater, Edward Pugh, twenty-nine years old, found himself in the grip of Edith Frey, jujutsu expert of the police department, who arrested him.

EARNS HIS LIVING DUSTING BILLIONS IN GOLD BULLION

Bill Smith Has Strangest of Many Strange Ways in Which New Yorkers Make Their Money.

New York.—Of the many strange ways which people have found of making a living in New York city, perhaps the strangest is that selected by Bill Smith. Besides being a porter with the Federal Reserve bank of New York, Bill is a champion duster, and confines his activities to gold bullion.

The gold stored in the underground vaults of the bank must be kept just as clean as the floors and office furniture in other parts of the building. Accordingly, it is dusted whenever the vaults are opened. This may be every month, every three months, or even every six months, depending upon how fast Uncle Sam spends his money.

On these occasions it is nothing for Bill to grasp his trusty duster, step into the vault and flick the gray coating from several billion dollars' worth of gleaming bars in an hour or two.

As a runner up for the laurels of New York's oddest job holder there is Walter Baugh, who finds the commercial possibilities in fishing tackle to his liking. Each morning at 5:30 Mr. Baugh may be seen marching through Battery park clutching a burden of fishing tackle and blood worms. He is tall, has only one eye and exes out a fair existence peddling rods, lines and bait to those followers of Izaak Walton who set out via Battery park.

Fancying neither fishing tackle nor dusting, there are other individuals who wrest the necessities of life and some of the luxuries, from the odds and ends abandoned by their fellow men. Some persons salvage waste paper from the streets, working first in the frat flushes of early dawn to beat the competition offered by the city street cleaning department. Their paper salvagings are carefully baled and sold, while bits of foil are rolled into balls and bring a higher price.

Others make it their business to stay close to the docks and pounce upon bits of cargo spilled when ships are unloading. Fruits and nuts they seize, broken pieces of cheese, or occasionally a bolt of cloth which has slipped undetected from some cargo sling. A leaking case of olive oil always brings to light several men with sponges and buckets.

Although confining their activities to the shore, these men have counterparts afloat. Those making a living from the waters do not fish. Seated in small boats, they drift about the harbor salvaging driftwood which is sold along Park avenue. Impregnated as it is with salt and chemicals from the harbor waters, the wood produces vari-colored lights in the drawing-room fireplaces of the wealthy.

New Haven, Conn.—There's a movie at Yale of sleeping sickness. It will be the nucleus of a library of films of various diseases.

Girl (dimply)—Money.—Washington Columns.

Worried for a Minute

"Oh, mother, the bank busted."

"What bank, child? Not the Sixth National?"

"No, my piggy bank!"

SHOULD HUSBANDS DO HOUSE WORK?

How Mrs. Dyer Solved the Problem.

Mrs. Mildred Dyer was lucky. She had a good-natured husband who helped her with much of her housework. Because she was in ill health for five years, it was often necessary for him to do this. But it bothered Mrs. Dyer. She felt that he had to work hard enough anyway. The time he spent in doing her work wastedied determined to find the road to better health.

She writes: "I think Lydia E. Pinkham's Vegetable Compound is simply wonderful. My health is better than it has ever been. I am getting stronger and gaining in weight."

She has solved her problem and her household is happier. The Dyers live at Redlands, Calif., Route A, Box 125.

How about you? Does your husband have to do your housework? No matter how willing he is, no woman feels comfortable about it. Perhaps you, too, will find better health through the faithful use of Lydia E. Pinkham's Vegetable Compound.

DEPARTMENT OF CONSERVATION
OF THE
STATE OF MICHIGAN

Lansing, June 10, 1926

NOTICE is HEREBY GIVEN, That the following described abandoned tax land, situate in the County of Charlevoix, and deeded to the State by the Auditor General under the provisions of Section 127 of Act 206 of the Public Acts of 1893, has been withdrawn from homestead entry by the Auditor General and the Commission of Conservation, acting jointly, as provided by Act 141 of the Public Acts of 1901, examined and appraised and will be placed in the market by offering the same at a Public Auction to be held at the Office of the County Treasurer in the County Courthouse in the City of Charlevoix, on Tuesday, the 3rd day of August, 1926, at nine o'clock in the forenoon, Central Standard Time, at which time it will become subject to purchase in the manner provided by statute.

In case of sale the deed conveying the same will contain a clause reserving to the State of Michigan all rights in any mineral, coal, oil or gas found lying or being on, within or under the said land, as required by Section 8 of Act 280 of the Public Acts of 1909, and also reserving to the People of the State of Michigan the right of ingress over and across any of said tract lying along any watercourse or stream, as also required by said Section 8, Act 280 of 1909.

DEPARTMENT OF CONSERVATION.

Village of Spring Harbor
Block No. 2. Lot No. 3.
Block No. 3. Lot No's 7, 8, 9.
Block No. 5. Lot No. 17.

William H. White & Company's Addition to Village of Boyne
Lot No. 9. E 50 feet of Lot No. 10; Lots No's 14, 24.

Township 33 North, of Range 6 West
Commencing on the west eighth line 4 rods north of southwest corner of se¼ of nw¼; east 9 rods two feet; north 66 feet; west 9 rods 2 feet; south 66 feet to beginning. Section 26. .20 acres.

Part of se¼ of nw¼, commencing at west eighth line 28 rods north of southwest corner; thence east 9 rods 2 feet; north 8 rods; west 9 rods 2 feet; south 8 rods to beginning. A. R. Crane's Addition unrecorded. Section 26.

Nw¼ of nw¼ also that part of sw¼ of nw¼ lying north of Charlevoix road and Ridge street of Chapman & Addis addition to Spring Harbor. Section 27, containing 30.00 acres more or less.

Part of east half of section, commencing on northwest side of Front street 628 feet; north 63 degrees 35 minutes, east of northwest corner of Cobb's addition; north 26 degrees 25 minutes west 171 feet to Pine Lake; south 63 degrees 35 minutes west 50 feet; south 26 degrees 25 minutes east 171 feet to Front street; north 63 degrees 35 minutes west 50 feet to beginning, except 40 feet railroad right-of-way. Section 34, containing .34 acres more or less.

Part of ne¼ of ne¼, comprising 16 rods east of southwest corner of Lot 44, Beardsley's second addition; east on north side of State street 3 rods; north 8 rods; west 3 rods; south 8 rods to beginning. Section 35.

Part of nw¼ of ne¼, commencing 19 rods east of southeast corner of Lot 44, Beardsley's second addition to Village of Boyne; thence east on north side of State street 3 rods; north 8 rods; west 3 rods; south 8 rods to beginning, Lot 7, Block A, Beardsley's addition (unrecorded); Section 35.

Part of nw¼ of ne¼, commencing 25 rods east of southeast corner of Lot 44, Beardsley's second addition, thence east on north side of State street 3 rods; north 8 rods; west 3 rods; south 8 rods to beginning. Section 35.

Part of nw¼ of ne¼, commencing 28 rods east of southeast corner of Lot No. 44, Beardsley's second addition, east 3 rods on north side of State street; north 8 rods; west 3 rods; south 8 rods to beginning. Section 35.

Part of nw¼ of ne¼, commencing 31 rods east of southeast corner of Lot 44, Beardsley's second addition to Village of Boyne; thence east on north side of State street 3 rods; north 8 rods; west 3 rods; south 8 rods to beginning. Lot 11, Block A, Beardsley's (unrecorded) addition. Section 35.

Part of nw¼ of ne¼, commencing 40 rods east and 38 rods south of north quarter post; east 8 rods; south 12 rods; west 8 rods; north 12 rods to beginning, being Lots 23, 24 and 25, Ward & Knowles addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 40 rods east and 30 rods south of north quarter post; east 8 rods; south 8 rods; west 8 rods; north 8 rods to beginning; Lots 26 and 27 Ward & Knowles addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 52 rods east and 10 rods south of north quarter post; east 8 rods; south 4 rods; west 8 rods; north 4 rods to beginning. Lot 3, Ward & Knowles addition (unrecorded) Section 35.

Part at nw¼ of ne¼, commencing 60 rods east and 1032 feet south of north quarter post; north of State street, east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Sec. 35.

Part of nw¼ of ne¼, commencing 60 rods east and 768 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning, being Lot 2, Geo. A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 760 feet south of north quarter post; east 8 rods; north 8 rods; west 8 rods; south 8 rods to beginning, being Lots 8 and 9, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 708 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning, being Lot 7, Geo. A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 696 feet south of north quarter post; east 8 rods; north 12 rods; west 8 rods; south 12 rods to beginning. Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 684 feet south of north quarter post; east 8 rods; south 12 rods; west 8 rods; north 12 rods to beginning. Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 672 feet south of north quarter post; east 8 rods; south 12 rods; west 8 rods; north 12 rods to beginning. Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 660 feet south of north quarter post; east 8 rods; south 12 rods; west 8 rods; north 12 rods to beginning. Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 648 feet south of north quarter post; east 8 rods; south 12 rods; west 8 rods; north 12 rods to beginning. Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 636 feet south of north quarter post; east 8 rods; south 12 rods; west 8 rods; north 12 rods to beginning. Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 624 feet south of north quarter post; east 8 rods; south 12 rods; west 8 rods; north 12 rods to beginning. Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 612 feet south of north quarter post; east 8 rods; south 12 rods; west 8 rods; north 12 rods to beginning. Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 600 feet south of north quarter post; east 8 rods; south 12 rods; west 8 rods; north 12 rods to beginning. Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 588 feet south of north quarter post; east 8 rods; south 12 rods; west 8 rods; north 12 rods to beginning. Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 576 feet south of north quarter post; east 8 rods; south 12 rods; west 8 rods; north 12 rods to beginning. Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 564 feet south of north quarter post; east 8 rods; south 12 rods; west 8 rods; north 12 rods to beginning. Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 552 feet south of north quarter post; north of State street, east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Sec. 35.

Part of nw¼ of ne¼, commencing 60 rods east and 548 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 544 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 540 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 536 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 532 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 528 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 524 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 520 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 516 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 512 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 508 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 504 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 500 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 496 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 492 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 488 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 484 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 480 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 476 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 472 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 468 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 464 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 460 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 456 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 452 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 448 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 444 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 440 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 436 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 432 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 428 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 424 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 420 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 416 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 412 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 408 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 404 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 400 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 396 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 392 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 388 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 384 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 380 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 376 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 372 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 368 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 364 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 360 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 356 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 352 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 348 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 344 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 340 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 336 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 332 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 328 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 324 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 320 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 316 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 312 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 308 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 304 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 300 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 296 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 292 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 288 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 284 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 280 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 276 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 272 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 268 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 264 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 260 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 256 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 252 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 248 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 244 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 240 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 236 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 232 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 228 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 224 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 220 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 216 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

Part of nw¼ of ne¼, commencing 60 rods east and 212 feet south of north quarter post; east 8 rods; north 4 rods; west 8 rods; south 4 rods to beginning. Lot 3, George A. Smith's addition (unrecorded). Section 35.

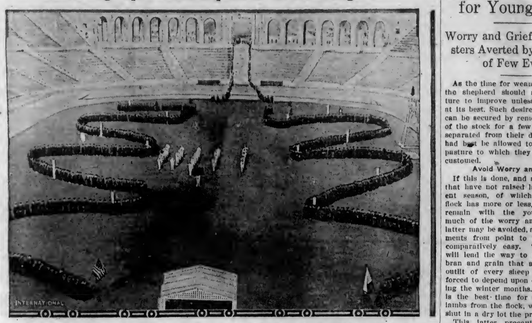
Marching Up to Get Diplomas in Los Angeles



Students of the University of Southern California, in Los Angeles, marching up to the stand where they were given their degrees.

Northern Illinois Suffers From Cloudburst

Northern Illinois, especially in Rockford and vicinity, was hard hit by a cloudburst which rapidly swelled the streams and caused floods that did a lot of damage. The illustration shows a scene on the state highway between Rockford and Beloit, Wis.

Plot to Kill New Woman Mayor

Seattle police said they had been informed a plot to assassinate Mrs. Bertha K. Landes, who has just been installed as mayor of that city. Mrs. Landes, who is the wife of Dean Henry Landes of the University of Washington, is here seen with her predecessor in office, Dr. E. J. Brown.

All Tars Welcomed to This Club

Group of Argentine sailors of the battleship Moreno, guests of the National Navy club of New York city. They appear to be very much satisfied with the reception accorded them. The National Navy club extends its hospitality to sailors and marines of all nations.

FROM FAR AND NEAR

Pennsylvania has more hunters than any other state, judging by the number of licenses issued.

Mentor, Ky., with a population of 100, has 40 musicians, an average of two to every home.

Nearly $2,000,000 worth of knitted cotton undershirts, the only underwear to be imported into the country to any extent, was received into the Philippines in the past year.

Promissory notes and doubts contracts were in existence in Egypt in 400 B. C.

If exposed photographic films or plates are kept dry and away from light, they can be kept indefinitely before development.

The proposed Colorado river development will be one of the greatest engineering undertakings ever attempted by the government.

About Even

"I don't think much of men, if they are worth anything they don't marry, and if they do marry they are not worth anything.—Wiener Kleines Witzblatt, Vienna.

Speed the Day

The higher agricultural education should in course of time lead to such a diffusion of useful knowledge in gardening that the cantaloupe need not necessarily taste of the pumpkin.—London Tit-Bits.

Improve Pasture for Young Lambs

Worry and Grief of Youngsters Averted by Presence of Few Ewes.

As the time for weaning approaches the shepherd should allow the pasture to improve unless it is already at its best. Such desired improvement can be secured by removing a portion of the stock for a few weeks. When separated from their dams the lambs had best be allowed to remain in the pasture to which they have been accustomed.

Avoid Worry and Grief.

If this is done, and a few old ewes that have not raised lambs the present season, of which nearly every flock has more or less, be allowed to remain with the youngsters, very much of the worry and grief of the latter may be avoided, and their movements from point to point rendered comparatively easy. The old sheep will lend the way to the trough of bran and grain that are part of the outfit of every sheep raiser who is forced to depend upon cured feed during the winter months. The morning is the best time for separating the lambs from the flock, which should be about in a dry lot the previous evening. This latter precaution will save much inconvenience from swelled udders of the ewes, which should be kept on scant pasturage for several days to reduce the secretion of milk. A careful watch should be kept over them, and where appearances indicate the approach of overdistension of the udder, it should be promptly emptied by hand. In the majority of cases the precaution against accumulation of milk will be all that is necessary. Some shepherds advise that the lambs be turned with their mothers after one day's separation, remaining only long enough to remove the accumulated milk.

Practical in Small Flocks.

Such a course is practical, however, only in small flocks, and even with these has its disadvantage in prolonging the time required for becoming reconciled to separation on the part of both dam and offspring. When thoroughly dried off the ewes should be given the best possible opportunity for thrift to insure the return of the coupling so necessary for the reproduction of the species.

Carefully Keep Cattle Yards Free of Rubbish

Cattle commonly show a tendency to pick up and swallow objects other than food which they may happen to find in yards or in their feed.

This habit is not always harmless and especially not when the objects are more or less pointed and of metal. Such foreign bodies may consist of pieces of wire, nails, hairpins, hairpins and so on.

After being swallowed they are detained in the second stomach—the stomach and by the combined motions of the latter and the diaphragm, they are likely to become pushed forward through the wall of the stomach and through the diaphragm finally to become arrested by the structures of the heart.

On their way and when lodged in the heart or its surrounding sac, they give rise to serious septic processes which eventually cause the death of the animal concerned. Prior to death the animal shows fever, grunts and moans when moving, the veins of the neck stand out prominently and a soft doughy swelling of the throat and dewlap is likely to form.

There is no help for such cases, but care that cattle yards are kept free of rubbish, pieces of wire and the debris of old buildings and fences is an effective measure to prevent this deplorable accident. An iron magnet is a rather common one it always pays to give the matter attention.

Sows Should Be Deloused

When the sows are confined previous to farrowing, they ought to be deloused. The same disinfectant that kills the lice will generally do for washing off the udders so the pigs will not draw in worm eggs with the first milk. The places where the lice and their eggs are thickest are in the crevices behind the head, in the wrinkles near the hocks and in the region just back of the forelegs. They are thickest here because the pig cannot rub here and hence she enjoys being scratched in these spots.

Save Chilled Lambs

A young chilled lamb can often be saved by taking it to the fire and plac-ing it in water as warm as the elbow can bear, after which it should be rubbed dry and placed near the fire, according to sheep scientists. Many a lamb which was thought dead from cold has been revived by this method. A teaspoonful of its dam's milk will help if the lamb is weak.

Pruning Peach Trees

The question, "How shall I prune my peach trees after the crop has been destroyed?" arises all too many times. In general, the answer is that such trees should be heavily pruned. The upright growing branches can be cut back to a strong lateral. On trees that become 10 to 12 feet in height, this cutting back could be as much as a half to six feet. The top of the tree will then be filled with too-thick a growth of young wood during the summer and half or more must be thinned out during the pruning the following winter.

Way to Feed Chickens

Poultrymen at the college of agriculture, University of Illinois, have found that methods of feeding chickens may vary, provided the ration meets certain essential requirements. Flocks may be fed on mashless rations, on all mash and no scratch grain or on a combination of grain and mash with good results, provided the minimum requirements with respect to each nutrient are furnished.

RED MEET'S QUEEN

Miss Lily B. Tully, of the Puyallup tribe, was chosen queen of the festival at the recent convention of the Northwest Federated Indian Tribes in Everett, Wash.

MRS. W. B. HAMILTON

An exclusive picture of Mrs. William B. Hamilton, prominent society woman of San Francisco, who has been selected by a committee of five thousand women of the coast city as their candidate for congress from the Fourth California district to succeed Mrs. Julius Kahn. Mrs. Hamilton is an avowed dry and the wife of the collector of the port.

Safety-First Drive of Railroad Employees

General view of the parade of railroad employees as they appeared en route to the Sunnyside railroad yards in Long Island, where they started a safety-first drive with a mass meeting.

Arctic Mystery Not Yet Solved

Test of Beef Left by Franklin Expedition Shows Members Not Poisoned.

London.—A tin of beef has revived interest in a subject that thrilled the world 75 years ago. It was at about that time that the British admiralty and the world at large became convinced that Sir John Franklin's expedition was hopelessly lost in the Arctic seas. Searching parties that braved the blizzards of the North, first to take assistance to the heroic band of men marooned in the iceflows and last, when all hope had been abandoned, to bring back some word of the fate that had befallen them, returned with a few relics found scattered on the fields of ice at Beechey Island. Among the salvaged articles were some cans of beef.

It was thought that when the sealed top of the receptacle containing the "bully" beef on which Franklin and his companions lived was lifted a possible reason for their death might be disclosed. Could it be that the contents of the can had not come up to the required standard and that the explorers had succumbed to its poison? Professor Benchey of Liverpool was elected to solve the mystery. The tin was cut and the meat removed and examined. It was found in as sound a condition as when it left the packers' hands 81 years ago. If the rest of the provisions sent with the expedition to feed the men for a period of three years were as fresh as this beef, another theory regarding the "lost expedition" has been exploded.

It was in 1845 that the sturdy ships, the Terror and the, Erebus, set forth from England to discover the northwest passage, never to return. They were under the command of Sir John Franklin, a skilful leader.

Clue Fourteen Years Old.

Many theories have been advanced as to what befell his vessels and their crews. Not until 14 years later was a clue found that permitted those in command of the searching parties to establish to a degree the course taken by the expedition. It was an admiralty form placed under a cairn on Point Victory, around the margin the words being written:

"April 25, 1848.—H. M. ships Terror and Erebus were deserted on April 22, five leagues N. N. W. of this, having been beset since September 12, 1846. The officers and crew, consisting of 105 souls, under the command of Captain F. R. M. Crozier, landed in lat. 60° 37' 42" N., long. 90° 41' W. This paper was found by Lieutenant Irving where it had been deposited by the late Commander Gore in June, 1847. Sir John Franklin died on June 11, 1847, and the total loss by death in the expedition has been to this date nine officers and fifteen men."

Silence and the ice sea henceforth wrapped them in eternal mystery. Of the ships not even a broken spar was found by the searchers. A few skeletons indicated where some of the crew had fallen. Eskimos told of having seen straggling figures making their way across the frozen fields and of abandoned provisions.

Sir John Franklin in 1845, at the age of fifty-nine, had made a reputation as a navigator and an explorer. At the age of ten he first had sight of the sea from the shore of Saltfleet, England. He determined to be a sailor. Hoping to cure him of his desire, his parents permitted him to embark on a merchantman bound for Lisbon. Far from being the end, it was the beginning of his seafaring career.

Adventure followed adventure. On board the Polypheus he took part in the battle of Copenhagen; in the Investigator he learned the science of navigation and became expert in making maps; while exploring the coast of Australia he was shipwrecked. He was in the battle of Trafalgar, in the blockade of Flushing and the attack on New Orleans.

Meanwhile, the British admiralty's interest in the Arctic regions, which had been dormant for half a century, began to revive under the leadership of Sir John Barrow, secretary of the navy. An expedition was organized under the command of Captain Buchan of the Dorothea, in which Lieutenant Franklin was invited to join, taking charge of the Trent. It ended unfortunately for the Dorothea, and Franklin returned, conveying a damaged ship.

Tried a Third Time.

All England was afire with the desire to know what lay to the north and west of Hudson bay. Maps indicated two rivers, the Mackenzie and the Coppermine, but of the indentures of the coast between their estuaries nothing had been learned. The following year Franklin was ordered to traverse the land lying between Hudson bay and the Arctic sea. Three years of hardship followed, but the party returned triumphant, having descended the Coppermine to its mouth.

When next he sailed, he was Commander Franklin. That time he penetrated still further, reaching Mackenzie bay. The commander himself sailed along the unfriendly coast, while Doctor Richardson was detailed to journey in an eastwardly direction, exploring the coast to the mouth of the Coppermine. This second Arctic voyage was not to be followed by another until 26 years later, when he understood, the one that was to prove fatal.

Franklin returned to England from Tasmania, where he had been lieutenant-governor. Since his last effort to establish the northern contours of the American continent, important additions had been made to his own findings by others. Only 300 miles lay between him and the fulfillment of his life's dream—the discovery of the northwest passage. He sought the command of the expedition under consideration by the admiralty. His wish was granted.

His ships, the Terror and the Erebus, were commissioned by his former mates, Captain Crozier, who had commanded the Terror in her Antarctic trip, was second in command. Each ship carried 67 officers and men. They were provisioned for three years. Taking every precaution, Franklin ordered them equipped with steam power and screw propellers.

It was agreed between the admiralty and Franklin, at the latter's suggestion, that he should have his choice of two alternatives. He was either to pass through and beyond Lancaster sound to Cape Walker and thence southward, in the direction of the American coast, or, that being impossible to carry out, he was to attempt a northerly course through Wellington channel.

The little company reached the coast of Greenland by July. Franklin's last letter to his wife was written from Disco bay. It was full of good cheer and they expected soon to be on their way. Five weeks later they were seen moored to an ice berg, delayed by frozen seas and fogs, when they had hoped to be well on their way to Lancaster sound.

Effort to Escape Afoot.

It was at about that time that they were last seen by a whaler, ten days after they had left Disco. "All well and in remarkable spirits." Is the report of the whaler's log made of them.

From then on the expedition was wrapped in the silence of the North.

Evidence found in later years leads to the belief that, leaving winter quarters at Beechey island in 1846, the expedition skirted its course down Peel sound. The voyage was apparently a slow one and came to an end when they were "hoses since September 12."

The evidence pieced together shows that the following year they must have traveled further south into the channel named for the explorer, where they came into a wider stretch of ice and water. Again their progress was halted and for 587 days they were locked in an icy prison. Many died and others made a vain desperate dash for freedom. Relics picked up in later years told of the horrors of their march, but apparently bad beef was not one of them.—New York Times.

Railroad in Alaska Boosts Tourist Trade

Anchorage, Alaska.—The Alaskan railroad was constructed to develop the assets of Uncle Sam's northern possession, but it also has brought satisfaction to the road's officials from another source—tourists.

The route of the railway from Seward, on the Pacific ocean, to Fairbanks in the interior, passes through one of the most beautiful sections of the northland. Each year has brought an increasing number of visitors.

The entire trip, with the exception of 40 hours on the Gulf of Alaska, is made through what is known as the Inside passage, a land-locked route, which is described as being as smooth as a mill pond.

The trip from Seattle to Fairbanks and return takes three weeks. From May 15 to September 15 there is no snow, but abundant sunshine.

Only Middle-Aged Dance in London's Night Clubs

London, England.—Gray heads, or heads that would be gray if nature had not been assisted, are so numerous in London night clubs that newspapers generally agree with the statement of the late Sir Squire Bancroft that the "young-man-about-town" no longer exists in England.

The Kit-Cat and other well-known London night clubs are the haunts of the middle-aged and aged. Practically none of the dancers is really young. This is true of the women as well as the men.

Youth has its fling in the popular dance halls where the cost is less and it is not necessary to be so formally dressed.

LEADS NOVEL TOUR

Thirty-eight artists, headed by Dudley C. Watson of the Chicago Art Institute, will travel 2025 miles beyond the Arctic circle on a painting tour of the northern polar regions. Much of the way they will go by airplane. Above is a portrait of Mr. Watson.

DIGS UP $200,000 IN GOLD COINS CONCEALED ON FARM

Kentuckian Unearths Treasure Buried by His Father During the Days of the Civil War.

Demopolis, Ala.—Aided by old papers his father left him, Gayus Whitfield of Middleboro, Ky., has unearthed buried gold valued at more than $200,000 on the Whitfield farm near here. The discovery of the treasure came as the result of a search which began in the spring.

Directions for locating the gold were contained in papers left to his son by C. Boaz Whitfield, member of one of the oldest and most aristocratic families of Alabama and descendant of the pioneer general, Nathan Bryan Whitfield.

When Gayus Whitfield began his search 85 negroes were employed to uncover an old boundary stake on the Shady Grove farm, 18 miles from Demopolis, near Jefferson. For a week the large force worked without results, but later a large cache of gold coins was discovered. It consists of $20 gold pieces, minted in 1850 and before, which were buried by the wealthy Boaz Whitfield in Civil war days.

There are eight heirs who may put in claims for the gold, all of them daughters and sons of the four Whitfield brothers, born in Civil war days, three sons of Nathan Whitfield.

Other gold coins had been found on the old Whitfield place prior to the discovery, it is learned, but the matter of instituting an active search for buried treasure was never given much attention by the Whitfield family until the old key left by C. Boaz Whitfield was found in Kentucky.

—Citizens here express the belief that Boaz Whitfield buried the gold to prevent his seizure by Union forces. Similar instances are recalled by older inhabitants, but in no case is so large an amount involved.

10 Months' Auto Taxes Increase $25,000,000

Washington.—Taxes collected by the government on automobiles in the first ten months of the fiscal year ending April 20, 1926, were more than $25,000,000 in excess of the amount collected during the corresponding period of last year, according to compilations issued by the internal revenue bureau. Figures from 12 of the heaviest tax-paying states showed $96,100,272.22 for 1926 and $72,008,173.45 for 1925.

New York's automobile taxes for 1926 were $2,257,363.86, compared to $1,370,689.60 for 1925. Michigan pays the largest automobile tax in the country, the figures being $72,180,057.46 for 1926 and $54,035,725.23 for 1925.

New Yorkers paid less on cigars and cigarettes for the ten months ending April 20, 1926, than in 1925, the figures being $4,962,770.49 in 1926 and $5,790,831.06 in 1925.

The Cuckoo Becomes a Dough-Dough Bird

ATWATER KENT IGNITION *for Fords*

Thousands of Ford owners have found that the Atwater Kent Type LA Ignition System for Fords lasts longest, is least trouble, means a smoother running motor, easier starting, picks up quicker and gives more power.

Of the same general character as the Atwater Kent ignition Systems furnished as standard equipment on many of America's foremost cars, it is a complete scientific ignition system with twenty-six years' experience in making scientific ignition systems back of it.

As carefully made as an Atwater Kent Radio Set.

Installed in less than an hour.

Everlastingly dependable.

Type LA
Price
$10.80
Including Cable and Fittings

Wood Best Insulator

The bureau of standards says wood is the best insulator for ice. However, it is as impossible to keep an ice box cold without putting the ice in as it would be to keep a stove hot without burning coal. Of course, an ice box should be so constructed as to prevent the heat from the outside getting into the interior of the box.

Sidetracked

"Did you pop the question last night?"

"No; I got to talking oil burners with her father and before I knew it she went out."—Cincinnati Times-Star.

First Floor, Please

A clerk who has charge of the garden implement department in a downtown store was approached the other day by a customer, who asked whether he had corn knives for sale.

"Yes, ma'am, just a moment, please," replied the clerk, who returned shortly with a large evil-looking blade which he assured her had a keen, dependable edge.

His customer looked somewhat startled. "My goodness," she exclaimed, "how can I trim my corns with that battle ax?"

"Wrong department. First floor, please."—Indianapolis News.

CORNS

In one minute the pain is Gone!

Gets at the cause of corns

Dr. Scholl's Zino-pads work like magic, because they remove the cause—pressure or rubbing of shoes. The pain goes instantly. Amateur paring or burning with "drops" (acid) is dangerous—and doesn't remove the cause. Zino-pads are safe, sure, scientific, healing. They protect while they heal. Get a box at your druggist's or shoe dealer's today.

BOON TO U. S. TRADE

The year 1926 marks the fiftieth anniversary of close association in the way of official relations between the United States and Hawaii. These relations commenced in 1876 with the reciprocity treaty between Hawaii and Uncle Sam in which the former came under the benefits of the American protective policy, according to Gov. Farrington, who writes of the islands under the title, "America's Outpost in the Pacific." Speaking of Hiwaii's trade, he says:

"Today the total amount of trade between Hawaii and the United States amounts to $172,000,000 annually. The total value of products of Hawaii shipped to the mainland of the United States in the twelve months ending December 31, 1925, amounted to $99,748,046. The merchandise shipped from the mainland to Hawaii in the same period totaled in value $72,952,949. Sugar and pineapple constitute the main source of Hawaii's prosperity. There are forty two cane sugar plantations in the territory, carrying 48,437 people on their pay rolls. The raw sugar sold in mainland markets for the calendar year 1925 was valued at $63,300,491. The laborers on the sugar plantations are largely Filipinos, totaling in round numbers 24,000; Japanese number 12,000; the remaining employes being about equally divided among American citizens coming from the mainland, Chinese, Portuguese, Porto Ricans and Hawaiians."

PRIMARIES FAIL

Looking over the field of candidates, in this state, who have already asked for preferment at the hands of the people in the coming primaries, and to those threatening to run as independents, for offices ranging from minor political positions to those of United States congressmen and senators, most of us find our gorge rising at the preposterous assumption on the part of some of this human material.

We regretfully begin to realize that it is our present system of primaries, once heralded as a cure-all for every ill in politics, which makes it possible for this spume of ignorance and sublimated mediocrity to rise up and demand that positions of trust, which requires brains, ability and trained administrative capacity, be placed in their inept care.

The political boss, the ward heeler and the scheming politician are making no outcry against the present primary system. They have no desire to return to the days of open conventions, where as leaders, viewed by the spotlight of pitiless publicity, they were forced from necessity to pick candidates who possessed qualifications which would attract public attention and secure popular approval.

They find the workings of the primary game much simpler. Certain to their knowledge that only a small part of the vote will come out in the primary, and that that vote is represented mainly by tried and true henchmen, the political leaders are assured, in advance, of the nomination of their pliant tools through the so-called popular vote of the people.

With our national, state urban and municipal problems becoming more complex and obstruse each year—a situation which demands that these problems be handled by men of the highest attainments—are we willing to perpetuate a system of selecting men to represent our interests, most of whom we know to be of peanut mentality? That the people will not vote for them in either party is evidenced by the steady shrinkage of the vote at the fall elections.—St. Louis Post-Dispatch.

COMMENT.

—A scientist reports finding a tree in the tropics, that when tapped, produces milk. Now if he can only find one that will produce beer under the same circumstances, think what a reforestation program we could put on in New York and New Jersey?

—Sale of the new 3.75 per cent malt tonic has been declared illegal in Kentucky. Having been used to something better, Kentucky naturally resents the appearance of a weak product of this kind.—Kansas City Star.

—One thing we can never understand about vaudeville is why a dancer thinks she is expected to sing and a singer is never content unless she dances.—Philadelphia Inquirer.

—According to press reports Houston, Texas, recently imported 85,000 pounds of cork from Spain. Now the question is, what are they going to do with it.

—An idea of a Polish courtesy may be gained from the soldiers who told their general he could either shoot himself or let them do it.—Indianapolis Star.

—The old fashioned man who used to get mad when you criticised his dog now has a son who gets furious if you say any thing against the car he is driving.

—Running in a Pennsylvania primary, according to the Senate investigation returns, rs about as expensive as living at a fashionable seaside resort.

—According to Gov. Pinchot the Pennsylvania primary cost an awful lot of money and the results prove to him that it wasn't worth it.

—It is said that man can now fly four times as fast as the birds but the birds still have it on him when it comes to engine trouble.

—Ezra Tuttle, who used to be the star football player of his school, now has a job hi-jacking on a prominent road out of Chicago.

—If it be prohibition that has checked the coming of British lecturers, that is a strong point in its favor.—PittsburgTimes

—Uncle Billy Gamster says a lot of fellows would be all right if their initiative was as strong as their referendum.

THE VOICE OF THE LIBERTY BELL

This is one of the two new official posters of the Sesqui-Centennial International Exposition, opening in Philadelphia June 1 to celebrate 150 years of American Independence. The Exposition will continue to December 1. Dan Smith, the artist, has symbolized the epoch in history which the tolling of the Liberty Bell in Independence Hall, July 4, 1776, marked and has depicted the growth of the United States from the original thirteen states, represented by the thirteen stars which emerge from the mouth of the Liberty Bell.

Poles Vary in Attraction

While the north magnetic pole attracts the north end of the needle and repels the south end, the south pole repels the north end and attracts the south end. This is true no matter in what part of the earth the needle is placed, and there is no reversal of the needle when the magnetic equator is crossed.

Pasturage in Marsh

Romney marsh in Kent, England, is protected by a seawall of great thickness and the guardianship and drainage of the swamp is in the hands of a special ancient corporation. The level lands afford pasturage for vast flocks of sheep which form the principal industry of this section.

STATE OF MICHIGAN—The Circuit Court for the County of Charlevoix—In Chancery.
William J. Gallagher, Plaintiff, vs
Samuel Shaw and his Unknown Heirs, Devisees, Legatees or Assigns, Defendants.

Suit pending in the Circuit Court for the County of Charlevoix, in Chancery, at the City of Charlevoix, in said county, on the 22nd day of June, A. D. 1926.

In this case it appearing from affidavit on file that the defendant Samuel Shaw is not a resident of this state, and that it is not known in what state or country he resides, and that the names and residence of his heirs, devisees, legatees or assigns are unknown.

On motion of A. L. Fitch, attorney for the said plaintiff, it is ordered that the said Samuel Shaw, de endant and his unknown heirs, devisees, legatees and assigns, cause their appearance to be entered in this cause within three months from the date of this order, and in case of their appearance they cause their answer to the plaintiff's bill of complaint to be filed, and a copy served on said attorney for the plaintiff within fifteen days after service on said defendants of a copy of said bill and notice of this order, and that in default thereof, said bill be taken as confessed against said defendants.

And it is further ordered, that within forty days, the plaintiff cause notice of this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in said county, and that publication be continued therein at least once in each week for six weeks in succession and that said plaintiff cause a copy of this order to be mailed to said defendants at their last known postoffice address by registered mail with postage thereon fully prepaid, and demand a return receipt therefor, or that plaintiff cause a copy of this order to be served on said defendants personally at least twenty days before the time herein prescribed for theappearance of said defendants.

Said bill of complaint is filed to quiet title to the following described parcel of land situate in the Township of St. James, in said county, namely: Lot one of Section 23, Town 30 North, Range 10 west.

"When you reach the lake call me"

Use long distance

When you leave for a vacation trip, those who remain at home look eagerly for word that you've reached your destination safely. Relieve their anxiety with a Long Distance call. Nothing will give them greater satisfaction than your own voice.

Long Distance rates are remarkably low. And on "Anyone" calls, after 8:30 at night they are approximately half the day rate.

An "Anyone" call is a call on which you will talk with anyone who answers the telephone.

USE LONG DISTANCE

MICHIGAN BELL TELEPHONE CO.

Artistic Errors

Oh, those artists again! They picture Cupid as bearing a weapon that wouldn't make an impression on a country bird, even if he could hit one—which he couldn't—and everybody knows who knows anything about love at all, that Cupid's weapon is a high velocity pump gun of outrageous caliber that screens 29 bits out of 30.—Indianapolis Evening Times.

How to Make a Poem

We should manage our thoughts in composing a poem as shepherds do their flowers in making a garland; first select the choicest and then dispose them in the proper places, where they give a luster to each other; like the feathers in Indian crowns, which are so managed that every one reflects

Power of Vibrations

A Boston violinist says he can put out a flame with the vibration of his fiddle. But that's nothing. A saxophone slightly off key can put out an entire orchestra.—Cleveland Plain Dealer.

"We Serve Michigan"

Building Up Markets

THE constituent lines of the Michigan Railroad Association will expend nearly $25,000,000 this year for additions and betterments to the respective properties. These will provide for greater safe-guards to human life, more comfort for the traveling public, increased facilities and better freight service.

Michigan Railroads may justly claim more than their modest slogan—*We Serve Michigan.* They have contributed to the upbuilding of the industries of the Commonwealth, as perhaps no other group of rail lines in America has done. Two decades of tremendous industrial expansion justified this far-sighted policy of the railroads.

In encouraging industrial up-building, the railroads have also, in a measure, created a Home Market that absorbs the bulk of the produce of our farms, orchards, gardens, etc., right at home. So true is this that with increased production, the railroads are annually hauling farm commodities less and less. All of these—except the hay crop—are consumed at home.

THIS tremendous Home Market is the ideal market. But the expansion policy means more. It has created an outlet for similar products grown in other states. The track market at Detroit, for instance, handles 40 different perishable commodities from the cars direct to the dealers—a single transfer only. To illustrate: Fresh tomatoes are found at the green grocers for seven months in the year, thanks to expedited service and the refrigerator car. Shipments are made from Old Mexico and five southern states before the Michigan crop has matured. This is so for the entire list of fruits and vegetables.

With our present railroad system the average wage earner of today enjoys a far wider range of delicacies on his table the year round than did the Kings and Nobles of Europe of a century or more ago.

THE Michigan Railroad Association, then, takes justifiable pride in announcing its program of improvements and betterments for the current year which will further aid the state's industrial advancement, give even greater importance to the Home Market, and contribute still more towards raising the standard of living of all the people.

NEW PALACE THEATRE

Attractions for Coming Week

Friday, July 2nd—

Bebe Daniels in "Miss Brewster's Millions." The biggest, fastest and funniest society comedy Bebe has ever made; with Warner Baxter and Ford Sterling. Also Pathe comedy, "Uneasy Three."

Saturday-Sunday, July 3-4—

Douglas MacLean's latest picture. "That's My Baby." More fun than a circus. Yes, sir! "That's My Baby" is an uproaring farce with a riotous auto-airplane chase. Extra—Educational comedy, "Yes, Yes, Babette."

Monday-Tuesday, July 5-6—

"Tramp, Tramp, Tramp," with Harry Langdon. If laughs were worth a million dollars, it would cost you a million to see "Tramp, Tramp, Tramp." His laughs are worth a million but it won't cost you a dollar. That's the way Langdon does things; our Harry. Seven reels that spin laughs so fast, you think its the first reel when its really the last. Extra—Pathe comedy, "What's the World Coming To." Also Felix the Cat "Eats are West"

Wednesday-Thursday, July 7-8—

"The Wise Guy," with Mary Baxter, James Kirkwood, Betty Compson, Geo. F. Marion, Mary Carr and Geo. Cooper. Made by the man who gave you "The Sea Hawk" and "Black Oxen" and better than either. Fox News Reel. Extra—Educational comedy "Mr. Cinderella."

—MAJESTIC THEATRE—

Sunday-Monday, July 4-5—

Tom Mix in "Tony Runs Wild." The most rugged scenery in America is shown in "Tony Run's Wild," starring Tom Mix and his famous horse Tony. Extra—Educational comedy "Wireless Lizzie."

THE BELVEDERE CLUB

With the opening of the resort season at hand managers of the big summer hotels have been busy for weeks putting their places in shape preparatory to entertaining guests who find Charlevoix the ideal place in which to spend their outing.

In connection with this the management of the famous Belvedere on the grounds of the Belvedere Club have kept abreast of the times making improvements by painting and redecorating their big building throughout and adding conveniences and betterments for the comfort and pleasure of their guests until now there is but little more that can be done to improve the property. Aside from the painting and decorating program mentioned extensive improvements have been carried out in the way of a complete water system, both hot and cold, throughout the entire building and many new bath rooms added to those formerly in use.

New rooms have been added and all former rooms have been artistically decorated and in this the work presents a most attractive appearance in which the color schemes are artistic features—a variety of colors being presented in the scheme—rose, peach, apple green and orchid predominating.

Some change has been made in the personnel of the staff organization this season all of which members think will be a decided improvement in this department of the big hotel. Mrs. Frank-lin C. Sears will retain the position of manager the same as in recent years and has aptly demonstrated her ability to successfully manage the organization a work in which she ranks A1 in efficiency. The new members of the office force are Miss Ivy L. Johns as bookkeeper and private secretary to Mrs. Sears, she came from Toronto Summit Golf and Country Club, and Mr. M. E. Deffenderfer of Detroit, who has had extensive experience and association with high class metropolitan hotels such as specially fits him for his position at the Belvedere—that of chief clerk and executive in the front office.

A change has been made this year in the musical members of the organization and this season a six-piece orchestra composed of musicians from Iowa State and Drake Universities will entertain ensemble and with instrumental solos. The members of the orchestra have but recently closed a successful winter season with the Des Moines Grant Club one of the five best clubs in the state of Iowa. Professor Arthur D. Brown, violinist and instructor in music at the Iowa State University is in charge of this branch of Belvedere service.

Recent arrivals at the Belvedere are Mrs. C. W. Northrup of Evanston, Ill., Mrs. Ernest Roberts of Hollemore, Md., R. E. Olds and party composed of Mr. and Mrs. C. J. Rouser and Mrs. S. E. Sheets, Ludsing, Messrs. James and John Boys and A. E. Mitchell of Grand Rapids.

Monday, July 5th, the Belvedere will serve a Table d'Hote luncheon at the noon hour and Table d'Hote dinner from 6:00 until 7:30 p.m. the price being placed at $1.00 and $1.50 respectively.

Local Charlevoix friends of the Belvedere and out of town visitors will be welcome.

Mrs. Ida R. Lewis

Funeral service for the late Mrs. Ida R. Lewis who passed away June 27th at her home in Hayes township, where she resided for a long term of years, was held Tuesday afternoon, Pastor Herman Burns D.D., of the local Baptist society officiating.

Her maiden name was Miss Ida Rounds. She was born in Kent county, this state September 22, 1871 and at the time of her death in her 54th year.

Mrs. Lewis was married twice, her first union being with Mr. Peter Rose, who passed away about eight years ago. One daughter was the result of this union, Mrs. Wm. Gregory also of Hayes township. Something over a year ago she married Mr. Jones Lewis by whom she is survived; also the daughter above mentioned, Mrs. Wm. Gregory and four sisters, Mrs. Middleton of Fowlerville, Mrs. Johnston of Dexter, Mrs. Bradt of Detroit and Mrs. Beacroft of Chicago, and two brothers, William Rounds of Detroit and Ernest Rounds of Saskatchewan, Canada.

Copper 5,000 Years Old

Copper vanity cases, a copper hand mirror, copper razors, tools, fishhooks and hairpins have just been found in Mesopotamia by scientists excavating the five thousand-year-old palace of the kings of Kush. Copper is truly the everlasting metal.

Special chicken dinner Sunday, July Fourth—Betty Shop.

—PERSONALS—

John A. L. Gaister, of Petoskey, was a business visitor here last Friday.

Guy Olney, of Reed City, is spending a short vacation with relatives here.

Mr. Asa Loveday, of Lansing, was a business visitor in this city Wednesday.

William T. Driggett is spending some time this week at St. James on a business trip.

A girl baby was added to the family of Mr. and Mrs. Earl A. Young last Friday, June 24th.

Walter Peters and family of Chicago, are occupying the Benj. Campbell cottage on Park-av. for the summer.

Dr. and Mrs. A. Lawson Baxter and two daughters, of Central Lake, were Charlevoix visitors early this week.

Mrs. William E. Wright arrived from Chicago a few days ago and will occupy her splendid cottage at Norwood for the season.

Mr. and Mrs. Russell Blakeslee, of Detroit, are spending a vacation with Mrs. Blakeslee's parents, Mr. and Mrs. James Gaskin.

Captain and Mrs. M. J. Bonner, visitors in Chicago during the Eucharistic Congress, returned to Charlevoix last Saturday.

Miss Germaine Atchison left for Detroit last Sunday where she will spend the following two or three weeks with her aunt, Mrs. Nat Hurney.

Miss Anita Mayne and Mrs. John Clark are at Mackinac Island this week attending a national meeting of the Delta Gamma Sorority.

Mr. and Mrs. John Devaney, and daughter, arrived in this city today and are occupying the Alton Smith cottage, 904 State-st. for the summer season.

Miss Anabelle Comfort came up from Niles last Sunday and will spend a short vacation with her parents, Mr. and Mrs. Lou Comfort and other Charlevoix friends.

Mr. and Mrs. Sidney Lowenstein and family arrived here from Chicago Tuesday morning and are at their splendid summer home on the north side for the season.

Mrs. C. C. Tuxbury, Mrs. Era T. Kutsche, son William and Mrs. Helen Sorr, spent last Sunday on a motoring trip to Bellaire and Fisherman's Paradise.

Extensive improvement work is in progress at Captain O. E. Wilbur's wharf this week with a sufficient force of workmen on the job to complete the work in short order.

Mrs. Earl Miller and sister Mrs. M. J. McCann, after spending several days in attendance at the Eucharistic Congress in Chicago, last week, returned to this city last Friday morning.

Master Alfred Stamer left for Eagle River, Wisconsin, last Tuesday, where he will spend the summer season at Camp Lallambeau, returning to Charlevoix after the boys' camp closes.

Miss Helen Armstrong will spend the summer at home with her parents, Dr. and Mrs. R. B. Armstrong. She arrived from Chicago last Sunday, following the close of her school duties for the year.

Mrs. Archie Irwin met with a bad fall last Saturday, sustaining injuries of a serious and annoying nature. She is improving nicely and there is every indication that she will soon be as well as usual.

The Cake Shoppe and Woman's Exchange opened for business Saturday, June 26th at 203 State st. The business was formerly conducted at 311 Bridge street, under the same management as at present.

Mr. C. P. Brooks, one of the regular Charlevoix vacation citizens, has taken a cottage at Pine Point, for the season, thereby breaking a precedent of long standing. He otofore he has usually occupied temporary quarters in the south part of the city.

Mr. and Mrs. Fred Wilson, of Charleston, West Virginia, were Charlevoix visitors last Monday. They were on their way to Mackinac Island, making the trip by automobile to Mackinac City. Later they expect to return to Charlevoix for an extended visit.

The steamer Griffin, Captain James H. Gallagher, that has been undergoing repairs at Boyne City, cleared this port for Manitowoc last Thursday afternoon. Further repairs will be made at the Manitowoc shipyard. When the ship is reconditioned, which will be soon, the Griffin will at once be placed in commission.

An importation of woolen goods direct from Scotland was cleared through the Charlevoix custom house a few days ago by the Little French Novelty Shop, consisting of a very complete line of sweaters in shades, quality and design out of the ordinary as well as superior to what is found on sale in gift shops even in metropolitan quarters.

The Steamship Manitou of the Michigan Transit line made her initial appearance for this season at the port of Charlevoix last Saturday and left a large percentage of her passengers in this city, nearly all of whom will spend the summer in this city, some at the hotels, boarding houses, private homes with a goodly part of the members at their several summer homes.

E. V. Smith, piano tuner in the city this week. Leave orders with W. C. Bellinger, Addie Holley or Hotel Bartlett.—adv.

The government ship Sumac entered the port of Charlevoix last Saturday and spent the following day at her berth near the supply station.

L. P. Adams made a business trip to Detroit last week, leaving Charlevoix Thursday and returning Saturday afternoon via the motor route.

Mr. and Mrs. W. G. Caldwell, of Cincinnati, are recent arrivals and are at their cottage on the grounds of the Belvedere Club for the season.

Raymond Faulkner left for Harvard Tuesday evening, where he will spend the summer taking special work, a course in landscape architecture.

The members of the Pilgrim Circle of the Congregational church and their families will picnic in the city park, west of Mason-st, at noon on July 5th.

Miss Georgia Garuney, of Fort Orange, Florida, arrived in Charlevoix Wednesday morning and will spend the summer here with her grandfather, "Uncle" George H. Van Pelt.

Supervisors W. J. Gallagher of St. James and John W. Green of Peaine townships were in attendance at the June meeting of the board of supervisors in session Monday and Tuesday.

Lee R. Smith left for Clearwater, Fla., early this week to assume the duties incident to his transfer from the Charlevoix postoffice to Clearwater where his official title will be superintendent of mails in the southern city.

The S. S. Americus, Captain Charles Roe, that has been in commission in Round Lake and nearby waters, cleared for Manitowoc last Thursday, the trip being made primarily for the purpose of having a new propellor wheel placed in position.

Logan G. Thomson spent a few days at his cottage on the Belvedere Club grounds recently. Tuesday he left for Bay City to inspect his new yacht Sylvia IV and to see what progress was being made in the final work before the yacht is accepted from the builders and placed in commission for the season.

Charlevoix Lodge No. 736 L. O. O. M. will be represented at the annual Grand Lodge meeting which will be in session from June 28th until July 4th, the first three days in Chicago and the four following days at Mooseheart, Indiana. Mr. Charles Hyres will be the accredited representative during the week from the local branch of the order. Mr. Hyres left for Chicago last Saturday in order to be present at the opening of the session.

Fire destroyed the Walter Daniels garage at Boyne City Monday night. Mr. Daniels represented the Hudson-Essex cars and besides carrying a line of accessories did an extensive repair business. Six cars were lost in the fire besides a considerable amount of accessories and tools used in the shop. The garage was known as the State Street Garage. It is generally understood that Mr. Daniels did an extensive business.

New arrivals at Pine Point for the season are Miss Thyrsa W. Amen, Dean of Women University of Pittsburgh; Mrs. A. G. Amon, Shawnee, Oklahoma; Mrs. Marjorie Dodge Tapp, Shawnee, Oklahoma and Helen P. Rush, Pittsburgh. Pine Point and its surroundings is not new to the several party members as they have spent prior seasons there and as a matter of choice return to this natural and beautiful location for thir 1926 vacation.

Failure of drivers to observe traffic regulations has been the cause of annoyance and payment of fines for such non observance in several cases recently. In the main violations of this nature or for willful violation of city ordinances, hence the parties contributing by the way of fines and court costs are not in a position to register a kick when brought face to face with the court, nor can they make complaint with an officer on the street for the performance of duty.

Captain and Mrs. Ward W. Bennett, son Kenton and Mr. Mr. Richard Merson, of South Haven, visitors in Charlevoix and St. James for several days, returned to South Haven, via the motor route, Wednesday. The return trip from St. James to Charlevoix was made in the Beaver Island seaplane. Messrs. Bennett and Merson taking the trip Tuesday and Mrs. Bennett and Kentner the following day. In this Mrs. Bennett has the distinction of being the first woman making the St. James-Charlevoix flight.

In addition to the regular program at the celebration scheduled for July 5th, members of the committee are offering a prize of $10 for the best designed and nicest appearing float and $5 for the second best used in the business men's, lodge and society parade and two $10 prizes will be awarded to dancers in costume one each to male and female person for the best costume worn by dancers. This feature is open for men or woman, boy or girl in making the award. This costume may be comic or otherwise and the decision will be based on appropriateness of design, oddity of makeup rather than upon richness of quality in material used in the costume. Ingenuity of construction and color combinations will be features taken into consideration by the judges.

Special chicken dinner Sunday, July Fourth—Betty Shop.

—Fireworks at Fessenden's

Charlevoix summer residents are making their annual visit with many of them here, recent arrivals, with others arriving by steamer or train daily all of which bears evidence that the resort season will soon be at its height. More recent arrivals and those expected before the end of the week follows: Mrs. Rosamond Schwab and family at the Jacobs cottage, 301 Nicholls-st; Mrs. Theodore Freidlender at the Gilbert cottage, 216 Park-av; Miss P. M. Franks at 326 Dixon-av; S. J. T. Straus and family, 418 Michigan-av; Mrs. Guy Edenheimer and family, 104 Auld-av; Mrs. Jack Guggenheimer and family, 225 Park-av; Mrs. Samuel N. Sumner, Blue Bird cottage; E. W. Sterne, 201 Lewis-st; William J. Shrader, 200 Dixon-av; Mrs. Henry Wineman, 411 Michigan-av; Milton Cohn, 113 River-st; Simon Lazerus, 309 Michigan-av; Mr. J. Q. Adams, 117 Belvedere Club.

Paper Out of Date

What once was known as "butcher paper," the dark, heavy, brown paper used to wrap up meats, is no longer manufactured in any great quantity in the United States. It has been replaced by what is known as "bogus manilla." The old butcher paper was made from straw.

Conclusive

"My client is not mentally normal. The fact that he murdered his wife is partly a proof of that, but the fact that he married again is conclusive."
—Durchbruder, Berlin.

—Fireworks at Fessenden's

Might Have Been Worse

A man consulted suicide because his proposed to two girls and both of them rejected him. Well, look how much worse off he'd be now if both had accepted him.—New York American.

Two Fire Causes

Electric light wires hung over nails and silly rags thrown into a corner are two of the things which give the newspapers stories about "fires of unknown origin."

—Fireworks at Fessenden's

CHURCHES

Methodist Church.

C. E. Pollock, Pastor.

Editor William H. Phelps, D. D., the Michigan Christian Advocate, Detroit, will be the speaker next Sunday at 10:30 a. m. The public is most cordially invited to share this morning of special service with the church. Dr. Phelps is a genius with the language, either as writer or speaker. He is different—hear him and you will be glad for the message.

"The Man Without a Country" is the sermon subject for next Sunday evening at 7:30. This will be a patriotic service. The Fourth of July this year has special significance, and will be made of note in the evening hour of worship. Special features will mark the entire hour.

Epworth League will meet at 6:30 p. m., next Sunday, and each succeeding Sunday evening this summer. Our summer guests are given a special invitation to all these services.

The Epworth League Cabinet will meet with the pastor Thursday evening this week.

Each Thursday evening the pastor will have charge of the prayer meeting at 7:30. An invitation is extended to all bible lovers to attend this hour of prayer and devotion.

Sunday School convenes each Sunday morning at 9:30. A class for each one who attends.

The following resolution was adopted by the Third Quarterly Conference of the church:

"Whereas, Archibald Buttars, a member of our Quarterly Conference and for many years one of the pillars of Charlevoix Methodism, has passed from our midst to be 'with Christ,'

"Be it resolved that we hereby express our sorrow at his departure from us, and extend our sympathy to his bereft family.

"Be it also resolved that a copy of this resolution be published in our local papers and forwarded to Mrs. Buttars."

Baptist Church

Rev. Herman Burns, D. D., Pastor

"Charlevoix the Beautiful" is not a commercial slogan but the stranger is constantly saying, "The is the prettiest place I ever saw." We do not think this town is exceptionally bad but we long to hear the stranger say, "This is the best town I ever saw." The churches are the moral index by which they will judge in this respect. Then amid the other efforts we make, let us give proper place to the church.

Dr. Burns will preach both morning and evening, and the Bible School will be held at noon. The mid-week service will be held on Wednesday evening on account of the band concerts on the ad joining lot. A cordial invitation to all to join us in any and all these services.

A good delegation from Charlevoix attended the County Sunday School Rally at Boyne City last week.

Congregational Church

Rev. B. G. Mattson, D.D., Minister

The church services begin with the Sunday School session at 9:30 a.m. Morning worship and sermon at 10:30. The theme for the morning will be "Loyalty, Human, National and Religious."

There will be held a special patriotic service in the evening at 7:30 in which the young people and the pastor will participate. The service will be held in the auditorium and the general public is cordially invited. Further announcement of evening plans for the summer will be made at that time.

The service at the Ironton church will be as usual at 2:30, with a combination church and Sunday School service for old and young. Strangers and visitors are most heartily welcome.

Episcopal Church

The Rev. John K. Coolidge, of Glencoe, Ill., will hold services at 10:30 a.m. at the Episcopal church during the summer months.

St. Mary's Catholic Church

Low Mass 8:45 a. m.
High Mass 9:00 a. m.
Saturday and Monday 7:00 a. m.
Rev. Knute Lowenski, Pastor.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Christian Science."
Sunday School 12 o'clock.
Wednesday evening service 7:45.
Reading room, Tuesdays and Saturdays, 3 to 5 p. m.
The public is cordially invited to attend our services and use our reading room.

THE DIVINER

SYNOPSIS—Idly fishing Hermann creek, in California, Caleb Warner, civil engineer and a New Englander, is witness of the end of a coyote pulled down by two wolfhounds, urged on by a girl rider. Admiring the hounds, he introduces himself, and learns her name is Clinton. With wasteful hospitality she invites him to the ranch to meet her father. At dinner Clinton hears Warner learns his new friend's name is Betty. He is welcomed by her father, Southern Civil war veteran and owner of Hermanos del Sol, and tells them something of his ambitions, including that he is destined to be a "Crazy-disaster." In the town of Golden Warner shares an apartment with his old Columbia college chum, Ted Baxter, carefree and somewhat dissipated youth, only child of his widowed mother, who controls the family fortune. At a club luncheon Baxter introduces Caleb to Wilbur Cox, leading business man and president of the water company which supplies the needs of Golden. He gives Cox an inkling of his ambitions, and Cox, impressed, invites him to dinner that night. During dinner Cox asks Caleb to call at his office next day. He does so and Cox arranges a meeting between Caleb and Hinckley, the water company's chief engineer. Hinckley tells Caleb he is in difficulties with a girl, Mary Morgan, Cox's stenographer, who insists she must marry her. With Hinckley, Caleb looks over the water company's source of supply, the Crystal springs, in Hermanos valley.

CHAPTER V—Continued

"Surely. Had to. Still have to. If you ever build a dam anywhere along the line of the Great Divide, don't forget that. Every major quake runs along the same line, out of the sea at a tangent, northwest to southeast down the original crack. The big temblor of 1872 did wrecking decisions, and the quake in 1906 that wrecked Golden and Santa Rosa moved over an identical trail. And that trail went clean through my big dam down there."

The long lake had once been a peaceful valley, Hinckley told Caleb, a stage road winding through it on the way to the sea, farms, farmhouses and a hamlet with a famous roadhouse at the Crystal Springs for which the valley was named. All those had been razed to prepare the bottom of the great reservoir, fences taken up, trees eliminated, the place devastated as the big dam rose in the great notch that formed the main outlet to the valley.

Caleb turned the talk to the question of Golden's impending shortage.

"Mr. Cox," he said, "stated that there was no more watershed available on the peninsula."

That is true. We own a certain number of artesian wells around the lower end of the bay but they are only a drop in the bucket. The outlook is not very encouraging."

"How about across the bay?" Caleb spit the query with a degree of nervousness. He feared that Hinckley was about to uncover his own precious theory and demolish it.

The engineer's eyes twinkled.

"They say that water, like gold, is where you find it. And faultless—keeping." There is water over there that ethically belongs to Oakville, Our company naturally considers Golden more important. But it is difficult of development. Means large expenditure. We should have a hard job to get water rates raised sufficiently to warrant it. Filtration is the big trouble. The work would be elaborate and expensive. We can't see our way clear."

Caleb kept his face clear of everything but earnest attention. But he was breathing more easily. His theory was still virgin.

Hinckley proceeded to go into the present filtration system and the layout of the conduits that supplied the hydrants of Golden. Caleb's interest in Crystal lakes had been satisfied but he followed the technical talk with intelligent comment and left the engineer at last on terms that were more than merely friendly. He reached Golden after the stores were closed for the day but, early the next morning he obtained prodigite section maps of the quadrangles covering Caliente valley and the Gabilan range. He put in most of the day studying these and making little drawings to scale in vertical plane.

It was all in support of a mere theory but it was his habit to be painstaking, even in preliminaries, and he revised his sketches with a good deal of satisfaction. If the theory panned out it meant, not merely money and fame if he handled his discovery properly, but it would make him, Caleb Warner, an actual factor in pioneering, in city building. He quoted to himself what Betty Clinton had said at El Nido.

"That is what I should prefer, if I was a man. To create something, to be a water-bearer, to the thirsty earth or to thirsty people."

Baxter, coming in, broke through his reverie.

"You look like a latter-day prophet seeing visions," said Baxter. "What's the big idea?"

"Just a hunch, so far, Ted. I'm going across the bay tomorrow, prospecting."

The other looked at him oddly.

"Expect to uncover a gold mine at El Nido? Beware of the sirens who lie behind the rocks! As I remember her that day at the dog show, the Clinton girl was a looker. Beware!"

"I'm not looking for that kind of a mine, Ted. And I hadn't thought of going to El Nido this trip. You seem fairly happy yourself."

"I am. I've heard from my parties in the land deal. They'll be out in a few weeks. Probably some time next month. Thereby greatly relieving the general situation. Now it's up to me to attend to the little formality of finding the land to please them. "I wonder if there's anything across the bay? I must look up my notes. Want me to come along with you, Cal? I wonder if the El Nido valley is for sale?"

He glanced mockingly at Caleb and laughed.

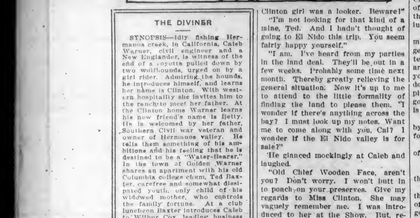
"Old Chief Wooden Face, aren't you? Don't worry. I won't butt in to poach on your preserves. Give my regards to Miss Clinton. She may vaguely remember me. I was introduced to her at the Show. But, remember my warning. Stick like you, when they fall, fall hard!"

CHAPTER VI

The Diviner

Caleb caught an early ferry for the six-mile water trip across the bay from Golden to Oakville. At Oakville he took a local train that paralleled the shore of the lower bay for a time before striking east through Coyote canyon, the natural gateway through the hills for the overland trains. As he had done on Hermanos creek, Caleb noted flood signs. Then he gave himself up to studying his sketches, covering the region he was going to prospect, going over them while the train tinged up the canyon until he knew them by heart.

He left the train at the same station he had used on his previous trip, buying some fruit to serve as lunch-



The Long Lake Had Once Been a Peaceful Valley.

eon before he crossed the bridge and started up Hermanos. He had brought along rod and creel, more as a mask to his real intentions than from any idea of fishing.

The scanty flow ran in a deep channel gouged out by floods. He examined the sides and found them of a lot of gravel. A wagon road that had followed the creek up from the station turned off to wind behind a low ridge. It was deep-rutted and Caleb traced it. He found that it ended at a gravel pit, dug into the side of the ridge, used probably for road-making purposes. The pit had been bitten out in the shape of a horseshoe and, standing where one of the calks would

Man Ever Waging Fight on Disease

Happy legends to the contrary, there seems no reason to believe that the world ever has known a golden age of health. Geologists find diseased bones which are thought to show that even great prehistoric lands, and after them the early mammals, suffered from tumors which, according to the advertisers, will claim the teeth of four out of five of us. Man probably falls heir to, troubles which other flesh suffered before, him.

By herding in crowds, by giving up his dower rights of sunlight and space, he even has added to many of those troubles, has created wholly new ways of wracking body and mind. For a time the balance of life and death promised doom to either: they survived only because life was produced

Went Him One Better

A cobbler in a university town, wishing to meet the clever advertising of an encroaching and unscrupulous rival, asked one of the professors to give him a Latin phrase that he could place in the window and attract the attention of the students. The professor promptly wrote the words "Mens Conscia Recti" (a clear conscience). The shoemaker had the sign painted and with much pride hung it in a conspicuous position in his window. Imagine his discomfiture when he saw on a gaudy sign in his rival's window, the following day, the words "Men's and Women's Conscia Rectt."

MILLINERY FOR MIDSEASON; SIMPLE AND DAINTY FROCKS

HERE is a group of five midseason hats, in trimmed and tailored types, that summarize important and encouraging features of the mode. They are straws that show which way the millinery wind is blowing—and they point in the direction of handcraft in the making and trimming of hats. The more artistry and handcraft we have, the more inter-

Some Midseason Hats.

esting and worthwhile our headwear becomes. In midsummer much restraint is evident in trimmings—but craftsmanship makes up for this; whatever is used proclaims the hand of an artist.

A summer without leghorn hats would be like home without a mother, so the group leads off with a wide brimmed leghorn shape, trimmed with flower petals, made of silk, and some millinery foliage. Each petal is made by hand and the fancy of the trimmer is free to play with color and arrangement of it will. The brim is bordered with lace with a dropping frill at the edge.

A dignified and elegant tailored hat at the right is made of straw cloth and silk is black. It epitomizes the wider brimmed tailored styles with upturn at the back. Folds of straw cloth and satin are interwoven on the side crown. This is a fine and practical midseason model, for crisp straw shape, faced with crepe, oc-

Pretty Frock for Little Girl.

cupies the center of the group and deserves the place of honor because of its artistic propriety and reminder of wide, soft ribbon. It looks very simple—but no amateur could make it.

Milan straw and silk give a good account of themselves in the fourth, square-crowned shape at the lower left of the picture, with clusters of flowers pushed in the brim at the back. This is another of those simple-seeming affairs that reveal an artist's hand. But the picture is finished with a fascinating, plain hat of milan straw, with a double color in silk and velvet ribbon. It is a swag-

Fly-Flit-Flop!

FLIES breed in filth, feed on filth and bring filth into your home.

Flit spray cleans your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Flit on your screens. Flit kills moths and their larvae in fur and hides. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has reduced all the old methods because it kills all the insects—and does it quickly.

FIRST
to develop and use the self-starter

The first practical self-starting and lighting system, the Delco, was invented in Dayton, Ohio, in 1910.

It opened a new era in the history of the automobile, extending its service to women, making night driving safe and all driving vastly more comfortable and secure.

Delco was first used by Cadillac, a General Motors car.

The inventor of Delco is today head of the Research Section of General Motors, whose personnel includes scientific leaders in every phase of automotive development.

General Motors operates the largest automotive research laboratories and proving ground in the world. They are added assurance that whatever is best and soundest in scientific progress will be found in General Motors products.

Evening Capes

The new evening wraps are not contribute much warmth, but they do their bit for appearance's sake none the less. They are composed of seven capes of tulle, one over the other, and their chic and beauty depends on the way the colors of the different layers are blended.

New Sleeves

The new dresses which are essentially quite plain today, must have something to set them off from monotony. For example, a plain black satin dress may have tight-fitting sleeves which will be embroidered from shoulder to wrist with flashing sequins. Or the dress may have a single huge bright-colored flower posed upon it with a big artificial stone in the center.

Wool on Sheer Fabrics

Wool embroidery on georgette crepe and chiffon is one of the new style tips from Paris. The more colorful the embroidery the better.

—Ennlus.

IN CONGRESS, JULY 4, 1776

The unanimous Declaration of the thirteen united States of America.

DO YOU know the story of the Declaration of Independence? Do you know who drafted it? Who signed it, and why? Where the original document is? Do you know what the Declaration proposed? Do you know what part Caesar Rodney played in the writing of the Declaration? Do you know what part George Read played in the writing of the Declaration? Do you know what part John Dickinson played in the writing of the Declaration?

Here was a pure Declaration of Independence, proposed by one of the most eminent men of the most influential colonies at that time, and promptly seconded by John Adams of Massachusetts.

The next day congress went into a committee of the whole to consider the resolutions. Delegates from Pennsylvania, New York and one or two other colonies, objected on the ground that the Middle colonies were not yet ready for so drastic a step, although generally sympathetic and friendly attitude.

Congress resisted that unanimous action by all the colonies on a question of such moment was of supreme importance. Several delegates had been instructed by the votes of conventions for independence, New York and New Jersey being among them. The majority had been authorized to take any action that might be considered wise. Virginia, on the other hand, had gone so far as actually to instruct her delegates to propose a declaration to congress. Richard Henry Lee was simply obeying his legislature when he presented his resolutions.

On June 10, congress postponed final consideration for three weeks, but in the meantime day appointed a committee of five to draw up a declaration. Lee, surely—would have been the committee had he not, by that time, been called home at the illness of his wife. But the fact that Virginia's delegates to propose the Declaration of Independence, instead of his younger Virginia colleague, Thomas Jefferson, then but thirty-three years old.

Coming to congress with a reputation of wielding a facile pen, Jefferson in the ballooting for the committee received a majority of votes and became its chairman. The others were Benjamin Franklin of Pennsylvania, John Adams of Massachusetts, Roger Sherman of Connecticut, and Robert R. Livingston of New York.

Stories differ as to how Jefferson came to be selected to write "the one American state paper" as has been said. That has reached to the supreme distinction in the world and that seems likely to last as long as American civilization endures." One account is given by John Adams, who said that he and Jefferson were appointed by the committee to prepare the rough minutes in a proper form. When Jefferson first proposed that Adams prepare the draft of the Declaration, Adams declined, giving, as he says in his autobiography, the following reasons:

(1) That he was a Virginian and I a Massachusettensian. (2) That he was a southern man and I was a northern one. (3) That I had been so obnoxious that my name would be a burden in promoting the measure that every draft of mine would undergo a more severe scrutiny and criticism in congress than if it should be another's. (4) And lastly, and that would be reason enough if there were no other, I had a great opinion of the elegance of his pen and none at all of my own. I therefore insisted that no hesitation should be made on his part. He accordingly took the minutes, and in a day or two produced to me his draft."

Jefferson, writing in 1823, tells a slightly different story. He says that the entire committee urged him to make the draft. He showed it first to Franklin and Adams, who, in their handwriting, made a few minor alterations. This original draft was given by Jefferson to Richard Henry Lee, the dean of the Virginia delegation, and in 1825 his grandson presented it to the American Philosophical Society of Philadelphia.

Making another copy, which incorporated the suggested changes, Jefferson presented it to the committee which reported it unchanged to the congress. On July 1, 1776, Philadelphia burned with excitement, for here was to be taken the most important step in a long series of disputes with the mother country.

The original resolutions of Richard Henry Lee came before the body as a committee of the whole. They were approved by nine colonies, Delaware, Pennsylvania, and South Carolina being on the negative side. The New York delegates, having received no instructions, were unable to vote.

When the formal vote of congress was taken the next day, the resolutions were approved by twelve colonies—except New York. Thus on July 2, 1776, the original colonies became the United States of America.

The next two days were spent in discussing the draft of the declaration as drawn by Jefferson. The debate was lively, but when it was over, the action adopted with very few changes. Of the twenty-eight specific charges brought against George III, only one was deleted, that was the one accusing the king of "piratical warfares" in permitting the offshore and enslavement of human beings. This was not a just charge, for the slave trade had been carried on long before the reign of George III. One other paragraph, near the close, was omitted. Besides these, barely twenty lines were stricken out, and not a single addition of fact was made.

The Declaration of Independence was then unanimously adopted by the twelve colonies whose delegates were instructed to vote in its favor, on July 4, 1776, which henceforth became the recognized birthday of the new nation.

On July 9 word arrived at the headquarters of George Washington in New York that the Declaration had been ratified, and it was at once read to the soldiers and citizens. On the same day the New York assembly, in session at White Plains, gave its formal vote for independence, and for the first time the thirteen colonies were united in their common cause.

John Hancock, president of the congress, was the only member who signed the Declaration on July 4. An engrossed copy on parchment was ordered for all the delegates to sign. This was completed on August 2 and signed by 54 delegates. Two others signed later, Thomas McKean of Delaware, who was absent with his regiment in August, and Matthew Thornton of New Hampshire, who was not elected to congress until the autumn. He was permitted to sign the document in November, making the total number of the famous "signers" 56.

Webster's Tribute to Hero of Bunker Hill

"But—ah—Him! the great martyr in this great cause! Him! the premature victim to his own self-devoting heart! Him! the head of our civil councils and the destined leader of our military bands, whom nothing if brought hither but the unconquerable fire of his own spirit; him I cut off by Providence in the hour of overwhelming anxiety and thick gloom; falling ere he saw the star of his country rise; pouring out his generous blood like water before he knew whether it would fertilize a kind of freedom or of bondage; how shall I struggle with the emotions that stifle the utterance of thy name! Our poor work may perish, but thine shall endure! This monument may moulder away; the solid ground it rests upon may sink down to a level with the sea, but thy memory shall not fail! Wherever

among men a heart shall be found that beats to the transports of patriotism and liberty, its aspirations shall be to claim kindred with thy spirit!"—Daniel Webster's eulogy on Gen. Joseph Warren.

Hastened Revolution

The name "Boston Massacre" in popularly given to a street affray that occurred in Boston March 5, 1770, between the citizens and the British soldiery. The garrison, being annoyed by several hundred of the populace, who were pelting them with snowballs and other such embarrassing things, fired on the crowd, killing three and wounding several others. Among those killed was a negro, Crispus Attucks, looked upon as somewhat of a leader. The affair created intense excitement, and doubtless hastened the breaking out of hostilities. Until the beginning of the Revolution, five years later, the anniversary was celebrated, and the incidents of the day made the subject of oratory.—Kansas City Star.

THE KITCHEN CABINET

(©, 1926, Western Newspaper Union.)

Mid the rich stores of nature's gifts to man
Each who his loves, elose wedded to his soul
By association's golden links.
—Eliot.

EVERYDAY GOOD THINGS

There is nothing that takes the place of a good salad for a luncheon,

dinner or supper dish.

Garden Delight.—Take one each of fresh green and red pepper, chop fine and mix with one cupful of cottage cheese which has been well seasoned and enriched with butter or cream. Line salad plates with lettuce, and lay on each one-half of a banana cut lengthwise, add salad dressing to the cheese and cover each with the cheese dressing.

Halibut Souffle.—Take one cupful of halibut flaked, one cupful of thick white sauce, one egg beaten stiff, one tablespoonful of lemon juice, one teaspoonful of worcestershire sauce, salt and pepper to taste, one cupful of bread crumbs and two tablespoonfuls of grated cheese. Mix the flaked fish with the white sauce, add the lemon juice, and worcestershire sauce, salt and pepper, then fold in the egg white beaten stiff. Butter a glass baking dish; fill three-quarters full, leaving room for the crumbs and cheese on top. Mix the crumbs with melted butter and the grated cheese. Sprinkle over the souffle, bake in a hot oven fifteen minutes. Serve with a spicy tomato sauce if liked.

Prune Cake.—Take one cupful of sugar, two tablespoonfuls of butter, one cupful of cooked prunes, finely chopped; one-half cupful of prune juice, one teaspoonful of soda, two cupfuls of flour, two teaspoonfuls of baking powder, one teaspoonful of cinnamon, one-half teaspoonful of cloves, one teaspoonful of nutmeg. Mix in the order given, sifting flour and dry ingredients together, bake in two layers about thirty minutes. Ice with one cupful of powdered sugar, three tablespoonfuls of butter and enough cream to make of the consistency to spread. The butter should be well creamed with the sugar before the cream is added.

Ox Tongues and Spinach.—The canned tongue and canned spinach may be used for a hurry-up meal. Heat the tongue and place on a platter neatly sliced. Surround with a border of seasoned spinach chopped, garnished with sliced hard-cooked eggs.

Baked Ham.—For each thick slice of ham take one cupful of milk or enough to cover. Cover and bake in a slow oven for an hour or more.

Dishes From Grains.

The corner foods are quite necessary in our diet and should be freely used at all times of the year.

Scotch Oat Crackers.—Put two cupfuls of rolled oats through the meat grinder, add one-fourth of a cupful each of milk and molasses, one-half of a tablespoonful of fat, one-fourth of a teaspoonful of soda, one teaspoonful of salt and a little water to make a dough. Roll out very thin and cut into fancy shapes. Bake twenty minutes in a moderate oven.

Oatmeal Soup.—Take one-half can of tomatoes, one-third of a cupful of oatmeal, two cupfuls of water, one tablespoonful of sugar, one-half of a small onion, pepper and salt to taste. Cook in a double boiler for one hour, rub enough a sieve, add seasoning if needed and serve hot.

Hominy Gems.—Pour one cupful of scalded milk over half a cupful of corn meal, add one-fourth of a cupful of hominy, a tablespoonful of sugar, and the same of shortening; mix well, cool, add a yolk beaten thick and two cupfuls of flour in which one-half teaspoonfuls of baking powder and a little salt has been well sifted. Fold in the egg white and bake in hot well-greased gem pans.

Corn Meal Gems.—Take one-half cupful of corn meal, add one cupful each of flour, three teaspoonfuls of baking powder, one tablespoonful of sugar, one tablespoonful of melted butter, one-half teaspoonful of salt, three-fourths of a cupful of milk and one egg. Boil the milk, scald the corn meal, cool and add the remaining ingredients. Bake in well-greased muffin tins.

Hominy and Pecan Croquettes.—Boil one-half cupful of hominy with a teaspoonful of salt in two cupfuls of water five minutes, then put into a double boiler and cook two hours. Add two tablespoonfuls of shortening, one-half cupful of chopped pecans and a teaspoonful of scraped onion. Cool and shape into cylinders. Roll in egg slightly, add two tablespoonfuls of water, roll the croquettes in crumbs, then egg, then crumbs again and fry in deep fat. This makes one dozen croquettes.

Rich Drop Cookies.—Cream one-half cupful of butter, add one-half cupful of sugar, one egg well beaten, three-fourths cupful of flour, one-half teaspoonful of soda, raisins, nuts or citron. Drop by teaspoonful on a bitter sheet, spread thinly with a knife dipped in water; decorate with fruit and nuts.

Nellie Maxwell

Earliest Kind of Soap

Mankind at a very early period in its history discovered the necessity of soap to remove dirt and grease. The first soap, it is said, was made of goats' tallow and the ashes of beechwood.

Old Swedish Mine

In Sweden there is a mine which is so old that records are missing as to its age. As far as can be known the mine has been in active opuration for more than 800 years.

Way Animals Do

Mother had taken her small daughter, Edith, to a store to buy her a coat. As this was one of her first shopping trips, she seemed interested in everything the saleslady said, especially when she was told that she should shake the fur collars and cuffs downward like the animals do.

A few minutes later Edith began scratching her face. Her mother said, "Don't do that; it doesn't look well." "Hint, mother, that's the way the animals do," was the quick reply.

Watch Cuticura Improve Your Skin. On rising and retiring gently smear the face with Cuticura Ointment. Wash off Ointment in five minutes with Cuticura Soap and hot water. It is a wonderful what Cuticura will do for poor complexions, dandruff, itching and red, rough hands.—Advertisement.

Moral: Keep Auto Clean

The bombshield of Cort Hinman's automobile acted as a burning glass at Putnam, Conn., directing the sun's rays to a grease spot on the front seat. Fire that started damaged the car considerably before it was discovered and was extinguished by a few pails of water.

Mail Sent by Radio

"Air mail" says Henry Hubbard, secretary of the bureau of standards, "is not the last word in high-speed letter communication. A greater system is in sight right here, transmitting letters by radio, reproduced—then in facsimile instantly at destinations. No mail bags, no sorting, no long trips overland. Swift as light, wired wireless or direct radio can produce at destinations an autographic duplicate of a letter filed at the post office in Washington. Tomorrow, doubtless radio will deliver the world's correspondence instantly."

DEPARTMENT OF CONSERVATION
OF THE
STATE OF MICHIGAN
Lansing, June 10, 1926

NOTICE IS HEREBY GIVEN, That the following described abandoned tax land, situate in the County of Charlevoix, and deeded to the State by the Auditor General under the provisions of Section 127 of Act 206 of the Public Acts of 1893, has been withdrawn from homestead entry by the Auditor General and the Commissioner of Conservation, acting jointly, as provided by Act 141 of the Public Acts of 1901, examined and appraised and will be placed in the market by offering the same at a Public Auction to be held at the Office of the County Treasurer in the County Courthouse in the City of Charlevoix, on Tuesday, the 3rd day of August, 1926, at nine o'clock in the forenoon, Central Standard Time, at which time it will become subject to purchase in the manner provided by statute.

In case of sale the deed conveying the same will contain a clause reserving to the State of Michigan all rights in any mineral, coal, oil or gas found lying or being on, within or under the said land, as required by Section 8, of Act 280 of the Public Acts of 1909, and also reserving to the People of the State of Michigan the rights of ingress over and across any of said tract lying along any watercourse or stream, as also required by said Section 8, Act 280 of 1909.

IRONTON
Heineman's Addition to
MOUNT MCSAUBA
Lot No. 16.

Michigan, on the 26th day of January, 1921, in Liber 61 of mortgages, page 579, on which mortgage there is claimed to be due at date of this notice the sum of One Thousand Three Hundred Seventeen and 66-100 Dollars, including the principal sum due with interest; and a further sum of Four Hundred and Eighty Nine afid 17-100 Dollars, being taxes and inforest thereon paid by the mortgagee on the land and premises herein described, together with an attorney fee of Thirty-Five Dollars as provided for by the said mortgage, and no proceedings at law or equity having been instituted to recover the money secured by said mortgage, or any part thereof; and whereas, the taxes required by the statute to be paid on said mortgage have duly paid prior to the recording thereof;

Now Therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises hereinbefore described, or so much thereof as may be necessary to satisfy the amount then due for principal with the costs and the expenses of the foreclosure, including the attorney fee provided by said mortgage, and also including the taxes paid by the mortgagee at Public Auction, to the highest bidder therefor, at the front door of the Court house in the city of Charlevoix, Charlevoix county, Michigan, (that being the place where the circuit court for the county of Charlevoix is held), on Friday, the 25th day of June, 1926, at ten o'clock in the forenoon of that date.

The premises described in said mortgage being the lands and premises situated in the Township of Hayes, county of Charlevoix, state of Michigan, viz: The east one-half of the Southeast quarter of Section No. 23, township Thirty-two North, Range seven west, containing eighty acres of land, more or less, according to the government survey thereof.

Dated March 19th, 1926.

MARY ZIPP,
Mortgagee
LISLE SHANAHAN,
Attorney for Mortgagee
Business address: 108 Clinton Street,
Charlevoix, Michigan. 49 13t

Appointment of Administrator
SAATE OF MICHIGAN—The Probate Court for the County of Charlevoix:
At a session of said Court, held at the Probate Office in the City of Charlevoix in said County, on the 24th day of June, A. D. 1926,
Present: Honorable Servetus A. Correll, Judge of Probate.
In the Matter of the Estate of Linus S. Parmelee, deceased.
Edith F. Parmelee having filed in said court her petition praying that the administration of said estate be granted to herself or to some other suitable person,
It is Ordered, That the 22nd day of July A.D. 1926, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for hearing said petition;
It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel a newspaper printed and circulated in said county.
SERVETUS A. CORRELL,
Judge of Probate.

In the Matter of the Estate of John Dunlop, deceased.
Edward B. Dunlop having filed in said court his final administration account and his petition praying for the allowance thereof and for the assignment and distribution of the residue of said estate.
It is Ordered, That the 21st day of July, A.D. 1926, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for examining and allowing said account and hearing said petition;
It is Further Ordered, That public notice thereof be given by publication of a copy hereof for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel a newspaper printed and circulated in said county.
SERVETUS A. CORRELL,
10-3t Judge of Probate.

Order for Publication—Final Administration Account.
STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.
At a session of said Court, held at the Probate Office in the City of Charlevoix in said County, on the 29th day of June, A.D. 1926.
Present: Hon. Servetus A. Correll, Judge of Probate.
In the Matter of the Estate of John Dunlop, deceased.
Edward B. Dunlop having filed in said court his final administration account and his petition praying for the allowance thereof and for the assignment and distribution of the residue of said estate.
It is Ordered, That the 21st day of July, A.D. 1926, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for examining and allowing said account and hearing said petition;
It is Further Ordered, That public notice thereof be given by publication of a copy hereof for three successive weeks previous to said day of hearing in the Charlevoix Sentinel a newspaper printed and circulated in said county.
SERVETUS A. CORRELL,
10-3t Judge of Probate.

Order for Publication—Probate of Will
STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.
At a session of said Court, held at the Probate Office in the City of Charlevoix, in said County, on the 28th day of June, A.D. 1926.
Present, Hon. Servetus A. Correll, Judge of Probate.
In the Matter of the Estate of Archibald Buttars, deceased.
Archibald H. Buttars, having filed in said court his petition, praying that an instrument filed in said Court be admitted to Probate as the last will and testament of said deceased and that administration of said estate be granted to Archibald H. Buttars and Edward F. Parmelee or some other suitable person.
It is ordered that the 22nd day of July, A.D. 1926, at ten o'clock in the forenoon, at said probate office, is hereby appointed for hearing said petition;
It is Further Ordered, That Public notice thereof be given by publication of a copy hereof for three successive weeks previous to said day of hearing in the Charlevoix Sentinel a newspaper printed and circulated in said County.
SERVETUS A. CORRELL,
10-3t Judge of Probate.

THE CHARLEVOIX HARDWARE CO.
OFFERS A BIG
Special for Saturday, July 3rd
COASTER WAGONS
SIZE 36X16

10 inch all steel Double Disc Wheels
ROLLER BEARING
¾ inch Rubber Tires
Body made of Seasoned Hardw'd
Nickel Plated Hub Caps
Steel Running Gear
EASILY WORTH $6.75
FOR SATURDAY
ONLY $4.85

Over the Hills and Away!
In your own car with the carefree spirit of youth! Take to the open road—where skies are sunny and winds are fresh. Choose your own way; there is no dusty road that lures you. You will stumble on adventure—romance will trip you up—before you've gone many miles. Your Middle West is a fascinating wonderland of never-ending thrills.
Here's a list of what it holds!
1—The county without a railroad—high, rocky picturesque Calhoun County, the greatest apple county in Illinois. On a long, ragged peninsula between the Illinois and Mississippi Rivers. Not far from Alton, State Highway No. 3.
2—Lake State Park, Minnesota, in the valley of the St. Louis River. Rugged country with dense forests. Fifteen miles from Duluth on State Highway No. 1.
3—The Hanging Tree, Versailles, Indiana, formerly used as a gallows for hanging criminals, in a vicinity of great historical interest. Seventy miles S. from Indianapolis.
4—Valley City, North Dakota, set like a jewel on the Sheyenne River with historic trees and a great viaduct spanning the valley and above the river. State Highway No. 6.
5—The great dam at Keokuk, Iowa, a marvelous feat of engineering skill. Mississippi River State Highway No. 4.
6—Deadwood, South Dakota, famous in the history of frontier life and still more for sunshine, western hospitality and gold production. Gateway to "Wild Hill" and "Calamity Jane" overlook the city. State Highway No. 90.
7—Lawrence, Kansas, the scene of the famous Quantrell Massacre of 1863. Red Star Route No. 22.
8—Alley Spring State Park, Missouri. The spring flows from the bottom of a rocky cliff forming a deep, clear blue lake. Typical Ozark scenery. Sixteen miles north of Birch Tree, Missouri, State Highway No. 16.
9—Elk Lake in the heart of Northern Michigan's woods, chosen country of hunters and fishermen. State Highway No. 11.
10—Monument at Portage, Wisconsin commemorating the famous first portage from the Fox to the Wisconsin in 1673 of Louis Joliet and Father Jacques Marquette on their voyage of discovery toward the Mississippi. State Highway No. 16 and No. 33.
Make out your own wonder list of places *near you*—and set out to find them. There is nothing to stop you. Roads are good and Red Crown Gasoline is easily obtainable everywhere throughout the entire Middle West.
All nature will speed you on your way as you travel new parts of beauty. Fill the tank with Red Crown — and you're off.

MORTGAGE SALE
Default having been made in the conditions of a certain mortgage executed by Frederick Yahr and Sophia Yahr, his wife of Hayes township, Charlevoix county, Michigan, unto Mary Zipp of the city of Petoskey, Michigan, dated January 26th 1921, and recorded in the office of the Register of Deeds for Charlevoix county,

THE CHARLEVOIX SENTINEL
Volume 57 | Charlevoix, Michigan, Thursday, July 8, 1926 | Number 11

THE CELEBRATION
MANY VISITORS IN EVIDENCE.
Weather Conditions Ideal—Charlevoix Loses in Ball Game

Monday was all that could be desired in so-far as weather conditions were concerned in connection with an Independence day celebration. Not only this but visitors were here in abundance, the first arrivals making their appearance early in the day making for a crowd of early arrivals that was greatly increased during the succeeding hours. This early crowd was added to as the hours slid by with the top crowd on the scene during the afternoon and evening and of the large number of visitors there were a highly proportionate number of visitors that came from a considerable distance to observe the sports, meet old acquaintances and enjoy the day.

The parade advertised for 10:00 a.m. started on time and on time, making for a pleasing surprise due to promptness in making their appearances at the scheduled time. In this the formation was led by the Charlevoix city band with displays in the following order: Charlevoix Hardware Co., two displays by the L. O. O. M., "Mooseheart" and "Mooseheaven." Earl A. Young, Troy Steam Laundry, Northern Auto Co., Johnsons blacksmith and repair shop, Woodfros., Campbell-Bosworth and Boyne City band and these followed by a long list of automobiles, many of which were decorated in the true spirit by the use of American flags and a liberal display of bunting, all significant of the day and occasion, making for an appropriate demonstration.

During the early morning Bridge street from Park avenue to Mason St., was closed to everything except foot passengers, thereby making this part of Charlevoix's main thoroughfare safe for pedestrians old and young. On account of this automobile traffic was confined largely to Park avenue and State street by everyone using vehicles for transportation purposes were compelled to park the same or business district and it was the part of the street thus reserved that contestants in the various athletic stunts scheduled for the day met and sprang a splendid display of fireworks the setfor sport, thereby making the most of the opportunities afforded by the circumstances.

Throughout the day and evening the city was full up with visitors near by and from cities more remote which filled parking places to full capacity making for solid lines on both sides of down town business streets and residence streets that extended several blocks and in all directions. A large number of booths and stands were conveniently located and from these crowds around each were judge the keenest bidding competition did a thriving satisfactory business.

Fireworks, torpedoes, toy pistols, etc. were plentiful and in the hands of the youngsters and others created enough noise to satisfy everyone that Independence day in Charlevoix was being observed to the limit and in a manner that would create and enlarge the spirit of patriotism in the minds of the younger generation. The heavier inland seaplane was in evidence from early morning and was thought a major part of the time with one or more passengers, making all flights safely a source of satisfaction to the passengers and owners of the "ship."

Sunday at 10 a.m. Miss Ruth C. Hammet and Mr. Robert C. Frey were united in marriage at the home of the bride's parents, Mr. and Mrs. R. C. Hammet, 109 Park avenue, in the presence of the family members, with Rev. R. G. Mattson D.D., officiating at the ceremony. Mr. Frey is a comparative stranger to Charlevoix citizens. His home for years past has been La Grange, Ill., while the bride is one of Charlevoix's most estimable members of the younger set.

The young couple following the ceremony took a short honeymoon trip to Mackinac Island and today they leave on the Manitou for Chicago and thence to St. Petersburg, Florida, where they will reside in the future and be at home to their friends..

Sweeping Changes In State Fair's Army of Exhibits

In order to better display the exhibits at the Michigan State Fair which will be held at the State Fair grounds, Detroit from September 5 to September 11, a number of changes in the arrangement of the exhibits is to be made.

Those who have been attending the State Fair during recent years have seen practically the same arrangement, year in and year out, with nothing to indicate that the exhibit was new.

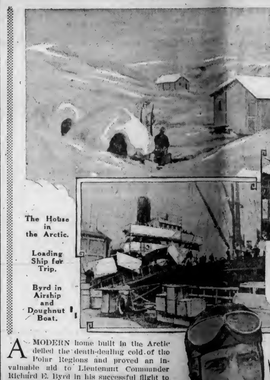
This policy has been changed since the present State Fair Board was appointed and managers of the fair have been instructed to go the limit in arranging the exhibits in the best possible manner.

Sweeping changes have been planned in dairy cattle, dairy and poultry exhibits, as well as those of the boys' and girls' clubs.

At the same time the women's exhibit will be held this year in the new Women's Building, which is one of the most attractive structures on the State Fair Grounds.

Hammet-Frey Wedding on July Fourth

WAS A NOTABLE ACHIEVEMENT
Modern Home Aided Byrd Pole Dash; Sugar Cane Fought Cold of North



A MODERN home built in the Arctic defied the death-dealing cold of the Polar Regions and proved an invaluable aid to Lieutenant Commander Richard E. Byrd in his successful flight to the North Pole, which he circled three times in a record breaking flight of 1,500 miles in 15 hours and 30 minutes at an average speed of 58.75 miles an hour.

It was at the Spitzbergen base, King's Bay, where this first modern house was constructed amid the snow and ice of the Arctic immediately upon the arrival of Lieutenant Byrd and his companions, as a permanent home and observation station for the explorers. The house, which rose up on the borders of the frigid north in marked contrast to the igloo of the eskimo, was equipped with a complete radio outfit that those who remained at the base while Lieutenant Byrd made his thrilling dash to the Pole in his sporting Fokker might keep in touch with their chief and the outside world, which they had performed as to the progress and success of the flight.

It was to this same home that he returned after his hazardous trip and from which some of the first messages were sent to the waiting public, telling them through the home of the air that Byrd had circled the pole three times and had returned to his Spitzbergen home in safety, adding one of the most memorable pages to the history of Arctic exploration.

Sugar Cane Fights Polar North.

When Lieutenant Byrd left the Brooklyn Navy Yard on the ship Chantier he declared he had the best and most scientifically equipped expedition that ever had started for the North Pole. Special plans were made for the erection of his Arctic home. Boards of celotex insulating lumber made from bagasse (sugar cane fiber after all the juice has been extracted) were carried along with the latest inventions to aid in polar exploration. This building material is light and is filled with millions of air cells, which give it great insulation value and resistance to change in temperature, especially the severe cold. The celotex in connection with the use of this material is that the sugar cane of the south was utilized to keep out the cold of the north.

Celotex was selected instead of lumber because tests made by the United States Bureau of Standards and by universities in building construction all over the world, had demonstrated that this insulating lumber would keep the quarters of the explorers warmer and protect their living conditions more against the extraordinary building material.

It was also after careful investigation by the scientific men in the expedition that celotex was selected. These authorities pointed out that the protection afforded by its insulation efficiency was three times as great as ordinary lumber and nearly twelve times as great as that of brick and stone construction. Another reason celotex also was lined with celotex as an added precaution to keep the sides warm within the explorers used it in the preliminary stages of the expedition.

In practically every other way this expedition was more scientifically prepared than any of its predecessors. These included inventions of Commander Byrd himself. A simple sun compass conceived by Byrd and developed by Mr. Burnelson of the National Geographic Society, superseded the complicated German device, developed three years ago for Amundsen. The drift indicator also was Byrd's invention. The bubble sextant by which the navigator obtains his bearings while in flight was another one of his inventions. Still another scientific development was a quick method of telling when one is at the North Pole. This has been worked out by G. W. Littlehales, the navy's hydrographic engineer.

Device Locates the Pole.

Byrd and others realized that a chart of the magnetic lines flowing towards the magnetic North Pole, which is in Northern Land, 1,200 miles south of the pole. Between Bothnia Land and the Pole the compass points south instead of north and over much of the Arctic it is badly disturbed by the discrepancy in position between the geographical North Pole and the magnetic North Pole.

This chart of the magnetic lines, flowing to the magnetic North Pole, although it was far from complete, was such as to enable the navigator to tell in what direction the compass should point from any spot in the Arctic. With this knowledge the erratic behavior of the compass becomes orderly and it is once again a useful instrument.

A third type of compass used was a device of infinite sensitiveness—a revolving electrical coil, which is adjusted to a given relation with the magnetism of the earth. This, the sun compass, and the magnetic compass were each used to correct the other.

Lieutenant Byrd in his flight used a quick method of telling when he was actually at the Pole. This was the invention worked out by Mr. Littlehales, the U. S. Navy hydrographic engineer. It shows the sun's position from the North Pole at every hour of the day and every day of the year. When the flyer is near the Pole he can, by ascertaining the exact position of the sun, prove that he is near the Pole.

Flies 3,000 Miles Over Arctic.

The expedition, backed by such men as John D. Rockefeller, Jr., and Theodore Roosevelt, Jr., had three main objects:

1—To prove that air navigation in the Arctic is feasible and that freight and passenger travel over the top of the world is certain to come.
2—To hunt for new land in the unexplored areas of the Arctic.
3—To conquer the North Pole from the air on a sporting adventure and go a long construction of what a plane can do—not a geographical study, as the Pole was bagged for all time by Admiral Peary.

Probably no one knows more about Arctic flying than Commander Byrd. From the Greenland base of the MacMillan expedition at 82nd last year he flew 3,000 miles over the Arctic, studying the location of soil, mosses, outcroppings, other navigation ingronouns at great altitudes over the Polar sea.

The plane which Commander Byrd took a noted fast expert, who is Flying Commander H. O. Nobe, as it requires great skill and judge to prevent the freezing of lubricating oil and stiffened action of the motors, if forced to work on the plane. In the open at great altitudes with the thermometer at 60 to 70 below zero. The points which favored the fourth of May were that the arctic fog had not begun to rise and heavy snows still covered the land and afforded many good landing places.

A factor of safety pointed out by Commander Byrd in connection with the use of the Fokker machine is that it carries a reserve engine. It has three engines. With a flight load one is expected to be sufficient to maintain the plane in flight. With a normal load, two engines will do the work. If two engines break down at one time, when the plane is not too heavily loaded, it may fly with the use of one engine. The Fokker machine has a wing-spread of slightly more than 71 feet. It is said to be a marvel of airship construction.

The other airplane—the Curtis Oriole—was to have been used chiefly in finding landing fields so that if the fliers found their main landing place covered with a deep fog they might go elsewhere.

The Chantier was equipped with a powerful radio transmitting station to send back the news to the world. The Fokker also is equipped with a receiving and transmitting set, Commander Byrd not only kept the world informed of the progress of the expedition, but received through the Chantier weather warnings to guide him in his flight.

How Expedition Was Equipped.

Forty-five hundred pounds of whole beef were included in the ration of the trip to consist of forty-seven lbs. sausages and tenderloins. Also four hundred pounds of pemmican (meat fats and fruits), huge quantities of bacon, dried milk, erisowurst, (pea soup) and other supplies in proportion were carried along. Cod liver oil was included for its healthful properties. Herbert Gaspard, who had charge of provisioning Peary's expedition in his previous trip to the north, was in charge of the commissary. The novel lends afford passinges for vast flocks of sheep which form the principal industry of this section.

K. C. Picnic Sunday July 11th at Park

A general basket picnic party in which members of the K. of C. from Charlevoix and Emmet counties will join will be held at the city tourist park next Sunday, July 11.

Reports from Petoskey, Boyne City and East Jordan indicate that large delegations, members of the order and their families will participate in the event and that all will enjoy a genuine K. C. holiday. Local members of the order are getting everything arranged for receiving and so far as possible providing suitable entertainment for the occasion.

AN EDITOR AS-SISTS PASTOR

Rev. W. H. Phelps D.D., editor of the Michigan Christian Advocate, Detroit, assisted the pastor of the local Methodist Episcopal church in the service last Sunday morning. His address dealt with Summer Church activity and was well received by a large congregation of people.

Dr. Phelps is a unique speaker with a magnetic presence. He is regarded as a leader among Methodists the world around, and the local people feel highly favored to have had the close contact with their editor. Charlevoix Methodists are on the honor roll of the church paper because of their large subscription list.

For several years Rev. Mr. Pollock and the editor have been quite intimately associated in church enterprises. The Michigan Christian Advocate is one of the best up-to-date publications of Methodism and is greatly enlarging its circulation under its present leadership.

HORSES! HORSES! AT FAIR GROUNDS IN TRAINING GRIND

Between 130 and 150 horses are now at the Michigan State Fair Grounds at Detroit training for the big harness circuit races and the other light harness races which will be held at county and state fairs throughout the Middle West this summer and fall.

First arrivals at the stables in Detroit were at the grounds by May 1, and within three weeks more than fifty horses were in daily training. Of the 130 horses approximately half are trotters and pacers and the other half are saddle horses in training for the horse show.

A number of horse shows and fairs have already been held in Ohio and Indiana, and many of the animals which were being conditioned at the Michigan State Fair track have left their stables for short periods in order to compete in these shows and fairs.

Because this past spring has been quite backward, no fast time has been recorded for any of the horses at the track, but by the middle of July real speed will be on tap. By the opening of the State Fair on September 5, the horses which are to enter the various events at the Michigan State Fair will be at their peak form.

Pasturage in Marsh

Romney marsh in Kent, England is protected by a seawall that keeps the business and the guardianship and drainage of the swamp in the hands of a special sanitet corporation. The level lands afford pastirnage for vast flocks of sheep which form the principal industry of this section.

HUGH W. DICKEN
CANDIDATE FOR STATE SENATOR

East Jordan Man is Well Fitted for Holding that Office

[Charlevoix County Herald.]

In printing the announcement of the candidacy of Dr. Hugh W. Dicken for the office of Senator from the 29th Senatorial District, the "Herald" would feel like an neglected a duty if it did not present some of the qualifications of the candidate with a short sketch of his activities in our midst.

"Doc" was born at Rogers, fifty years ago, attended and graduated from the Romeo High School 1893, later attending the University of Michigan and graduating from the Dept. of Medicine and Surgery of the University in the year 1898, having played end on the U. football team in the year 1895.

Locating first in Emmet county, where he was united in marriage to Miss Susie G. Dickenson, daughter of the late Colonel Dickenson, who was for many years clerk of Emmet county. Twenty-five years ago the doctor located in East Jordan, where he has enjoyed a lucrative practice and gained an enviable reputation in his profession. During the world war he offered his services to his country, being two years in the American army, 9 months overseas, returning with the rank of major, 313 Engineers.

Being interested in the welfare of his comrades, he has been active in American Legion work, and is at present Finance Officer of "Rebec-Sweet-Post" No. 227 of the American Legion.

His busy professional life has not kept him from doing his share in connection with all civic matters. Now serving his third term as mayor and for several years a member of the school board. As a friend and neighbor he is unex

Solemn Opening of the Eucharistic Congress

Scenes at the solemn opening of the Eucharistic congress in Holy Name cathedral, Chicago. Below, John Cardinal Bonzano, papal legate, seated on his throne. Above, the ten cardinals who sat facing the legate during the services in the cathedral.

Fighting Ships Passing Through Golden Gate

The United States battle fleet steaming majestically into San Francisco bay where 68 warships dropped mudhooks in man-o'-war row. This is the greatest number of warships that has steamed through the Golden Gate since the entire United States fleet of 144 ships was there in April of last year.

Governor Smith Greeted in Chicago

Gov. Al Smith of New York went to Chicago to attend the Eucharistic congress and was given a most enthusiastic welcome. He is shown here being greeted by friends as he and Mrs. Smith alighted from the train.

WASHINGTON RELIC

This book, held by George H. Carter, United States public printer, records the initiation of George Washington as a Mason on November 4, 1752; also his passing to Fellow Craft degree, March 3, 1753, and being raised to Master Mason degree, August 4, 1753. The book was restored by a group of 113 Masonic lockbinders employed in the government printing office at Washington, who will return it to the Fredericksburg lodge at Fredericksburg, Va.

Veteran of Senate Celebrates

Surrounded by his colleagues in the United States senate, who showered him with congratulations and best wishes, Senator Francis Emory Warren celebrated his eighty-second birthday at the capitol. He is the last member left to right: Senators C. C. Dill, Washington; J. T. Robinson, Arkansas; Francis E. Warren, Wyoming; S. B. Kendrick, Wyoming; Charles Curtis, Kansas; L. C. Phipps, Colorado, and Simeon D. Fess, Ohio.

AD MAN OF ENGLAND

Col. E. Frederick Lawson, president of the British Advertising association and leader of the British delegation to the advertising congress in Philadelphia.

THINGS YOU MAY NOT KNOW

In ancient times borax was extremely rare and almost as precious as gold.

Salonika, Greece, will soon construct the Fort Durazzo and drain Durazzo lake, covering an area of 20 square miles.

Gutenberg printed 300 copies of the Bible—the first book made from movable type—but only four complete copies are in existence today.

Japan's foreign trade in 1925 was the greatest in the history of the empire.

Flamingoes in South America are rapidly decreasing because Indians rob the nests and sell the eggs for food.

Delicate instruments have been invented which enable an aviator to steer safely to a given point in the thickest fog.

Real Use Found for Sunflowers

Crop Used Successfully Both for Silage and for Its Seed for Oil.

The sunflower bids fair to become a regular farm crop, in the light of experiments conducted by the Ontario Agricultural college in Canada and various state stations. It has been used successfully both as a silage crop and for its seeds as feed and for their oil. Southern Illinois joined the sunflower procession when its corn crop failed and there have been favorable reports on the sunflower crop from that section. The Ontario Agricultural college report says:

"The average results of the analyses of the sunflowers compare very favorably with those of corn, being particularly rich in protein and fat."

Distinct Advantage.

The Montana station reports: "When digestible nutrients, yield per acre, drought and frost-resisting qualities of the sunflower are compared with corn, it is readily seen that sunflowers have a distinct advantage over corn for silage purposes in the higher mountain valleys of the West or in other sections of the United States or Canada with similar climatic conditions."

The station at Alberta, Canada, reports: "From our experiments we are quite in favor of the use of sunflowers for silage."

British Columbia reports: "All the animals take to the sunflower silage quite readily and their flow of milk is normal and absolutely satisfactory."

Not Equal to Corn.

Oregon reports that sunflowers make good silage but are not the equal of corn. Pennsylvania says that the milk flow is not as well maintained on sunflowers as on corn. New Hampshire says the cows did not relish sunflower silage at first but took to it readily a little later. West Virginia reports sunflower silage as a success. Colorado station says its herd went through the winter on sunflower silage as well as on corn silage. Seedsmen now stock the principal commercial types of sunflower seed.

Grub in Head of Sheep Controlled by Pine Tar

The grub in the head of sheep is a larvae of a fly which lays its eggs in the nostrils of the sheep during the summer time. A little pine tar put on the nose of each sheep, that is, a little smeared on each side of the nose, neat summer when the hot weather comes, will drive the fly away and help protect the sheep.

It is also a very good practice to plow a fresh furrow in the fields during hot days of June and July, when the flies are bothering. If you do so, the sheep will place their noses against the fresh soil and close the opening so that the flies will not be able to reach them. It is interesting to see how quickly they will arrange themselves along a furrow of this kind as soon as the fly appears.

This creature that you have found is not the true "pink" but the false gid. The true gid is the embryo of tapeworm.

The matter of getting rid of the grubs in the heads of sheep would be a situation to be dealt with by a veterinary.

Eggs From Pekin Ducks

Used Most for Hatching

Ducks may be fed on the rations recommended for chickens, but better results are usually secured by feeding more green and vegetable feeds and a larger proportion of mash. Eggs from Pekin ducks are used largely for hatching, and the profit is secured in producing green ducklings; therefore these ducks are fed a maintenance ration after they stop laying in the summer until about December 1, when a laying ration is given and the amount of mash increased.

Runner ducks have been introduced as producers of commercial eggs, so they should be fed laying rations throughout the year if kept for egg production.

FARM NOTES

Alfalfa pays both the farmer and the land, and the stock like it.

* * *

Even three-leaf clovers bring good luck if you have plenty of them.

* * *

Gardening keeps down the cost of living on the farm. It's no longer just a job.

* * *

The question is often asked, "Which is the best breed to raise?" All are good breeds and are capable of giving good money returns if the owner will take the proper interest in them.

* * *

The petted calf is the one that responds most easily to the care of the young stockman. When the Junior club member feeds his calf, the time that he spends in petting it a little is not lost time.

* * *

Thorough cultivation of corn and sorghum land previous to planting means a better stand, less cultivating after the crop starts to grow, greater sure of controlling weeds, and a higher yield next fall.

* * *

Sour skim milk is probably the best single feed for starting off young chicks. It should be used in connection with ordinary commercial chick feeds and the home-mixed dry mash.

* * *

The cow and calf, the mare and the foal, the ewe and lamb, and even the sow and pigs enjoying the many benefits of the pasture life. Nothing is better for them than plenty of sunshine, green and exercise. It tones them up and stimulates the mother's milk production.

Youthful Inventors

The average age at which twenty of the greatest inventions were produced is thirty-two. Wireless telegraphy, the self-binding reaper, and the vacuum air brake were largely developed in the inventors' twenty-second year.

Use Wisdom in Reproof

A man takes contradiction and advice much more easily than people think; only he will not bear it when violently given, even though it be well founded.—Richter.

Crippled Lads in Unique Boy Scout Troop

Boy Scout Troop 100, Cincinnati area, has the distinction of being the only one of its kind in the country. It is composed of nineteen boys of the Crippled Children's school, at the General hospital. Crutches, artificial limbs, wheel chairs and braces are not enough handicap to prevent them from being full-fledged boy scouts. T. K. Harden, scout field executive, is shown addressing the boys.

Making the Ohio Good Waterway

Will Have Nine Feet of Water in 1929 From Pittsburgh to Cairo.

Washington.—Nine feet of water in 1929 for 968 miles from Pittsburgh to Cairo. That aim of the Ohio River valley, it is announced, is two-thirds accomplished. Dams recently completed by the engineering corps of the War department now assure 9-foot water for 604 miles from Pittsburgh to Louisville, Ky.

"The first hundred years, apparently are the hardest in the development of the Ohio," says a bulletin of the National Geographic society from its headquarters in Washington. "Next year, 1927, will be the hundredth anniversary of the government's efforts to improve the Ohio which began with channel clearing in 1827. The year 1929 will be the fiftieth anniversary of the first of the 22 dams and locks which are expected to make the Ohio more useful as a waterway.

"There will be celebrations of the Ohio's anniversaries. Probably there will be flotillas of boats. Each of the four great cycles of the Ohio's life as a waterway is known by a boat. But what a motley collection. The only thing they have in common is that they float. For a hundred years after the Ohio's discovery by La Salle in 1670, the native Indian canoe reigned supreme. The flatboat for 50 years. Then boat building flowered in the building of 'floating palace' steamboats. But the Civil war stopped that. The Ohio river of today is chiefly a river of barges.

"The Ohio river's story falls easily into pageants. Land with Monsieur Celoron de Blenville at the bank where the Scioto comes into the Ohio. Watch him bury at the foot of a great tree an inscribed lead plate he brought from Montreal. His 200 Indians and soldiers of France have drawn up their canoes on the shore. They stand in battle array. Monsieur Celoron hammers an iron plate with the arms of France to the tree. That will warn the world and the English in particular, he hopes, that this is property of the king of France. Keep off!

"Monsieur recites a speech prepared by La Salle for such occasions. It ends with a lusty shout, 'Vive le Roi.' 'Vive le Roi' shout the soldiers of France in battle array and the startled silence of the woods echoes the French boast. Monsieur Celoron and his 200 paddled in the name of fura as well as kings of France but such a river could not waste its strength forever on the luxury of fur.

"The stage of the next Ohio pageant is about 40 feet long and 12 feet wide. It is the deck of a Kentucky broadhorn. If this flatboat had a roof over the whole 'deck' instead of half it would be a New Orleans broadhorn. The three families who have built this flatboat are going only as far as Marietta. Under the roof one woman feeds wood in a small clay fireplace. Others busy themselves preparing the evening meal. They work amid a clutter of chests and chairs and the ridiculous needs of a pioneer household.

"They brought these precious possessions from New England in Conestoga wagons over the interminable ridges of the Appalachians to McKeesport. The families built the flatboat at McKeesport. It will never come back. The deck and the eight-foot sides will be the floors for their cabins in Marietta.

"At Cincinnati, on the Ohio, Mark Twain embarked on his career as a river steamboat pilot. The war which wiped out the steamboat era took his job, too. At one time two-thirds of the steamboat tonnage of the United States was on the Mississippi-West rivers. On the Ohio and other Mississippi tributaries there were more steamboats than in all the ports of Great Britain.

"Few people see the modern pageant of the Ohio. They glimpse the river from a pullman car window and thus confirm by vision a geography lesson of their teens about a twisting thin on the map. The pageant is spread at any one of the locks between Pittsburgh and Cairo; locks which are 110 feet wide (the width of Panama canal locks) and 600 feet long. Each lock is linked to the opposite bank by a 'house of cards' collapsible dam. A series of panels, usually four feet wide, propped up by heavy struts, breasts the current.

"When the river is in flood above the 8-foot level a barge releases the props. The panels fall flat to the river bottom. When the river drops the dam is 'fished' up into position again. The stage set, the chief actor in the Ohio's modern pageant is a staunch towboat steaming 'round the bend. Like a hen with too many chicks it approaches the lock dragging 12 barges four abreast. They are loaded, not with fur, not with Immigrants. They are not 'floating palaces.' They carry coal from Kanawha."

"One man is at the stern with a 40-foot steering oar. A lanky boy in the bow holds a 'gouger,' a short oar for use in swift water. In one hand he has a tin horn—every boat carries a horn. As the evening mists close down the boy blows the horn to warn any craft ahead. The reverberating blast of the horn is the echo and answer to 'Vive le Roi.' There are two 20-foot sweeps on each side of the flatboat. But these are for emergencies. The Ohio offers free transport on its swift current to any settler who will try his luck in the valley of the Mississippi, the largest valley in the world capable of inhabitation by man.

Chantey of the River.

"Flatboats of the Ohio were to the Middle West what the 'iron horse' was to the far West after the Civil war.

"'As they float down the river the 'Pilgrims of the Ohio' sing:

'O, the river is up, the channel is deep,
The wind blows steady and strong,
Appleshing their oars the mariners leap,
As they row their boats along.
(Tenor.) Down the River
(Bass) Down the River
(All) Down the O-Hi-O.'

"The steamboats were finer than anything on shore,' says Mark Twain, who is the most entertaining authority of the next and most golden age of the Mississippi waterways. The third pageant begins with the launching of the first steamboat at Brownsville, Pa., in 1811.

"Compared with superior dwelling houses and first-class hotels in the valleys writes the beloved humorist, 'they were "palaces." They tallied with the citizen's dream of magnificence . . . chimney tops cut to counterfeit a spraying crown of plumes; pilothouse, hurricane deck, boiler deck, guards, all garnished with white wooden filigree work of fanciful patterns, gilt deer horns over the big bell, oil pictures on every stateroom door, big chandeliers every little way, such an April shower of glittering glass drops.'

Styles Exhibit by Women's Bureau

For the sesquicentennial in Philadelphia the women's bureau of the Department of Labor has arranged an interesting exhibit of styles from the Revolution down to date. These three members of the bureau staff (left to right), Miss 1776 (Mrs. Lois Gerber), Miss 1876 (Miss Isabelle Haydon), and Miss 1926 (Miss Margaret McKinley).

ANDREWS EXPEDITION FINDS "DRAGON BONES" IN CHINA

Remarkable Discovery Follows Trade in Fossils to Be Ground for Medicine.

Peking, China.—The fame of "dragon bone medicine" among the Chinese of the interior province of Szechuan has led to remarkable discoveries of remains of long extinct animal forms by a member of the Central Asiatic expedition under Roy Chapman Andrews. Drawn by reports of a trade in "dragon bones" which has flourished along the middle Yangtze for seven or eight centuries, Walter Granger, paleontologist of the expedition, investigated and found fossils of thirty-five to forty animals of the Pliotocene age.

Granger disclosed his discovery in Peking, where the expedition still is waiting for a chance to get to Kulgan and the Gobi desert to continue its search for traces of primitive man.

Civil war at present bars any movement along the railway from Peking to Kalgan, although the American scientists are ready for their next excursion into the upland wastes of Mongolia.

Among Granger's most notable discoveries among the "dragon bones" were skulls of the stegodon, an animal which resembled the mammoth, of a giant tapir, and a rhinoceros. A complete fossilized skeleton of a gaur, or East Indian bison, and fossils of about thirty-five other extinct forms, including ancestors of many present-day animals.

Near Wanhsien, on the Yangtze, Granger learned farmers in the shale section were digging "literally tons" of bone fossils out of mud-filled pits in a limestone ridge running sixty to seventy miles along the river, and selling these "dragon" remains to be pulverized for "medicine." Dealers bought them for shipment to Chungking, the most important river port of the Szechuan.

The excavations made in the pits formed by action of water on the rock are often 75 to 100 feet deep, Granger said. "The salvaged bones are dried, cleaned and piled in a corner of the farmer's house, waiting for the dealer to come along."

Asserts All Lincoln Relics Are Collected

Springfield, Ill.—Half a century of activities of collectors of Lincoln relics and papers has cleaned out the last vestiges of Lincolniana, J. C. Thompson, former judge and lay-historian here, says.

Mr. Thompson, who has had experience as a student of Illinois history and particularly that relating to Lincoln, says he refuses to be disturbed by reports of new Lincoln discoveries.

"Washington's bodyguard," he said, "was a long time in dying and it will be the same with Lincoln. The collections of some 500 Lincoln enthusiasts and various museums have garnered practically everything that ever related to the emancipator or his life."

Mechanical Time Beater Limits Jazz Dance Speed

Paris.—Jazz has to watch its step now. A Paris dance hall has introduced an instrument to beat time mechanically for the orchestra and indicate the number of beats per minute of the music on a great dial resembling a clock face.

The dial, placed on the orchestra stand and visible at the same time to dancers and musicians, is electrically controlled by the orchestra leader. When the tempo gets too fast, the dancers protest and the leader moves a little switch until the mechanism beats time to suit the couples on the floor.

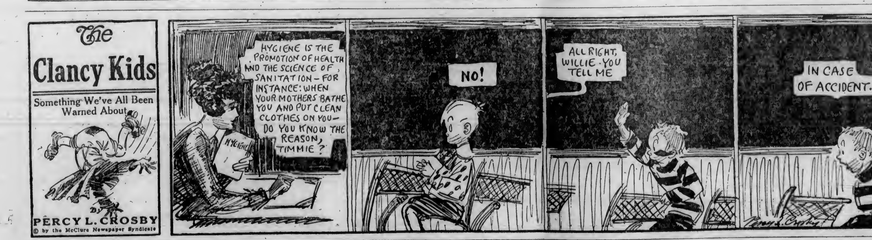
HOME WANTED FOR A BABY

The Clancy Kids



OUT OF DATE

Helen—"Mary is always in a bustle." May—"Doesn't she know such things were discarded years ago?"

At Ten Miles an Hour

"I understand you have a second-hand car. Do you drive it?"

"No! We coax it along."—Good Hardware.

Better Not Be

Bookkeeper—My salary is not what it should be.

Office Boy—But do you think you could live on it if it was?

Force of Habit

Wife of Keen Angler—So glad to make your acquaintance, Mr. Jones—but my husband gave me the impression that you were very tall!

Jones—Ah!—but you must remember that he once fished me out of the river!

Low Visibility

"I saw you in church last Sunday."

Gray—I didn't notice you.

Bray—I suppose not. You see, I took the collection.

Wholly Artificial

Mary—Don't you think Cholly is awfully artificial?

May—Even his mind's affected, I think.

Wonderful Cow

Mrs. Newsewed—Oh, Harry, won't it be wonderful! We'll live in the country and keep a cow.

Her Husband—Just one cow?

Mrs. Newsewed—Why certainly! We can milk her every day and cut a beefsteak from her every week.

Naturally

Helen—Gosh! Is Sue still going on about that Spanish shawl her fellow gave her?

Mabel—Yes, she's still wrapsodizing.

A Tedious Job

City Ed—Haven't you got that list of today's murder victims ready yet?

Cub—I'll have it in just a minute, sir.

Had Taken Something Off

May—Yes, it was an expensive dress. It was very high.

Mary—To look at it one would think the dealer had taken something off.

ATTRACTIVE WOMEN

If You Would Be Attractive You Must Be Healthy

A beautiful woman is always admired. There are many types of beauty. But no woman can be truly beautiful unless she is healthy. Radiant vitality is always attractive however plain a woman's features may be.

Many a woman has found her health improved thru the use of Lydia E. Pinkham's Vegetable Compound.

Weakness, loss of weight, and a pale complexion were a few of the things of which Mrs. J. C. Taylor of Box 211, Tallahassee, Florida, complained before she started taking Lydia E. Pinkham's Vegetable Compound. "I could not even sit down and talk to a friend for any length of time," she states, "I would forget what I was talking about and fall so blue." Mrs. Taylor is so pleased with the work of the Vegetable Compound that she keeps a bottle of it in the house at all times—and when it is empty, her husband makes sure that she has a new bottle. "It have regained my strength," Mrs. Taylor writes. "I can do all my housework now and I feel just fine."

Lydia E. Pinkham's Vegetable Compound is made from roots and herbs and has been proven by its popularity among women for over fifty years.

FACIAL ERUPTIONS

unsightly and annoying—improved by our application of

Resinol

Made Sure of Soft Seats

A young Japanese couple, attired in American clothes and each carrying a square pillow, entered a cafe in the Broadway (N. Y.) subway. In the most matter-of-fact manner they placed the pillows in their seats and sat down, wholly unconcerned at the amusement it caused their fellow-riders.

Proof Positive

Johnny had been the guest of honor at a party the day before, and his little friend, Tommy, had been hearing about it. "Have a good time?" asked Tommy.

"Did I?" answered Johnny. "I'm not hungry yet."

PRESIDENT COOLIDGE ON INDEPENDENCE DAY

July 4, 1776, was a day of history in its high and true significance. Not because the underlying principles set out in the Declaration of Independence were new; they are older than the Christian religion, or Greek philosophy, nor was it because history is made by proclamation or declaration; history is made only by action. But it was an historic day because the representatives of three millions of people there vocalized Concord and Lexington and Bunker Hill, which gave notice to the world that they were acting, and proposed to act, and to found an independent nation, on the theory that "all men are created equal; that they were endowed by their Creator with certain inalienable rights; that among these are life, liberty, and the pursuit of happiness." The wonder and glory of the American people is not the ringing declaration of that day, but the action, then already begun, and in the process of being carried out in spite of every obstacle that war could interpose, making theory of freedom and equality a reality. We revere that day because it marks the beginnings of independence, the beginnings of a Constitution that was finally to give universal freedom and equality to all American citizens, the beginnings of a government that was to recognize beyond all others the power and worth and dignity of man. There began the first governments to acknowledge that it was founded on the sovereignty of the people.—From a fourth of July address by Calvin Coolidge at the home of Daniel Webster at Marshfield, Mass.

BURNING SHIPS

Press dispatches the other day carried the story of the destruction, on Henderson's Bay, near Tacoma, Wash., of thirteen ships which cost the people of the United States $4,250,000. These were war-time ships intended to carry supplies to the American troops overseas,but which never left their home ports for the reason that the war ended before they could be put into use. The boats had been purchased from the government by a private concern and were burned to salvage the scrap in them.

No matter what one may think about our shipping policy during the World War, it must be admitted that if the United States had possessed an adequate merchant marine of its own at the outbreak of the conflict the expenditure of billions upon experiments and hurried shipbuilding when the crisis came, would not have been necessary.

The real fault, therefore, of the shipping fiasco of war times, lies in the neglect of the people of the United States through their representatives in the government; in failing to see that there was a real merchant marine on the high seas, flying the American flag.

And we are again confronted with the question of what we are going to do about keeping the Stars and Stripes on the ocean. It is generally admitted that government direction, or some sort of federal aid will be necessary to maintain an adequate merchant marine.

The reasons for it are both patriotic and economic. We need the marine because it will protect us from foreign shipping monopolies which could just as easily gauge us as the rubber monopoly did.

And then we need the marine for national defense. Without it we will be as helpless if we are suddenly plunged into another war as we were in the last, and the shipping fiasco may be repeated. Money spent in advance, therefore, on a merchant marine will be economically and wisely invested.

These occasional million dollar bonfires of war time ships ought to impress upon the American people the advisability of having at all times an adequate merchant marine.

DOWN ON THE FARM

Things, down on the farm' are quite different now than in the old days according to Congressman John W. Summers of Washington, who writes interestingly of his boyhood experiences in the country, comparing conditions then and now:

"When I was a boy down on the farm we planted a few acres to corn, we sowed a few acres to wheat and oats and grass. We milked a few cows, we sold an occasional calf, we fattened a pen of hogs a heterogeneous flock of poultry ran everywhere. A small band of sheep supplied blankets and socks, mittens, pulse warmers, and red, white and blue 'comforters,' and hoods for the girls.

The Summers 'boys' worked early and late six days a week and cared for the stock all day Sunday. Any additional labor was procured at fifty cents a day and board' or seventy-five cents a day if the laborer boarded himself. We took a few sacks of wheat to mill twice a year—that furnished flour and bread for the family for the entire year. We shelled a bushel of corn occasionally and took it to a near by mill, waited for it to be ground, and returned with 'the makings' of our corn bread and mush for winter evenings.

We swapped bacon for jeans and copper toed boots. We swapped butter, at eight to eighteen cents a pound, and eggs, at seven to fifteen cents a dozen, for sugar and coffee and rice and calico.

When we went 'courtin' we rode a mule or a stray colt. These were the good old days our eastern friends still have in mind. No freight problem. No Auto. No gasoline. No hard roads. No telephone. No radio. No phonograph. No piano. No organ—only a Jew's harp and I could not play that. No electric lights nor gas nor electric range. No coal bills. We cut our own fuel from our own or neighbors woods without restraint. No 'store clothes' for Johnnie. No reaper. No mower. No 'header.' No 'combine.' Those were the days of the 'scythe and cradle.' No movies. No soda fountains. No nothin' for a boy down on the farm but work, fishin', huntin', trappin', the old swimmin' hole and school and 'spelling bees' and games and 'exhibitions' and church and Sunday school and 'singings.'

That was the simple life! Those were the good old days' down on the farm.

There was no farm problems then."

Ancient Swiss Cathedral.

St. Basil, Switzerland, is a cathedral founded in 1019.

COMMENT.

—Heart beats can now be recorded on a phonograph record, and if this gets to be the custom, a lot of these fellows who claim to be in love are going to have a hard time proving it.

—New York City is now closing night clubs at 2 a.m. and the visiting hotter and cigar men are complaining because there is nothing to do for the rest of the evening.

—An open-minded statesman is one whose stand is virtually anywhere in the broad ground between 100 per cent liquor and 100 per cent enforcement—Det. News

—Bolshevist complains that American labor leaders do not represent the philosophical intelligentsia. Maybe they just represent intelligence.—Plain Dealer.

—Uncle Sam is about as popular in Europe as the village quire and agency lemon dealer was in the Horatio Alger books that we used to read when we were boys.

—The summer climate of our national Capitol was the subject of debate in the British parliament the other day. That is what you might call hot stuff.

—One reason we can chase dollars, as Europe charges we do, is that we have plenty of them around to be chased.—Pittsburgh Gazette-Times.

—It sometimes happens that what the candidate thought was a call by the people was merely an echo of his own voice. —Dayton News.

—It is said that telephone girls never engage in a lottery because they know that they are pretty sure to get the wrong number.

—Brazil has given up its box seat in the League of Nations and is going to leave the game before the ninth inning is over.

—The bolsheviks over in Moscow are unusually quiet just now, which is a good sign that they are up to something.

Copper 5,000 Years Old

Copper vanity cases, a copper hand mirror, copper razors, tools, fishhooks and thirlpins have just been found in Mesopotamia by scientists excavating the five thousand-year-old palace of the kings of Kush. Copper is truly the everlasting metal.

Notice for Annual Meeting

The Annual Meeting of the School District No. 1, Charlevoix City and Township, will be held in the high school building, on July 12th, at eight o'clock p.m. for the purpose of electing two trustees for a period of three years, and the transaction of such other business as may lawfully come before the meeting.

Dated this first day of July, 1926.

H. A. CRAIG, Secretary.

For State Senator

To the Citizens of the 29th Senatorial District of Michigan:

Having been urged by many to become a candidate for the Senate from this district, and Mr. Pearson having stated to me that if I was a candidate he would not seek third term, I have decided to submit my name for your consideration at the coming primaries, on the Republican Ticket, assuring you that, if I am chosen to serve you in such a capacity, I will do my utmost to prove worthy of such confidence bestowed in me.

Sincerely yours,

HUGH M. DICKEN, M.D.

THE THEATRE

"Thousands of persons killed in the blinking of an eyelash! One moment taking part in a pagan revelry—the next fleeing the wrath of God! This is one of the situations which develops in "The Wanderer," beloved parable of the Prodigal Son, which opens at the Palace theatre on July 9-10. As "The Wanderer," William Collier Jr., plays a part in which he blends comedy with tragedy and sympathy with hatred. Seldom has there been a masculine role that has called for the variety of emotions enacted by the prodigal son in "The Wanderer."

Gloria Swanson sparkles through her latest picture,"The Untamed Lady, at the Palace theatre, July 11-12, with all the brilliancy and polish of the finished actress and luxurious wardrobe of a society heiress, who has youth, beauty, social position and—twenty million dollars!

Three times she becomes engaged, and each time the engagement blows up. It is then that fiance No. 4 comes along and determines for her good as well as his own peace of mind to tame her. And then the fun—and action—and thrills, begin in earnest.

The team of George Sidney and Charlie Murray bids fair to become as famous on the screen as Weber and Fields were on the stage. In their latest picture in which this rotund son of Abraham and the wry faced son of Erin have appeared never have they been as funny as they are in M. C. Levee's comedy, "Sweet Daddies," at the Palace theatre, July 13-14. This is one of those wholesome comedy affairs with a particularly funny twist at the end. The plot scheme gives ample room for the broad and genuinely comical situations and at the same time affords opportunities for the display of the most unemotional.

Time was when the champions of the prize ring, race track and other branches of sport passed out of the picture when their day was done. Now, however, they pass into the picture. This fact was clearly emphasized during the filming of "The Rainmaker," at the Palace theatre next Thursday and Friday. One of the spectacular scenes in the picture is a thrilling handicap race. Each of the jockeys are mounted on a real thoroughbred of the race tracks.

"The Cowboy and The Countess," the latest Fox films production, starring Buck Jones, which opens at the Majestic theatre Saturday and Sunday, is a delightful tale of cowboys on tour in Europe. In it the romance of the West and of the Old World are combined with thrills and dramatic situations. Helena D'Algy, the vivacious little South American beauty, plays opposite Buck.

He Sold Matches by *Telephone* in The Dull Season

Business was dull the first of July, so the salesman tried the Long Distance sales plan suggested by the Telephone Manager.

He went to the telephone office in Jackson, gave the operator a list of 20 stores in eight nearby towns and asked that the calls be set up one after another—sequence calls, they are called.

The plan with the consequent saving of money to the match company and therefore to the dealer, appealed. The idea went over big—and so did the matches. And the salesman covered the eight towns in five hours.

You can sell or buy anything by Long Distance

STATE OF MICHIGAN—The Circuit Court for the County of Charlevoix—In Chancery.

William J. Gallagher, Plaintiff,

vs.

Samuel Shaw and his Unknown Heirs, Devisees, Legatees or Assigns, Defendant.

Suit pending in the Circuit Court for the County of Charlevoix, in Chancery, at the City of Charlevoix, in said county, on the 22nd day of June, A. D. 1926.

In this cause it appearing from affidavit on file that the defendant Samuel Shaw is not a resident of this state, and that it is not known in what state or country he resides, and that the names and residence of his heirs, devisees, legatees or assigns are unknown.

On motion of A. L. Fitch, attorney for the said plaintiff, it is ordered that the said Samuel Shaw, defendant and his unknown heirs, devisees, legatees and assigns, cause their appearance to be entered in this cause within three months from the date of this order; and in case of their appearance they cause their answer to the plaintiff's bill of complaint to be filed, and a copy served on said attorney for the plaintiff within fifteen days after service on said defendants of a copy of said bill and notice of this order, and that in default thereof, said bill be taken as confessed against said defendants.

And it is further ordered, that within forty days, the plaintiff cause notice of this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in said county, and that publication be continued therein at least once in each week, for six weeks in succession and that said plaintiff cause a copy of this order to be mailed to said defendants at their last known postoffice address by registered mail with postage thereon fully prepaid and demand a return receipt therefor, or that plaintiff cause a copy of this order to be served on said defendants personally at least twenty days before the time herein prescribed for the appearance of said defendants.

Said bill of complaint is filed to quiet title to the following described parcel of land situate in the Township of St. James, in said county, namely: Lot one of Section 23, Town 39 north, Range 10 west.

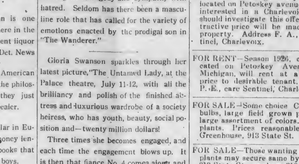
The Wool Industry in South Africa

(Letter from E. S. Ratcliff, Bloemfontein, O. F. S., Africa)



© Underwood & Underwood

Wooling woolers work on sheltter booms in Africa. Note the Overseers.

Four of a kind. Kaffir children.

The Union of South Africa is rightly classed among the great wool producing countries of the world. Climatic conditions there are admirably adapted to the breeding and raising of the Merino type of sheep with a strong, staple wool.

A large part of this country is suitable only for the raising of sheep, and the government is making progressive and intelligent efforts to improve both the sheep and the manner of preparing the wool for market.

Besides being a strong source of South Africa, long-time government loans are extended to sheep owners for the erection of jackal-proof fencing. Government sheep experts are maintained permanently in wooled districts so that their advice and service may be assured at a moment's notice.

The mutton shown at South African is the best obtainable. Special Dopedand-weekly shows are held, and breeding for mutton rather than wool is the result are purely Merino in character.

Progress in this South African industry is particularly noticeable in the lowveld. Despite the fact that Kaffir labor can be secured at the munificent rate of $2.50 American a month, there is a trend towards the modern shearing machine as against the age-old hand blades, which, even at that, have not disappeared entirely by many otherwise entirely progressive wool makers.

A study of this fact, however, readily explains the reason and thrills that there is a first cost for the machine, the unskilled black laborer himself to use much more readily than to the hand blades, and does a much more markedly smooth job of shearing with the machine.

Once adapted to the use of the machine, its economic value is demonstrated in the materially greater number of sheep shorn daily, the better market value of the wool, the fewer ruined sheep, and not least important, the additional 5% to 12½ more wool obtained with the machine over and above the amount of wool secured with the hand blades. As a consequence, the machine resolves itself into a small investment with certain and big returns.

Steadily, the science of wool-marketing in South Africa is fast approaching the scientific efficiency of the Australian marketing plan, which is, without doubt, the most practical and efficient in existence today.

Considering that the four provinces, Natal, Transvaal, Orange Free State, and Cape Province, which comprise the Union of South Africa, have 60,000 square miles less of territory than Oregon, Washington, Idaho, Montana and Wyoming combined, it is quite evident that they contain many and many more sheep than are five states named.

This alone makes vast country a strong economic link between trade in the wool industry. It is interesting to note however, that the great bulk of foreign progressiveness is due to American initiative, American implements, and machinery and American ingenuity. The South African wool industry holds true to this in that American methods and American machinery are destined to take a prime and important place in the economic progress of the far distant Union of South Africa.

NEW PALACE THEATRE

Attractions for Coming Week

Friday-Saturday July 9-10—

"The Wanderer, with Ernest Torrence, Greta Nisson, William Collier Jr., Wallace Beery, Tyrone Powers and Kathryn Williams. What a theme for a motion picture! And how perfectly Wm. Collier jr. portrays the role of the first black sheep. The story of The Prodigal Son of long ago who left home for the wine, women and song of a wicked city. Fox News Reel. Extra—Educational comedy, "Mr. Cinderella."

Sunday-Monday, July 11-12—

Gloria Swanson in "The Untamed Lady." She had 20 millions and an ungovernable temper. Come and see men try to tame her. A thoroughly spoiled and yet thoroughly lovable daughter of wealth, placed in a position whereby she becomes absolutely and irrevocably "tamed." Extra—Educational comedy, "Nobody's Business."

Tuesday-Wednesday, July 13-14—

"Sweet Daddies" with Jack Mulhall and Johyna Ralston-All the way from Florida to New York and out to sea—the laughs and the thrills follow as sure as night follows day and about a million times faster. Made by the man who gave you "Classified."

Thursday-Friday, July 15-16—

"The Rainmaker" with Ernest Torrence, Wm. Collier, Jr. and Georgia Hale. Jockey Robertson, "The Rainmaker" they called him. Owners of mud horses lived him. The others panted him to stay away. See how a dramatic turn of events enables him to save an entire town from fire and plague. A story that is a sensation. Extra—Educational comedy, "Time Flies."

—MAJESTIC THEATRE—

Saturday-Sunday, July 10-11—

Buck Janes in "The Cowboy and the Countess," shows a highly original story of a troupe of cowboys on an exhibition tour of Europe. Besides a very original plot, the story is full of action and thrills from start to finish. Extra—Educational comedy "Sky Bound."

CONCRETE WALL TO KEEP AUTO RACERS ON THE FAIR TRACK

Sanctioned American Automobile Association Meeting Ensures New Safety for Spectators.

So that spectators may be fully protected during the automobile races which will feature September 11, the final day of the Michigan State Fair, a solid concrete retaining wall will be constructed around the centerfield in which automobiles will be parked and spectators permitted to watch the event.

For the first time in years automobile races sanctioned by the American Automobile Association, the governing body of racing in this country, will be held at the state fair.

Special emphasis is being laid on adding up to all the rules of the contest Board of the A. A. A. Thes rules provide that a hubbligh rail must be around the centerfield provided spectators are permitted within the enclosure. They also require that another fence forty feet inside the hubbligh rail be constructed and that no one be permitted between the rail and the fence.

Construction on the inner fence is progressing. A temporary outer railing made of six by sixes and backed with four by fours has been constructed for the automobile races which were held under the A. A. A. sanction at the State Fair Grounds on June 27. This rail was hastily constructed in order to conform with the rules of the Contest Board, because time did not permit the construction of a concrete rail by the day of the race. The two months intervening between this race and the opening of the fair will permit the construction of a rail which will be there for all time.

A show ring is being constructed at the State Fair Grounds in Detroit in the centerfield of the mile track for the horse show which will be staged in connection with the annual Michigan State Fair to be held from September 6 to September 11.

The show ring will be 250 feet long by 100 feet wide and is being built directly in front of the grandstand at the finish wire.

To the Taxpayers of the City of Charlevoix

Notice is hereby given that the July Tax Roll of the City of Charlevoix has been delivered to me, and that the taxes therein levied are payable at my office at any time on or before the 15th day of September, 1926, without charge for collection.

On all taxes remaining unpaid after the 15th day of September a collection fee of 4 per cent will be charged and collected.

Office hours:—8:30 a. m. to 12:00 noon, and 1:00 to 5:00 p. m.

PERSONALS

Neil Newman, of Lansing, is here today on business.

Born to Mr. and Mrs. Colon McKenzie a girl, Monday, July 5th.

George A. Sanford of Bellaire, was a Charlevoix visitor last Friday. ½

Nels Lafreniere of St. James, is spending a day or two here on business.

George W. Hawthorne, of Bay City, was a business visitor here early this week.

Born, to Mr. and Mrs. Clarence N. Bridge, a son, William Albert, Friday, July 2, 1926.

Mrs. Geneva Green, Evanston, Ill., is at her cottage, 419 Antrim-at., for the summer.

Mrs. Anna Gatliff, of Kalamazoo, is visiting at the home of her daughter, Mrs. Perry Smith.

Eugene Du Vincent, clerk of Presque Isle County, was a business visitor in this city last Monday.

Mr. and Mrs. Barron Callen and son "Bill" of Columbus, Ohio, are at Pine Point for the season.

Mr. and Mrs. Robert Greenfield, of Baltimore, Md., spent Wednesday in Charlevoix, with friends.

Hert Adams of Vanderbilt, a brother of Len P. Adams, was a visitor here from Friday until Monday.

Mr. and Mrs. Frank A. Kenyon, of Mackinac Island spent Sunday with relatives and friends in this city.

Mr. Leo. Lecher of Detroit, is spending the week here a guest at the F. M. Lewis cottage, 223 Clinton street.

Theodore Erickson motored up from Holland last Friday to spend the 4th and visit old friends in Charlevoix for a few days.

Mrs. N. Allison, of Boston, Mass., will spend the summer season in this city at cottage 13 on Belvedere Club grounds.

Mr. A. E. Wilbur spent the week-end with his parents, Captain and Mrs. O. E. Wilbur, returning to Chicago early this week.

Mrs. Dan Gillespie and son Edward, following a visit here over the week end, returned to their home, St. James, Tuesday.

E. V. Smith, piano tuner in the city the week. Leave orders with W. C. Bellinger, Addie Holley or Hotel Bartlett.—adv.

Mr. Frank Baumgardner spent a few days with his mother, Mrs. E.C. Baumgardner recently, returning to Toledo, Ohio.

Mr. and Mrs. I. M. DeVoe and daughter, Miss Helen of Detroit, were guests of Mr. and Mrs. Geo. W. Pykes over the week end.

Mr. and Mrs. E.C. Dyer of Toledo, recent guests of Charlevoix friends motored their motor trip, leaving this city last Wednesday.

Mr. and Mrs. Stanislaus Gregeber of Kalamazoo, arrived here last Saturday and will spend a two or three weeks vacation period in this city.

Mr. and Mrs. Homer Nold, of Detroit, on a vacation trip motoring through this part of the state, spent Wednesday with friends in this city.

Mrs. A. D. Goldman and family from St. Louis, Mo. arrived here Saturday night and will spend the summer months at their Michigan avenue home.

The Fountain City Hotel will serve a special chicken dinner hereafter on Sundays during the season. The price for same will be placed at 75c. per plate.

Harold Webster spent a vacation of several days with his parents, Mr. and Mrs. Plntt Webster in Hayes township recently, returning to Flint early this week.

Mr. and Mrs. M. L. Hartman and family of Chicago arrived here several days ago and are installed in their summer residence, 302 Michigan avenue, for the season.

Mr. and Mrs. Leon Van Etten, of Flint, guests of Mr. and Mrs. Platt Webster at their farm home in Hayes township for several days, returned to their home last Monday.

Mr. and Mrs. H. V. Cook, daughter Miss Gwendolyn and Mrs. Sadie Vrooman, all from Oak Park, arrived on the S. S. Manitou Tuesday, and will spend the summer season here.

The W. C. T. U. will meet with Mrs. Kibbie on Friday afternoon at 2:30. An interesting program will be presented, and some political matters of importance will receive attention.

Mrs. J. W. Harris and daughter Miss Edith, of Oak Park, Ill., were passengers on the S. S. Manitou last Tuesday. They will spend the season at their summer home near Ironton.

Dr. Frank H. Wilkinson is taking a two weeks vacation and is spending the same at the O. T. C., Camp Custer; Mrs. Wilkinson during the same period is visiting friends in Lansing.

Mr. George Borgeon, of Muskegon, and family, spent several days recently with Arthur Bergeon. The gentlemen are brothers. The first named has been a resident of Muskegon twenty-two years. About forty years ago he resided in Charlevoix and was a marine engineer, sailing for some time with the late P. D. Campbell.

Rev. Fr. Arnold took the air route from Charlevoix last Sunday making the trip to High and Beaver Islands to visit the Indian missions under his supervision and to whom he administers spiritual consolation. Heretofore the trip has been made by boat, later years by steamship, but in earlier years by sail boats and lighter craft even canoes. Such was the manner of travel nearly three centuries ago when Father Marquette was in addition to his exploration work, seeking converts amongst the several Indian tribes in this region, instructing them in the new faith and attending to their physical needs. Time has wrought many and great changes. Main ingenuity, his ability to perfect new and improved mechanism in accordance with advanced ideas is aptly demonstrated by modern airship, hence the forward movement in the travel by air. Father Arnold is probably the first of his faith in this state to make a trip in this manner in the discharge of such duty.

Mrs. W. N. Coulter, a visitor here for several weeks with her sister, Mrs. W. A. Smith, 209 Park avenue, and other relatives, returned to her home, Rochester, Mich., last Wednesday.

Mrs. Eugene Du Vincent and Mrs. Ray Ferguson, of Rogers City, were passengers on the James E. Sanford last Tuesday, making the trip to visit relatives and friends at St. James.

Sisters M. Concepta and M. Incarnia, sisters of the Immaculate Heart of Mary, of Chicago, are visitors at St. James. They made the trip on the James E. Sanford from Charlevoix last Tuesday.

Mrs. John McCann, who was called to Chicago a few days ago to attend the funeral service of her sister, who was killed in an automobile accident, returned to her home, St. James, Tuesday of this week.

Mr. and Mrs. Frank Calousky, of Ludington were Charlevoix visitors early this week. Tuesday they continued their trip to St. James, where they will visit Mrs. Calousky's parents, Mr. and Mrs. W. J. Gallagher.

Edward Hayes, of Detroit, spent the week end with relatives in this city, returning to Detroit he was accompanied by his sister, Mrs. Henry Partridge, who will spend a month with relatives in Detroit before returning to Charlevoix.

Mr. and Mrs. E. A. Stowe and Mr. and Mrs. L. E. Hartman, of Grand Rapids, were guests of "Uncle Lewis" Wentzenitz, last Saturday. The party left Grand Rapids Friday on a motoring trip through the western part of the state with Mackinac Island scheduled as the farthest point on this outing.

Mr. and Mrs. R. C. Hammet are the proud grandparents of a little girl born Sunday, July 4th, at the Charlevoix Hospital. Neither the parents, Mr. and Mrs. R. Dunbar Lasely, of Indian Alabama, or the grandparents have thus far, been able to select a name for the baby.

Business thus far with the State owned ferries covering the Mackinaw City-St. Ignace route report a heavy increase in business over the period to July 1st over the 1925 season for the same date. Reports show that the big percentage of automobile tourists go to Sault Ste. Marie and thence to Canada for an extended trip, while tourist traffic west from St. Ignace to Wisconsin is far less than in previous years.

Mr. Brrman, representing the Royal Atelier Studios of New York City, is a guest at Hallett's Inn where appointments can be made by parties interested in having portrait work done at their homes. The Company make a specialty of portraiture work of children, something new, different and artistic. All work is completed and delivered subject to the approval of the patrons.

Mrs. Mae Knight of Kalamazoo, is at the Belvedere club grounds for the season. She also has under consideration the building of a cottage for occupancy in future seasons on the grounds of the club. Plans for the same are in the hands of contractors who will bid on the materisl and construction work within a few days. Should the progect go forward the new cottage will be completed prior to the opening of the 1927 season.

Erased!

A letter inclosing sixpence in stamps, received by a Romford (Essex) tradesman, read: "When a child I stole a piece of india rubber from your shop. Please accept inclosed as restitution."

Conclusive

"My client is not mentally normal. The fact that he murdered his wife is partly a proof of that, and the fact that he married again is conclusive." —Dorfbuerder, Berlin.

CHURCHES

Baptist Church

Rev. Herman Burns, D. D., —) Pastor

Hundreds of strangers are visiting in or passing through our city every day. We are proud of its beautiful homes and streets. No other city can excel and few can equal its attractiveness. Can we also have these tourists take away the impression that we are as pretty and pure in character in contrast with other towns? Let us try.

The usual services will be held Sunday morning at 10:30 and Sunday evening at 7:30 with Bible School at 12:00 to which all are cordially invited.

Methodist Church.

C. E. Pollock, Pastor.

"The Heart of Fellowship"—sermon next Sunday morning at 10:30. The "Lord's Supper" will follow the sermon. The adequate facilities for serving this sacred Rite make it possible to accommodate the entire congregation very quickly, so that the service will not be unduly prolonged. Every person who desires to participate, regardless of church membership or non-church membership, will receive a welcome at this service.

"Ships That Pass In The Night"—story sermon subject at 7:30 p. m. next Sunday. A great feature service that lasts one hour—good music planned.

Miss Ellen Cook, a Western State Normal student, will lead the Epworth League next Sunday evening at 8:30. The young people's service lasts one hour only, and is entirely in charge of the young people. Don't get lonesome in "Charlevoix The Beautiful", but get acquainted. There were about one hundred at this service last Sunday evening. Something different each service.

Prayer meeting each Thursday evening at 7:30. This stabbing service is invariable. Many are finding it so. He ose each Thursday evening during the good old summer time.

St. Mary's Catholic Church

Low Mass 8:45 a. m.

High Mass 9:00 a. m.

Saturday and Monday 7:00 a. m.

Rev. Route Kowalski, Pastor.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Sacrament."

Sunday School 12 o'clock.

Wednesday evening service 7:45.

Reading room, Tuesdays and Saturdays, 3 to 5 p. m.

The public is cordially invited to attend our services and use our reading room.

Episcopal Church

The Rev. John K. Coolidge, of Glencoe, Ill., will hold services at 10:30 a.m. at the Episcopal church during the summer months.

THE PICNIC

SYNOPSIS—Idly fishing Hermanos creek, in California, Caleb Warner, civil engineer and New Englander, is witness of the end of a coyotte pulled down by two wolfhounds, urged on by a girl rider. Admiring the hounds, he introduces himself, and learns her name is Clinton. With western hospitality she invites him to the ranch to meet her father, the Clinton-home Warner from the time when Grimsby was first founded by her father, Stephen Clinton, Civil war veteran and owner of Hermanos valley. He tells them something of his ambitions and his feeling that he is destined to be a "Water-Bearer." In the town of Golden Warner shares an apartment with his old Columbia college chum, Ted Hazlett, carefree and somewhat dissipated youth, only child of his widowed brother, who controls the family fortune. At a club luncheon Hazlett introduces Caleb to Wilbur Cox, leading business man and president of the water company which supplies the needs of Golden. He gives Cox a talking of his ambitions, and Cox, interested, invites him to dine that night. At the dinner Caleb meets Hermanos Clinton and calls at his office next day. He does so, and soon arranges a meeting between Caleb and Hinckley, the water company's chief engineer. Hazlett tells Caleb he is in difficulties with a girl, Mary Morgan, Cox's stenographer, who insists he marry her. With Hinckley, Caleb looks over the water company's source of supply, the Crystal springs, in Hermanos valley. Proceeding in Hermanos valley, Caleb visits a mesa, Dixon, because of his ability to "divine" drilling rods, to locate water without boring.

CHAPTER VI—Continued

"Hut it ain't no good," he said, suddenly disconsolate. "'Course why'd what's the good of water less you can use it? The site here ain't thick enough to put dirt in sore fingernails. It wouldn't grow a radish. An' the wells wouldn't be artesian. They'd have to have windmills to work 'em. And, as I said, they ain't no site. Seems like a plumb bit of foolishness to put water where it ain't no manner of use, don't it?"

"Have another cigar," said Caleb. "Where do you suppose all the water comes from?"

The fisherman looked at him pityingly.

"Fish fish, that stream ain' you'll see. This is Caliente stuk. The stream runs into it like dishwater goes down the drain. Wish you luck, mister. An' thanks for the smokes. Some day, if ever come this way, an' I'm feelin' better, I'll give you a demonstration. I'll be glad to see you any time. Kinder lonesome here in this crop, but it's hinking me look to health."

Caleb went on upstream in a mood. It seemed, though his Yankee mind affected to scoff at the suggestion while it considered it, as if he had come into close touch with mystery. He fingered the emblem on his seal and smiled. Had the sign of the zodiac, Aquarius, really charged him with destiny, lending him along the trail to be the Water-Bearer to the promise city of the sands?

Half a mile up the canyon from where the gravel road branched off, an arroyo entered from the east through a bench that was thickly furred with underbrush of desert species. Only a trickle of water was in the almost dry watercourse, barely having to mingle with Hermanos creek.

The place was wild enough, and silent. A grass-grown road close either bank at random, fording the creek at freshest intervals. He found stones to keep his feet dry as he crossed.

Up the road he began to espy traces evidences of an abandoned ranch. There was little left but the posts and a scattering of lustative tendrils, soundly lawful. He passed a corral, no longer tenable, a bunk shed without a roof, a leaking house, a tumbledown wall of stone, and then he became aware that he was walking through what had been once a garden, a stately garden, still with a certain dignity.

The garden had attracted him immediately and he had left the half-obliterated road. He did not go back to it but wandered on to the house that rose above the ruinous guard. Caleb's footsteps rang hollowly as he passed into the flags and glanced in through where a door had failed as warder. He was beginning to people the place with such ghosts as he imagined should represent the former occupants when he heard the light, clear sound of laughter at the very instant that his nostrils conveyed to his nerves of smell, thence to palate and to stomach-sense that his mouth watered and his appetite proclaimed freely with no uncertainty—the smell of broiling meat.

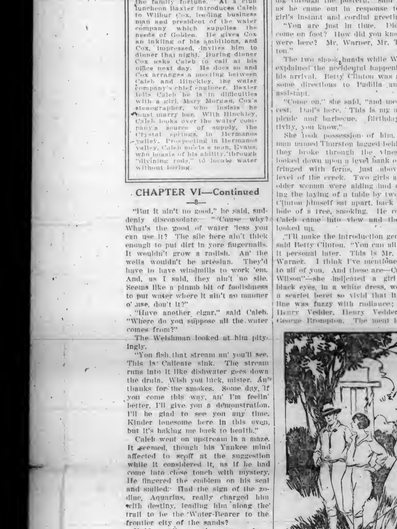
The laugh of something from a ranch lunker, a glass of milk, a piece of cake or pie, if nothing more substantial had died with sight of the deserted house. The ruins he had been trailing the past half hour for the like of him to follow inevitably. And now he had blundered on to a picnic—a California picnic—which means a barbecue.

Caleb's stomach yearned, rose in revolt against his manners and so far won that he ventured to the outer door of the house and peered through.

The laughter had ended but he could hear the clatter of young voices, men and women, children somewhere down by the stream that had wheeled to bow in front of the old house and sparkled through the interstices of a tall, thick mantle of wild-grape, flung over the arms of the trees.

In front, between house and stream, there was a smoking pit straddled by an iron grid on which two swarthy men were turning joints of meat from which came the smell that had been send all the spigots of Caleb's gastric economy. One of them looked up. Caleb had no time to disappear. No wish, once the instant recognition had been made. The cook, el cocinero, was Luis Padilla.

The swinging screen of grapevine parted and two people came through. Betty Clinton in her riding togs and



She Took Possession of Him.

lariat. The enchiladas are at the height of their excellence. He seated. Had, you at the other end. Mr. Warner, next to me, at my right. All right, Padilla, bring on the carne. I hope you brought an appetite with you, Mr. Warner. Carmen, pass the enchiladas. Frijoles, if you like them better. They are ever substitute for Boston beans, you know. And the salsa, Mr. Brompton."

The meal was all anticipation. Good viands, good nature and a general jabbering over of high spirits.

Bits of the talk, allusions, chaffing remarks, together with little summaries supplied him by Betty Clinton, soon put Caleb in possession of surface information concerning the families of the party.

Thurston had been a bank clerk, losing his position in the merger of banking interests. But he had possessed sound commercial faculties and, backed to some extent by his uncle, he had started raisin growing in the Fresno valley. Now he owned hundreds of acres and was raised almost a millionaire, soon to pass that mark.

Henry Velder was editor of the Pioneer, a weekly published in Golden, of resounding literary merit. His wife had a bending toward modern esthetics, according to her gown and her mode of hairdressing. She apparently saw nothing except through the medium of her husband and she hung on his every word in the attitude of one who eagerly waits the opportunity to encore the performance of a favorite dramatist.

George Brompton was an artist who specialized in mural work. He was the most diffident of all the company, with an especial shyness toward Carmen Wilson, which that precious personage did not appear to regard as the kind of tribute to her charms that she preferred.

Thurston and Betty Clinton had ridden down Hermanos canyon to the picnic on horseback. The rest had come in a hindlisord, by the longer road, a wagon preceding with the materials for the barbecue. Luis Padilla had come mounted. The vehicles and the horses were stowed in the old barns. The whole party was returning to El Nido in the early evening, where Marfa was now preparing a fitting dinner for the Senin of her young señorita's birthday.

"You are to come, too," she insisted with pride. "And stay over tomorrow. I am not to be denied anything today and I make that an order. You need feel that you are crowding or were not included in the original invitation. There is lots of room.

"You have made it an order," said Caleb. "That settles it."

Here again was a different side to the girl, he thought, as he listened to her lighthearted talk, admiring her quick wit. He caught himself watching her closely whenever she laughed. The look of her mouth was a pleasure as a kitten's and she laughed without reserve, so that one caught a glance of, even rows of teeth that needed no dentist, backed by the rosy glow of health.

Caleb enjoyed himself thoroughly, the food, the company, the talk and the shady spot beside the stream.

After the meal, Betty Clinton proposed an excursion. Vedder claimed to have had an inspiration for a poem and said that he was going to try to put it on paper in the old garden. His wife was no more to be detached from him than a limpet from a rock. Clinton himself made the excuse that he was not feeling especially energetic.

"Then Mr. Brompton must stay to keep you company," announced Carmen. "You and Mr. Clinton can discuss that pioneer panel. Mr. Brompton," she went on to Caleb, while Brompton smilingly acquiesced in the arrangement, though the smile was as wan and lacking in warmth as a winter sun, "is working on a set of panels for Judge Hemingway's new house. They are to represent California, past, present and future. And Mr. Clinton is brim full of pioneer lore, aren't you, Mr. Clinton?"

It was obvious that Carmen Wilson intended to make the party to drive out a foursome. Clinton smothered a smile. Brompton seemed to be used to this sort of thing and the four started.

They were less than half way when Betty Clinton suddenly missed her camera.

"I have been intending to take a photograph of that view for two years," she exclaimed. "The light is wonderful. Would you'll get it for me, won't you? We'll wait here. It's in the backseat under the seat."

Thurston went swinging off on his errand and the three sat down to be entertained by his return. The change of scene seemed to have put Betty Clinton in more serious mood.

"Have you found your opening yet?" she asked Caleb.

It looks as if Carmen Wilson intends to capture Caleb. Does Betty care?

(TO BE CONTINUED.)

Decries All Fear of Athletic Heart

College students need no longer fear that four years of hard football or track work will bury them with a shaky "athletic heart" in middle age. Experiments by Dr. Benjamin Gayhart of the Boston Peter Bent Brigham hospital on men and animals, revealed that the heart, instead of enlarging after strenuous exercise, actually shrinks. Furthermore, an enlargement of the heart resulted after prolonged athletic training.

Doctor Gordon made his observations on hostess marathon runners, and rabbits with normal and abnormal hearts. The rabbits were exercised to exhaustion, and X-ray pictures taken immediately afterward revealed a shrinkage which took time to disappear. The strained hearts of marathon runners also got smaller, Doctor Gordon said, and did not return to normal for several hours.

Athletes were strulled to note any permanent enlargement of the heart which could be blamed on the exercise, but it was found that the most pronounced vigorous efforts did not produce the much dreaded hypertrophy of the heart.

Sumthin' Missin'

Aw, shucks, I ain't so crazy, 'bout my father's new machine. There's such a thing as havin' things too fine. He went and bought the bunch of us a classy limousine. The best that he could buy—but not for mine.

Ya know how people feel about a thing that's sporthi' new. They're allus 'raid of ears and scars and such. And every time I'm in it peopl reads such thing I do. That's why I can't outlouse about it much.

They seats is all upholstered with a cloth of silver gray, an' all the wood and metal's shiny bright. But that don't mean a thing to me. I just found out today they wouldn't let my dog in. That ain't right.

Aw, what's the fun of ridin', when I leave my purp behind? I hate to see him whine an' fume an' fuss. I don't see why my father didn't wait and try to find a plain old common second-hand bus.—Detroit News.

Ambiguous

The carol singers were having an argument.

"Look here, Binks," said the leader, "if this carol is to be a success you must sing louder."

Binks—I'm singing as loud as I can. What more can I do?

"He enthusiastic; open your mouth and throw yourself in."—Pearson's Weekly

HOW TO KEEP WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

©lb. 1934, Western Newspaper Union.

THE CONTROL OF RICKETS

RICKETS is a disease common among babies, due to lack of food or of the right kind of food. It has been known for over two hundred years. It is found among babies all over the world and especially in the crowded slums of our cities. Their things are generally credited as the causes: insufficient food, bad air and lack of sunshine.

In the poor little babies whose mothers are unable to nurse them, and who, as a result, are fed condensed milk, some forth of prepared baby foods or on such starchy foods, all of which are lacking in the fresh, living substances we now call vitamines, rickets is quite develops and, in the majority of such cases, does develop. The long bones of the arms and legs, as well as the ribs and breast bones, instead of hardening as the child grows, are soft and bend easily. At the ends of the bones, ridges or knobs form. The bones of the skull are thin like parchment, due to the fact that the bones do not have the necessary salts to harden. The child is feverish, restless, sleeps badly and sweats profusely. The head is unduly large, the teeth appear late and the child does not learn to walk or, if it has already begun to walk, it walks with a feeble tottering gait. If the child is somewhat grown into a weak, puny, pale child, often deformed by its bowed legs and bent spine. If it is given mother's milk, properly modified cow's milk and, most important of all, fresh fruit juice, it soon recovers. Cod liver oil was for years the sovereign remedy in rickets, because, as we now know, it contains a large proportion of vitamines. Orange juice or lemon juice is of great value. One of the most effective remedies is tomato juice, either fresh or canned.

Fresh air and, above all, sunshine are also important. It has recently been found that food of any kind is most effective if exposed to sunlight or, failing that, to the ultra violet ray light.

This infant disease is found in the poorer quarters of all our large cities. In 1923, the United States children's bureau started an experiment to see how successfully this disease could be wiped out. New Haven, Conn., was selected because of the large number of negroes and Italians, two races peculiarly subject to this dire disease. All the children suffering from rickets as well as all those whose condition showed that they were susceptible, were given cod liver oil, orange juice and sun baths, with the result that those in charge of the experiment have not only cured many actually ill but prevented many cases which would otherwise have occurred.

TO CONTROL MALARIA

IT is now agreed by all authorities that the mosquito is caused by mosquitoes. It is also known that quinine or its salts or various preparations will cure malaria in the individual. But prevention is so much cheaper than cure, that the efforts of our health boards and officers are centered on the destruction of mosquitoes at the only stage of wiping out malaria.

To undertake to kill all the mosquitoes in the country or even in those sections where mosquitoes are abundant would be impossible. But what can be done is to destroy their breeding places and so prevent the production of millions of young mosquitoes. Careful study of mosquitoes has given us as complete and accurate knowledge of the habits of mosquitoes as the experienced live-stock breeders have of horses and cattle.

Mosquitoes breed almost entirely in stagnant water. That is why swamps and regions of stagnant water infested with malaria. Draining the land, filling in low places and cleaning up sections where water collects and stands are among the effective methods of mosquito control. Where water can not be drained off, spraying crude oil on the water forms an oily film on top, which prevents the mosquito larva from developing and so increasing the number of flies.

This is work that cannot be done by the individual. Every one can keep his own back yard free from puddles, tin cans full of water, receptacles of rain water and other places where mosquito "wigglers" can grow. The real work of mosquito control can only be done by the state by experts paid out of special tax levies for this purpose.

In a recent issue of the American Journal of Public Health appears the report of the committee on mosquito control which was appointed by the New Jersey Public Health association. This report showed that in the 48 states various methods for mosquito control were being generally carried out in 11 states; particularly in 19 states, and that nothing at all was being done in 17. The states which are doing the most successful those in which the mosquitoes were most numerous and malaria most common, New Jersey, Mississippi, Texas, Florida, Alabama and Georgia are spending considerable amounts and doing much work to protect their citizens from the danger. This work brings its own reward. No mosquitoes, no malaria.

Acid Test of Suffering

No character has been tested until it has known suffering. The style under which one spirit grows strong, patient, courageous, evokes in another only bitterness and complaint. The metal is revealed by the acid.

Discovered

In Switzerland a house hidden beneath the water of a lake for years is now gradually reappearing. It is presumed that the plumber has found the leak.

THE LAST HATS OF SUMMER; FOR TOTS' SUMMER WEAR

THE last rose of summer and the last hat of summer are alike beautiful, but whereas the last rose soon left blooming alone, the last hat is blooming among myriad others. Genius is turning like everything with millinery designers; they continue to overflow with fine ideas for midsummer. Perhaps the season inspires the loveliest headwear or perhaps they enjoy exercising talents that were over-long suppressed last winter, during the vogue of unplumed and unjuried cutting hats.

Here are five hats which have come into bloom recently in the millinery garden and have been chosen as representative of beautiful types suited to midsummer. Five there is the beloved leghorn, adorably developed by an appliqued trimming of handmade embroidery, laid over the crown. The brim-edge is bound with silk in a color used on both the upper and under brim three-tight little, bright little rickets as well as all those whose condition showed that they were susceptible, were given cod liver oil, orange juice and sun baths, with the result that those in charge of the experiment have not only cured many actually ill but prevented many cases which would otherwise have occurred.

Five of the Latest Summer Hats.

as intricately made trimming of narrow ribbon and lavender placed at the right side. Among these softly feminine headpieces the black Spanish sailor does not look dully. It is a black straw with a collar of black velvet ribbon arranged in pencil pleats and finished with a narrow contrasting ribbon. This is a hat that, of the severe type, to be worn with a suit of similar character. Midsummer calls for the lovely widebrimmed, butterfly hat, like that which brings this brief story to a close. It is designed very simply in regard to the shape and extends over the brim edge and a cluster of roses is poised at the front. This model is lovely in any of the flesh colors.

Many a ways and means committee may work overtime considering the problem of keeping little tots clean without getting any further than the washtub. In a grimy world this homely friend of the family is the only answer. Here stylists come to the rescue with designs of all kinds that can be washed and ironed easily and quickly; and it happens that these very simply designed things look better than any others on the youngsters.

In hot weather for those who live near the beaches, bathing suits and beach coats may bring laundry work down to the irreducible minimum. Little ones wear their knitted bathing suits during most of their waking hours when they can play on the sands. Beach coats to be worn over bathing suits are sometimes of the printed terry cloth, which does not need to be ironed. They may be made of other printed cottons or of heavy, unbleached domestic, with cut-out figures of little animals, flowers, children or birds applied to them. These are sewed down with cotton floss, using the buttonhole stitch.

Chambray, cotton broadcloth, coarse linens and gingham unlined, their head at the head of the list of dependable fabrics for little dresses and rompers. Nearly all dresses are made with panties to match and nearly all have round collars in tights or a plain color and binding on the sleeves and pockets to match the collar. The dresses have grown extremely short this season, but it is still the fashion to have them worn in the rain, so do not wear them on a doubtful day. But if they have been caught in a shower later on, continual brushing will soften them again. Some suede shoes wear shiny in patches. The nap is quickly rubbed up by a vigorous application of the wire brush sold at most shoe shops.

A black velvet gown that receives much attention in a colorful season has huge sleeves of white lace embroidered in gold.

Last Season's Frock

If last season's frock seems not quite fresh, why not make an overdress of georgette in plain color? That is the popular vogue now. Or use it on the skirt in tiers, wide tucks or in plaited lengths. Overlap the sleeves with it and use it as a scarf, collar or a bolero.

Care of Suede Shoes

Pale colored suede shoes require some care to keep them beautiful. They will not look well after they

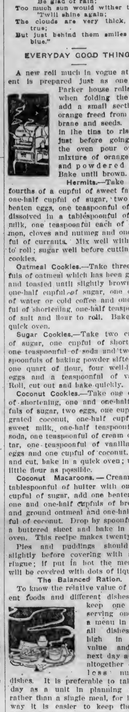
"Is it rainy, little flower?
Its glad of rain!
Too much sun would wither thee,
'Twill shine again;
The clouds are very thick, 'tis true
But just behind them smiles the blue."

EVERYDAY GOOD THINGS

A new roll much in vogue at present is prepared just as one does



An Easily Laundered Dress.

pastie frock pictured, of checked gingham, is cut with kimono sleeves, round neck, slit a little way down at the front, and straight cuttles. It is hardly more difficult to iron than a handkerchief. The floral motif is cut out of the stuff and the pockets is done with cotton floss in the lazy daisy stitch. Little boys' suits are just as simply designed; most of them made of chambray.

Cocoanut Macaroons.—Cream one tablespoonful of butter with one-half cupful of sugar, add the yolks of ten eggs, one and one-half cupfuls of browned and ground oatmeal and one-half cupful of cocoanut. Drop the mixture on a buttered sheet and bake in a hot oven. This recipe makes twenty-four.

Pies and puddings should cool slightly before covering with a meringue; if put in the refrigerator will be covered with dots of liquid.

The Balanced Ration.

To know the relative value of different foods and different dishes, will be one means of serving one day's meals so that all dishes are high in food value and the next day's menu is lacking in the less nutritive dishes. It is preferable to take the day as a unit in planning menus rather than a single meal, for in this way it is easier to keep the food standard about the same each day.

Concentrated foods which are mostly in the protein and fat groups, should be combined with the starchy foods. One part protein to one part starchy foods is the most common proportion.

Cheese, a highly concentrated food without waste, when combined with rice, macaroni or potatoes, makes a good main dish and is highly nourishing.

Sugar in the form of candy is another concentrated food and should not be eaten on an empty stomach as it is sufficiently satisfying to spoil the appetite for a meal. Eaten at the close of a meal it helps to make a little sweet we are not likely to overeat.

Some having stimulating properties put the stomach into better condition to digest the food which follows. A cream soup is best to precede a light meal. A clear soup which has little nourishment is an appetizer to good for a heavy dinner.

There is no end to the variety which a little planning may produce in the line of cocktails. Left-over fruit juice of various kinds, both known to a thick syrup, adds flavor. Lemon ice, bits of lemon peel, pineapple bring a few grapes for a garnish makes an especially well-flavored one.

The toothsome cocktail person who is normal-would feel and be much better to cut down on the use of meat to at least one-third. To spend more time in masticating the food, so that the digestive apparatus need not overwork, would be another great advance in keeping the body fit.

One of the finest breakfast foods for young and old is the clean whole wheat grain, the grain grown. Soak it overnight, then cook slowly on the back of the stove for several hours until the grain bursts and is surrounded by the soft jellylike substance, which indicates that it has been well cooked.

Salads and vegetables should always have place in the dinner and luncheon menus, and in the spring time are generally abundant. Crisp, tender vegetables stimulate the appetite by their crispness and tenderness.

Nellie Maxwell

Indian "Big Medicine"

The Indian ceremony of "making medicine" in the medicine lodge is a solemn scene on the Glacier National park reservation. Articles of clothing, pieces of meat, hides and small trinkets of all sorts are wrapped around the tree as "powerful medicine" while the Indians sit around and commune with the Great Spirit.

THE SCREEN: ITS AMAZING HISTORY

No One Took the Early Films Seriously, Not Even the Inventors

Thirty-seven years ago there were no moving pictures. Today the movie industry ranks fourth in the United States, with an investor capital of $1,500,000,000, employing more than 500,000 persons in production, distribution and exhibition, with 60,000,000 persons paying from 40 cents to two dollars for weekly admissions to theatres, large and small, dotting towns and cities throughout the country.

By PROEHL HALLER JAKLON

ROOM Five of the West Orange (N. J.) laboratory of Thomas Alva Edison buzzed with excitement on the morning of October 6, 1890. Two men, one young, the other older, were keenly interested in a block wooden box about five feet high. Near the top was a peephole, and the young man, with an air of triumph, urged the older man to peer into the small opening.

Inside an ear light sputtered. There was a noise of machinery, and there came into view a transparent strip of celluloid bearing the prints of many photographs. As the strip began to sweep the photographs came to life. It was a moving picture of the younger man, walking, sniffing, but in haul, approaching as if to extend a greeting.

As he came nearer there was heard the phonographic reproduction of the young man's voice saying:

"Good morning, Mr. Edison. Glad to see you back. I hope you are satisfied with the kinetophonograph."

This was the remarkable demonstration which greeted Edison upon his return from the Paris exposition. The young man was William K. L. Dickson, an Englishman who five years before had come to study under the tutelage of the wizard of Menlo Park. Edison had entrusted Dickson with the development of certain ideas, and this was what the young man had to show for his labors.

The Motion Picture Is Born

The birth of the motion picture is marked officially by this demonstration. From this crude beginning, in less than thirty-seven years it has attained the importance of a major industry, providing employment for more than a million persons throughout the world, and giving entertainment to more than 100,000,000 persons weekly in every civilized and many uncivilized lands.

Following the formula that the time to write history is while it is happening, an American intimately acquainted with the film industry, has produced, after five years of careful, intelligent research, a two-volume history which bears the title, "A Million and One Nights: the History of the Motion Picture." He is Terry Ramsaye, former newspaper man, screen editor and executive. The original edition, of which there were only 3000 sets, each bearing the autograph of Thomas A. Edison, and selling for $75, was launched by Simon & Schuster; those two young men whose success with the cross-word-puzzle books startled the publishing world in 1924.

Mr. Ramsaye set out "about six years ago in search of his material. The pursuit took him to all sections of the United States and many parts of Europe. Dickson was found living in retirement in France. He interviewed the first inventor of instantaneous photography on Cape Cod. He all he talked with more than 400 individuals who contributed to the events in the development of the art. Court and corporation records were made to give up their stories, while letters and original papers were still available, as they may not be to a later historian.

Starting as far back as he could go, Mr. Ramsaye traces his picture history from Aristotle to Edison. He shows us the camera obscura, the magic lantern, Stampfer's whirling disks, the spinning colu of Herschel, but the two most important developments, he says, were the camera de Daguerre, the Frenchman, in 1829, and the inception of wet-plate photography in 1850.

To Settle a $25,000 Wager

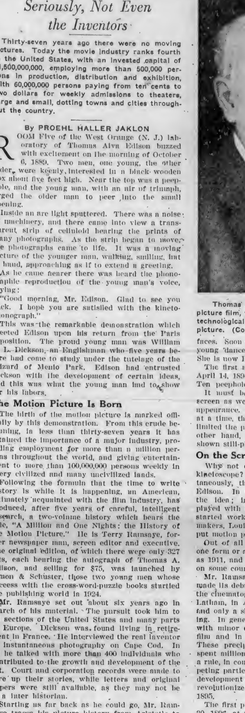
The credit for the discovery of instantaneous photography is given to John D. Isaacs, a civil engineer, working for Leland Stanford in 1872. Stanford maintained that artists were all wrong in their pictures of horses in action. Their legs were shown in unnatural positions, he declared, and made a bet of $25,000 that he was right. He engaged a San Francisco photographer, Edward Muybridge, who later received the glory, to enlist a trotting horse in action by employing a battery of cameras. Muybridge failed, but, having something about photography, realized that the 4mm shutters then in use were too slow for the job, and so he attached rubber bands with a hundredpound pull to the shutters. This gave an exposure of one hundredth of a second and "caught" the motion of the horse. Muybridge, who was the photographer, gained the fame.

Isaacs went on about his own business, attaining success, and rarely referred to the incident. Later the risk performed by the battery of cameras was done much more efficiently with a single camera, a spring taking the place of the rubber bands. In 1880 LeFrince, a Frenchman living in the United States, used sensitized strips of paper in place of the old-fashioned wet plate, and soon after Carbutt substituted celluloid for the paper. George Eastman, a photograph supply man of Rochester, N. Y., produced much finer celluloid strips and put them on the market in the form of dry plates for his kodaks. Etching, in September, 1889, bought a small supply for use in the kinetoscope, as Edison called his new device.

Edison, after the demonstration, had his device to a firm consisting of Norman C. Raff, a wealthy capitalist; Frank Lambert, president of the North American Phonograph company, and Frank Gammon, a bill-posting young business man. In turn, they marketed state and foreign rights to their toy. Edison, at his West Orange laboratory, agreed to produce the pictures.

Edison obtained a patent on his kinetoscope in 1891. Learning that foreign patents would cost about $1500, he told his attorney, that they were not worth it. A patent more or less meant nothing to Edison. He failed also to protect his invention for a disk record for his phonograph, preferring the cylinder type. How many millions were lost because of this neglect can only be guessed at.

The first motion-picture actor in the world, according to Mr. Ramsaye's findings, was one Fred Ott, a mechanic in Edison's laboratory. He dressed in absurd clothing and while funny



Thomas Alva Edison, inventor of the motion picture film, is shown in Kinetoscope Parlor, technological foundation of the art of the motion picture. (Courtesy Simon and Schuster.)

faces. Soon vaudeville actors began to appear. A young dancer named Dennis was among them. She is now Ruth St. Denis.

It was not a remarkable picture emporium was opened April 14, 1894, at No. 1255 Broadway, New York. Ten peephole kinetoscopes attracted the public. It was the first commercial motion picture screen as we know them had not yet made their appearance. All movies were shown to one person at a time, through the peephole. This, of course, limited the patronage. The magic lantern, on the other hand, for scores of hundreds of years had shown still-pictures to entire audiences.

On the Screen at Last

Why not combine the magic lantern and the kinetoscope? This question stirred, almost simultaneously, the minds of several men, including Dickson. In Chicago Edwin 1101 Amet pondered the idea; in Virginia Prof. Woodvill Latham played with it; in England Robert Fyoss-Greene started working, and in France two instrument makers, Louis and Auguste Lumiere, set about to put motion pictures on the screen.

Out of all this effort grew litigation which in one form or another was going strong until as late as 1911, and may still have a belated appearance on some court dockets.

Mr. Ramsaye says that the Lumiere projector made its debut in March, 1895, under the name of the Cinematograph. Several weeks later Professor Latham, in America, demonstrated his projector, and only a short time later Amet made his showing. In general, all these devices were the same, with minor exceptions in the perforation of the film and in method of winding and rewinding. These precluded legal battles in which were spent millions of dollars in costs, only to end, as a rule, in compromise and combination of the competing parties. Thus the projector, the last vital step in motion picture history was ready to revolutionize the world of amusement as early as 1895.

The first public screen showing was made April 20, 1896, at the old Koster & Bial music hall, in Twenty-third street, New York. These were simple subjects, dancers, acrobats and the like, projected with action in it.

The idea that any actor would want money for his efforts never occurred to the early film makers. The publicity they got out of it was held to be ample remuneration. Carmen, the Spanish dancing star, performed; Annabelle Moore put on a serpentine; Sandow and other notables of the time all worked on this basis of payment.

Censorship Begins

About this time came the first censorship. The Edison company had produced a film in which Dolorita put on a hoochie-koochie, a dance made known to America at the Paris exposition of 1893. Klinetoscopes by this time, in 1896, were fairly well distributed, and there were several doing business on the Atlantic City pier. Some one, somebody took a peep at Dolorita, became shocked at her performance, and promptly wrote a letter to the authorities. The result was that the owner of the establishment wrote the New York office, "Send me another film. The police say that Dolorita's dance is too strong."

As early as 1896 the movies, not yet known by that title, or even by the name of motion pictures, had begun to attract the attention of scores of men who saw the opportunities for money-making. Their imaginations had been fired by such exploits as the filming, in 1897, of the Corbett-Fitzsimmons fight at Reno, which ran 14,000 feet, and was shown in the New York Academy of Music, the first special showing of a picture. The same year one Jenkins, a Washington, opened the first motion-picture theater with 200 chairs in it. This was in Newark, N. J., and Rochester, N. Y., produced much film of rolled strips and put them on the market in the form of dry plates for his kodaks. Etching, in September, 1898, bought a small supply for use in the kinetoscope, as Edison called his new device.

Edison obtained a patent on his kinetoscope in 1891. Learning that foreign patents would cost about $1500, he told his attorney, that they were not worth it. Plans to Open Up Old Indian Mounds

With the departure for the Louisiana coast of Henry B. Collins, Jr., ethnologist, the Smithsonian institution initiates an exploration of an almost forgotten area of prehistoric life on this continent. The region, which extends westward from New Orleans, was the ranging ground of the Attacapa and Chitimacha Indians. It has been overlooked by archeologists and nothing has ever been written about it.

Mr. Collins, who is assistant curator of ethnology in the National museum and whose expedition the bureau of ethnology is financing, will investigate the mounds in the area with a view to determining whether they are true mounds or mere shell heaps, and to collect bones, artifacts and pottery. So far all the pottery found along the gulf from Florida to Louisiana has been similar, indicating a cultural relationship among the peoples and suggesting a migration route.

The Attacapa Indians were one of the few known cannibal tribes of the American continent. Whether they engaged in the practice for ceremonial purposes or for the love of it, is not known, other cannibal tribes were found in Cuba, Jamaica, Venezuela, Colombia and Brazil.—From a Bulletin of the Smithsonian Institution.

Seven radio houses have been established on the Great Lakes.

DEPARTMENT OF CONSERVATION
OF THE
STATE OF MICHIGAN
Lansing, June 10, 1926

NOTICE IS HEREBY GIVEN, That the following described abandoned tax land, situate in the County of Charlevoix, and deeded to the State by the Auditor General under the provisions of Section 127 of Act 206 of the Public Acts of 1893, has been withdrawn from homestead entry by the Auditor General and the Commission of Conservation, acting jointly, as provided by Act 141 of the Public Acts of 1901, examined and appraised and will be placed in the market by offering the same at a Public Auction to be held at the Office of the County Treasurer in the County Courthouse in the City of Charlevoix, on Tuesday, the 3rd day of August, 1926, at nine o'clock in the forenoon, Central Standard Time, at which time it will become subject to purchase in the manner provided by statute.

In case of sale the deed conveying the same will contain a clause reserving to the State of Michigan all rights in any mineral, gas, oil or gas found lying or being on, within or under the said land, as required by Section 8, of Act 280 of the Public Acts of 1909, and also reserving to the People of the State of Michigan the rights of ingress over and across any of said tract lying along any watercourse or stream, as also required by said Section 8, Act 280 of 1909.

DEPARTMENT OF CONSERVATION,
By John Beard, Director.

Order Appointing Time for Hearing of Claims

STATE OF MICHIGAN — The Probate Court for the County of Charlevoix.
At a session of said Court, held at the probate office in the City of Charlevoix, in said county, on the 14th day of June, A. D. 1926.
Present, Hon. Servetus A. Correll, Judge of Probate.
In the Matter of the Estate of Robert Stuart, deceased
On reading and filing the petition having been applied to probate and Albert F. Bridge appointed administrator.
It is ordered that four months from this date be allowed for creditors to present their claims against said estate and that such claims will be heard by said court, on Wednesday the 20th day of October A. D. 1926, at ten o'clock in the forenoon, said time and place being the City of Charlevoix.
It is further ordered, that public notice thereof be given by publication of a copy of this order for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel, a newspaper printed and circulated in said county.
SERVETUS A. CORRELL,
8-4t Judge of Probate.

Order Issued by Authority of Act 230 of the Public Acts of 1925, Making a Closed Season on Deer in the County of Charlevoix for a Period of Five Years from November 15th, 1926.
STATE OF MICHIGAN—County of Ingham ss.
The Director of Conservation after an investigation relative to conditions in Charlevoix County as they affect deer, recommends a closing order.
Therefore, the Conservation Commission by authority of Act 230 of the Public Acts of 1925 hereby orders that the open season for deer as provided by Section 4 of Act 3-6 of the Public Acts of 1925 is hereby suspended or closed for a period of five years from the fifteenth day of November, 1926 in the County of Charlevoix during which time it shall be unlawful to pursue, hunt or kill deer or attempt to pursue, hunt or kill deer, under penalties provided by Section 5 of Act 230 of the Public Acts of 1925.
Signed, sealed and ordered published this eleventh day of March, 1926.
JOHN BAIRD, Director
Department of Conservation
Conservation Commission by
W. H. Wallace, Chairman
Edgar Cochran, Secretary

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Frederick Yahr and Sophia Yahr, his wife, of Hayes township, Charlevoix county, Michigan, unto Mary Zipp of the city of Petoskey, Michigan, dated January 20th, 1921, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 26th day of January, 1921, in Liber 48 of mortgages on page 279, on which mortgage there is claimed to be due at date of this notice the sum of One Thousand Three Hundred Seventeen and 66-100 Dollars, principal and principal sum due with interest; and a further sum of Four Hundred and Eighty Nine and 17-100 Dollars, being taxes and interest thereon paid by the mortgagee on the land and premises herein described, together with an attorney fee of Thirty-Five Dollars as provided for by the said mortgage, and no proceedings at law or equity having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas, the taxes required by the statute to be paid on said mortgage are duly paid prior to the recording thereof;
Now Therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon including the costs and expenses of the foreclosure, including the attorney fee provided by said mortgage, which sale will take place at the front door of the Court House in the city of Charlevoix, Charlevoix county, Michigan, (that being the place where the circuit court for the county of Charlevoix is held), on Friday, the 16th day of June, 1926, at ten o'clock in the forenoon on that date.
The premises described in said mortgage to be sold are situated and described in the Township of Hayes, county of Charlevoix, state of Michigan, viz: The east one-half of the Southeast quarter of section Eleven in township Thirty-four, Range seven west, containing eighty acres of land, more or less, according to the government survey thereof.
Dated this 19th, 1926.
MARY ZIPP,
Mortgagee
LISLE SHANAHAN,
Attorney for Mortgagee
Business address: Clinton Street, Charlevoix, Michigan. 49 13t

The wonderful NEW EASY WASHER

THE new *Easy* Washer is the most remarkable washing machine you ever saw. It washes and dries clothes at the same time, without any more attention on your part than pressing a button and turning a lever. No wet clothes to lift piece by piece. No buttons broken or deep wrinkles put in clothes. No water to handle. The precious warm soap suds are removed from the clothes and returned to the wash tub without wasting a drop. The rinse and blue water are returned by the stationary rinse and 'bluing tubs. The *Easy* ...even empties itself when you are through. Phone today for a free demonstration of the new *Easy* in your own home. No cost or obligation.

Volume 57 — Charlevoix, Michigan, Thursday, July 22, 1926 — Number 13

TOURNAMENT HERE

West Michigan Champions in Tennis Coming in August

In accordance with an outlined program tennis champions of Western Michigan will contend for honors and supremacy on Charlevoix courts, opening with games on Monday, August 9th with the playing continuing throughout the week, the match games being conducted on the five courts kept up by the Inn and released for this series of championship games.

Tennis fans of the west are made official by the United States Lawn Tennis association and cover the period August 9-14 both inclusive and include games singles and doubles for both men and women, while in these entries have been made by star players such as Lott, Hayes, Hennessy, Oliver and others, all famous in the tennis world.

The outlook at present indicates that upwards of one hundred experts will vie with each other for honors in the coming tournament and under this conditions the meet in August will feature some of the best games and attract a host of visitors to an exclusive event that has been conducted in the entire northern region.

Preliminary work has been carried out under the direction of Harold A. Cartier, chairman, in which he has had as co-workers Lawrence D. Chase, secretary, W. G. Parker and others; and in this Mr. A. I. Creamer, manager of the Inn, has been an indefatigable worker which in no small way will contribute largely toward the success of this meeting. The game of tennis has always ranked high with athletically inclined persons in Charlevoix and it is pleasing to know that not only players but many local citizens are taking more than a passing interest in the tournament schedules for August at the Inn Courts.

Ferry Business at Straits Show Increase

A statistical report on the business connected with the state owned ferries in service on the Mackinaw City-St. Ignace route for the month of June shows an increase of approximately 17 per cent over the corresponding season for 1925, with an increase in receipts for the same period of about 9 per cent and this too, in view of the fact that prices for 1926 have been considerably reduced from those of the previous year. For the month of June the average price per car was $2 60 as against $2.87 for 1925. During this period the number of passenger automobiles transferred was 6433. Trucks 111, trailers 62, motorcycles 4 and foot passengers 1655. Total receipts for the month amounted to $17,568.50.

VALUABLE REAL ESTATE PURCHASE

Subdivision Promotion Work in Prospect for 1927

Mr. and Mrs. R. S. Shapton have sold to Andrew I. Creamer and William E. Flynn the farm and buildings called Knollwood, adjoining the Belvedere Country Club. The terms of this property does not mean that Mr. and Mrs. Shapton will leave Charlevoix, but instead they have agreed to take charge of it.

Mr. Creamer and Mr. Flynn purchased the property for the reason that they have always enjoyed Knollwood and have in mind promoting it. At the beginning of another season lots will be offered to eastern friends, and it is probable that in a year or two there will be a hotel erected.

There is no location in Charlevoix superior to Knollwood. The property now is estimated to have about seventy-five acres, and the price paid was close to $10,000.00. This will permit lots of an acre or more to be sold at a reasonable price. The Shaptons and the purchasers have always been warm friends, and it was only with the understanding that Mr. Shapton would look after the upkeep of the property that it was purchased.

The acreage taken over is in its entirety superb, located in an ideal spot, commands a beautiful and broad perspective, containing water views, hills, valleys, broad acres of agricultural and a wealth of timber land; a view that is most pleasing to the most critical observer. By taking over this property the purchasers become owners in fee of the choicest piece of real estate for the purpose intended that can be found in the entire north resort region.

Average Fleece Weight

The bureau of animal industry says that the average fleece weight for the United States is approximately seven and a half pounds. There is a great difference between the Southdown and the Rambouillet breeds, the wool production varying in Southdowns from six to seven pounds in well-bred and well-fed Rambouillet, from twelve to fifteen pounds.

Power of Love

If there is anything that keeps the mind open to good visits, and repels the intensity of ill, it is human love. —N. P. Willis.

SERIOUS ATTACK

James E. Sanford at Rochester, Minnesota for Treatment

Upon receipt of a message from Rochester, Minnesota, that their son James E. Sanford, was in a critical condition at Mayo Bros. institution, Captain and Mrs. James Sanford left for Rochester last Tuesday afternoon.

For some time past the son James E., has been afflicted with a chronic stomach trouble, a condition that had its beginning in France during the world war period where he saw service along the west front, and from which permanent relief could not be obtained regardless of persistent efforts of professional men high in the medical world, either government men or those engaged in private practice.

Repeated efforts have been made to effect a cure but all such have failed to give the relief sought. As a last resort James E. made the trip to the Mayo Bros.' world renowned institute where after a thorough study of the subject was made, he was advised to submit to an operation. An operation was performed Monday and favorable reports concerning Mr. Sanford's condition were received here during the day and evening by both telegrams and long distance telephone.

Tuesday morning messages of serious import came and the father and mother left for their long journey west on the first train.

LOVE MATCHES NOT UNCOMMON IN EAST

Occident Has No Monopoly of Romance.

Western women often pity the oriental for her enforced seclusion and her lack of liberty; above all for the husband who is forced upon her by parents. And yet love matches are by no means unknown in the East, says Dorothy Buck, writing in the Buffalo Express.

Mokhtar-bon-Beschid-ben-Missour, a young merchant of my acquaintance, was a much-sought-after young bachelor of Tunis, but proved immune until some cute smuggled to him a snapshot of the daughter of a said.

He instantly fell madly in love with it, and the women of his family hastened to call on her and bring back reports.

"It is all a mistake," said a spiteful feminine relative, after she had seen that photograph than I am. She has a distinct cast in one eye, and limps!"

"She is lovely," said his sister, "and appeared interested in thee! They say she is very sweet tempered."

"She has no dowry," said his mother, "and is almost betrothed to her cousin. I do not think it is worth while upsetting the affair."

The unhappy young man did not know what to think, but eventually got engaged, and remained in a fever of doubt until his wedding day, when he found that his bride was all and more than he expected. There is an ideal marriage, though unbiessed by those sons that are supposed to be essential to happiness.

Such romantic matches as this are by no means frequent, and are usually successful, perhaps because beauty, placidity, and affection are all that a Mussulman asks of his wife. But I know of other matches still more romantic, whose beginning lay in a childhood's friendship, necessarily broken by the reclusion of the little girl at the onset of puberty, and whose fruition came in an early marriage.

Under the law of Islam a man is not only permitted but urged to divorce a childless wife, and things about many tragedies—for the childless wife is often the best loved. There have been instances when family pressure has forced an Arab either to divorce his wife or to take another, and the result has been a tragic havoc. The two, rather than be separated, have been found dead in each other's arms.

Steam Power Old Idea

No great invention ever was the work of one mind, they will tell you at the patent office. Everybody supposes that Watts invented the steam engine in 1782, but history records the first steam engine was operated in Egypt 224 years before Christ, and that the inventor was a Mr. Hero of Alexandria and not Mr. Watts. Hero wrote learnedly of the expansive forces of steam, described the cylinder, piston, and side valves; built his own stationary engine and used it for raising water. There are records of improvements on Hero's design, or of other steam engines, in 1601 and 1629 in Italy, and 1650, 1680 and 1712 in England and France. It is just like the discovery of America. Columbus got the credit but the Norsemen and others beat him to it.—Capper's Weekly.

If This Is a Sample

A CUTTING AFFRAY ON FRIDAY NIGHT

An altercation on the street last Friday evening between a colored boy named Smith and Roy Chamberlain, caused no small amount of excitement for the several parties nearby who gave the combatants ample room in which to carry on their activities.

The charge is made that the colored boy used a knife during the fracas and the several open spaces in Chamberlain's coat as well as a few minor cuts and scratches about his person indicates that a sharp instrument was used during the encounter. Several stories are told relative to the cause of the disturbance.

The case will probably be aired in the local courts at which time an effort will be made to find out who was responsible for the occurrence and unenviable notoriety.

AILING LONG TIME

Mrs. Katherine B. Sloan Passes Last Sunday Afternoon

In the passing of Mrs. Katherine B. Sloan, wife of Robert F. Sloan, Charlevoix loses a woman of most exemplary character, beloved by the members of her household, neighbors and a large circle of friends and acquaintances in this region where she has resided since 1910; a period of sixteen years, replete with acts of noble and generous womanhood of the highest type.

Her maiden name was Miss Katherine B. Guille and place and date of birth Zanesville, Ohio, December 29, 1870, thus she was in her 56 year of age at the time of her death. For some months past Mrs. Sloan has been a critical physical condition from an ailment—finally which failed to respond to medical treatment administered by men professionally skilled and eminent in the medical world, regardless of their efforts the disease ate steadily, continuous progress, sounding a menacing warning to family members and friends of the inevitable.

Mrs. Sloan was distinctly a home woman, and in this was ordered that duty to the home and family members stood prominent in the routine of her daily acts, solicitude for members of the family circle at all times was a prime characteristic, and as a consequence she received the never failing expression of gratitude, sincere love and devotion from each.

June 25th, last she was united in marriage with Robert F. Sloan and for the following sixteen years, until they came to Charlevoix in 1910, they resided in Memphis or Chattanooga, Tenn. and it was to the latter place where she remains were taken Monday for interment by the side of two young sons, Malcolm and Andros, in Forest Hills cemetery.

She is survived by Robert F. Sloan, Sr., husband, and two sons Robert F. Jr. and Paul Stewart Sloan, of this city and four brothers, Rev. B. F. Guille, South Salem, Ohio; Rev. Geo. E. Guille, Athens, Tenn.; Charles E. Guille, Chattanooga, Tenn and Harry L. Guille, Coltewah, Tenn.

A short service, attended by personal friends was held at the family home 100 State street, Monday afternoon with Rev. B. G. Matthon, officiating. Prank Isaac sang "Good Night, Good Morning" accompanied by Mrs. A. J. Stetler. The remains were taken to Petoskey Monday evening for interment, accompanied by Mr. R. F. Sloan Sr. and son Paul Stuart.

LAD DROWNED AT ST. JAMES

Hugh R. McLaughlin eleven year old son of Mr. and Mrs. Hugh McLaughlin of Detroit, met his death by drowning at St. James yesterday, when he fell from a raft into the harbor waters, the body being recovered later.

The McLaughlin family were occupying the O'Donnell cottage at St. James for the season where they have relatives, Mr. McLaughlin being a cousin of Mr. John McCann. Mrs. McLaughlin, mother of the drowned boy, was a former resident of Charlevoix and will be remembered as Miss Mary Jones.

Family members accompanied the body to Detroit Wednesday evening, where funeral service will be held and interment made. The trip was made by special boat to Petoskey and thence by rail to the Detroit home.

No Unalloyed Pleasure

There is no such thing as pure unalloyed pleasure; some bitter ever mingles with the sweet.—Ovid.

JERSEY BREEDERS

To Picnic at Ellsworth on Saturday, 24th of July

Plans have been definitely arranged for the Antrim-Charlevoix Jersey Breeders annual picnic to be held at Ellsworth on Saturday, July 24th, at the camp grounds. H. E. Dennison, fieldman from the American Jersey Cattle Club will be the main speaker of the day.

The Ellsworth Co-operative Association have kindly donated lemonade to add to the well-filled baskets. Another big feature of the day will be the exhibit of Jersey cattle from the herds of our local breeders, and don't forget there are some fine Jerseys in these two counties.

H. E. Dennison will act as judge and ribbons will be awarded to the winners in their respective classes. Much of the credit for the big day must be given to the small thriving village of Ellsworth for their generosity in donating the ribbons and also in taking care of the transportation of the cattle to and from the grounds.

If you own Jersey cattle or are interested in Jerseys you can not afford to miss the big day at Ellsworth. Plan to will show you the correct type to get and how to judge your best cows. See for yourself the kind of cows the counties have. Bring your basket and plan to spend the day at Ellsworth on July 24th, next Saturday.

ENJOY SOCIETY OF THE "YOUNGER SET"

Parents in Spain Make "Chums" of Children.

Statistics show that the birth rate in Madrid has declined in the past 10 months. Whether this explains that the traditionally large family is more than slender purses can stand while the cost of living is at its present high level, or whether it is merely a passing phase, remains to be seen.

It is a notable fact that cases of cruelty to children cease to light, and indeed practically cease to be noted for a time, directly such as exists in other countries, the whole duty it would be to take up such cases and bring them to the notice of the police. Corporal punishment is seldom administered either by parents or by teachers; indeed, anybody witnessing the infliction of physical punishment on a child would not hesitate to interfere and, whatever may have been the fault, a friend he should be let off would be forthcoming.

The Spanish mother, even of the upper class, can seldom be persuaded to separate from the young folk, and astonishment is often expressed in Spain when foreign visitors are found to have left their children at home. When boys are sent away to school care is taken that they are not herded within easy reach, and the argument that children brought up away from the watchful eye and eare of the parents are probably better fitted in later life to grapple with the many problems is one that does not often carry much weight with the typical Spanish mother.

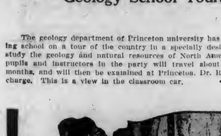
Spanish parents are always at their best with the smaller children, whose nurses, companions and playmates they are, fully identifying themselves with their mother interests.

The greatest day of the year for the children is Dia de los Reyes' —"The Day of the Three Kings From the East." Probably no people in the world devotes itself collectively and so whole-heartedly to a purpose from which no gain is expected, but that of the privilege of bestowing. The big stores are so filled with people until twelve o'clock at night that it is difficult to move about in them.

Shows Aboriginal Life

Geology School Tours Country by Railway

The geology department of Princeton university has just started a traveling school on a tour of the country in a specially designed pullman car, to study the geology and natural resources of North America. The twenty-two pupils and instructors in the party will travel about 10,000 miles in two months, and will then be examined at Princeton. Dr. Richard M. Field is in charge. This is a view in the classroom car.



Carrying Former Emperor of Corea to His Tomb

This view of the funeral procession of Prince Yi, former emperor of Corea, shows the catafalque being carried to the mausoleum between lines of mourners dressed in white, the mourning color of the Orient.

The Barrel in Teenie Weenie Land

Here is the unique summer home presented by admirers of the Teenie Weenies to Mary Dickerson Donahey, wife of William Donahey, creator of the Teenie Weenies. So far as known, this is the largest picket barrel ever constructed. It is 16 feet high, with a capacity of 21,000 gallons. There is a living room downstairs, with sleeping room upstairs. The barrel in the rear is made into a kitchen. The small room is 9 feet in diameter, while the living room is 12 feet. "The Barrel" is located on Grand Sable lake, near Grand Marais, Mich. School children from Grand Marais, dressed in Teenie Weenie costumes, conducted the presentation ceremonies.

FITTINGLY CHOSEN

Albert J. Kobe, a full-blooded Chippewa Indian, is leader of the United States delegation to the International Y. M. C. A. congress in Helsingfors, Finland. He is short in his costume he will wear on occasion there.

New Supreme Dictator of the Moose

At its convention in Chicago the Loyal Order of Moose elected Norman G. Heyd of Toronto, Canada, as supreme dictator, and named Philadelphia as the next convention. Mr. Heyd is shown above, at right, with J. Albert Cassedy, his predecessor in the office.

HE'S ONLY 109

Above is pictured Joseph Belland of Calumet island, Quebec, who recently celebrated his one hundred ninth birthday. He doesn't look his age and says he has no intention of letting Father Time pin him to the mat for many years to come.

ALL AROUND THE GLOBE

Cinnamon bark can be obtained from trees 200 years old.

Three-quarters of the supply of ivory comes from Africa, but Antwerp is the chief market.

Chemists have found that an important dye base can be extracted from corncobs at little expense.

Leather dust is sold to fertilizer manufacturers.

Work done by a tractor in 24 days would take almost 200 days if done by a horse.

John Quincy Adams was the first President to take the oath of office on Friday.

The great mass of ocean water has a temperature not much above the freezing point.

Air Mail Makes Rapid Strides

Private Lines Now Connect at Many Points With Government Planes.

Washington.—Recently the first east-bound flight of the latest air mail route, linking New York to Texas, was completed in 20 hours, clipping a full day from the fastest rail service. After connecting at Chicago the route includes Illinois, Kansas, Missouri, Oklahoma and finally the terminal at Dallas, Texas. This air mail service has been called the latest; but reports from Hartford, Conn., already announce a still newer effort, this time to link aerially the cities of Boston and Bangor, Maine.

At the rate air mail services are springing up all over the country—and all over several other countries—the honor of being the "latest" is indeed an insecure and impermanent one. Some of these lines spring up so quickly and are so readily accepted by the public that they attract scant attention outside of the immediate locality of their operation. Thus an air mail service has been in full swing for more than two months between Elko, Nev.; Boise, Idaho, and Pasco, Wash.; and another line operates between Miami, Fort Myers, Tampa and Jacksonville.

The Colonial Air Transport operates a postal and express service between Boston and New Jersey, giving Boston the benefit of the New Jersey and New York-Chicago service, just as St. Louis already enjoys it by a branch line through Peoria and Springfield. The government, through the Post Office department, has so far been responsible for the amazing growth of air mail trunk lines throughout the country; but in future it will be the privately owned lines that will take the initiative in building subsidiary branches extending to every part of the country.

Fresh Impetus Last Summer

A great impetus was given to the air mail service last summer when the government let contracts for four feeders to the transcontinental route, including three north-south trunks and over-night service between New York and Chicago. The north-south extensions included routes between New York and Boston, Chicago and St. Louis, Los Angeles and Salt Lake City, Elko and Pasco, Minneapolis-St. Paul and New Orleans via St. Louis and Memphis; Pittsburgh and New Orleans, and Chicago and New Orleans via Indianapolis, Louisville, Nashville and Birmingham.

More and more cities of all sizes are being put on the transcontinental route, New York to San Francisco. These cities connect by plane with some point on the transcontinental route or else forward their letter and parcel post mails by train for connection at some center on the route. Last June Des Moines, Iowa, and Sacramento, Calif., were placed on the route, both east-bound and west-bound planes stop at these points to take on and leave mail, and these cities in turn become centers for other cities outside the air mail route.

Late last year 17 hubs were received by the Post Office department for the operation of flight routes, including the Los Angeles-Seattle route, the Salt Lake City, Ute, New York-Boston route and four others. It was said that the new air service would directly connect 20 important cities by air mail routes with the 16 cities which have been receiving similar service on the transcontinental air mail route for more than a year. In addition to these, it was believed that many other cities would enjoy the advantage of speedy transmission of mails by combining the air routes and the railway mail services. The contracts for the eight new routes called for an extension of the air mail service of 4,602 miles, and require about 390,000 miles of flying yearly on the six round trips per week scheduled for each route.

Following the lead of the government in extending air mail connections on a nation-wide scale several pioneers have already started privately owned mail, passenger and freight lines, and this development is looked forward to with unfeigned enthusiasm by those who have the interest of commercial aviation at heart.

Aviation as an Industry.

Both Herbert Hoover, secretary of commerce, and Harry S. New, postmaster general, have expressed the opinion that it was the proper function of the government to aid in the development of aviation as an industry. With a view to encouragement of the flying art Secretary Hoover last year recommended the establishment of a bureau of civil aviation in the Department of Commerce, to be charged with the duty of providing services for commercial aviation comparable to those afforded in the field of commercial navigation.

This proposed bureau received warm commendation from Mr. New when he appeared before President Coolidge's air board of inquiry last September. The postmaster general brought out that in the last fiscal year of mail planes had flown more than two and one-half million miles, of which more than half a million miles were night flights. Great as had been the growth in efficiency of the government-operated air mail service, Mr. New contended, however, that the government should not permanently administer the service under its own auspices. He favored assigning the service to private agencies under contract, just as is done in the transportation of the mail by railroads and water carriers.

Already some private concerns have entered the new field outlined by Hoover and New. The Eastern Air Transport, Inc., linking New England with the West by means of the Federal line, was organized late last year. Shortly afterward the Western Air Express, Inc., with main offices in Los Angeles, began operation of an air mail and freight service between California.

Besides these, several other lines are contemplated in St. Louis, Boston, Hartford, Des Moines and other points. So far, due to the fact that the amount of freight must be limited, private commercial aviation has not developed at the rate that some of its ardent advocates would like; but this phase of the matter is receiving serious study all over the country, and it is believed that the day is not far off when planes will be able to carry more freight, thus being of greater industrial use.

Early this year Henry Ford entered the ranks of the pioneers in commercial aviation when he started to operate a private line between Chicago, Cleveland and Detroit. The first definite adventure of financial men into the field of commercial aviation, with the avowed intention of extending their activities to all parts of the country, was announced in December, 1925, with the formation of the Colonial Air Transport, Inc. This "adventure" was hailed as the first great step toward making commercial aviation practical and profitable on a large scale. It was predicted that, should the first efforts be successful, the backers of the scheme would next attempt to carry passengers on a commercial basis.

Postmaster General New explained recently that it was the intention of the government to turn the air mail over to private interests. "The time is at hand when the government can step out of the air mail business and let private interests gradually take over the service," he said. "I don't think that the handling of mail alone will pay on air lines. The successful lines must be prepared to carry not only mail but high-class express, and eventually passengers. That will come when the American public has been trained to realize that airways have business possibilities."

It is readily granted both here and abroad that in its air mail service the United States ranks first. But, according to a review made recently by the New York Trust company, in passenger and freight service Europe is far ahead of the United States. Aviation lines, most of them privately owned with government subsidies, are an established part of the transportation service on the Continent.

This review further states that in France, now maintaining the strongest military air service with the largest number of planes, the operation of the thirteen commercial lines has been consolidated into five heavily subsidized companies. Punctuality is rated as high as 90 per cent, with the same degree of safety as on the railroads. Efforts are being made to establish connections between Paris and the main capitals of the world, and to organize a Mediterranean aerial system connecting France with the Near East and South America.

The German lines, although not as fully developed, have shown less deficit than the French and are less dependent upon government subsidy, according to the review. Their activity has been concentrated into three great trunk lines, the Europe System being the most powerful. This system controls most of the strategic air routes in middle Europe, comprising airplane service in Germany, Austria, Switzerland, Denmark, Sweden, Danzig, Latvia, Esthonia, Finland and Russia.

In the development of commercial aviation abroad Turkey fills a novel chapter. When, late in 1925, the enthusiasm over aviation became nationwide a committee composed of deputies, army officers and professional men made a house-to-house canvass seeking a contribution from each family according to the income. Bulls and fezes were given to swell the fund for the establishment of a passenger, commercial and mail service between Constantinople and Angora.

Thus commercial aviation is progressing all over the world. In England a new organization became effective in April, 1924, when the existing companies were consolidated into the Imperial Air Transport company, Ltd., which has a monopoly of commercial aeronautical operations. In Mexico, the governor of the state of Tabasco last year requested permission to establish a hydroplane service between Villahermosa, capital of the state, and Puerto Mexico and Vera Cruz. Air service between the United States and Cuba, via Key West and Havana, was resumed last year. In Canada commercial aviation, according to reports, is progressing at an amazing rate. Plans to link Europe with South American countries have repeatedly been considered, both in Paris and Berlin.

Down at the other end of the world, in Cape Town, the first South African air mail flight was completed successfully in February, 1925, when airmen flew the 600 miles between Cape Town and Durban in eleven hours.

Glass Leads to Arrest of Two in Death Car

Sandusky, Mich.—A bit of glass from an automobile headlight, left in the road near Lexington after the car had struck and killed Maurice H. Read, twenty years old, Detroit, brought the arrest at Pontiac of William Wintermute, twenty-eight, and "Frenchy" Huron, in connection with the accident.

Read was changing a tire on his car when he was run down. The driver of the automobile which killed him sped away without stopping to offer assistance. A bit of glass from the headlight of the automobile was left in the road and stumped on the glass was a serial number. Sheriff John A. Johnson traced the headlight to an automobile purchased some time ago by Guertin.

Put Out Oil Fires With Chemicals

Scientists demonstrated at El Segundo, Calif., that they are now able to cope with oil fires with the aid of chemicals. A huge oil tank was set ablaze purposely and the fire was put out in less than ten minutes. This illustration shows the demonstration.

GHOST CITY, ONCE THRIVING METROPOLIS, TO BE JUNKED

Sliding Built Up Around Great Steel Plant in Missouri During the World War.

Kansas City, Mo.—Nestling in the hills of southern Missouri lies Sliding, a ghostown now that thrived in the war, but now a "ghost city," with only nineteen families living there with price real, waiting for the crane, crowbar and sledge hammers of the junk dealer. The thriving metropolis of Carter county eight years ago figured in one of the most unusual transactions in America, growing out of the World war.

The entire city, 350 houses, a great steel plant, water works system, electric light plant, motion picture show, gymnasium and executive building of 18 rooms, streets and all improvements, has been sold to the Sonken & Sniamin Iron and Metal company of Kansas City as junk.

The nineteen families that live there by virtue of the few rent are wondering what the Kansas City concern will do with the houses. Many of the buildings, seven and eight-room structures, are strictly modern.

Herman Sonken of the iron company says he is in a quandary as to what to do with the fine homes. It would be a crime to tear them down, he feels. There are more than two hundred houses.

Sliding has 234 acres of land in the townsite. The same owners also have a lease on 23,000 acres of timber land. In close proximity to the town are several iron mines which produced metal for military uses in the war, but are idle now.

When the great demand for iron casing in the World war the Mid-Continent Iron corporation built a huge iron plant and pig iron plant there and laid out the town.

About $4,000,000 was spent on the plant. Workers hurried in and built the homes and buildings. The base of the powerful machinery in the great plant was heard night and day during the war and the workers went to the new city in great numbers. As many as 3,000 once occupied the town. After the war, the plant was shut down. The population, jobless, departed, leaving the city in the hills deserted.

Most of the machinery in the big steel plant is intact and will be reclaimed by the iron company.

Big Demand in Britain for U. S. Safety Razors

Washington.—The growing popularity of the American safety razor and its indispensable blade was evidenced in a Commerce department report showing that such blades accounted for approximately two-thirds of this county's $13,000,000 cutlery export trade in 1925, while the old-fashioned "ax" razor made up one-tenth. The little whisker eliminator found more customers in the British Isles than in any other country.

ORCHARD GLEANINGS

FIND CULTIVATION BEST IN ORCHARD

Most orchards should be cultivated during the early part of the season, and a cover crop, preferably a legume, should be sowed in the early fall, according to the New York agricultural experiment station. This practice is claimed to have decided advantages over the sod mulch system, at least for most districts of the state.

The station, in tests extending over ten years, secured an average yield per acre of 69.16 barrels of apples from an orchard left in sod. A yield of 116.8 barrels per acre was obtained from an orchard cultivated during the same period. The cultivated trees made a decidedly better growth than the ones in sod.

The beneficial effects from cultivation are believed to result from the saving in soil moisture and to the lack of competition between the trees and the sod for moisture and plant food. Also insects and diseases are more readily kept under control in the cultivated orchard than in the sod orchards, due to the protection afforded by the sod during the winter.

The station recognizes, however, that on soils that are rocky or which are so hilly that cultivation would be difficult it may be impracticable to cultivate. Furthermore, hilly land may wash badly if cultivation is practiced. It must also be recognized that cultivation is somewhat expensive on hilly and rocky land. In view of such conditions, it may be advisable, in the opinion of station experts, to practice sod cultivation in some orchards on hilly or rocky land. On most apple soils, however, the station believes that tillage will prove more profitable than sod culture.

While the station's recommendations pertain particularly to conditions in New York, the recommendations will prove applicable in many other states, particularly in eastern and northwestern fruit sections.

Anthracnose Disease Is Enemy of Raspberries

One of the common enemies of a full raspberry crop is anthracnose disease. It is quite prevalent, and, this, together with crown gall, has discouraged many from attempting to raise cane fruit. It is detected by a spotty appearance of the canes, and these places are centers of infection. Proper spraying helps to control anthracnose. For the first spray use liquid lime-sulphur, 10 gallons in 100 gallons of water. The commercial liquid lime-sulphur recommended is about 33 degrees Baume, and dilutions of this strength test should be used. For the next spray bordeaux mixture is recommended, at the rate of 4-6-100, which means 4 pounds copper sulphate, 6 pounds stone or lump lime to 100 gallons of water. The use of lime-sulphur at the second spray is not recommended. Black raspberries require spraying every season, but reds are not so susceptible to anthracnose.

Horticultural Hints

Give the waste land a chance to earn its way by growing trees.

* * *

The fifth orchard spray should be made about two weeks after the fourth spray.

* * *

Do not neglect orchards because a part or all of the fruit may have been destroyed. It is Mother Nature's provision that plants shall have a rest occasionally.

* * *

Apple scab test plots in Cuyahoga county, Ohio, this year showed a control 95 per cent efficient where the spraying was thorough. In unsprayed plots scab infected 62 per cent of the crop.

* * *

Clean up black knot in plum and cherry orchards by removing the knotted twigs and branches, and then get rid of them by burning. Lime-sulphur spray also helps prevent infection in clean trees.

* * *

Apple and other trees injured by rabbits or mice should receive treatment as soon as noticed. Where the damage is slight the bark should be smoothed down and the injured portion covered with grafting wax.

* * *

The earlier that fruit and ornamental trees of all kinds are planted after the ground is dry enough to dig, the more successful will the planting be. The same applies to bush fruits, strawberries and other herbaceous perennials.

* * *

The codling moth, on leaving the apple, spins a little cocoon in which it passes the winter. The apple might immediately disappear in the ground, with no cocoon, until late June or early July of the following year.

* * *

Time is short for effective spraying of fruit trees which are infested with scale. This infection is so difficult to eradicate that it requires a strong spray which would kill the tree if applied during the active growing season.

* * *

The need of planting trees for the benefit of ourselves and those who come after us is as great today as it was years ago.

* * *

The orchard should receive regular attention regardless of fruit crop. If the crop has been killed partially or totally, there should be an application of fertilizer made just as though the crop were being held, but the amount should be reduced according to the size of the crop. Cultivation should be kept up in the usual way.

THE USUAL RESULT

Sunday School Teacher—"Now, Elmer, what was the result of Joseph wearing a coat of many colors?" Advanced Pupil—"Didn't he become the biggest political boss in Egypt after a while?"

Her Trick

"How did Ethel manage to win that famous nose?"

"Well, all the time he was courting her she suffered from sore gums and didn't feel like talking."

Sugar can be produced easily from corn.

Really?

"Ho, Marimba, and if I ate my father Big mother, what would I be?"

"You'd be a cannibal, Theodorus, of course."

"Tut, tut, Dick one, I'd be an orphan!"—West Virginia Moonshine.

The Price of Existence

Old Hen—I'll give you a piece of good advice.

Young Hen—What is it?

Old Hen—An egg a day keeps the ax away!—London Daily Mail.

EXPERIENCED ON NECK

Host (to diner)—"What part of the chicken do you feel best fitted to wrestle with, my boy?" College Youth (unthinkingly)—"My experience has been with the neck."

Generous Chaps

"As partners I suggest we raise the pay of our help."

"Sure. Let's give her a dollar more a week."

Speaking of Tires

Dick—Mike Wilson is very selfish. He lives entirely within himself.

Tom—Oh, well, you know some of our best people live in tents.

Big Game

"Does Wilbur still race the trains to the morning?"

"No, it was too tame. He traded his car for a motorboat and tried to cross in front of a battleship."—American Legion Weekly.

In the Navy

He—Darling, I love you.

She—But we're just been introduced.

He—Yes, but I have to go on duty at ten o'clock.—Ammpola Log.

ORGANIZATIONS AND MOTHERS BOTH AGREE

Health of School Girls Important

The Girl Scouts and Camp Fire Girls are two national organizations, working side by side in the cause of healthy, happy, intelligent womanhood; training the minds of eager girls for greater service, training their bodies for the destiny that shall be theirs.

All honor to them! Wise mothers like Mrs. Alice Louthan urge their daughters in their early teens to take Lydia E. Pinkham's Vegetable Compound.

Mrs. Louthan says—"I gave my fifteen-year old girl Lydia E. Pinkham's Vegetable Compound, and it did her a wonderful lot of good. She was out of school for four months. I read the advertisements of the Vegetable Compound, and since she has taken it she has improved and has gone back to school. I recommend the Vegetable Compound to other mothers with girls who are not as strong as they should be."—Mrs. Alice Louthan, Route 5, Charleston, Illinois.

Some girls in the fourth generation are now relying on Lydia E. Pinkham's Vegetable Compound.

Not of Same Family

The hedgehog and porcupine are entirely different families. The true hedgehog does not occur in this country. The porcupine is found in both the Old and the New worlds. The Old world porcupines are terrestrial and fossorial, while the species found in this hemisphere are arboreal and not fossorial.

THE REAL ISSUE

The Chicago Daily News calls attention to the fact that one reason the National League baseball club of that city dropped from second place to fourth recently was that a certain star player on the team was guilty of drunkenness and failure to keep in condition. The player was suspended and no longer wears a Chicago uniform. The News adds:

"If other players are guilty of similar infractions of discipline they should be dismissed at once. Drunken players win no ball games."

The latter statement is certainly true. Baseball has become an exact science and to be a winner in his chosen profession the player must keep in first class condition all the time. What right living will accomplish is abundantly shown in the case of Walter Johnson.

And what is true of baseball is true, of course, of all other walks of life in which there is keen competition. This is so well established that repeating it seems like uttering a truism. But there has been so much discussion of the effectiveness of prohibition of late and so much politics played with the question pro and con that we are in danger of losing sight of the main issue. The thing to be kept in mind first of all is that no man, whether he favors constitutional prohibition or whether he believes some other regulation more effective, can gainsay the fact that to be efficient and reliable we must keep from getting drunk.

[Political Announcement]

WILLARD A. SMITH,
Republican candidate for office of
SHERIFF
Primaries September 14, 1926
Your support will be greatly appreciated.
Resident of Charlevoix County for fifty years.

annual convention of the Loyal Order of Moose:

"The United States does not want any virus of communism in its system. We know it for the poison that it is. The United States is the first country in the world in which the common man was placed on terms of equality with the wealthy before the law. Communists will tell us that is not enough. They say that we must level all distinctions, that we must make all men, rich and poor, alike, that we must emulate the example of Russia."

What shame is involved in wealth, and the ever growing wealth of America? There is no shame in it. America has grown rich because she has remained true to the economic laws and the principles set forth by the fathers of the republic."

Another real American with no use for Communism is President Green, of the American Federation of Labor. To long as American workingmen select such real patriots as their leaders, there is less danger of the red menace winning out in America.

INDIRECT SUPPORT

Much indirect support is given the Moscow-directed communist movement in the United States by organizations which disavow any communist sympathies, according to the National Republic, which says:

"The significant thing in connection with the Moscow-directed communist movement in the United States is the support it gets directly and indirectly from many larger groups which publicly disavow connection or even sympathy with the red organization. This includes leaders in pacifist, internationalist, religious and educational movements calling themselves moderate radicals and "liberals." The strength of the opposition to the restriction of immigration, registration of aliens and deportation of aliens illegally in the country shows how deeply sunk are the roots of the anti-American movement in the United States. It is easier to raise money for radical defense or propaganda funds than for any other cause. The fact that the strike at Passaic, N. J., is political rather than industrial, and that it is led by communists with a definite program of violence and determination to prevent an agreement between employer and employe, has not prevented many of the leading newspapers of the country from editorially denouncing the police and civic authorities of New Jersey for dispersing mobs without waiting for mass demonstrations to ripen into wholesale violence. In addition to the half million communists in the United States there are several millions others who are to some degree sympathetic with them and who are gradually drawing into closer sympathy with left, wing radicalism. Since this is in a time of general prosperity, the conditions which would develop from a period of depression may readily be imagined. Yet there are millions of political Pollyannas who deprecate the idea that there is any danger from this source.

BETTER PROSPECTS

Although we are hearing a great many rumblings of discontent from the middle West, the indications at present, according to the Department of Agriculture, are that the present year will be one of improvement for the farmers.

According to the department's last report, the stage is set for strong hog prices well into next year at least. Prospects for the wheat growers are moderately good, cattle are coming back to the West and the dairy business is picking up in the East. While it is true that the price of corn is out of line with other commodities, the farmer who converts his corn into pork, is by no means badly off, as prices of hogs continue to remain satisfactory.

There is no doubt that there is dissatisfaction with conditions in the agricultural regions of certain parts of the country, although it is difficult to estimate just how much of this may be due to political agitation. But conditions in the farming industry change pretty rapidly some times and there is no telling just what the situation will be within a few months from now.

Two things handicapping the farmer are high taxes and high cost of labor. The cost of labor will doubtless remain high so long as the present prosperous conditions continue in our cities. And the farmers taxes are due to local and not national conditions. It is up to the farmers themselves to see that local economy bring down local taxes. A little campaigning to reduce local taxes might have more beneficial effect than all the chimerical agricultural remedies the theorist can conceive.

COMMENT.

THE PHILOSOPHER

"There's one thing sure", said Uncle Billy Gamester, when he learned the President was going fishing. "He won't scare the fish by talking too blamed much."

Ed Tupper our dance expert says that the easiest way to learn the Charleston is to go into the parlor and have somebody drop one of the goldfish down your back.

Henry Martin's cousin over at Bluntsville had three fingers burned off his left hand on the 4th when he accidentally put them into a crock full of home made gin.

George Krouse, who made a million dollars in Florida real estate last year is back home presiding over the gasoline pump at the Acme garage.

Remember when we used to think that every short haired woman we saw was some kind of a reformer?

Whenever you ask Tom Milton, our local milkman, how things look, he always answer, "pretty blue."

"Lady Luck" Failed the Former German Kaiser

Berlin.—"Lady Luck," in addition to a large army, was regarded by the former kaiser as an important factor in the success or failure of his dreams of Germany as a world empire, judging from "good luck" emblems in the former imperial palace.

Above a gilded and intricately carved door leading from the sumptuously furnished anteroom connecting with the former kaiser's study, there hangs a rusty old horseshoe. It hangs on a rusty nail driven into the gilded portal under which the kaiser passed many times a day. The horseshoe was picked up by him more than twenty-five years ago while he was riding horseback in the Tiergarten.

The superstitious among his former subjects incline to the belief that the kaiser's dreams failed because the horseshoe was hung with the points down, instead of up.

Cost of Child First
18 Years Now $7,202

New York.—It costs $7,202 to rear a child during the first 18 years of its life, according to an estimate by an insurance company.

The total is divided as follows: Birth, $250; food, $2,590; clothing and shelter, $2,401; education, $1,150; health, $248; recreation, $130; insurance, $54; sundries, $570. These items, exclusive of $1,100 of the education bill, which the survey says the child may pay for itself, total $7,202.

THE THEATRE

There are probably no two faces as welcome on the motion picture screen as those of our old friends, Potash & Perlmutter. It will no doubt be welcome news to the patrons of the Palace theatre that they have succeeded in securing the showing of the latest Goldwyn picturization of Montague Glass stage successes, "Partners Again—with Potash and Perlmutter." It comes to that popular playhouse next Sunday and Monday.

The vitriolic partners have heretofore dabbled in the prosaic "Cloak & Suits" business. From that they took a flyer in motion picture production, but now we have them in "Partners Again" enjoying and suffering the experiences of automobile dealers. Of course, it would not be so bad if they had a reputable car to handle, but Montague Glass could see them with nothing but a "Schenckmann Six" than which there is none worse. Potash however, survives the nervous breakdown occasioned by his plunge into this impossible business, and is able to furnish even more laughs after the collapse of the business, by an impromptu airplane ride he takes involuntarily.

Picture-goers who read Francis Youngs sensational best seller, "Sea Horses," and are looking forward to seeing Allan Dwan's screen version of it at the Palace theatre, Tuesday and Wednesday, may be sure that the best available talent was assembled to portray the characters which the author has developed. Florence Vidor is the lone woman in the picture—the lovely, charming girl who makes search for her missing husband takes her to an out-the-way port on the east coast of Africa and plunges her into a stirring series of adventures.

Jack Holt has the virile role of the captain of the freighter—a part that gives him an opportunity to fight and love in his characteristic style. George Bancroft who scored a distinct personal triumph as the smiling killer in "The Pony Express," is ideally cast as the semi-brutal second mate. William Powell, noted screen heavy, impersonates the sinister character of the degenerate Englishmember husband, from whose clutches Miss Vidor is saved through the courage of Holt and the sacrifice of Bancroft.

"Paucity of ideas," is one ailment of the cinema from which Harold Lloyd never appears to suffer. The great comedian is given credit for developing more new comedy themes, situations and ideas than any other man on the screen today. His supply of new material seems inexhaustible. This will be gratifying news to the host of his admirers who see him in "For Heaven's Sake," his first Paramount release, which is booked for the Palace theatre, Thursday, Friday and Saturday, July 29-30-31.

Lloyd is enabled to maintain the pace he has set for individuality because of one thing. He never makes the story idea fit the situations, or "gags" as the funny bits of business he portrays are called, but makes his situations mould into the general theme of his story. For this reason, he cannot use stock material and thereby avoids the rut into which so many comics fall. The comedian is known to have carried in his mind for several years great comedy gags to use them only when a situation developed into which they could be logically placed.

Lloyd is recognized by close students of motion picture affairs as the best "gag" man in Hollywood.

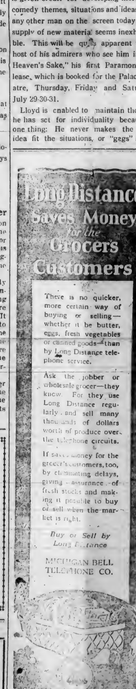
Leslie Fenton, who is at work in Fox productions has brought him to the top among the screen's young character men, has the leading male part in "The Shamrock Handicap," adopted from Peter B. Kyne's story, "Cornbob Kelly's Benefit," which will be shown at the Majestic theatre Saturday and Sunday, July 24-25.

Fenton has the role of Neill Ross, an Irish jockey, and does the finest work of his career under the direction of John Ford, producer of "The Iron Horse," "3 Bad Men," "Kentucky Pride" and a dozen other screen selects.

Theatre patrons who admired Buck Jones in "Lazybones" and enjoyed his spunk and cleverness in the industrial, impossible but lovable, will find many traces of the same fine character sketching in his newest Fox picture, "The Gentle Cyclone," which comes to the Majestic theatre on Tuesday, July 27.

Buck, of course, is the cyclone, and despite the suggestion of gentleness in the title of the picture, Mr. Jones is at times as vigorous and tornadic as his fondest fan could wish. In fact, in many of the scenes Buck swings a pair of very lusty and decisive fists.

The role presents Mr. Jones in fine contrasts, for at times he is as gentle and appealing as the title implies he is, and gests. Again, he is the wild-riding, fearsdefying Buck Jones of many a valient western picture.



There is no quicker, more certain way of buying or selling—whether it be butter, eggs, fresh vegetables or canned goods—than by Long Distance telephone service.

Ask the jobber or wholesale grocer—they know. For they use Long Distance regularly, and sell many thousands of dollars worth of produce over the telephone circuits.

It saves money for the grocer—customers, too, by eliminating delays, giving assurance of fresh goods and making it possible to buy or sell when the market is right.

Land of Endless Cold Unknown to Explorers

Northward beyond the tree limit is the land of endless cold, of eternal snow and ice—at least according to popular belief, and some textbooks still in use. But this story of eternal ice is an interesting myth. The facts of climate are quite different, says Dyson.

The Arctic winter is indeed long, dark, cold and stormy, but the actual number of inches of snowfall is less than in northern Virginia, for example. The cold, therefore dry, air of Arctic regions cannot produce much rainfall; in many places it is only ten inches or even less. The rainfall being light, the snow does not get very deep.

Believers in the snow-myth seem never to think of the intense heat of the Arctic summer, when the sun does double duty by shining also at night.

At 60 degrees north latitude the longest day has 18½ hours of sunshine; at 70 degrees north latitude, at the Arctic circle, the longest day has 24 hours of sunshine. At 90 degrees north latitude there are 73 days with continuous sunshine, unbroken save by clouds. At the pole there are six months of continuous daylight. Several hundred square miles of Arctic America have more than 30 days of continuous sun.

Universal Necessity

Apropos of the rich Osage Indian girl who sent the government a bill of $372 for cosmetics, Secretary Work told a story at a reception.

"Cosmetics are becoming a universal necessity," he said. "A nurse girl the other day rushed into the study of her master, a young divine, and gasped:

"'Goodness gracious me! What are we to do, sir? While his ma was asleep the baby licked all the paint off.'

"The nurse girl gulped. She could hardly go on for fright.

"'All the paint off—'

"'Yes, yes. Off his toys!' said the young divine.

"'No, sir,' said the nurse maid. 'Off his ma's.'"

BEAVER ISLAND

J. Conger of Detroit, is here in the interest of the Weather Bureau, and will turn over the Beaver Island cable to the U. S. coast guards. They will make a landing of the cable at Light House Point instead of across the bay, on account of ice in the spring.

J. Michaud of Minneapolis, an aviator, is here to take charge of the Beaver Island airplances.

Mr. and Mrs. William Vandenburgh of Holland, is visiting his brother, Captain Vandenbergh.

Mr. and Mrs. Carl Marine and family of Chicago, are visiting her sister, Mrs. Dan J. Martin.

Mr. and Mrs. Connie Gatliff of Detroit, spent the week end visiting his brother, Tom Gatliff.

Mr. and Mrs. Smalley Daniels of Grand Rapids, are at their bungalow for the summer.

Mr. and Mrs. C.C. Allers are home from South Haven, where they had been visiting Miss Nelly Duffy of Chicago, is visiting her sister, Mrs. W. J. Gallagher Jr.

Mr. and Mrs. Max Sanderriger of Milwaukee, are at his mothers cottage.

Fred Schreiber of Grand Rapids, was here for several days this week.

Mrs. Bid Martin is home from Chicago where she had been visiting.

William Darling, income tax man, was here several days this week.

Dr. and Mrs. C. B. Ruth of Des Moines; Iowa, are at their cottage.

Mrs. Annie T. Burns and two daughters are at their bungalow.

G. Hoffman of Springfield, Ill., is at his cottage.

Miss Raymond McDonald is home on a visit.

Master Connie Gatliff is in Charlevoix.

Mrs. Mae Gallagher is home on a visit.

Mr. Business Man!
What About Your Profits?

Are many of them represented on your books as dormant or dead accounts? Are you usually charging off these bad accounts as uncollectable? If so, are you not causing yourself an unnecessary loss? Isn't it, after all, the one and only unpleasant feature of your business?

The Freeman Mercantile Agency is a bonded establishment, operated efficiently under the laws of the state. It is an institution, however, that has representatives scattered over Northern Michigan, able to give personal service to every call.

We wish to stress the "personal" element of our service. All calls within a radius of a hundred miles of Traverse City are made by personal representatives of this agency. Our collection efforts are not confined to letter writing. Our business is EXCLUSIVELY a collection business.

If you have bad accounts, turn them over to us. If it is humanely possible to collect these accounts, we will do it. Our collection fees are standard. Where no collection is made, no service fee is charged. Our commission is exacted only where satisfactory results are obtained

Look over your old accounts. List the questionable, or dormant ones. Do not charge them off until you have given us a chance to prove what can be done with them

NEW PALACE THEATRE

Attractions for Coming Week

◇ ◇ ◇ ◇

Sunday-Monday, July 25-26—

"Partners Again" with Potash and Perlmutter. The laugh sensation of a nation-with the famous fifty-fifty partners startign in the automobile business and ending in a runaway airplane. You'll hold your sides from laughter; you'll hold your heart from thrills. Pathe comedy, "Love and Kisses." Extra—Monday, Felix the Cat, "Keep on Walking."

Tuesday-Wednesday, July 27-28—

"The Sea Horses" with Jack Holt, Florence Vidor and William Powell. A great melodramatic adventure, completely different from the ordinary. Tornadoes and shipwreck; love and adventure on land and sea; tingling with thrills; massive in production. Extra—Wednesday, Fox News reel. Pathe comedy, "Charley, My Boy."

Thursday-Friday-Sat., July 29-30-31—

Harold Lloyd in "For Heaven's Sake." The man who makes the millions merry is coming in his latest landslide of laughs. He rocked the screen with laughter in "The Freshman," but he will wreck the screen with roars in "For Heaven's Sake." A lightning calculator couldn't keep track of the laughs. Extra—Educational, "The Vision." Prices: Adults 50c, children 25c.

—MAJESTIC THEATRE—

Saturday-Sunday, July 24-25—

"The Shamrock Handicap" with Janet Gaynor, Leslie Fenton; J. Farrell McDonald. A drama of pathos and Irish wit, about a heroic Irish jockey and a famous stepfather on an American track. Extra—Educational comedy, "Page Mr."

Tuesday, July 27—

Buck Jones in "The Gentle Cyclone." He came out west as Abnor. lom Wales, a homeless specimen, dressed in the latest of English sport clothes; but they soon got to know him as "Cyclone" Wales, a man of powerful muscles but powerful fists.
Extra—Pathe comedy, "Wandering Papas."

Bolstering Chinese Morale

The present year will see a great number of Chinese soldiers facing each other on either active or futile battlefields, and efforts were made to cheer up the morale of those men at the holiday season, says the North China Star. The Kuominchun gave ten cents to each soldier and five cents to each coolie, while those at the front received a double present.

Wounded officers from $5 to $10, according to rank, while seriously wounded soldiers received $1 and others 50 cents. All troops not at the front had a holiday on Friday and Saturday, which was not allowed those at the front.

Russell Painting Found

W. P. Connolly of Winifred, Mont., recently found on the walls of an old cabin in the Snowy mountains an original painting by Charles M. Russell, the cowboy artist, whose work now brings high prices.

The painting, on cardboard, was tacked to the logs and later had been covered with tar paper. It is plainly signed. Russell formerly worked in that section as a puncher, it is said. It is presumed he either dashed off the sketch in idle moments or gave it to a friend.—Los Angeles Times.

Generates Much Power

As much electricity as is required for a city the size of Boston is generated by the United States steamship Saratoga, an electrically propelled airplane carrier. This ship can attain a speed of nearly forty miles an hour by means of its 180,000 horsepower electric motors which drive four huge propellers. The electric energy is derived from four 22,500 kilowatt steam turbine generators.

Laughtening Sentences

An eighth-grade teacher recently gave her pupils several words to use in sentences. In some of the following results it is easy to find the words:

She went to a pulmonary coach to Boston.

The Red Cross is going to use the pulmonary when people nearly get drowned.

The child had a pulmonary expression on his face.

I was writing when I beheld the teacher watching me.

The man declined in his easy chair.

Willard is a boy that has tubular diseases.

Don't aggregate the dogs in front of the house.

The man's tubiars were stopped up.

The man was on a milk dialogue.—Indianapolis News.

Mr. J. W. Harris returned to his home, Oak Park, Ill., Tuesday evening after spending a couple of days with his family at their summer cottage near Ironton.

Several splendid yachts have entered this port and harbor during the past few days. The Buccaneer, Rainbow and Alacrity being in the class mentioned.

Prof. Kendall Page Brooks, who is at the head of the Physics and Chemistry department of the Central Michigan State Formal at Mt. Pleasant, is spending the summer with his family at his cottage on Pine Point.

Mrs. Rachel McCollum and daughter were passengers on the Manitou last Tuesday. They were on their way to St. James, the former home of Mrs. McCallum (formerly Donleyy) to visit friends for a few weeks.

High winds that spent some of its force here yesterday morning wrecked one of the large plate glass in the front of G. J. Garn's delicatessen store, making for annoyance to Mr. Garn and a substantial loss to the owners of the building.

D. H. Kirk, of Grand Rapids, was a business visitor here yesterday and is authority for the statement that thermometers registered 94 degrees in the shade at Rapid City Tuesday when a warm easterly wind swept across the Kalkaska plains.

Dr. C. W. Carter spent the week end here with his parents, Mr. and Mrs. F. E. Carter. He returned to Grand Rapids Monday accompanied by his mother who will visit friends in Grand Rapids and Detroit for some days before returning to Charlevoix.

The yachting party that has been cruising in northern waters, particularly in Lake Superior on the yacht Sylvia for about two weeks, returned to Charlevoix Wednesday evening and all on board make report of having a gorgeous trip and splendid cruise.

Charlevoix ball players defeated the Bellaire team on the North Park grounds in an interesting game played last Sunday. The game was hotly contested and for the first seven innings could not be claimed as won by either of the contesting nines. Some costly errors favorable to the Charlevoix players pissed them in an advantageous position, giving them a 7-4 lead at the close of the game.

Iced fruit drinks at Eveline Orchards' sales booth.—adv.

Alex Patterson, of Marquette, was a business visitor in this city Wednesday, going from this place to Gaylord for the purpose of attending a special meeting of K. O. T. M. scheduled for Wednesday evening. Mr. Patterson is District Organizer of Marquette District and as such takes more than ordinary interest in the proceedings of the order.

Ball players, the Mancelona team will meet the Charlevoix team Sunday afternoon at North Park. The game will be called promptly at 3 o'clock. Manc'lona usually puts up a good game and we hear that the players this season are up to their former standard, therefore the fans can expect something interesting in the contest staged for Sunday afternoon.

Commissioner of Schools, A. C. Bielinger; Superintendent, George Coverdale, and L. C. Hannah, motored over to Atlanta and spent last Sunday where they did some prospecting in a region that is getting more or less publicity due to a find of natural gas of which the gentlemen say is found in considerable quantities. Exploitation of the aforesaid mineral territory is being vigorously carried on.

A severe storm raged for a short time in this region early Wednesday morning, the high wind causing a small amount of damage and accompanying the wind was something of an electrical display and a downpour of rain, the latter of inestimable value to agriculturalists and gardeners. The storm was general throughout this region. At Bellaire the storm was accompanied by a heavy downfall of hail that covered the ground—some of the hailstones being out of the ordinary in size.

A safe in the plant of the Standard Oil Company, in Petoskey, was forced open by yeggmen sometime Monday night. Nitroglycerine was the explosive used, wrecking the safe. Currency and checks amounting to $500 was the reward to the yeggmen for their nefarious work, not all of which will be of value to them. In their rush to get away from the scene of their crime the burglars overlooked $100 in currency, leaving the same in one of the safe compartments.

Dr. and Mrs. Frank H. Wilkinson returned last Saturday night from a motor trip and vacation spent in southern Michigan. During their absence the Dr. spent the major part of the time in Camp Custer and in view of the fact that he gained eight pounds in weight it is evident that life in a training camp proves to be beneficial from a physical standpoint. During the time the Doctor was engaging in camp life Mrs. Wilkinson was a guest of friends in Lansing.

Great Commander, E. W. Thompson, K. O. T. M., of Michigan paid a short visit to Charlevoix yesterday holding a conference with members of the local tent, after which he continued his trip to Boyne City and Boyne Falls on a commission in connection with his duties at the high official of the State in this fraternal organization. Mr. Thompson was accompanied by his wife and other family members all of whom are enjoying a short vacation by motoring through this region.

Buttons Made Change in World's Fashions

It is remarkable what small things have revolutionized the habits of the world. The change from the loose, flowing robes of the ancients to the fitted garments of modern days is entirely due to the invention of the button.

Once the new fashion was established, many substances were pressed into service as substitutes for button making. Birmingham, England, has held its own as the most important center of the industry; and though Birmingham has a magnificent town hall, old inhabitants say that it would pay to pull it down and dig up the foundations, for it is built on a refuse heap of mother of pearl.

About the middle of the nineteenth century the manufacture of pearl buttons was one of Birmingham's chief industries, and shells were brought in such quantities from the Pearl islands off the coast of Panama that manufacturers punched one or two buttons out of the best part of the shell and threw the rest away.

Chimneys

From the days of the Henrys, strict laws were enforced to prevent ordinary people from attempting to "rear a stone above their eaves"—by building a chimney! Only in a castle or a manor house was one allowed—and not more than one. Imagine chimneys being built of wood! Yet they were. According to the Liber Alius (White Book) of the city of London, it was found necessary in 1419 to enact "that no chimney be henceforth made, except of stone, tiles or plaster, and not of timber, under pain of being pulled down." Owing to the restrictions on the materials-book, it was not till the time of Queen Elizabeth that chimneys had become commonplace.

Distinctive Trade Term

The term "rayon," as a generic name to be applied to all artificial silks, has come into quite general use, having been indorsed by many trade associations, and being applied by different producers to their products. The word is French, one of its meanings being a ray, as of light, and the thought in the minds of certain of those who sponsored it was that, being a term unknown to most of the English-speaking public, it would result of no confusion in its use. It was believed that it could not be mistaken for anything else, and would still be applicable to the product as expressing its outstanding characteristic of luster.

Dainty dishes served at Eveline Tea Gardon, Eveline Orchards.—adv.

Dwelling of Today Compared With Past

Consider the present-day, well-appointed house. It has an entrance hall, living or drawing-room, kitchen and pantry and service departments, bedroom and bathroom with modern sanitary adjuncts and aids to comfort. Go back a hundred years and you find the house has no bathroom. Go back two hundred years and apparently no change has been made.

Go back three hundred years to the time of Elizabeth and James I, and the house has only some primary divisions of hall, living-room, kitchen and bedroom, although the hall is large and well lighted. Go back a generation beyond Elizabeth and the hall is larger but less cheerful because the windows are smaller. Go back still further, say to the Twelfth century, and hardly any windows are visible in the outside walls, there are no bedrooms and living-rooms and the house consists of nothing but a kitchen and a large turnilike hall. Thus is the house reduced to the ultimate essentials.—New York Herald-Tribune.

Popular Christian Names

The ten most popular names in America, according to Simon Newton, who compiled them from telephone and city directories, are John William, James, Charles, George, Thomas, Henry, Robert, Joseph and Edward. In an average list of 100,000 names, John appears 8,580 times; William, 7,611; James, 4,258; Charles, 4,236; George, 4,171; Thomas, 2,710; Henry, 2,596; Robert, 2,303; Joseph, 2,096, and Edward, 1,967 times. Names of average popularity are Leonard, Nathan and Norman, which range as numbers 65, 66 and 67, respectively, on Newton's list.

Hear Ye! Hear Ye! Ye Workers of Men.

Take Notice. There will be a meeting of the Charlevoix county G. C. R. association at the Wolverine Hotel, Boyne City, Friday, July 30, at 7 p. m. sharp time or 8 p.m. fast time.

$1.00 a plate. A d—m good dinner.

We want all the old timers to be there with their spurs on, ready to start when the starter cries out go. After dinner others will be prominent out of town speakers, come and eat, come and hear 'em. UNCLE GEORGE.

The Mystery of Life

The first duty of every man is to acquire as much common sense as possible as soon as possible. If we know the simple rules governing life and that its conditions are fixed and unchanging, we need not greatly care for "the deeper significance of it all." How did the world originate? I do not know; but I know its rules, and that they will certainly endure as long as I am interested in the subject. . . . Literary men write about the dark woods in terms of mystery, but practical men have charted the woods and are able to tell the meaning of the darkness and the meaning. —E. W. Howe's Monthly.

Pharaohs Played Checkers

They were playing checkers in Egypt in 1900 B. C. and there is a question whether some of those old games are not going on yet. Archaeologists find checkers was the favorite game of Queen Hatasu. They have even found several of her draughtsmen and fragments of the board on which she played. Egyptian inscriptions show the game was popular in the times of the earlier Pharaohs. . . . As the centuries go by men grow differently and customs change, but man himself is pretty much the same kind of fellow.—Cupper's Weekly.

Times Have Changed

The chairman of a campaign committee was approached by an unimportant politician who had previously bolted the party. The man said that he had seen the error of his ways and expressed a desire to be taken back and given a job at campaign headquarters.

"I am sorry that I shall have to disappoint you, Mr. Blank," the chairman replied. "Glad to see you back, of course, but in these days the wise prodigal brings along his own grub."

Secret Service

"What's this?" asked the boss as his stenog laid a box on his desk.

"Why, they're the envelopes you told me to get while I was in the apartment store," replied his stenog.

"Great Scott!" exclaimed the boss, "I meant for you to get them in the stationery department."

"Oh," giggled the stenog, "I thought your wife had asked you to make a purchase and you were too bashful to go yourself."

Colored Musical Genius

"Blind Tom" was the name given to Thomas Greene Bethune. He was born blind and a slave, near Columbus, Ga., on May 5, 1849. He exhibited unusual musical talent before he was two years old, and played the piano when he was four. He was able to imitate birds, rain, thunder, etc., and could immediately play any selection after hearing it once. He appeared in his first concert when he was eight years old, and traveled extensively through America and Europe. He died July 3, 1908.

Brief Bootmaker

It was Thackeray who, when visiting Ireland, misunderstood the letters G.P.O. to mean "God Preserve Ould Ireland." But even in this age of letters, when newspaper readers are accustomed to decipher abbreviated forms in news and advertisement columns, mistakes are easily made. A notice on a certain street door, for example, always excites interest. It runs: "J. X. B.S.M." Some know the university degree. No; merely an intimation that the occupant was a boot and shoe maker.

Hot Comeback!

The famous animal painter Verboeckhoven, who painted principally sheep and goats, once visited an English manufacturer. The proprietor Briton said, with condescension:

"Are you the man who paints only stupid animals?"

"Yes," said Verboeckhoven, "why do you ask? Did you want someone to paint your portrait?"

CHURCHES

Methodist Church.

C. E. Pollock, Pastor.

"Appreciation" sermon subject 10:30 a. m. next Sunday.

Lodeeaen's Superior Orchestra from The Inn will render the following musical program at 8:30 p. m.

Mighty Like A Rose	Nevin
Orchestra.	
Miserere	Verdi
Violin, Trumpet and Piano.	
Simple Aveu	Thome
Trumpet Solo.	
Behind The Clouds	De Syiva
Orchestra.	
Veima	Wiedoeft
Saxophone Solo.	
Remembrance	Jessie Dappan
Violin Solo.	
Prisoner's Song	Massey
Orchestra.	

The members of this five piece orchestra are students from the University of Michigan, and have kindly consented to give the church the advantage of this half hour of excellent music. The pastor will preach directly following the musical half hour.

The Epworth League will hold another great hour of devotion and study at 8:30 p. m., next Sunday evening.

All young people are invited. The meeting is held in the auditorium. It was well filled last Sunday.

Congregational Church

Rev. B.G. Mattson, D.D., Minister

Sunday services are as follows:
Sunday School at 9:30 a. m.
Morning worship at 10:30 with sermon by the pastor on "The Fulfillment of Life."

Evening service at 7:30 with special program of Hymns the Whole World Loves." Dr. David Hugh Jones, pastor of the First Presbyterian Church, of Evanston, Ill., will direct the hymn singing as Precenter; the pastor will sell something of the story of the hymns and their composers. Mrs. Steib r at the organ will be assisted by Mr. Robt Bridge with the violin in furnishing rich instrumental accompaniment to the several hymns. The public is cordially invited to attend our services and use our reading room.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Truth."
Sunday School 12 o'clock.
Wednesday evening service 7:45.
Reading room, Tuesdays and Saturays, 3 to 5 p. m.
The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church

Low Mass 8:45 a. m.
High Mass 9:00 a. m.
Saturday and Monday 7:00 a. m.
Rev. Knute Lowenski, Pastor.

Episcopal Church

The Rev. John K. Coolidge, of Glencoe, Ill., will hold services at 10:30 a.m. at the Episcopal church during the summer months.

The WATER BEARER

By J. ALLAN DUNN

AUTHOR OF "A MAN TO HIS MATE" "RIMROCK TRAIL"

COPYRIGHT BY DODD, MEAD AND CO.
WNU SERVICE

THE POWER

SYNOPSIS.—Silly fishing Hermosa creek, in California, Caleb Warner, civil engineer, and a New Englander, is witness of the end of a coyote pulled down by two hounds, urged on by a girl rider. Admiring the hounds, he introduces himself, and learns her name is Clinton. With sentimentality she invites him to the ranch to meet her father. At the Clinton home Warner learns the new friend's name is Barry Evans. Clinton is a very wealthy man, owner of Hermosa valley. He tells them something of his ambitions and his feeling that he is destined to be a Water-Bearer. In the town of Golden Warner shares an apartment with his old Columbia college chum, Ted Baxter, curious and somewhat dissipated youth, only child of his brilliant mother, who controls the family fortune. At a club luncheon Baxter introduces Caleb to Wilbur Cox, leading business man and president of the water company which supplies the needs of Golden. He gives Cox an inkling of his ambitions, and Cox expresses interest. Invites him to dinner that night. During dinner Cox asks Caleb to visit the pumping station next day, he does so and Cox arranges a meeting between Caleb and Hinckley, the water company's chief engineer. Baxter tells Caleb he is in difficulties with a girl, Mary Morgan, Cox's stenographer, who insists he must marry her. With Hinckley, Caleb looks over the water company's source of supply, the Golden springs, in Hermosa valley. Prospecting in-Hermosa valley, Caleb meets a man, Evans, who boasts of his ability, through "divining rods," to locate water without boring. Caleb comes upon a picnic party, the festivities being in honor of Betty Clinton's birthday, and is welcomed. Betty tells him Hermosa valley, owned by her father, is in reality a mountain-girdled plateau, 2,000 acres in all. Here, Caleb, with Warner, Wilson and Betty, are threatened by a bull. Warner bravely protects the girls, and he is himself rescued by Padilla, Clinton's man.

CHAPTER VII—Continued

—10—

He hollowed out the lower end of the plain, the portion that the divine teased the Sink, was composed of gravel, retained in clay but without the clay capping. In it was held the sunken waters of the dry creeks, the same water that furnished the wells of the territory north of the creek, and this water should hold the same level, if his theory was correct. It should lie some forty feet below the surface in normal times—less during the storm-water season. It would be absolutely pure—filtered through the gravel. If this was true—and he believed it was—he had found a water mine, a mine with an inexhaustible ever renewed commodity, that was as commercial as any mineral that, conveyed to Golden, meant the assured progress of that city.

He knew that the city of Berlin, at enormous expense, had manufactured beds of gravel for the filtering of its river supply, but here at hand he had the filter built by nature, a cistern waiting to be tapped. And the land had unsuspected under the very noses of Cox and his engineers, and the water experts of Oakville.

He had to proceed cautiously. It was important to Cox his interests and his methods. If he made the discovery, it was his, of course, and to sell. He could not here in the Sink to prove out his hope that clay buttoned all the gravel and held the water. He meant to use the diviner for that, keeping him in ignorance of what the experiments might mean.

He smoked himself with cigars, and after supper crossed the bridge and walked along the creek and up the road to the pit. There was a wisp of smoke coming from the rocky pile and a light burning back of the solitary window.

A smell of crude cookery, blent of cheap coffee and half-cured bacon, intermixed with the acrid odor of logs burned in a pot, came out through the door, which opened part way to Caleb's knock, disclosing the lean figure of the Welshman silhouetted against lamplight.

"Who's there?" asked Evans.

"The fisherman. Don't you remember? You told me about your divining the other day."

The Welshman opened the door wider and peered curiously at Caleb in the broader ray of light. Then he stepped outside.

"Kind of stuffy inside the shack," he said. A great night. Look at them stars. Ah!"

He took the cigar Caleb proffered and puffed it to a glow, exhaling the smoke with a gratified sigh.

"I brought a few along," said Caleb, "thinking you might like them. I've got plenty."

The other held out his hand for the brown rolls eagerly.

"That's kind of ye. If you don't mind, I'll put 'em by the shack. No porkpie hunter that won't smoh 'em."

He disappeared in the shack and came out again bearing a bundle.

"I'd like to even up with you on them," he said. "How about an exhibition? The power's in me."

The suggestion had come as Caleb would have wished it, spontaneously, from the man himself.

"That will be lucky," he answered simply. "I should like very much to see you in action."

The Welshman led the way to the top of the gravel.

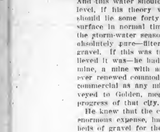
"Choose your place," he said. "I've a notion there's water most anywhere here. The soil'll prove it. Pick one of the rods," he went on, with the air of a conjurer asking for the choice of "any card in the deck." "They're hazel," he said. "Some say hazel's a magic wood, but the magic ain't in the rod, it's in me. Willert'll do, or peach, but I like hazel. Now, where d'ye say?"

Caleb chose a spot clear of sagebrush. It was almost a circle and he stood on one side of it, a strange figure in his attire. The spare figure of the Welshman, looking up to the stars, the rod that Caleb had chosen in his hands, breast high, a foot to each hand, the fingers upcurving, a tool on something of the dignity of a druid, prized about to perform a mystic rite.

"Can you see plain?" he asked in a whisper. "I'm going to walk to-ard ye. Watch the stem of the rod."

He lowered it to the full length of his arms, walking slowly, the twig horizontal, right-angled, midway, of his flight. His eyes glittered as he turned to the sky. Suddenly he stopped and Caleb held his breath, gazing intently at the rod.

It seemed to twitch—surely. It vibrated—up and down. Caleb, watching closely, half fearing he might unnerve a trick yet wishing to see if trickery was forward, could detect no



"Can You See Plain?" He Asked in a Whisper.

lexing of the hobby wrists. The fingers were rigid. So tightly did Evans grip the forks that his knuckles showed white.

Then he gave a sigh and the end of the rod flipped violently downwards. Caleb caught the distinct creak of pressure exerted upon the silence that followed the sigh. The downward branch, rigid, while the twig tips quit a frantic pointing, seemed the magic wand, not the magic ain't in the rod, it's in me. Willert'll do, or peach, but I like hazel. Now, where d'ye say?"

Caleb chose a spot clear of sagebrush. It was almost a circle and he stood on one side of it, a strange figure in his attire. The spare figure of the Welshman, looking up to the stars, the rod that Caleb had chosen in his hands, breast high, a foot to each hand, the fingers upcurving, a tool on something of the dignity of a druid, poised

DO YOU EVER STOP TO THINK

By EDSON R. WAITE
Shawnee, Okla.

Harry R. Hill, advertising manager of the Fargo (North Dakota) Forum, says:

That we hear a great deal of complaint from retail merchants in all lines of business with reference to people trading with out-of-town concerns, patronizing mail order houses and peddlers, and one is inclined to sympathize with them, and to condemn the peddlers and mail order houses.

While we hold no briefs for these people, we must at least give them credit for their enterprise in going after business in an aggressive way instead of weeping about hard times and worrying about the profits the other fellow is making.

If retail merchants would just put half the effort behind their selling campaigns in proportion to the size of their business as the mail order house puts behind its mail order business would find pretty poor pickings in most any community.

If the people behind the counters in the average store knew half as much about the merchandise they are supposed to sell as the average peddler does, and would be just half as willing to show their lines, and just half as anxious to make a sale, the peddlers would soon be forced into other lines of business.

Merchants in many cases encourage buying away from home. For instance, he'll say Mr. Jones is in the grocery business, his wife needs furniture—does he always buy from his fellow townsman across or up or down the street? No, he can save a few dollars by purchasing through some friendly salesman who doesn't happen to be selling the furniture man. The furniture man places his order for fruit for canning with a friend of his in the wholesale business in a nearby city, the jeweler buys his new suit from a peddler, the dentist sends away for his automobile accessories; the lawyers wife buys her clothing in the big city, and so it goes. Others should buy at home, but when it comes to practicing this good rule, one is inclined to forget himself.

If retail merchants will try out these suggestions, then go after business in an aggressive way using local newspaper advertising and attractive window displays, two of the best known advertising mediums known to modern merchandising, and neither of which is available to the peddlar or the mail order house, it will be but a comparatively short time before they will have little cause to worry about either of these competitors.

His Dilemma

A beaten candidate in politics never knows whether he has a defeat to live down or a moral victory to live up to.

"UNCLE" GEORGE HAS A GROUCH

To the Taxpayers of the City of Charlevoix

Notice is hereby given that the July Tax Roll of the City of Charlevoix has been delivered to me, and that the taxes therein levied are payable at my office at any time on or before the 15th day of September, 1926, without charge for collection.

On all taxes remaining unpaid after the 15th day of September a collection fee of 4 per cent will be charged and collected.

Office hours:—8:30 a. m. to 12:00 noon, and 1:30 to 5:00 p. m.

ELMA H. COOK, City Treas.

[Political Advertising]

For State Senator

To the Citizens of the 29th Senatorial District of Michigan:

Having been urged by many to become a candidate on the Senate from this district, and Mr. Pearson having stated to me that if I was a candidate he would not seek third term, I have decided to submit my name for your consideration at the coming primaries, on the Republican Ticket, assuring you that if I am chosen to serve you in such a capacity, I will do my utmost to prove worthy of such confidence bestowed in me.

Sincerely yours,
HUGH M. DICKEN, M.D.
East Jordan, Mich.

Charlevoix, Michigan,
July 16th, 1926.

Office Hotel Lobbies or Hotel Porches.

My Dear Editor:

I hope no one will read this letter.

This is one of the mornings that your Uncle George has a "Grouch" and I'd advise our readers who do not have the grouches not to read it.

Our thinking machine—we did not make ourselves, it was given us by the Divine Power and we should use it for good and not for evil. But, we do not do it all the time as we should.

I find that since I have changed my office from the saddle or on the jump to Hotel Lobbys and Hotel Porches that I get a great deal more news, facts and experiences than I did.

Newspaper men are as a class very smart. They have to be very much on their guard, as to what they publish. Sometimes they want to publish what they know, but for fear of a law suit they deny themselves and their readers frequently the pleasure it would give us all to read some of the spicy things which occur daily in their towns. In fact sometimes I am tempted to run a newspaper of my own, and in order to avoid legal difficulties, I'd incorporate for about $1500.00 (fifteen hundred dollars) and then the corporation could stand a legal war and not cost much. I learned that from a lawyer. Speaking of lawyers, they are the smartest set of people on earth, for their education has taught them just how far they can go and keep within the law, also that they are able to defend those who break the law (if they have money to pay for so doing), and make the opposition believe that the law breaker did not break the law. Now that is a very strong point. For my own part I am having a d—l of a time to convince erring humanity men who are interested in soft black top stuff for roads that it is not worth a ——, and that *concrete is the only stuff to use*, for it will last forever, because the older it gets the better it gets. No concrete road as yet has ever worn out. It will break just as a bridge will if it is over loaded. At present our state law like many others permit sixteen tons, and in the near future a law will undoubtedly be passed making it a national law with a heavy penalty for loading in excess of sixteen tons.

A still small voice says, well what about the Grouch. I'll tell you. I went to a man who makes his money driving his car over roads, and I thought he would be the best man to take me to Boyne City and East Jordan, in order that I might interview Mr. Haire, Editor of the Boyne Citizen and George A. Lisk, also Editor of the Charlevoix County Herald. I told the man the object of my trip and ask what he would charge. He replied by asking how long I'd be in each place, I replied, one-half hour. He then said $10. Then the grouch began. He said, "Is the price alright?" I said, "Yes I guess so, but I am not going." "Why not?" "Because I have quite my job." "What does that mean?" Why Sir, "You being one of the men I am working for and when you charge me $10 for doing a $6 or $8 job, I refuse to work for you any longer." I've been on this job on concrete roads for twenty years, I am over eighty-five years old, but this little instance has shown me what a d—m fool I am, and I've quit. "Well, aren't you going?" "No, why should I go. I tell you I've quit and if you wish to continue to drive your car over these damnable roads, keep on doing it for it doesn't cut any ice with me what kind of roads you fellows have up here." It is just such experiences as this that have made my job a hard one, but I can't blame me for quitting, can you?

Now we will compare my grouch case with another but very different one. As I was telling my experience of the grouch to some of my friends, one of them said, "Well when do you want to go to Boyne City and East Jordan?" I replied, "I am not going. Didn't I tell you I have given up my job. Do you suppose that I'd continue to work for such men as that?" And another spoke up and said, "Has this man ever been known to do many good generous acts?" Then another man (a good Samaritan) spoke up and said, "Well, when do you want to go Uncle George?" And I again said, "Why, did I not tell you I have given up my job and that I am not going?" And then he said, "Why Uncle George, you could not give up your job if you tried, and you wouldn't if you could. When you want to go let me know, and I'll take you and it will not cost you a cent." I thanked him and we parted. About a half hour later I met him again and I said, "I guess you are right and I'll go." "When?" said he. "Tomorrow morning at eight-thirty." "I'll be there," and he was. We went, and we saw, we had a glorious reception, and a press of business in both cases, was the only excuse offered.

Both editors are in hearty support of the G. C. R. around Pine Lake, and so are our own editors in Charlevoix. Many people in Charlevoix County do not appreciate what the newspapers have done for them. We never would have had the concrete on the Dixie Highway that we have, had it not been for their support. It cost money to run a newspaper, and the space that they have given to you demands your loyal support. Business men for advertisement, [Layman for subscription and when you have finished reading, wrap your papers up in a two cent envelope and send it to your friends, and let them see what we are doing in God's Country, and Charlevoix County.

In speaking of God's Country let me also ask you one and all to read the 8th chapter of Zachariah, for there you will learn the value of a good life, age, truth and love, and then try to improve our own selves, and to love our neighbor and to tell the truth. A Real Chapter. Let us all try to feel the divine energy of truth and love, and a good will toward all men, including the women and children, which will bring us into a new state of life, and no longer recognize selfishness, and jealousy or any other material power as able to build up our beautiful country.

Let us balance partners, join hands, all hands round, and then shake up.

Yours truly,
"UNCLE" GEORGE.

The Vital Spot

Sarcastic jests on a man's person or his manners, though hard to bear are perhaps more easily borne than those that touch his religion.—Benjamin Franklin.

ANNOUNCEMENT

The Charlevoix Sentinel: July 19, 1926

Dear Sirs—After due consideration of the matter, I have decided not to be a candidate for re-election for the office of County Clerk.

Having been inside continuously, caring for the offices of County Treasurer and County Clerk the past eight years, I feel that I should have a change and be outside more.

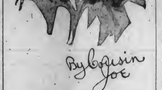
I am surely greatly indebted to my many friends who have made it possible for me to enter politics and remain in the Court House the past eight years and I assure these friends that I have attempted to conduct the offices under my supervision with justice to the patrons and to our county. Respectfully submitted,

CHARLES H. EMREY,
County Clerk.

Why I'm going to the Greater MICHIGAN STATE FAIR

THE BIGGEST THRILL IN SOME TIME

In the first place, I'm always ready for a little change around about September. And I just jump into my flivver and point her for the State Fair Detroitway. Been doing it for 17 years and going to do it again this September. Last year I got the thrill of my life. The stunningest girl kept looking at me, and I kept wondering who she was and where I'd seen her before. Finally she said, "Joe, don't you recognize me, in this new dress I got down town at noon?" Dog-gonned if it weren't my wife!



PROGRESS OF THE GREATER MICHIGAN STATE FAIR

Construction work is progressing rapidly on the New Agricultural Building which will be completed in time for this year's Fair, Sept. 6th to 11th. It will be the finest structure of its kind in the country and devoted exclusively to the display of flowers, fruits and agricultural products.

Michigan State Fair 1926

STATE OF MICHIGAN—The Circuit Court for the County of Charlevoix — In Chancery.

William J. Gallagher, Plaintiff,
vs.
Samuel Shaw and his Unknown Heirs, Devisees, Legatees or Assigns, Defendant.

Suit pending in the Circuit Court for the County of Charlevoix, in Chancery, at the City of Charlevoix, in said county, on the 22nd day of June, A. D. 1926.

In this case it appearing from affidavit on file that the defendant Samuel Shaw is not a resident of this state, and that it is not known in what state or country he resides, and that the names and residence of his heirs, devisees, legatees or assigns are unknown.

On motion of A. L. Fitch, attorney for the said plaintiff, it is ordered that the said Samuel Shaw, de endant and his unknown heirs, devisees, legatees and assigns, cause their appearance to be entered in this cause within three months from the date of this order; and in case of their appearance they cause their answer to the plaintiff's bill of complaint to be filed, and a copy served on said attorney for the plaintiff within fifteen days after service on said defendants of a copy of said bill and notice of this order, and that in default thereof said bill be taken as confessed against said defendants.

And it is further ordered, that within forty days the plaintiff cause notice of this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in said county, and that publication be continued therein at least once in each week for six weeks in succession and that said plaintiff cause a copy of this order to be mailed to said defendants at their last known postoffice address by registered mail with postage thereon fully prepaid and demand a return receipt therefor, or that plaintiff cause a copy of this order to be served on said defendants personally at least twenty days before the time herein prescribed for the appearance of said defendants.

Said bill of complaint is filed to quiet title to the following described parcel of land situate in the Township of St. James, in said county, namely: Lot one of Section 23, Town 39 north, Range 10 west.

PARM G. GILBERT,
Circuit Judge.
ARTHUR L. FITCH,
Attorney for Plaintiff.
Business Address—
Charlevoix, Michigan.

ONLY WOMAN RULER IN INDIA RESIGNS

Begum of Bhopal Turns Job Over to Son.

London.—India's only woman ruler, her highness the begum of Bhopal, has abdicated her throne in favor of her son, Nawab Zada Hamidulla. For a long time she had contended for the Islamic right to name her successor, who under ordinary procedure should have been, the son of her deceased eldest son, Nawab Nasrulla Khan. The British government finally acceded to her desires.

The abdication of the begum brings to an end 25 years of female rule in the little state of central India of 6,902 square miles with a population of about 700,000. She had ruled Bhopal with vigor and statesmanship.

Although now sixty-eight years old, she still is mentally and physically vigorous. Nevertheless she had long wished to see her only son established as her successor before her powers failed her.

Accordingly, she came to London last September with her son and his three young daughters to arrange matters with the British government. The successful dispatch of the special arrangement lay in the fact that two elder sons, both of whom died in 1924, left sons, and the eldest son of her eldest son stood next in line of succession, according to the laws of primogeniture.

Nawab Zada Hamidulla is now thirty-one years old. He has been trained in statesmanship under his mother's direction. He was on the staff of the prince of Wales during the prince's recent visit to India and also served in the World war. He has a splendid reputation.

It is understood that if the government had not granted the begum's request to name her successor she would have insisted on the throne rather than turn over the rule of Bhopal to a minor. Having succeeded in her point she retires happily from the cares of government. She is still in England with her family, but will return to India.

The begum always has had the highest regard for peace at heart, and is beloved by them. She adheres strictly to the rule of Islam, calling for women to conceal their faces.

Carrying It Too Far

Judge Xenophon Hicks of Knoxville said in criticism of a foolish antidote reminder:

"These people carry the thing too far. They remind me of a contractor who was hired to build for a medical college a storage room where the bodies, or corpses for dissection, could be kept.

"Well, when the dean of the college went to inspect the contractor's work he gave a start of surprise and said:

"'How is this, sir? You put only two rooms for our cadavers. I only ordered one.'

"'I know you only ordered one, but I built two, of course, said the contractor stiffly. 'Decency, doctor, decency.' The sexes must be kept apart.'"

STATE FAIR ADDS CLASS FOR BEST MICHIGAN FLEECES

A new department will have an exhibit at the Michigan State Fair to be held at the State Fair Grounds in Detroit from September 5 to September 11.

This is the Wool Department which will be housed in the Sheep Building. In previous years, there has been no wool exhibit, and although Michigan ranks among the largest wool-producing states in the country, the proper prominence to wool has not been given.

Sheep growers of the state are being asked to save their best fleeces to exhibit at the Fair. Competent judges are being secured who are thoroughly cognizant with all the factors to be taken into consideration in judging wool, and sheep growers of the state may rest assured that although new, this department will be carried out with the same care which is given to the older departments of the Michigan State Fair.

OWL A BENEFACTOR TO EVERY FARMER

While Rat Is Designated as Greatest Enemy.

If the owner of a poultry house were to find an owl and a rat snooping around the premises the chances are that he would shoot the owl, if possible, and would let the rat go free. Economically, that would be half backward for the owl, in spite of the fact that, now and then, it may rob the poultry house, is really a benefactor of man, while the rat is a constant menace, says the Indianapolis News.

Rats destroy more eggs, chickens and game, to say nothing of grain, than all other mammals combined. The persistent killing of carnivorous birds and mammals has been an important factor in the increase of rodents.

Owls, hawks, snakes, skunks, foxes, coyotes, weasels, minks, ferrets, dogs and cats are natural enemies of the rodent. While haunting the barnyard the owl, the snake or the skunk may be watching for the chance of profit. The term rats includes mice as well, for the latter are rats of a small size.

Barring insect pests, the rat is the farmer's greatest enemy. He destroys his fields, his granary and his poultry house. Working in the dark and in hidden places he is master of the situations is never fully realized. Being so common its operations are taken too much as a matter of course. The farmer and the poultry raiser are not the only ones who suffer from the rat menace. The loathsome rodents invade stores, destroying food, silks, carpets, laces and flowers; in markets they eat fruit, vegetables and meat; in buildings they gnaw doors and lead pipes and damage doors, foundations and flooring; they burrow under embankments and the banks of artificial lakes, weakening them; they overrun piers, wharves and sea-going vessels. Government experts in 1919 estimated that in the United States the losses due to rat depredations amounted to more than $167,000,000.

Being extremely filthy rats pollute more food and merchandise than they destroy. They are carriers of disease and spread the plague, both bubonic and pneumonic. They are susceptible to epidemic diseases and to poisons, parasites and leprosy. They harbor parasites and it is said that they may bring typhoid germs from cesspools to food prepared for human consumption. Because of its cunning, intelligence and cautiousness the rat persists in spite of continuous warfare.

His Ignorance

"Whilst I was in town day before yesterday," related Gap Johnson of Rumpus Ridge, "a feller, stranger to me, that 'peared to have taken two or three drinks, came into the post office whur I was standing, and started to open his box. He had his key chained to his pants, and the chain wasn't long enough to let him reach the key up to the box, which was pretty high. He struggled and cussed for a few minutes, but didn't seem to know how to get the chain loose from his pants. Finally he began to unbuckle his belt, and then—"

"Good gosh!" cried Old Man Stabley. "You don't mean to say he took off his pants, unbuckled the box, and then put 'em on ag'in, do you?"

"I don't the slightest idy. A feller tackled me just then for a dog swap; and he went outside, and I didn't notice."—Kansas City Times.

Mirrors for Macaroni

By using mirrors to supplement the sun in drying macaroni, manufacturers of the product have found the color to be more satisfactorily preserved since the deep yellow that is not bleached so easily, and the flavor also is said to be improved. The process is quicker than sun bleaching.

Tennis Courts are Crowded — Long List Contestants

Tennis courts at the Inn are filled to capacity this week with a large list of players in attendance with many champions contending for honors at the biggest event of its kind ever staged in Northern Michigan.

There are several players, nationally known, entered in this contest which continues throughout the week, others of lesser note, but recognized as expert players and in this latter list are several locals that are good amateurs, ranking well up toward the sectional championship class, all making for good contenders and lively antagonists for opponents. Several players were eliminated during the first few games and the same process will continue throughout the tournament.

The games are attracting wide attention, visitors being present who reside at considerable distance from the district. It is probable that some of the finals will be played next Sunday.

OLD NEGRO SINGING NOW SELDOM HEARD

Lovers of Music Keenly Regret Its Passing.

Some of the most cherished traditions of the old South are fast being lost by the new South. The "spiritual" and minstrel show harmony in the old plantation songs of the negro are fast becoming extinct. Industrial progress is blamed by music critics for this and other changed conditions among the negro race.

The large plantations of the South were once the homes of the chief negro musicians. Now the best musicians of that race, it is pointed out, are to be found in the large cities and centers of population, and many of these have acquired cultural attainments which have detracted from the old songs. One must go far into the state of Alabama now to find negro singing that even approximates the harmony that once existed over the entire South.

Tuskegee Institute is making a big effort to preserve and retain the old negro songs. That institute is trying to preserve to both the white and negro race the quaint songs originated by the first negro singers. During the past school year its glee club presented interpretations of negro songs of other days which were acclaimed as an unfairly perfect as reproduction could be made. Fisk and Hampton, other famous negro schools, have also given serious endeavor along similar lines.

It is claimed that one who has never heard the "cotton-patch harmony" cannot appreciate what it would mean to music lovers if this art should pass. Music critics have traveled far to hear negro harmony in its original setting. They claim that fifty negroes of varied ages in a cotton field are capable of producing an impromptu program of song, chant, whistling and chatter that can be found nowhere else on earth.

A true negro song is one that was never written. They do not have to know a song to join in with their fellows in singing it. Each farm group has a leader, usually a man, the rest follow in. The same song may be sung for an hour or all day, but it never grows monotonous because of its variations. Some negro singers can ring in more notes than have ever been written in the staff. They sing in major, minor and unknown "keys." There are no precedents for what they sing. But no matter what they sing there is nearly always an indescribable rhythm, swing and motion in it which, according to one critic, is as harmonious as the flow of a mountain brook." The ordinary negro singers know nothing of written music, but they know harmony.—Pathfinder Magazine.

THE BUSIEST MAN

Sheriff Kept on the Jump—Has Recovered Stolen Goods

Just about the busiest place in Charlevoix is the county jail and about the busiest and hardest worked man in the county is Sheriff Novak, who is on duty day and night spending most of the time answering calls and making trips of investigation, in most cases producing results; no small part of his work being in connection with finding stolen automobiles and accessories, and in this the sheriff has been very successful.

As a result of Sheriff Novak's activities he has during the past week recovered something like a dozen stolen outer casings, inner tubes, several mounted rims, complete wheels, a number of rugs, robes, goods, a quantity of tires, one high grade radio outfit, a lot of miscellaneous tools, one or two automobiles and in most instances has located the owners of the stolen articles, returned or has them ready to deliver, and in this the owners are widely distributed over the state.

As a result of Sheriff Novak's activities he has during the past week recovered something like a dozen stolen outer casings, inner tubes, several mounted rims, complete wheels, a number of rugs, robes, goods, a quantity of tires, one high grade radio outfit, a lot of miscellaneous tools, one or two automobiles and in most instances has located the owners of the stolen articles, returned or has them ready to deliver, and in this the owners are widely distributed over the state."

At a Tuesday afternoon he recovered an automobile—a Buick coach—that had been stolen at Traverse City, and as he was driving north on Bridge street, in which three young men were riding. They gave their names as Albert Fabiana, 17 years of age, Roy Bolan 17, and Burt Brown 18, and claim Lansing as their residence. The three young men make no denial of their guilt and in fact admit taking the machine. The reason given that "they wanted to take a trip," and their desire in this regard probably will be fully gratified when the case is proven in court.

Sheriff Novak informs us that a Chrysler car was recently stolen in Lansing and that the trio is wanted to answer to this charge. The men however claim that they are not guilty of the offense committed in their home city and have no knowledge of the Chrysler car. Also a Ford sedan stolen at Grand Rapids has been found in their possession.

Monday night a Buick sedan was taken from the front of a local residence, ran out near Boulder Park and partly stripped but the appearance of an officer who commenced shooting frightened the culprits from the machine before they had made much progress with their nefarious operations.

THE INDIAN PICNIC

Many Gather Despite Rainy Weather Conditions at that Time

Weather conditions last Wednesday and Thursday was not wholly favorable for the Indian picnic scheduled for two days at the Charlevoix Tourist Camp. The first day was for the most part rainy and disagreeable, so much so that but few visitors made their way to the camp ground and also more or less so to the indians and their families camping at the park of which there were a goodly number who came from widely divergent points.

Thursday showed some improvement in the weather conditions and as a result the park throughout the afternoon was crowded to full capacity, making for the largest number of people that have visited the tourist park since its first opening, a crowd made up of local citizens and visitors from a distance, some of whom were from the State of Michigan. No small proportion of the whole being aborigines.

Thursday afternoon and evening the tourist park held a great throng of people, in sufficient numbers to pack the entire grounds to full capacity, making for the largest gathering in the history of this favorite park.

Games, sports, athletic events, speaking and music all went toward featuring the picnic, while the beaded costumes worn by the Indians typifying the style of garments generally used by early aborigines, came in for a full share of admiration by visitors, with the several war bonnets worn by tribal chiefs attracted special attention.

Due to inclement weather conditions during the picnic days advertised, the program was extended one day, continued through Friday when extra war dances and other special features entered into the form of entertainment, all of which was pleasing to performers and visitors.

Peace, Goodwill

Columbia, Peace and the Spirit of Brotherly love have been joined in one person, a beautiful woman. This young lady was one of the central figures in a pageant staged at the Sesquicentennial International Exposition in Philadelphia, celebrating 150 years of American Independence. The Exposition continues until December 1.

Thorns Without the Rose.
Hell is sin with its pleasure gone and only the sting left.

COUNTY MEETING

Of W. C. T. U. was Held at Boyne City on Friday Last

The county meeting of the W. C. T. U. was held at Boyne City, Friday, Aug. 6. The county president, Mrs. A. Saltonstall, called the meeting to order; Miss Nettie Correll led in the singing.

A short memorial service was held in honor of Mrs. F. J. Weikle, Mrs. Nora Correll and Mrs. Jennie Alcox who have recently left us, and who are remembered for their long years of faithful service and companionship.

Mrs. Lockhoff, district president, gave a short talk and mentioned important matters in regard to the primary election. The report of the Union included silver medal contests; the organization of the National Prohibition Guards in the Sunday School; essay contests; a community banquet; Victory Day meeting; petitions to the governor; the schools and procured blotters for schools and hotels.

The county work will be carried on through a committee consisting of the presidents of the three unions with the secretary and treasurer, with the next annual meeting at Charlevoix.

A cooperative supper was enjoyed to which citizens of Boyne City and delegates and friends did ample justice. Rev. Pasiling of the Boyne M. E. church gave the speaker of the evening, and stressed the importance of all voters voting, quoting from President Coolidge's address to the Daughters of the American Revolution; who said: "The wholesystem of American government rests on the home and the schools." Citizens perform their duties there, such a system of government is doomed to failure."

Mrs. E. E. Gross referred to the proposed amendments to the state constitution, in particular the national state and county issues. It is significant that the work of the W. C. T. U. has gone into every county and organizations and will be carried on with such vigilence, that we believe, with others who took part, that in less than 30 years from now a wet representative or senator will be a curiosity.

Mrs. Scott and Mrs. Brown of Boyne City, also four young ladies, contributed to the pleasure of the evening with readings.

The assembly sang the closing song "God be with You Till we Meet Again," and all departed for their homes.—Secretary.

Sound Waves in Water Used to Fight Disease

Baltimore, Md.—Dr. H. W. Wood, professor of communal physics at Johns Hopkins university, makes public the results so far attained in the experiments conducted on the estate of Alfred L. Loomis, a New York banker, in Tuxedo, N. Y., with treatment of diseases by high-frequency sound waves sent through water. Mr. Loomis assisted in the experiments.

The possibility of applying the discovery to medicine is described as being found in the fact that circulation is greatly stimulated in any part of the body which is thrust into water in which the sound waves have been introduced.

Doctor Wood said that while the experiments had not gone far enough for him to claim that cures might be accomplished, it had been found that circulation could be tremendously stimulated and that a method for stimulating circulation without injury was valuable to medicine.

Indian Relics Sold to Museum at New York

Los Angeles.—Purchase by the museum of American Indians, New York city, of the A. B. Sanger collection of relics of Indian civilization in southern California was announced by Prof. M. R. Harrington of New York. The collection, described by Professor Harrington as the most complete in existence, consists of 1,350 stone implements, shell ornaments, beads, skeletons and other archeological specimens unearthed on Catalina and other channel islands and assembled here.

Experienced Men Rely on First Impressions

The banker learns soon that your face usually tells more than is told by your lips or your written statement, and this is something that you may very well remember. Your first impression, if it is one of suspicion, is usually correct. I doubt if any experienced teller will ever, cash a check for a stranger, no matter how well introduced, if this first glance at the man telegraphs to his brain "Look out! Be careful!" If he does, he usually regrets it.

I believe that when two persons meet for the first time eye telegraphs to eye. For one instant, and perhaps for one instant only, eye tells eye the truth, the hidden truth, and the absolute truth; then the lying begins, if it is to. This is, I believe, an animal impact purely, but always dependable.—Ellis Parker Butler, in Hearst's International-Cosmopolitan.

Annual Odd Fellow Picnic Thursday at Young State Park

The annual Odd Fellow picnic for Charlevoix county will be held at the Young State Park on Thursday, Aug. 19th, 1926. All Odd Fellows and Rebekahs and their families are expected to be there. It will be a basket picnic as usual, and coffee, milk and sugar will be furnished. There will be all kinds of sports for the winners of which suitable prizes will be awarded.

The following committees have been appointed and are working hard to make this one of the best picnics that has been held: Executive committee—E. E. Stroud chairman, Richard Lewis, Newton Jones, V. C. Ormsby.

Sports—W. D. Vought, chairman, Floyd Ikens, Harry Saxton, Wm. Schleider.

Refreshments—Fred Bergman chairman, Dana Shaier, Floyd Bartholomew, Bert Scott.

Publicity—Ed. J. Davis, Floyd Webster.

DIED SUDDENLY IN MILWAUKEE

Word was received by friends here last Saturday that John Chesney, 50-years of age, had passed away suddenly at his home in Milwaukee during the early hours of the day. The body was shipped to Charlevoix where it arrived on Monday afternoon accompanied by his wife and sister-in-law, Mrs. Frank Cheney.

He was born in this city about 20 years ago and resided here permanently until about seven years ago when he was transferred to Wisconsin to represent a wholesale house. Following this change he resided in Milwaukee, this being a central point for his work that of a traveling salesman.

He is survived by his wife, mother, Mrs. John C. Miller, three sisters Mrs. Fenton Gallagher, Mrs. Robert McDonald and Mrs. Louis Allard, the last four mentioned residents of Charlevoix; two brothers Frank of Milwaukee, and George of St. Louis, Mo.

Funeral service was held at St. Mary's church, Wednesday.

Poles Vary in Attraction

While the north magnetic pole attracts the north end of the needle and repels the south end, the south pole repels the north end and attracts the south end. This is true no matter in what part of the earth the needle is placed, and, there is no reversal of the needle when the magnetic equator is crossed.

Copper 5,000 Years Old

Copper vanity cases, a copper hand mirror, copper razors, tools, fishhooks and harpoons have just been found in Mesopotamia by scientists excavating the five thousand-year-old palace of the kings of Kish. Copper is truly the everlasting metal.

Friends and Enemies

Whatever the number of a man's friends, there will be times in his life, when he has one too few, but if he has only one enemy, he is lucky indeed if he has not one too many. —Hubert Lytton.

Two Fire Causes

Electric light wires hung over nails and oily rags thrown into a corner are two of the things which give the newspapers stories about "fires of unknown origin."

PARADE A FEATURE

Sparks Three-Ring Circus Coming to Petoskey August 23

Sparks circus, enlarged in every department this season, and carrying eight hundred people, five hundred horses, and the largest collection of trained wild animals in the world, is coming to Petoskey on Monday, August 23, giving the largest circus parade in the world at 11 a.m. daily. The name of Sparks Circus is a household word throughout America.

Among the outstanding features of Sparks Circus this season is the greatest Liberty horse act in the world—the famous Sparks Rotation Horses, 16 in number. No show before the public today has finer groups of wild animals than those carried by Sparks circus this season. The three herds of elephants include a group of baby elephants, two of the herds being handled by ladies.

Among the arenic stars are the famous human cannon balers, Riding Rooneys, from the New York Hippodrome; the Aerial Gulees; Tom and Betty Warren, aerial iron artists; Sonny Brothers and the Sells-Trio, Comedy acrobatic act; Flora Redid, and a score of other daly notables.

The three score clowns are headed by Paul Weinzel, the man who has originated more laughable "walk arounds" than any "Joey" in the world. The closing feature is the mammoth historical pageant, "The Flag of America,"—written by Prof. Del Vacho. Among the seven hundred human participants is a group of Sioux Indians, permission for them to appearon tour with the Sparks circus having been granted by the government.

For the convenience of patrons seats may be secured circus day at up-town ticket office at the same price as at the show grounds. Don't forget the date, Monday, August 23 at Petoskey.

Of all evil things, money with wings is the worst

Energetic Swiss
Every available piece of land in Switzerland is put to use. In places there are ten miles long of continuous hillsteads and terraces which sustain garden patches, where vines and plants are grown. Of the 2,882 kilometers of Swiss federal railways, 800 are now converted to electrical use, including the Simplon and St. Gotthard tunnel line. In 1928 Swiss railway authorities hope to have 1,500 kilometers converted to electric use.

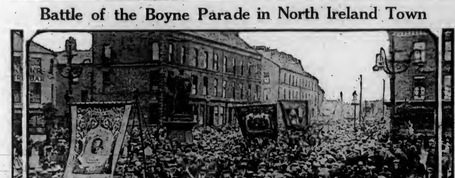
Switzerland is very rapidly developing hydroelectric energy and in a short time will have surplus to sell to Germany, France and Italy. The country around Lake Geneva is very like the high Sierra country in California, with mountains of 3,000 to 5,000 feet altitude climbing up from the lake level and cross covered with timber and rock.—M. M. O'Shaughnessy, in the American City.

Still Explaining
Dan and Sam, two boys of the seventh grade in a North side Indianapolis public school, look a good deal alike. The teacher started to call on Dan to answer a question the other day, but before she had pronounced the final consonant of the boy's name, she realized it was Sam and not Dan she was addressing. Whereupon she flubbed with the final consonant in the name of Sam. As her tone was clear and unmistakable, the class was thrown into a state of gloom consternation, and the teacher is still explaining.—Indianapolis News.

Flashlight Photograph Made at Night From Plane

Above is shown a remarkable aerial flashlight photograph of McCook field, Dayton, Ohio, taken from an elevation of 1,000 feet at night. The photograph was made by Lieutenant Goddard while the plane was being piloted by Lieutenant Brunner.

Battle of the Boyne Parade in North Ireland Town



Over in Ireland the Orangemen still celebrate the Battle of the Boyne every year on the anniversary of that historic contest in 1690. The photograph shows the procession in Belmont, northern Ireland.

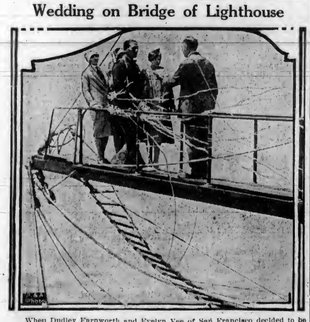
Helps Make Capital a Model City

Frederick Law Olmstead of Palos Verdes estates, California, third of a famous line of landscape architects, in the patio of his Spanish hacienda. He has been chosen by President Coolidge as the long-term member of the National Capital Park and Planning commission in Washington, D. C. The duty of the commission is to select land for park purposes and to supervise the building of highways and the development of residence suburbs, with the end in view of making the national capital a model city in every way.

LOS ANGELES BEAUTY

Miss Marcelin Arnold won the beauty contest at Los Angeles and will represent that city in the pageant at Atlantic City.

Wedding on Bridge of Lighthouse



When Dudley Farnworth and Evelyn Yee of San Francisco decided to be married, they wanted something solid, very solid, back of it all. "Mile Rock lighthouse," suggested the bride-to-be. "Solid enough," said the groom-to-be. So they were married on the "bridge" of the lighthouse and the photographer made this picture of the ceremony.

HAROLD P. SHELDON

Harold P. Sheldon, former fish and game commissioner of Vermont, who is now chief United States game warden of the bureau of biological survey.

OF INTEREST TO EVERYBODY

Torpedo fish give electric shocks to their enemies.

A baby wearing a new belt with wire legs can creep about floors, but cannot fall over while seated.

In the construction of a highway, stretching 287 miles across Japan, 231 bridges and 1,140 viaducts will be built.

Airplanes that can carry twenty-five persons and travel 900 miles without stopping have been developed in Italy.

A banana plant may grow 40 feet in a year.

The water ouzel is so fond of the water that it often builds its nest behind a waterfall.

Dust is carried by high winds from Australia to New Zealand, a distance of more than 1,200 miles.

More than 20,000 motor busses are being used to carry children in rural districts to and from school.

Insects Cause Big Grain Loss

Damage May Be Reduced by Early Harvesting and Prompt Fumigation.

(Prepared by the United States Department of Agriculture.)

It is best to harvest grain crops as soon as possible after maturity and to fumigate them promptly in order to kill any stored grain insects, says the United States Department of Agriculture. Farmers now suffer enormous losses from insect damage to grains. Farmers' Bulletin 1483-F, just issued, brings out many interesting facts relative to the cause and extent of insect infestation of grains.

Where Insects Develop.

The idea that insects develop from the germ of grain, although long since discredited, still persists among grain handlers and producers. The fact is, says the department, that grain often becomes infested with insects before it is harvested. The rice weevil and the Angoumois grain moth live over the winter in the grain bins. By to the near-by fields of ripening wheat and corn as these are nearing maturity, and lay eggs upon the wheat heads or corn kernels. These eggs hatch and the young pests burrow into the immature grain.

Illustrations are given in the bulletin of corn cribs designed to permit effective fumigation and instructions are given for their construction. The most successful grain fumigations are carried on at temperatures ranging from 75 degrees to 95 degrees Fahrenheit.

Other Facts Noted.

The new publication also discusses the fumigation of grain with heavier-than-air gases, effect of fumigation on the germination of seed, boring grain, and other related topics. A copy of the bulletin may be obtained free, as long as the supply lasts, by writing to the United States Department of Agriculture, Washington, D. C.

For Success With Flock Don't Let Chicks Crowd

Many troubles which beset the growing stock may be warded off by preventing the chicks from crowding, say poultry authorities at the New Jersey State College of Agriculture.

The situation becomes more and more serious as the birds increase in size. Many birds showing stunted growth and unkempt feathers fail to grow simply because of lack of room and not because of any particular disease or deficiency in the ration.

The damage is done at night. One may have a relatively small number of birds in a house and feel that they have ample room, but if these few persist in crowding on the floor the resulting damage may be as great as if the house were actually overcrowded with stock.

The thing to do is to get the birds in the habit of roosting as soon as possible. When on the roosts they must line up in single file with plenty of air circulation on all sides. Care must be taken, of course, that the stock shall not get chilled. This means that the house should be kept around 60 or 70 degrees. If one has difficulty in teaching the birds to roost it may be necessary to tack one-inch mesh wire netting under the roosts and from the front roosting stick to the floor. The birds may then be forced up the wire about dusk and in a few days will go up of their own accord. Get them on the roosts. It pays.

Study of Coöperative Live-Stock Marketing

A study of co-operative live stock marketing associations, including the organization, operating methods and problems of local shipping associations as well as terminal co-operative commission firms at central markets, is being made by the United States Department of Agriculture. Questionnaires have been sent to managers of local co-operative live stock associations and to boards of directors of the terminal co-operative live stock commission firms, and the information thus furnished by them is being supplemented by detailed analysis and study of the business set-up and records of the larger associations.

To date more than 90 shipping associations and many directors of co-operative sales agencies have sent much valuable information, and the various live stock marketing groups seem to be greatly interested in the investigation.

Control Currant Worms

Currant worms which have proved a pest in many communities can be controlled here by spraying the currant bushes with arsenate of lead at the rate of two pounds to fifty gallons of water. The currant bushes should be watched closely for signs of this pest for the caterpillars eat very rapidly and begin from the inside of the bush and out outward.

Worms Are Menace

Worms in chickens are a good deal more serious than is ordinarily realized. This is particularly true when chickens have been kept on the same ground for several seasons. Worms have the same effect on chickens as they do in hogs, causing unthrifty condition and lack of vitality. The one great remedy for intestinal worms in any kind of animal is santonin, which has been used successfully for a great many years. Prevent the parasites by keeping the yards clean.

Mistake with Strawberries

A common mistake made by strawberry growers is allowing the patch to persist for too many years. A commercial patch should produce not more than two crops and a home patch not more than three or four. A patch that has reached this stage should be plowed or spaded up after the season's harvest is over and the soil put to other use for two or three years, when it can again be planted to strawberries and more profitable crops obtained.

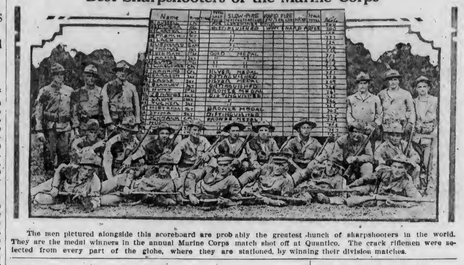
Inventions of Women

Patent office records show that woman inventors keep mainly to improvements in domestic articles, though in recent years there have been some notable mechanical inventions by women.

Rabbits Need Water

Tame rabbits are commonly kept without water, but they may be seen licking the bars of their hutch after a shower, and drink eagerly when they have the chance.

Best Sharpshooters of the Marine Corps



The men pictured alongside this scoreboard are probably the greatest bunch of sharpshooters in the world. They are the medal winners in the annual Marine Corps match shot off at Quantico. The crack riflemen were selected from every part of the globe, where they are stationed, by winning their division matches.

Foreign Travel Holds Surprises

Americans on First Trip Abroad Find Hotel and Train Customs Different.

New York.—Americans contemplating a first trip abroad are particularly interested in all the hints they can obtain on differences in rail travel and hotel customs abroad, said a representative of the American Express company recently, when asked for some general information on baggage and other items connected with travel. Seasoned travelers know all these things, but each year produces a brand new crop of visitors to Europe who have to get this information. Not only are customs different, but common everyday things go by different names, he pointed out, and this applies not only to countries where foreign languages are spoken, but to England, where a street car is called a tram, "curb" is spelled "kerb," and a "check" is "cheque," and that the latter has to bear a revenue stamp.

Division of service on trains into classes, since many years unknown in America, is universal in Europe. In most countries there are three classes, and in some four. First class is everywhere used only by the very rich—and by Americans. Second class has practically disappeared in England (on account of the excellence of third class), except on a few trains connecting with boats for the Continent, on which services there is a demand for second class all the way through. The almost universal habit among well-informed Americans, he said, is to travel third class in England and second in most of Europe, going first perhaps in Spain and Portugal. Where fourth class is found the seats are seldom upholstered.

In most countries circular tickets (like our present railroad books) good for a certain amount of travel anywhere over certain lines or within the country, may be obtained. In some, reduced rates obtain for trips of more than a certain length; in others, tickets good for unlimited travel for a certain number of days may be obtained at a flat price.

Ticket Examination.

Throughout Europe tickets are invariably examined on entering the train platform or boarding the train, and must usually be retained and surrendered at destination.

Time tables, it was said, are not freely distributed in Europe, and it is sometimes difficult to obtain information about connections even from the station agent. On most of the Continent the 24-hour clock is used, the hours from 1 p. m. to midnight being known as 13 to 24 o'clock. Trains are not commonly referred to by their numbers, as in America, and the story of the American who, with infinite pains had learned the number of the evening train is classic. "How do you 15 running this evening?" he asked the station agent. "The 7:43 is reported on time, sir," replied the infallible Britisher.

The fact that European coaches are divided into compartments is known to most Americans. Originally these compartments ran all the way across the coaches from one side to the other, and access from one compartment to the next was only by opening the door and swinging along an outside running board. Such coaches are still to be found on local runs, and are practically universal in rural districts, but on through runs on the Continent they have been superseded by corridor-and-vestibule cars. The compartments open at one side directly out of doors, but on the other into the corridor, which runs along one side of the coach.

Reserved Seats.

On European railways there are almost no separate coaches combining entirely of reserved seats, like the pullman cars in America. A few lines in England run pullman cars, and of course all compartments in sleeping cars are on reservation, but in general the above holds true. Instead, any seat, number of seats or compartments in an ordinary day coach may be reserved according to regulations, which vary in different countries.

Usually a small fee is required for reserving a seat, and in some countries, for instance in Italy, the reservation protects the seat only until a few minutes before the time of departure. After that the seat belongs to the one who gets there first. Throughout Europe it is the custom to require the marking of a seat in some manner when leaving it, for however short a time. A book, gloves or hat suffices. It is sometimes possible to obtain exclusive use of a compartment without taking quite all the seats therein.

For sleeping, first (and usually second) class passengers on payment of an additional amount have several sleeping cars much like the compartments in the newer American pullmans, where all bedding is supplied by the company. On other runs only "couchettes" are available, and the traveler must supply his own covering, if desired. This can usually be rented and turned over to a representative of the renter at the end of the run.

To Americans the total absence of drinking water on most trains (except, of course, in the dining cars) proves an inconvenience, but the natives provide themselves with bottles of mineral water, light wines or beer before leaving and do not seem to suffer in the least.

Table d'Hote on Diners.

Generally only table d'hote meals are served in dining cars. There are several sittings, tickets to which are issued by attendants, a convenience appreciated by Americans.

The amount of baggage carried free varies in different countries, as do the customs. In England most trains carry "luggage vans," or baggage cars, in which trunks and other heavy baggage may be carried, but in which there are no facilities for checking. On arrival at destination each passenger must claim his own trunk.

On most of the Continent only such baggage will be carried free as can be taken into one's compartment, and to be allowed in the compartment at all it must not exceed certain dimensions, so that it can go in the rack above one's head. All other baggage must be "registered," which means that it is carried checked in the baggage car much as in America, except that extra payment must be made.

The advice often encountered to carry only hand luggage is due to the fact that many trains do not carry baggage cars, so that if heavy articles are taken they must often be left behind to come by a later train. Contrary to the custom in America, it is usually the faster trains which do not carry luggage cars and the locals which do.

Sending Letters.

When it is definitely known at what hotels one will be, and on what dates, it is usually more convenient to have one's letters sent there. Otherwise it is best to use the foreign offices of some travel agency or firm. Friends should be warned that only to British possessions will 2 cents carry a letter; elsewhere the minimum charge is 5 cents. The American Express company, whose Paris office during the summer rush handles as many as 40,000 letters a day, finds that 10 per cent of all letters received for patrons carry insufficient postage.

Another thing which causes confusion is that no telegrams or letters can be sent collect, so that when it is expected that cables will arrive after one's departure a small deposit should be left at the address in care of which they will arrive to cover the cost of telegraphing them on.

Hotel customs do not differ greatly from those in this country. The "American plan" of operation is found far more frequently than in the land which give it birth. Many hotels now make a surcharge for service, and in many cities and some countries there are taxes on hotel bills. These items are not included in the prices quoted for accommodations, but are added to the total of the bill, so that if this is not taken into consideration the total is apt to be more than expected.

The hall porter, or "concierge," is an important individual and can do much to make one's stay pleasant.

Contrary to the usual impression, it is only in England that the traffic goes to the left. Elsewhere, when it has any noticeable predilection at all, it inclines to the right. Americans who have wondered at the incessant quawking of motor horns in Paris are informed that an ordinance requires bulb horns within the city limits.

Taxis are surprisingly cheap in Paris, and nowhere are they much dearer than in this country, in spite of the considerably higher price of gasoline.

Compared with America, there are, of course extremely few buildings which have elevators, and those which do often have queer customs. In many apartment houses the elevators will carry one up, but if one wishes to descend one must walk. In others, tenants may ride free, but visitors must pay. Servants are denied the use of the elevators in many places. In spite of cheaper labor and comparatively plenty of servants the automatic elevator is met with much more often than in this country.

European Subways.

Americans who use the European subways are surprised to find first and second-class coaches and smoking cars, with different rates and different tickets for the different classes. In London the rates vary with the distance traveled, and the tickets bear the names of starting point and destination. On the Continent a flat fare is more common. There is no surcellpance to see that a traveler with a second-class ticket doesn't get into a first-class coach, but occasionally inspectors come through who mildly collect the additional sum from delinquents.

On some lines season tickets are sold, good for an unlimited number of trips during the period named. As everywhere, the tickets must be shown at the entrance, where they are punched and surrendered at the exit.

In London most of the subways—"tubes," they are called—run underground, and so elevators from the train platforms discharge the passengers into shop-lined arcades through which they reach the street. Some of the Paris subways were built by English companies, and consequently the trains run to the left.

Verses to Cupid Cost Husband, 65, $4,000

New York.—Verses written by George Washington Becket 25 years ago to the woman who is now his wife were read in the Kings county Supreme court and Becket admitted he recently used them again at the age of sixty-five, but on Mrs. John E. Norton, who is now twenty-five.

The jury then found Becket guilty of doing $4,000 damage to Norton through alienating Mrs. Norton's affections, as charged "with gifts, automobile rides and poems of passion."

AUSTRIAN STILL TALKS AND SINGS MINUS LARYNX

Surgeon in Vienna Clinic Trains Muscles of Throat to Perform Duties of Lost Glottis.

Vienna.—A man without a larynx, who speaks and sings, was presented at the last meeting of the Society of Physicians by Dr. Hugo Stern of the laryngological clinic in Vienna.

Ignaz Schgerli, fifty-seven years old, an artisan in St. Andrae, in Nether Austria, had a malignant growth in his larynx which necessitated the removal of the entire organ. The operation, carried out by Prof. Marcus Hajek, was a success, and Dr. Hugo Stern undertook to restore to the patient his faculty of speaking by a new method.

In former years the surgeons used to replace the natural larynx by an artificial one of metal, but the experiments made with these substitutes were not satisfactory. Doctor Stern has worked out a plan by which certain muscles in the lower section of the throat are trained to become a sort of pseudo glottis.

The new method has been applied to a number of cases, and if never has failed to have some success, although the results have varied and the facility of modulation has not always been the same. The best cures have given pressure voices very near the normal, but without enabling them to sing. Schenck, however, can sing two octaves quite correctly, although with a somewhat harsh timbre. In ordinary talk he has reached such perfection that the listener does not notice anything abnormal.

Doctor Stern, who now is endeavoring to perfect his treatment, believes that close investigation of his cases will lead to a change of the present notions regarding the physiological conditions for the modulation of the pitch of the human voice.

China's First Inhabitants Probably Not Mongolians

Madrid.—The first inhabitants of Indo-China were probably not Chinamen or any of their Mongolian relations. Important new facts about the dark past of this corner of the Far East are coming to light as a result of the investigations of the geological service of Indo-China.

At the international geological congress held here, it is reported that human remains unearthed in this region indicate a succession of prehistoric races linking the two peninsula that show relations to the early forerunners of the Malays, Australian aborigines and Polynesians. Further study of these finds, say geologists, may yield important information concerning the origin and distribution of the different races of the Far East.

Irish Flappers

New York.—Ireland has flappers, like every other country, but they don't smoke or drink or use powder or paint. So says Father Eugene McCarthy, rector of St. Paul's, Dublin.

WEIGHED ONLY 98 POUNDS

Helped by Lydia E. Pinkham's Vegetable Compound

Cleveland, Ohio.—"I have really had all kinds of trouble. After having my first baby, I lost weight, no matter what I did. Then a doctor told me I would be better if I had another baby, which I did. But I lost more, was always sickly and went down to 98 pounds. My neighbor told me about Lydia E. Pinkham's Vegetable Compound, as it helped her very much; so I tried it. After taking four bottles, I weigh 116 pounds. It has just done wonders for me and I can do my housework now without one bit of trouble."—Mrs. M. Rivkovsen, 10004 Nelson Ave., Cleveland, Ohio.

If some good fairy should appear and offer to grant your heart's desire, what would you choose?

Wealth? It's a transient thing that brings it's own cares.

Happiness? It's an elusive thing which we keep by giving away.

Health? That's the best gift. Health is riches that gold cannot buy and surely health is cause enough for happiness.

Lydia E. Pinkham's Vegetable Compound may be the good fairy who offers you the priceless gift of better health.

German Women's Auto Club

Society women in Potsdam, the former capital of the Hohenzollerns, have organized the first women's automobile club in Germany. There are ten charter members. The only qualification for membership is possession of a driver's license. There is no danger of the club's losing its exclusiveness, however, as none but wealthy own automobiles and women drivers still are rare in Germany.

A woman's intuition is more powerful than a man's knowledge.

Lots of things he doesn't want come to the man who is impatient.

Announcement for Congress.

I am now serving my sixth term in the employ of the people of this District as their Congressman. During that time I have served every section of the District with no thot of partisanship or partiality. My duty and obligation has been to the entire District as a whole. I am anxious to continue and trust my services merit your approval of my remaining in your employ.

Those who are opposing my renomination have never attacked the character of service or the manner in which I have handled your work. If they wish you to dismiss me they should be fair and honest enough to openly assign their reasons in order that I may have an opportunity to defend my conduct, and you the opportunity to judge as to the contested qualifications of those who seek your favorable consideration.

I have very deeply appreciated your kindness in the past and have been faithful to your trust. No living soul can honestly challenge the assertion of my fidelity to this District. The fact that I am the only member of the Michigan Congressional Delegation who is chairman of a major committee in the Congress, and the further fact that I am one of the only two Michigan Congressmen who have held the chairmanship of a major committee in more than a quarter of a century, is but one indication of my endeavor to honor my constituency and occupy a position in the Congress befitting the importance of our District and the high standard of its citizenship. If my efforts and the experience I have gained, is of value to the citizens of this District I trust I may not be dismissed from your service in order that one man's personal ambitions may be gratified and political honor, at your expense, added to the accumulated return of his bank and other varied interests.

My opponent has been campaigning this District for many months but your work has kept me in Washington. It will be impossible to cover the District in the short time remaining before the primary election. I therefore trust that this announcement of my candidacy will be considered by each citizen as a personal appeal for their approval of my service and the privilege of continuing in their employ.

Resident of Charlevoix County for fifty years.

role is considered his finest. "The Only Way" comes to the Majestic theatre next Tuesday and Wednesday.

For the first time since Douglas Fairbanks has been in motion pictures he has produced a photoplay in which only two women appear. It is "The Black Pirate" to be shown at the Palace theatre, next Thursday, Friday and Saturday, August 19-20-21. The fact that only two feminine players appear is accounted for by the nature of the story which is romantic in the extreme. "The Black Pirate" is a rip-roaring tale of the sea, reflecting the spirit of the Seventeenth Century piracy, and in consequence is dominated by men, but the adventure of the star is a rapid fire love affair.

Keeps Tab on Autos

Albert Lyon, whose hobby is counting automobiles that pass his home at Berwick, Pa., expects this year to pass the 1,000,000 mark. He began counting in 1913, and all his spare time has since been devoted to that work, with the result that he is now well past the 800,000 mark. In 1924 he put into use a specially made counting device. With this, the first 100,000 was completed in 251 hours of counting time, the second block of 100,000 in 215 hours and 40 minutes, the third in 200 hours and 15 minutes, and the fourth 100,000 in 190 hours and 30 minutes. Traffic passing his home in both directions is counted, but motorcycles are not included.

Ape Commits Suicide

Because the little girl who always brought bananas to Timothy left for California, grief-stricken Jiggs, a black ape on the Benson wild animal farm at Hudson, N. H., committed suicide by hanging himself. When the girl, Janet McDonald, twelve, daughter of the homekeeper on the farm, made the animal good-by both she and the ape cried. Shortly after the girl had gone an attendant found Jiggs hanging by his collar from a beam in one of the bird cages.

F. E. CARTIER, Tailor

Mr. Business Man!

What About Your Profits?

Are many of them represented on your books as dormant or dead accounts? Are you usually charging off these bad accounts as uncollectable? If so, are you not causing yourself an unnecessary loss? Isn't it, after all, the one and only unpleasant feature of your business?

The Freeman Mercantile Agency is a bonded establishment, operated efficiently under the laws of the state. It is an institution, however, that has representatives scattered over Northern Michigan, able to give personal service to every call.

We wish to stress the "personal" element of our service. All calls within a radius of a hundred miles of Traverse City are made by personal representatives of this agency. Our collection efforts are not confined to letter writing. Our business is EXCLUSIVELY a collection business.

If you have bad accounts, turn them over to us. If it is humanely possible to collect these accounts, we will do it. Our collection fees are standard. Where no collection is made, no service fee is charged. Our commission is exacted only where satisfactory results are obtained

Look over your old accounts. List the questionable, or dormant ones. Do not charge them off until you have given us a chance to prove what can be done with them

FREEMAN MERCANTILE AGENCY

Attractions for Coming Week

At New Palace Theatre

Sunday-Monday, Aug. 15-16—

Jack Holt, Ernest Torrance, Esther Ralston and Louise Dresser in "The Blind Goddess." A mystery thriller, disclosing the hidden motive which may animate those whose business it is to prosecute crime—the weakness and fallibility of judges, jurors, witnesses and circumstantial evidence. Educational comedy "Fool's Luck." Extra Monday—Felix the Cat in "Blunderland."

Tuesday, August 17th—

One day only, "His People," with Rudolph Schildkraut and a notable cast. The "Alien Irish Rose" of the screen. Not a fairy story but a human document. Not whipped cream fantasy but the honest bread of life. "His People" the best father and son story ever told on any screen. Extra—Educational comedy, "Scared Stiff" and Felix the Cat in "Blunderland."

Wednesday, Aug. 18th—

One day only. Johnny Hines in "The Brown Derby." The whizziest, dizziest, fastest marathon of mirth ever run over the full distance of six reels; crammed full of grin fizzes. Extra—Pathe comedy, "Scared Stiff," and Fox News Reel.

Thursday-Friday-Saturday, Aug. 19-20-21—

Douglas Fairbanks in "The Black Pirate." The most appealing, romantic and adventurous role Doug ever pranced through. Pirates! Buried treasure! Romance! A vivid yarn of the rolling ocean. Lusty! It carries the colorful spirit of bold adventure, conquest and love. The love story of a bold Buccaneer. Second showing of this big picture by popular demand. Extra—Thursday, Fox News Reel. Friday and Saturday, Educational comedy, "Nothing Matters."

—MAJESTIC THEATRE—

Saturday-Sunday, Aug. 14-15—

"The Johnstown Flood" with Geo. O'Brien, Florence Gilbert and Jane Gaynor. Breathless heroism, heartrending suffering, miraculous escapes and daring adventure mingle in a good drama of history's most appaling disaster. A big special picture. Extra—Educational comedy "Broken China."

Tuesday-Wednesday, Aug. 17-18—

"The Only Way," with Martin Harvey. Thrills with human interest, bristling with situations, tense ordeals, and the nobility of manhood dedicated to a sacred love. The immortal story of Dickens' optimism that illuminated the grim Reign of Terror. Extra—Educational comedy, "Papa's Pests."

May Restore Old Theater

The theater of Marcellus is a famous ruin in Rome. The theater was commenced by Julius Cesaar and completed by Augustus, by whom it was dedicated to Marcellus in 13 B. C. It had a seating capacity of 30,000, and resembled in its exterior the Colosseum, which was probably modeled after it. The theater of Marcellus was everywhere injured and rapidly stored during the empire, and in 1080 was converted into a fortress. In 1720 it came into the possession of the Savelli family, which retained it until their extinction in 1712, when it was purchased by the Orsini family, the present owners. Little of the original building remains, except the arcades which are now used as shops. The restoration of the theater of Marcellus is one of the projects of Mussolini, who has announced his purpose of restoring Rome to the grandeur it once knew.—Kansas City Star.

Shoes and Cars

One of the latest accusations against the automobile comes from the shoe trade. Makers of shoes say that the proportional decline in the shoe business since the war is due largely to the increased use of the automobile. Especially noticeable is this decline in the rural districts, where the people formerly walked short distances rather than hitch up the team. Now a car ready at the door takes them to the village or the city. Then, too, the farmer often walked beside his horses when big loads were hauled. The man or woman who did not have "work" shoes and also "Sunday" shoes was scarce. Now the farmer finds that one pair at a time does him quite well.

The New Moralists

William Lyon Phelps, the noted critic, said at a reception in New Haven:

"Our new school of psychoanalytic novelists champion everybody except the virtuous and hard-working. The bad, according to these fad-followers, are better than the good.

"Their reasoning reminds me of an anecdote. A chap fell on the bark of his head. When he got up he growled:

"'I think a full-grown man who throws a banana skin on the pavement is a skunk.'

"'Ah,' said another chap, 'but what do you think of a banana skin that throws a full-grown man on the pavement?'"

Australia Holds Record

Melbourne, Australia, asserts it has one of the busiest railway stations in the world in the Flinders street terminal, through which 300,000 persons pass daily. Believing London stations could show bigger figures, the British Railway Gazette checked the daily flow of passengers through London's largest stations, Liverpool street and Waterloo, but found the total at the former was only 244,836.—New York Herald Tribune.

Women Architects

Nine women are enrolled in a course of straight architecture at the University of Illinois. The course is of four years and leads to a degree of bachelor of science. They have the same curricula as the men and are required to do the same work. Instructors in the class say there is great opportunity for women in architecture, especially along domestic lines.

—PERSONALS—

Dr. Hugh W. Dickie, of East Jordan, is a visitor here today.

Chester Maltby, of Bellaire, spent last Friday here on business.

Paul Winder spent some time last week with friends at St. James.

Garrett Cole, of Nomad, spent the early part of the week here on business.

Mrs. J. R. Durgan, of Petoskey, spent Tuesday with friends in this city.

N. R. Torey, of Cadillac, spent the early part of the week in this city on business.

Messrs. Al. Carr and Lafayette Bush, of Bellaire, were Charlevoix visitors last Wednesday.

Mr. Charles Gale spent Tuesday at St. James in the interest of the Charlevoix Hardware Company.

Mr. and Mrs. L. D. Coulter, of Detroit, are visiting relatives and friends in Charlevoix this week.

Nels Lafrenière after spending a day or two here on business returned to his home, St. James, last Saturday.

Mrs. Henry Partridge, for about one month with relatives in Detroit, returned to Charlevoix last Friday.

Joseph Horchow, of Portsmouth, O., a friend of Herron Callen, was a visitor here during the early part of this week.

Representatives to sell Blossom Time Fine Toiletries. Splendid opportunity. Youths Own Products Company, Manistee, Mich.

Mr. and Mrs. Harry Jackson and Mr. and Mrs. W. A. Horner and son L. D., of Detroit, were Charlevoix visitors last Friday.

J. D. Parker, a resident of this region in earlier years, now of Marquette, has been calling on old friends here for a day or two past.

Mr. and Mrs. Forrest Plum and children and Mr. and Mrs. George W. Hedell and family, of Bellaire, were Charlevoix visitors last Sunday.

Mrs. Everett Edwards and daughters, Margaret Ann and Virginia, of Columbus, Ohio, are guests of friends in this city for a few days.

Mrs. Mary Scroggie spent two weeks recently with friends at East Jordan and Green River, returning to Charlevoix last Saturday.

Mrs. Josephine Sculien, a business visitor in St. Louis and Chicago for the past ten days will return to her business place here next Sunday.

President M. A. Lovinson informs us that the regular annual meeting of the Charlevoix hospital has been adjourned to August 18th.

B. A. Wilbur spent the week end with his parents, Captain and Mrs. C. E. Wilbur, returning to Chicago on the S. S. Manitou last Sunday.

Mr. Charles T. McCutcheon, of the McCutcheon Real Estate service organization of Boyne City, was a business visitor in this city last Tuesday.

The Ladies Altar Society, St. Mary's Church, will hold a baked and fancy goods sale Saturday, August 21st at corner of Park-av and Bridge street.

Mr. and Mrs. Leon Taylor, of Cleveland, Ohio, are spending a short vacation here with Mr. Taylor's parents, Captain and Mrs. William C. Taylor.

Ray Lee Jackson is entertaining his mother, Mrs. Jennie Jackson, who arrived from Columbus, Ohio, this morning to spend a vacation in this region.

Mr. C. W. Fox, of New Orleans, spent the week end in this city, a guest of Captain and Mrs. C. E. Wilbur, leaving on the Manitou Sunday for Chicago.

Mrs. J. T. Gilbert and daughter, Mrs. Mabel Post ne Wood, of Muskegon Heights, spent the past few days with Charlevoix friends. They leave for their home tonight.

Mr. and Mrs. Lee Allard, of Pontiac, are here for a short time this week. They arrived here Monday to attend the funeral service, Wednesday, held for the late John Cheney.

Miss Marjorie Myers, for the past year a teacher in the public schools at Royal Oak, is spending a vacation of several weeks with her parents, Mr. and Mrs. Fred S. Myers.

Miss Elizabeth H. Harris, of Oak Park, Ill., joined the Harris family at their summer place near Ironton yesterday and will spend the remaining vacation period in this locality.

Wilbur Cline, a guest at the home of his wife's parents for about two weeks returned to Chicago last Sunday on the S. S. Manitou. Mrs. Cline, son and daughter remain a more extended visit.

Mr. and Mrs. Kaye H. Butters are spending a vacation period of three weeks by visiting friends in the north part of the state. Tuesday they were guests of friends in Charlevoix. Later they went to Pellston where Mr. Butters' parents reside.

Rev. William Eldredge, former pastor of the Church of God in this city, now of Sturgis, Mich., is spending a few days with friends in Charlevoix. He is accompanied by Mrs. Eldredge on his vacation trip. They return to Sturgis early next week.

In addition to two capital prizes of $5 each to be paid in gold several smaller prizes will be given to solicitors for their services in disposing of tags for the benefit of Charlevoix hospital tag day, Saturday, August 14th.

On Sunday evening, August 15th, Miss Helen Morris, a well known young pianist, will give a musicale at the Oldham Club. Miss Morris has appeared with much success and has concertized very extensively. Her concert is being eagerly anticipated in Charlevoix, as she has made previous appearances.

According to J. R. Smith, of Manistee, the seaplane, Miss Manistee, will arrive in Charlevoix next Thursday and will spend about three days here making flights and carrying out an advertising campaign for the Youths Own Products Company, manufacturers of "Blossom Time Fine Toiletries."

A. B. Fairbanks, of Elk Rapids, was a visitor here early this week placing posters and other descriptive matter advertising the 2nd annual regatta for Friday of next week, August 20th, on Elk Lake. The two preceding events were successfully carried through and an extra effort is being made to make the 1926 event superior in every way.

The fine yacht Minnie O., of Detroit, spent several days here recently entering the harbor last Friday. On board were Mr. Robert Oakman, owner, and two nieces Misses Helen Oakman and Isabella Davis and Judge and Mrs. C. E. Stein. The party continued their visit here until the early part of the week when they departed on their cruise toward their home, Detroit.

Congressman Frank D. Scott, of Alpena, spent some time in Charlevoix last Saturday. Mr. Scott expected to spend some time here early this week but a message announcing the death of a friend changed his plans and he left Cheboygan early Saturday morning in response to the message giving him information relative to the demise of the Cheboygan friend.

A broken shaft, part of the machinery used for operating the bridge over Pine River, caused some little annoyance early this week. The damage was repaired but for a two-day hour period the bridge was operated by manpower. During the entire period there was but slight delay in traffic along this public thoroughfare at a point used by several thousand automobiles daily besides other vehicles and passengers.

"Uncle" George H. Van Pelt, Miss Clark, Mr. and Mrs. Lawrence R. Chase and daughter, of this city, Mrs. Sybil Cowan and daughter, of Fort Lauderdale, Orange Florida, and Mrs. Mary Vucasovich, of Ironton, spent Tuesday last as a picnic excursion at Norwood. From reports made by the several members of the party a most enjoyable day was spent in the vicinity of the homes where all of the older members of the party resided in earlier years.

B. O. Henning, Fred L. Davenport and son Major Davenport, of Chicago, were Charlevoix visitors early this week, while making a tour and camping trip around Lake Michigan. They are on the northbound trip, will cross the straits, travel through the north part of the state and return to Chicago via Wisconsin. This is Mr. F. L. Davenport's first visit to Charlevoix for upwards of sixteen years. Prior to that he was a weekly visitor representing Armour & Co., in this territory.

Special features at the Spiritualist campmeeting now running at Snowflake for Sunday, August 15th, includes work by Miss Lina Schambaeker, a wonderful trance medium lecturer. A message by Mrs. Wenz of Chicago and demonstration by Mrs. Dollie Anderson ar acknowledged leader as a trumpet medium. An invitation is extended to the public to attend the service next Sunday and "hear the truth about spiritualism." The service next Sunday will be the last Sunday service at the camp grounds for this season.

Members of a special committee are arranging a program of entertainment for an old time carnival for Thursday evening, August 19th, at the Belvedere Club casino. Diversified forms of entertainment will be provided, all of which will be potent factors from pleasure and mirth provoking standpoints. In the list will be included various games, dancing, vaudeville stunts by special artists, fortune telling, a grand concert, while throughout the evening refreshments will be served, all making for a pleasurable evening. A general invitation is extended to the public to attend and participate to the fullest extent in the evenings program, which will start promptly at 7:30 o'clock. Proceeds of the evening will be used for the purchasing of furnishings for the new Belvedere Club house at the golf grounds. The price of admission is moderate, 50c per ticket.

Odd Use for Seashell

One South Salem radio enthusiast has a loud speaker which he made from a large seashell. The shell, which is in itself a valuable possession and has been in the man's family for years, has been connected simply with a bit of rubber tape and some wires. It is a most satisfactory, as well as attractive loud speaker.—Boston Globe.

Card of Thanks

We wish to thank our friends and neighbors for their great kindness and help during our recent sorrow. Also to those who made the beautiful floral offerings and cars.

Mrs. Jack Cheney.
Mr. and Mrs. John Miller and Family.

Total	$4629 50

Many Believe King Charles Escaped Ax

On the two hundred and seventy-eighth anniversary of the death of King Charles I, the English monarch who lost his head in a literal sense, a crowd of good souls with a defective sense of evidence," as the Manchester Guardian puts it, demonstrated at the foot of his statue in Charing Cross. Good-humored English tolerance has set up a statue to this king a few hundred yards away from the statue of Oliver Cromwell. Lately, however, a theory has been advanced by some unbelievers of evidence, that the king was not executed at all. He was, they say, a free Mason, and those who were to see that he was beheaded were Free Masons also. So they procured a substitute—presumably a still more ardent Free Mason—who undertook to take the place of Charles. The executioner, so these people argue, retired to Oxford and became Elias Ashmole, founder of a museum in the ancient university city. Just as this story went around in England that Lord Kitchener was never drowned, nor even took passage on the ill-fated Hampshire, but retired from public life under an assumed name. The chief evidence in the King Charles story is that a gentlemen says that Ashmore of Oxford was "no ordinary man." So he must have been Charles I.—Pierre Van Paassen, in the Atlanta Constitution.

Indian Massacre That Moved Poet to Verse

"A poem on the late massacre in Virginia" was the first celebration in verse, of the American colonies, according to evidence satisfactory to the New York World.

Christopher Brooke (he was a lawyer as well as a poet, and the friend of Johnson, Drayton and other men of letters), started off with an obsequious prose dedicated to the Right Honorable and Worthy Company of Virginians.

The poem was written in heroic couplets, and Christopher Brooke began by explaining that, like the church, he believes in rejoicing with those that do rejoice and weeping with them that weep.

The poet allowed that God was still in his heaven, despite the doings of "those Devilish bands"—belonging to the Indians.

Brooke evidently was one of the great irreconcilables, for he pointed out to the governors of Virginia that the massacre may have been due not only to "false security," but to their trust in "League confirm'd by oaths."

Domesticating Silver Fox

The United States Department of Agriculture has issued a bulletin on the silver fox industry, in which it says that as a fur animal propagated in captivity the silver fox has no equal. Beginning in 1887, when Sir Charles Dalton and Robert Oulton conducted their first experiments on a small island off the eastern coast of Canada, the growth of this industry has been so steady that today it occupies a strong position in five animal husbandry in the United States. Rapid drinking of arsenic and cutting off timber, together with the heavy increase in population and a growing demand for furs of all kinds, have cut deeply into the fur supply. Even such fur as skunk—decidedly unpopular three years ago—is now bought under its rightful name.

Electric Typewriters

Steady advance is being made in the development of the electric type writer. The essential feature of the latest machine before the public is a toothed shaft which crosses the instrument under the type levers. The shaft runs by means of a small electric motor which can be attached to a plug at 300 revolutions per minute. As the keys are struck, whether lightly or heavily, the type levers engage the teeth of the rotating shaft, operating them as the fingers would do. A method is provided for increasing the strength of the impression so that several carbon copies can be taken, and a simple apparatus prevents two keys being pressed down at one time.

Iced fruit drinks at Eveline Orchards' sales booth.—adv.

Romance, Inc.

A recent wedding exemplified good selling on the part of the bride's family. Not that they were anxious to part with the daughter—not at all—but they recognized that conditions were right, that the prospective bridegroom was very desirable—so they used, although they knew it not, a subtle, instinctive salesmanship. The bridegroom does not yet realize that the crackling wood fires her father "sells" in the fireplaces, and the chicken dinners mother provided were well-staged steps in a successful campaign to "make 'em want it!"—Western Advertising.

Flower Garden for Child

Nothing is more charming in a room than flowers, which every child loves. A window box, placed low enough in a little girl's room so that personal attention may be given the flowers, will be the subject of great interest. Their growth and blossoming will be watched with great care. Different kinds of flowers can be grown in pots, and the little inside garden may be attractive, as well as beautiful.

Laborious

Irate Parent—When I was your age I had to work for a living.

Son—Well, gee'whiz, there's nothing much harder than working you for a living.

CHURCHES

Congregational Church

Rev. B.G. Mattson, D.D., Minister

The program of the morning service at 10:30 will be as follows:

Order of morning devotions conducted by the pastor. Sermon by the Reverend Dr. Wm. H. Lampe, of St. Louis, Mo. The musical part of the service will include special organ numbers by Dr. John T. Schofield, organist and choir master of the First Baptist Church of Flint, whose organ recital of last summer in our church was enjoyed by a large audience.

Mr. Paul Davies, tenor, of Muskogee, Oklahoma, will also sing with Mrs. A. J. Stelter as accompanist.

Other music by our church choir.

Persons desiring to attend are advised to be present before 10:30 as seating space is limited for the large audience attending our August services.

At the evening service Dr. Mattson will tell the dramatic and beautiful story written by Henry Van Dyke, entitled "The Lost Word." Better than pictures on the screen are the pictures woven from the magic of Van Dyke's lovely imagery and masterly prose style through which fine ageless stories quivering with tenderness and powerful with human experience drawn from ancient lore. The singing of loved hymns and the telling of the story will fill a happy hour for those who come.

Charlevoix Sunday School meets at 9:30 a. m. The Ironton service is held at 2:30 p. m.

Methodist Church.

C. E. Pollock, Pastor.

The pastor, Rev. C. E. Pollock, will preach and have entire charge of the morning service next Sunday at 10:30.

Rev. Hugh Kennedy will preach in the evening at 7:30. Dr. Kennedy is manager of the Bay View Assembly, Ass't Secretary of the District Area of the Methodist Episcopal Church and Dean of the State Epworth League Institute. He will also speak at the Epworth League service at 6:30 next Sunday. The public is always cordially invited to be present.

Our Sunday evenings of music and sermon have proven so successful that it is planned to continue them. Always good music is the aim of the church.

The Fourth Quarterly Conference of the church is called for Friday evening, August 20th. The District Superintendent will preside. The hour of meeting is 7:30 p. m.

Prayer meeting each Thursday evening at 7:30.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Soul."

Sunday School 12 o'clock.

Wednesday evening service 7:45.

Reading room, Tuesdays and Saturdays, 2 p. m.

The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church

Low Mass 5:45 a. m.

High Mass 9:00 a. m.

Saturday and Monday 7:00 a. m.

Rev. Knute Lewenski, Pastor.

Episcopal Church

The Rev. John K. Coolidge, of Glencoe, Ill., will hold services at 10:30 a.m. at the Episcopal church during the summer months.

CHAPTER IX—Continued

—13—

"I kept the check. It was coming to me. And I'm going to have a good time on it. It won't pay up what I owe, or begin to. Square me with the club, though, for one thing."

He left Ted Caleb in turn changed his clothes and spent a couple of hours reviewing his plans. At the water company he noticed Mary Morgan driving away at her typewriter. Her expression was sullen and she did not look up, though she heard his name mentioned. Caleb wondered what she thought of the wedding.

He found his model-set up on a long table in the directors' room that opened off Cox's private office. Cox and Hinckley were examining it. They greeted him cordially. Hinckley in particular giving him a cordial grip of the hand.

"Suppose you go over the general plan, Warner," suggested Cox. "Then we'll talk. We want to know how you arrive at your premises."

Caleb described simply his belief that the whole of Caliente plain formed a great bowl of gravel with bottom and sides of clay, with a roof of clay at the upper end that caused artesian wells. He went over his operations and displayed his maps. He had felt a certain diffidence about the water-divining, doubting whether his hearers might not scoff at proof built up of such means. But Hinckley accepted it and Cox nodded his agreement.

Hinckley spoke first after Caleb's final summing up. And he spoke with a sincerity that held no trace of jealousy.

"I congratulate you. I should have liked to have made that discovery myself. But there is one big obstacle that exists. It is the flaw, if there is a flaw, in your plan."

"I mean the powerful action of the tides upon any pipes which may be laid upon the bay bottom. It shallows at the south end and the six-foot rise and fall has great swing there. There is your weak point. It may be overcome, but it will need a special invention."

"I had thought of that and I have a suggestion," said Caleb. "It is not perfected. I have not had time. But I am sure the idea is a sound one."

"Well," summed up Cox, "so far, I think we may say that your project interests us, Warner. I must add my congratulations to those of Hinckley. It looks as if your visit to the coast was going to be fortunate to us. Concerned, I am going to call a directors' meeting. I cannot set a date now. They are all busy men, with other interests than this company.

"I should say a fortnight should prove sufficient. But you know it at the earliest moment. Perhaps that two weeks will enable you to work out your idea about the pipes. Keep in touch with us through Mr. Hinckley. You may rely upon his co-operation."

They both accompanied him from the big room. Hinckley gave him his private address and invited him to come there any evening for consultation.

Caleb had some other business to attend to down town and he got back to the apartment house in fine feather.

He found Baxter there. He had just come from the club, he said modestly. Caleb saw that he had been drinking. His face was flushed and he was in bad humor.

"To whom one?" he said. "The bottom dropped out of the market. Some of Cox's ll—d manipulation! The tip was that they were driving down, the stock to buy cheap and we were prepared for that. But they were unlooking. My thousand went for margins, I'm clean. And I'm up against it."

He went to his bureau and took up the silver frame with Mary Morgan's picture in it. He took out the photograph and tore it into small pieces, which he tossed into a waste-paper basket.

"D—n her!" he said savagely. "She's the last straw. Getting ugly-is more ways than one!"

"You owe her something," said Caleb.

It was a slip and he realized immediately by the deepening scowl on Baxter's forehead.

"One her something?" he exploded. "A lot you know about it! You are like most preachers, you prate without experience. I may be a sinner, but she's no saint. She wasn't when I met her. The things we did were done mutually in full knowledge of the risks, because we wanted to do them. Now she's pinned this thing on me, with some excuse, perhaps, but I'm not feeling paternal about it. I can tell you. And I don't intend to marry her. That's flat and final. Owe her something? Maybe I do, but it can only be paid with money and where's that coming from?"

"I didn't mean to preach, Ted. As for money, I shall accept it, there's your land deal. It's easy for you to make money, Ted, if you buckle down to it and cut out the drinking."

"Preaching again," cried Baxter. "Well," But even in this age of letters, when newspaper readers are accustomed to decipher abbreviated form in news and advertisement columns, mistakes are easily made. A notice on a certain street door, for example, always excites interest. It runs: "J. X., R.M." Some more university degree! No; merely an intimation that the occupant was a boot and shoe mender.

There Were Some Thirty People in the Room and They All Seemed to Be Laughing and Talking at Once.

lob's intention and swung his fist viciously. Caleb's own temper had been mounting despite his efforts for control. He was tired and his nerves had been strained more than he suspected. He parried the blow and thrust Baxter back, meaning to pinion him in the chair while he talked some sense into his sodden brain.

But Baxter twisted. His weight went all upon one arm and the light chair overturned. Clutching at the rickety little desk, Baxter scrambled to the floor in a shower of papers as the desk toppled. The fall seemed to temporarily sober him. He scrambled to his knees and began picking up the papers as Caleb righted desk and chair, ashamed of the brawling termination of the affair.

"Look here, Ted," he said, catching Baxter by the elbow. "This has gone far enough. We are both acting like a couple of cowboys. If I've . . ."

But Baxter stood staring at one of the papers he had picked up. His face was contorted by a malevolent sneer.

"You haven't got the money, eh?" he said. "A fine friend you are. You rotten liar. I'm through with you!"

He flung the paper down on the top of the desk and flung through the door, his face livid. Caleb heard his own door slam as he picked up the slip. It was the telegram from his attorney announcing the closing of the deal and the forwarding of the money.

For a second he stood irresolute. He did not want to explain to Baxter why he could not lend him any of this amount, or to what use he had already put it. Finally he made up his mind. His friendship with Baxter had been largely protective. He did not want to abandon that friendship now when Baxter most needed him.

He knocked on the door, then tried it. The key had been turned on the inside. He called.

"Ted! let me in for a minute."

"You go to h—l." A moment after, the door to the corridor slammed. Caleb went to his own and saw Baxter entering the elevator. He rang the bell, hoping that he might catch the other before he got too far down the street.

The colored boy grinned at him as the elevator came to rest at his floor.

"Want to catch Mistelı Baxter, suh? I reckon you's too late. He cyah's his waitin' fo' him fo' nigh half an hour. He's gone a kitin'."

CHAPTER X

The Party

If Baxter came back that night Caleb never knew. Baxter kept the door of his room locked. Caleb heard him casually mentioned at the club as being on "a tear." Doctor Fields inquired for him once directly of Caleb.

"He'll get cirrhosis of the liver, if he keeps on," said the physician. "And he'll snuff out like a match in the wind. We must get him on the wagon. I'll try and scare him into it. Though there's real cause for the scare. He'll stay off the stuff for several months sometimes. There's just one thing he can't resist and that starts him off. Worst thing he could take, Champagne. Fortunately it's scarce and expensive. You'll understand my talking to you this way. They say you and Ted have been friends for a long time."

But Caleb doubted very much if Baxter would listen to him until his mood changed. And he was busy with his own problem of the pipes and the tides.

He had an idea of what was needed, if the bottom sloped evenly the big tug at his submarine pipeline would come in subchannel, looping it backwards and forwards. But, wherever there was a depression or a channel, his pipes would sag and great strain come on the joints. A flexible line—that was what he wanted. He worked over it daytimes and dreamed of it nights without coming to a practical solution. He wanted to complete his plan, to come before the meeting with all difficulties solved.

Then one day he received an invitation from the Veddera to a radio party.

"It will be quite informal," wrote Mrs. Vedder, "but I think you will enjoy it and we hope you can come. Some friends of yours will be with us, Betty Clinton and Carmen Wilson among them. Don't dress. Come any time after eight o'clock."

Caleb accepted. He found himself eager to do so at the mention of Betty Clinton's name. The afternoon of the appointed day the solution of the pipe problem came to him. It seemed to him that thoughts of the girl had blent with his clinkerings and drawings and quickened his invention.

He sketched out his idea and made the specifications that he took down to a working machinist with whom he had got in touch. A model was to be made. The thing was simple enough though an entire novelty in the way of pipe laying. It would have developed full flavor and are too ripe when supplies are abundant, the market becomes very discriminating and is likely to ignore all peaches not meeting its fancy, he explained. Uniformly large peaches, free from blemishes, may sell very well, while small or slightly blemished peaches go begging on the same market, he added.

"Not all peaches suitable for shipment are uniform enough in size, color and freedom from blemishes to sell to the best advantage if packed together. Certain classes of trade call for extra-fine table peaches, and such peaches command a premium over the less highly finished product, although the latter may be well suited to canning and other uses. The more nearly uniform the peaches in a given lot, the better they will sell. Often the second grade, packed alone, will sell nearly as well as a mixture of first and second grades. And the first grade sells very much better by itself than if even a few inferior specimens are included in the package.

"Three factors must be considered in the grading of peaches: maturity, blemishes and size. In case a fancy pack is to be made, color also is concerned. If peaches are picked too green, they must be culled; if so ripe as to be easily bruised in handling, they are unsuitable for shipment but may be sold locally for immediate use. With reference to blemishes and size, if each grower grades according to his own ideas without regard to what others are doing, many variations in grades will result, and each lot of peaches must be seen by the buyer before a sale can be made. On the other hand, if all growers graded according to some definite, recognized standard, it would be possible to make sales by wire without personal inspection by the purchaser. This would greatly facilitate the handling of a large crop. Growers therefore will find it to their advantage to pack according to the United States grades for peaches. These grades are well known in the trade and have been adopted as official for Illinois. Small quantities of peaches may be graded by hand, but for large volumes of fruit a mechanical grader should be used.

"Although the four-basket tomato flat formerly was used for packing Illinois peaches and the six-basket carrier has occasionally been used, the standard package at the present time is the bushel basket. Special types of bushel packages are used to a slight extent, but for the most part the regular form of standard bushel basket is employed. This year a new package is also available that has a separate compartment for each peach, is being tried in some commercial way for the handling of fancy table peaches that have been allowed to ripen on the tree until they have developed full flavor and are too ripe when supplies are abundant, the market becomes very discriminating and is likely to ignore all peaches not meeting its fancy, he explained. Uniformly large peaches, free from blemishes, may sell very well, while small or slightly blemished peaches go begging on the same market, he added.

"Not all peaches suitable for shipment are uniform enough in size, color and freedom from blemishes to sell to the best advantage if packed together. The Outdoors Is Yours!

Your own car makes the whole country yours—with its peace of color and coolness. Not far from your own home are scenic treasures—adventure—fun—and romance. Find them! Follow the shores of sapphire lakes! Stop to fish in their cold clear depths. Drink in the fragrance of wild flowers and scented meadows!

You will find color wherever you go—green of forests—gold of wheat fields—blue waters of lake and stream—crimson of flaming sunsets. And always the promise of the unknown luring you on! Below is a suggestion of the rich treasure of the Middle West.

1—Prairie du Rocher, Illinois, the only town in the United States having a common on the old French plan. Church records date back to 1720. House of first governor of Illinois where La Fayette was entertained used as post office. Near Evansville on State Highway No. 3.

2—Sully's Hill, an important wild animal preserve in North Dakota. State Highways No. 34 and No. 20.

3—Lecompton, Kansas, where the "Lecompton Constitution" was framed in 1857. View of Kansas and Delaware Rivers from the bluffs. Near Big Spring on Union Pacific Highway No. 10.

4—Storm Lake, Iowa, a beautiful resort region. State Highways No. 4 and No. 5.

5—Indian fortifications north of Fourteen Mile Creek, Indiana. Peculiar formation over 2000 feet high and in one place hardly a rod wide. Near Charlestown on Wonderland Way No. 24 from Madison.

6—Mount Baldy, one of the largest sand dunes in the world, at Saugatuck, Michigan. State Highway No. 11.

7—Mille Lacs District in Minnesota, where the pine forests and oak forests meet. Fishing is very good in this district. State Highway No. 18 from Brainerd follows the shore of Mille Lac.

8—Sibley, Missouri, where Fort Osage was established in 1809, during Osage Indian War, one of the eastern terminals of the old Santa Fe Trail. Near Buckner on National Old Trails Road No. 6.

9—Trempealeau Mountain, Wisconsin, where Perrot, the French explorer, landed in 1685. Name derived from the French meaning "the hill which soaks in the water." Bold piece of scenery. Silver Highway No. 162 from Holmen.

10—Crystal Cave, near Sturgis, South Dakota, with 1,500 chambers of mystic beauty. Via Piedmont, State Highway No. 30.

Discovering scenic treasures for yourself is the best sport of all. It's easy to do for splendid highways weave their pattern smoothness over the entire Middle West. And Red Crown Gasoline can be obtained easily wherever you go. Standard Oil Company (Indiana) Service Stations have been established for your convenience on all the roads of the Middle West. The outdoors is yours! Claim it this summer!

"The Vine"

This magnificent bronze by Harriett Frishmuth is on display in the Palace of Fine Arts at the Sesqui-Centennial International Exposition in Philadelphia where the 150th anniversary of the signing of the Declaration of Independence is being celebrated. This is but one of the many gorgeous and beautiful things to be seen in the Fine Arts exhibit. Famous artists from all parts of the world have sent their paintings, etchings and sculptures to Philadelphia to be exhibited during the exposition, which continues until December 1.

Known and Found Wanting

Irvin S. Cobb, the humorous writer, and lecturer, was praising women novelists—Sarah G. Millin and the author of "Elizabeth and Her German Garden" and Susan Glaspell.

"How those women know us men," he said, "and how they despise us! Elizabeth especially despises us. Her works make me think of a story.

"Mrs. Blunk and her daughter, on a visit to Palm Beach, were returning to their room after tea in the Coconut grove.

"'I wonder,' said the daughter, 'if papa has got back from his golf yet?'

"Mrs. Blunk laughed—a hard, metallic laugh.

"'Hum a Jazz tune,' she said, 'and spray a little Eau de Venus in the air, and your father, if he's within a mile of us, will stick his head out of his bedroom door to dirt will the chambermaid.'"

Jimmy Got a Bargain

Jimmie is a little urchin who often comes into the chain store where I work, writes a correspondent of the Chicago Tribune. He seems always hungry, and is continually priefing candy and other dainties displayed on the counters, but frequently he has no money with which to buy anything, which has gotten me into the habit of answering him carelessly and at random.

The other afternoon, on his way home from school he came in and, rubbing his dirty fingers against a glass jar of fine big chocolate standing on the counter, he asked: "How many of those for a nickel?"

"O, two or three," I replied unthinkingly.

"All right," said Jimmie, producing his nickel, "gimme three."

Order Issued by Authority of Act 230 of the Public Acts of 1925 Prohibiting Fishing in Adams Lake, Marion township, Charlevoix county. 16-3t

STATE OF MICHIGAN—County of Ingham—ss.

The Director of Conservation having made a thorough investigation of fishing conditions in Adams Lake, Marion township, Charlevoix county, recommend certain regulations.

Therefore, the Conservation Commission by authority of Act 230 of the Public Acts of 1925 hereby orders that it shall be unlawful to take or attempt to take any kind of fish from the waters of Adams Lake, Marion Township, Charlevoix county until the opening date of the season on large and small mouth bass A. D. 1927, under penalties provided by Section 5 of Act 230 of the Public Acts of 1925.

Signed, sealed and ordered published this fourth day of August 1926.

For State Senator

To the Citizens of the 29th Senatorial District of Michigan:

Having been urged by many to become a candidate for the Senate from this district, and Mr. Pearson having stated to me that if I was a candidate he would not seek third term, I have decided to submit my name for your consideration at the coming primaries, on the Republican Ticket, asking that, if I am chosen to serve you in such a capacity, I will do my utmost to prove worthy of such confidence bestowed in me.

Sincerely,
HUGH W. DICKEN, M.D.
East Jordan, Mich.

AL MARTIN'S COUNTRY STORE

Story of the Ironton Annual Festival Held Last Wednesday

"The Ironton church has arrived" was the way one of our friends put it after the great success of the annual festival held last Wednesday. A chicken dinner may not be a exciting story but the one served at Ironton was so immensely satisfying that people continued talking about it long after they could eat no more. And the people were there. For an hour or two the corner of a little country road was in need of a traffic cop.

The church was decorated with greens and festooneery and attractive signs, the artistic work of Miss Eva Adams proclaimed the wares of the tastefully adorned booths. Articles of rare workmanship and beauty brought ready buyers so that the sales of the fancy work booth reached the total $100. The candy booth sold out, and the ice cream venders did a big business and Strongs ran out of gas.

The home talent play made a big hit before an audience which filled all the space and every inch of standing room including the porch. The play was well adapted to the clever group of Ironton players, entitled "Al Martin's Country Store." It was a friendly comedy full of humor and good acting. The following is the character ensemble:

Al Martin, the storekeeper, Doan Ogden; Marie, his pretty daughter as postmistress, Kathryn Tunnoth; Sam Jones, Floyd King; Tom Briggs, Manetta Harry; Buck Friend, Ole Nelson; Rube Hutchins, Elliott Bird were the various contributors to country store philosophy. Ernest Brown and Elliott Bird took the parts of the city englishers. Harold Hawley, Robert Carey, Eleanor Tumnoth and Wallace Nelson were the up-to-date, young ladies, and friends of the heroine, Marie Martin. The parts of Messrs. Blake and Smith were well taken by Mrs. Alexander and Mrs. King, and their swapping of receipts brought much joy to the audience. Agnes Brown and Mabel Bird were stylishly dressed ladies. Bessie Brown, James Patterson, Eleanor Tumnoth and Wallace Saunders were irresistible kids. Gail Allen made an excellent school teacher, and Wilbur Brown a minister. The villian of the play was well carried out by Willard Bird. Father Johnson as the excitable negro boy slim, and Mary Wilson as the imp of a mischief lover, were a joy to the audience.

The play netted the handsome sum of over sixty dollars as the contribution of the young people toward the work of our Ironton church. All in all the occasion of the annual festival exceeded all former records both in attendance and amount of money realized, over $300 after all bills are paid. At the church service Sunday the church received a generous personal contribution from the people of the Sequenota Club amounting to $75.00.

Good will and good work and a line friendly fellowship have characterized the undertaking, making this little rural church center of Christian influence which is sure to be felt in the days ahead and the years to come.

Oriental Princess in Charlevoix
M. E. Church, Sunday-Monday

With her dark eyes flashing fire when she talks of the nations and empires that have overthrown her native land—Syria—and growing wistful again and soft when she relates the musical Syrian poetry that takes its charm from the Orient. Princess Rahme, of the ancient Syrian House of Haider, and whose lineal descent dates back into remote antiquity, tells about her birthplace and the birthplace of Christianity. The Princess is a thinker, lecturer and dramatist and is here in this country to tell the story of her native land and its interesting people.

Palmeen Rahme is enroute East after completing an extensive Chautauqua tour of Canada, and while in Charlevoix will give two of her famous lecture-recitals at the Methodist church. Sunday evening at 7:30, she will present "Under Syrian Stars." Depicting life in Palestine—life in a country that has gone on pretty much the same (Concluded on page Ten)

HOSPITAL BENEFIT

At Inn Casino, Saturday Evening, August 21st at 8 o'Clock

There will be a Hospital Benefit Dance at the Inn Casino, Saturday evening, this week, August 21st, at 8 o'clock a program of exhibition dances, featuring Miss Daphne Hayes, pupil of Adolph Bohn, Russian ballet master.

Little Betty Ross and Jane Miller of Charlevoix, will present in costume, "The Marionettes." A group of clever young children, guests at The Inn, under Miss Travis' direction, will present stories and character dances. Elizabeth Spiers of Oklahoma, dressed as a French doll, will interpret a pantomine dance. Miss Regina Maechalter of Columbus, Ohio, will give a spirited Russian dance.

The Inn orchestra will be augmented with musical artists under the direction of Leader Rudolph Ludemen.

The board of directors of the hospital are cooperating with the committee at the Inn to make the entertainment and the dance a success, and realize a desired large sustaining fund for the hospital.

Dancing starts at 9 o'clock and continue until 12. Favors of unusual variety will be given during the evening

OUR COUNTY FAIR

To Be Bigger and Better Than Ever—Held Sept. 14-16

Fair time will soon be here. The Charlevoix County Fair which is to be held at East Jordan, Sept. 14, 15, 16, 1926 promises to be the best in the history of the Agricultural Society.

According to reports coming in from various parts of the county, all departments will be filled to capacity with unusually fine exhibits. A beautiful fireworks display will be an added attraction this year.

Plenty of free acts both afternoon and evening will amuse and entertain both the kiddies and the grown-ups.

Four county bands will furnish music for this 42nd annual event. There will also be rides and amusements of various kinds for people of all ages. Some attractive features are ball games, horse racing, exhibitions of unusual merit by Hooker's Riding Academy, airplane rides and many others of interest that go to make a good county Fair where you meet old friends and make new ones.

Make your plans now. Hold these dates open, Sept. 14-15-16.

MOTOR REGATTA LAST SUNDAY

On Lake Charlevoix—Best in Recent Years—Many There

The regatta scheduled for last Sunday on Lake Charlevoix, the program for which was arranged and carried out by local yachtmen and sportsmen interested in like events wherein gas boats are used for either racing or pleasure.

In the events of last Sunday entries were made in several classes ranging from ships of high power with outboard motors to those with stationary engines up to one hundred horse power, with several entries made in each class, as follows:

Outboard motor, 14 inch—owners Goldman, Talbot, Burnham, Schwab Jr., Stuart and Fox.

Outboard motor over 14 inch—Graham, Whiting, Shwab Jr., Valier, Goldman.

50 horsepower—MacDonald, Hartman, Hamilton & Son, Lazarro, Reis.

100 horsepower—Shwab, Hollingsworth, Welsh, Garrison, Engle.

Free for All—Brady, Gilbert, Garrison, Webb, Hollingsworth, Shwab, Engle.

In each of the classes the little ships started the race without advantage, ran the course fairly and with every evidence of good sportsmanship shown by those in charge of the craft entered, all showing a decided spirit of good natured rivalry and this same spirit was exhibited by those interested in the several entries as well as spectators.

The 1926 regatta will go down in history as one of the best events, if not the best, ever held in this region and it is positive that no event of like nature has ever been held in local waters that fully equals the exhibition on Lake Charlevoix last Sunday.

Miss Charlevoix entered in the free-for all, Mr. Roy Brady owner, showed a burst of speed that was wholly unexpected, even to those having some information as to her capacity for making speedy progress. Officers and members of the Boat Club have every reason to feel good over the success of the Sunday meet and no doubt are imbued with new courage such as will enable them to go forward with pleasure to a bigger and proportionately better event in 1927.

Last Sunday's regatta attracted a large crowd of spectators some in boats on the water and no doubt are responsible for the statement of many that the Sunday meet was one of the best ever held on Lake Charlevoix, the shore line was occupied by large crowds. Throughout the afternoon the Charlevoix City Band did their turn and entertained the masses with several choice selections all of which was appreciated highly by the public.

Former Mayor S. M. Rose acted as starter and also as one of the judges. Other judges were Mrs. M. B. Brady and Alson Smith.

Winning trophies were presented by J. R. Wineman to Jack Goldman, less than 14 inch class; Ziba F. Graham, over 14 inch class, this entry being from Indian River; R. S. MacDonald, 50 horsepower class, and M. Roy Brady in the free-for-all.

Power of Vibrations

A Boston violinist says he can put out a flame with the vibration of his fiddle. But that's nothing. A saxophone slightly off key can put out an entire orchestra.—Cleveland Plain Dealer.

French Tricolor

The tricolor was chosen as the national emblem of France because it combines the colors of the nation and its capital. Red and blue are the colors of Paris, while white is the color of France.

FEWER ACCIDENTS

Attributed to the Painstaking Efforts of Our Officials.

It is a matter of satisfaction to know that up to the present time there has not been a serious automobile accident in Charlevoix due to careless drivers and but little damage to machines due to collisions this season. About the only evidence of damage to cars thus far is the appearance at infrequent intervals, some car with a crimpled fender, a smashed running board or some slight damage to wheel or body and of the entire number the damage in the main and near accidents has been done at some point outside of the city limits.

Several near accidents have been reported, some but for the fact that drivers have used their heads when confronted with a critical situation, would have resulted differently with probable heavy financial loss and possible loss of life or serious injury to some of the occupants of the several cars.

Several thousand automobiles are in use daily in this city, the major part being used for pleasure, many of which are handled by professional chauffeurs however the big majority of the machines are driven by owners or some family member who in the main are less expert than the professional driver, but all careful recognizing the fact that an error on their part will place their machine in the death car class.

Present satisfactory conditions can in no small extent, be attributed to the painstaking effort of officials on duty for the special service of safeguarding life and property in the city particularly in the down town district. In this work officials have throughout the season rendered meritorious service

HORSE SHOW NEXT

Hooker's Paddock on Friday Afternoon, August Twenty

Friday, August 20th, Manager A. W. Sankey will stage a horse show and gymkhna at the Hooker Paddock located near the north end of Michigan avenue. Display cards are out announcing the event and if the same is patronized as in former years a large number of spectators will witness the event which to many persons is highly interesting.

The show is put on from a financial standpoint for the benefit of the Charlevoix hospital, the proceeds being turned over to this local institution, however the show attracts the attention of everyone interested in good horsemanship and in this regard Charlevoix summer and local citizens take unusual interest and will be present in numbers.

The show will open at 2:30 p.m.

Poles Vary in Attraction

While the north magnetic pole attracts the north end of the needle and repels the south end, the south pole repels the north end and attracts the south end. This is true no matter in what part of the earth the needle is placed, and there is no reversal of the needle when the magnetic equator is crossed.

Great Statesman Exiled

Rivadavia, the great Argentine statesman, who is considered by many as second in both Americas only to Washington, after serving his country in many important positions, spent the last years of his life in exile in Spain.

Spell of Eloquence

Eloquence is made up at once of individuality and of sympathy. To live much in ourselves, to live much in others—such is the double condition of powerful speaking.—Vinet.

Republican State Convention Detroit—Date, September 28

Tuesday, September 28th has been named as the date for holding the Republican State Convention, the place for holding the same in the city of Detroit, the purpose that of placing in nomination candidates for state offices and the transaction of such other business as may properly come before the convention. According to the call recently issued by the chairman and secretary of the State Central Committee 1,291 delegates from throughout the 83 counties in Michigan will be entitled to seats in the convention. Of the total number the Charlevoix county appointment is 5 delegates, Emmet 5, Grand Traverse 6, Otsego 2 and Cheboygan 4, the apportionment being based on the Republican vote for Secretary of State at the November election held in 1924.

Republican county conventions for the election of delegates to attend the State Convention are held one week earlier—Tuesday, September 21st.

DRIVE A SUCCESS

Total Receipts for Hospital Tag Day Saturday Was $1054.42.

Solicitors on the tag day drive for the benefit of the Charlevoix hospital turned in $1,054.42 at the close of the drive last Saturday night, making for a fine showing for the days work and substantial financial aid to the hospital.

Solicitors started their program early and followed it diligently throughout the day and evidence of their faithful work was pronounced as but few persons in the city were without one or more of the tags furnished to subscribers to the tag day fund.

The members of the Ladies' Auxiliary are entitled to great credit and to no small degree for the interest taken and painstaking effort put forth by them in order to make the hospital tag day a financial success—not only in this but for their persistent loyal effort and activities during the year all of which has been highly beficial to the hospital.

Five prizes were offered to girls and an equal number to boy solicitors on this drive, the first being a five dollar gold piece to the girl and boy making the highest collection for the day. In the girls class the $5.00 gold prize was awarded to Miss Sybil Levinson with a total collection of $74.98. Other girls in this class awarded prizes were Misses Mary Strauss, Elizabeth Lugarman, Dorothy Hitzenbush and Jane Wineman.

In the boys' class Alfred Stumer made first place with $155 to his credit with four others in the following order, Robert Sies, Stanley Cartter, Drew Young and Charles Zeitler.

SYSTEM PRAISED

U. of M. Says State Records are a Model to Others

According to a statement published in Public Business, a magazine issued by the Detroit Bureau of Governmental Research, the Bureau of Government of the University of Michigan, after a complete investigation of the state's system of keeping its records, declares it is a model one.

In view of the fact that opponents of the administration of Governor Alex J. Groesbeck, have recently made attacks upon the accounting department that was instituted by the Governor, the findings of this bureau are of especial interest just at this time.

In part the report says: "The accounting system gives constant information as to the financial condition of the state and the balances available in every fund and appropriation. It supplies cost data on every state activity. It accurately records every transaction. Indeed the accounting system is in the opinion of qualified experts a model one."

The report which covers many pages, states in the concluding paragraph: "The people of Michigan have a right to be proud of the progress in administrative reorganization which has been made since 1921. They enjoy today many of the most substantial advantages of an ideal administrative system. The organization is no longer very complicated. There is an effective central authority which, under the leadership of the governor, has established a reliable financial procedure."

Friends and Enemies

Whatever the number, of a man's friends, there will be times in his life when he has one too few, but if he has only one enemy, he is lucky indeed if he has not one too many.—Bulwer-Lytton.

MANY TRAVEL

This Year Sees Many Thousands in this Northern Clime

Never in the history of Charlevoix has there been as many automobile tourists in this region as at the present time. Main thoroughfares and by ways inside the city limits are traversed daily by thousands of machines, residential districts have a full quota and the down town district takes on the appearance of a continuous passing show.

Machines are seen everywhere from early morn till the wee small hours of the following day. Some coming, some going, as trending as the waves of the ocean, all or nearly all carrying a full complement of passengers, with no small percentage of the machines well loaded with camp equipment and such paraphernalia as is considered essential for both comfort and convenience.

Of course all tourists motoring thru the country do not patronize the public parks, many of them do as is evidenced by the number of machines nightly at the several splendid parks in this locality, a few nights ago more than 800 people were camped at the state park at Mackinaw City, an unusual number and the greatest since the park has been invaded by tourists.

Business of the state owned ferries shows a heavy increase with each month and at this time the business for the 1926 season is far in excess of any former year, with a corresponding increase in gross receipts, notwithstanding the fact that carrying charges have been greatly reduced, the present transportation rates for crossing the straits being about one third of that charged prior to the establishing of the state owned ferries on this popular route.

Mirrors for Macaroni

By using mirrors to supplement the sun in drying macaroni, manufacturers of the product have found the order to be more satisfactorily preserved, since the deep yellow tint is not bleached so easily, and the flavor also is said to be improved. The process is quicker than sun blanching.

Gave Name to University

Brown university, founded in 1764, at Providence Rhode Island, was known as Rhode Island college until 1804, when its name was changed in honor of Nicholas Brown, American merchant, who had given it $100,000.

Rough Guess

"What is the occupation of that gentleman who works so hard to entertain?" "Judging from the stories he tells," answered Miss Cayenne, "I should say he is an archeologist."—Washington Star.

REAL ESTATE ORGANIZATION

Meeting Attended by Representatives of 3 Counties

At a meeting in the offices of Kinsey & Buys, Charlevoix, held last Friday evening, representative real estate men from Antrim, Charlevoix and Emmet counties voted to establish a local real estate board which is to be affiliated with the Michigan Real Estate Association and the National Real Estate Board.

Among the purposes which the organization hopes to promote are a code of ethics and practice which will establish confidence in real estate men and the real estate business; publicity concerning the resort and tourist possibilities of Northwestern Michigan and especially the three counties named; cooperation between members that will facilitate sales of property; and the discussion and exchange of ideas for the betterment of methods.

The meeting was addressed by Mr. John H. Doelle, of Lansing, executive secretary of the Michigan Real Estate association. He told of the prosperity of this section as a resort and tourist playground, and of how the outside world favors it as such. Later, at the request of the meeting he explained procedure for obtaining the national and state affiliations desired, and assisted in preparing the details.

Committees were appointed and a date was set for another meeting to be held in the same place, two weeks hence. Committees will then report and preliminary details be completed.

Antrim county was represented by T. J. McCutcheon of Bellaire and C. B. Carver of Elk Rapids; Charlevoix county by C. T. McCutcheon of Boyne City and Charles E. Emrey and Lawrence R. Chase of Charlevoix; from Emmet came John Quinlan of Petoskey and George W. Gould and E. C. Matthews or Harbor Springs.

YOUR STATE TAX

During the administration of Governor Alex J. Groesbeck, your state tax has been reduced as follows, Charlevoix Co.:

1921	$42,871.33
1925	29,561.29
Reduction	$13,172.04

From the primary school tax, since 1921 the state has increased payments to your county as follows:

1921	$53,298.00
1925	69,009.30
Increase	$15,711.30

Governor Groesbeck has so arranged state finances that unless you own an automobile you do not pay one cent for high way or bridge construction or for their maintenance. Besides paying all road construction costs from the Weight and Gas Tax, the highway bonds are being retired from the same funds.

1925—Returned to county from Automobile license fees	$16,739.45
1925—Paid to county on State Rewards account	$ 1,808.82

These statements can be verified by your county records.

During Governor Groesbeck's administration, Michigan has constructed 3,480 miles of improved highways, of which 1,480 are paved roads.

A Lazy Man's Estimate

Someone has said that "good luck" is just a lazy man's estimate of a hard worker's success. But, perhaps some of the credit may be given to that steadily growing Savings Account that the "hard-worker" started and religiously tended during the years.

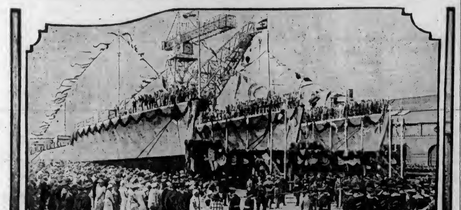
Here at this strong, friendly bank one or more dollars will open a Savings Account. WHY NOT START YOURS TODAY!

CHARLEVOIX COUNTY BANK
BUTTARS, BRIDGE & CO.
"The Bank on the Corner."

Monument to Man Who Founded the National Grange

A monument in memory to Oliver Hudson Kelley, founder of the National grange, nation-wide, farmer's organization, was unveiled at Kelley's grave in Rock Creek cemetery, Washington. He conceived the idea of the grange while an employee of the Department of Agriculture. Photograph shows Mrs. Elmer E. Reynolds of Washington laying a sheaf of grain at the foot of the monument.

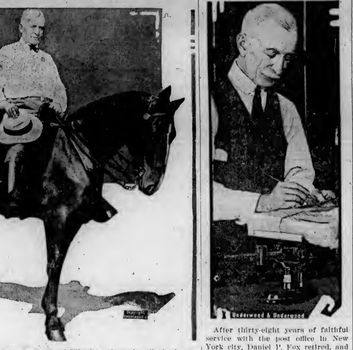
Three New Destroyers Launched for German Navy



Scene at Wilhelmshaven, Germany, at the launching of three new torpedo boat destroyers for the German navy. A great crowd attended and the ceremonies were quite elaborate.

F. O. Lowden on His Favorite Mount

AFTER 38 YEARS



Frank O. Lowden, former governor of Illinois and much talked of as a Presidential possibility, takes a horseback ride every day when he is at his Sinnissippi farm near Oregon, Ill. He is seen above on June, his favorite mount.

They Don't Like Washington Much

Blanche Dalley of Phoenix, Ariz., and Mary Putnam of Ponca City, Ariz., picturesquely garbed, as they arrived in Washington after driving across the continent. One of their first experiences in the capital was to crash into a Treasury department car, and when they appeared in court and were told they'd have to pay their own damages, they said that the capital was an awful town.

FROM THE FOUR QUARTERS

Twenty cities have a population of 1,000,000 or more.

Thermopolis, Wyo., has the largest hot springs in the world.

No species of mammal is known to be absolutely colorless.

Insects eat up from 10 to 20 per cent of all the crops planted.

The gibbon is the only ape that habitually walks in an upright position.

Automobiles are increasingly popular in Alaska.

Homing salmon sometimes leap up waterfalls eight feet high.

Women of Esthonia are just trying out electric curling irons.

A gas mask has been developed that produces its own oxygen.

Poison gas is being used to kill off rats that gather in tunnels and under buildings.

Avoid Injecting Serum Into Hams

Veterinarians Urged to Be Careful in Immunizing Against Cholera.

(Prepared by the United States Department of Agriculture.)

Veterinarians and others are cautioned by the United States Department of Agriculture against injecting serum and virus into the hams when immunizing hogs against cholera.

Frequently infectious material is carried into the ham by a contaminated hypodermic needle and damage results through the formation of abscesses at the point of the injection. When such unsound hams are discovered at the packing house they are condemned as unfit for food, but in some instances the abscesses are so deep-seated in the meat that they cannot be detected at the time the hams are trimmed and inspected preparatory to curing. In instances have been reported where the presence of such abscesses was not revealed until after the ham had reached the consumer.

Heavy Loss to Packers.

In July, 1923, the Department of Agriculture called to the attention of those who administer the anti-hog-cholera treatment the heavy losses to packers through this sort of damage. A case was cited where abscesses were found in 40 out of 110 hams as the result of ham injections of serum. There has been a marked improvement since 1923, but recent reports indicate that some operators continue the old damaging practice.

More Suitable Places.

Immunization can be accomplished just as effectually when the serum is injected into the axillary space under the shoulder (corresponding to the armpit in man), where no damage will result should an abscess form. The same applies when the virus is injected under the skin at any place where the conditions are favorable for absorption. Losses can be avoided if hog raisers will refuse to allow either serum or virus to be injected into the hams when their hogs are being immunized against cholera.

Orchard Requires Care to Return Good Profit

"Environment and man must co-operate to produce fruit," says Prof. R. J. Barnett of the horticulture department of the Kansas State Agricultural college," and many men would fail as fruit growers even if placed in the Garden of Eden as once befell one of our eminent ancestors."

The home orchard of Kansas has, between the years 1910 and 1920, practically disappeared. Professor Barnett attributes this to diminishing soil fertility, drought, failure to conserve such moisture as was available, and attacks of pests. Kansas, once a state producing a surplus of apples, must now depend on other states for a portion of its supply. The question is, could the home orchard be brought back, and would it be profitable? Professor Barnett answers "yes," but he accompanies his answer with a great many "ifs."

Pails With Small Tops Preferred for Milking

The ordinary milk pail is usually about ten inches high, much wider at the top than at the bottom and holds from twelve to sixteen quarts. An exceptionally well arranged vessel for catching all the foreign matter that may fall from the cow's udder, flanks or belly. Intelligent farmers and dairymen are abandoning these old time pails for the more sanitary small top pails. Pails with small openings in the top reduce the bacterial content approximately 50 per cent. Such pails are not expensive and will last as long as the old style. All milk vessels should be of good material, well tinned and have all the crevices well filled with solder. It is quite difficult or almost impossible to thoroughly clean and sterilize a milk vessel that has deep crevices along the seams.

After thirty-eight years of faithful service with the post office in New York city, Daniel P. Fox retired, and was presented with a leather bag by Postmaster John J. Kiely. He is seen here working on his last piece of mail.

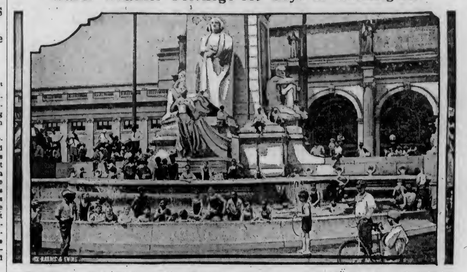
MAJ. J. C. WADDELL

Maj. Jaffies C. Waddell has just assumed his new duties as supervisor of brewery control in the prohibition enforcement unit, succeeding Thomas E. Stone. He is a graduate of West Point and New York University Law school and served in the World war.

Hard Bosses

The easy boss isn't always the best boss. The employer who is exacting but just is the best man to work for. Under him the store employee learns to do things as they should be done. Half-way measures do not go. This is a wonderful schooling for the young fellow who wants to push ahead. The world is filled with workers who can do a job fairly well. What the world wants, says a writer in Good Hardware, is now who can do their work exactly right.

Warm Weather Privilege for Boys of Washington



When Policeman Clark of the Sixth precinct, Washington, chased a flock of bathing youngsters from the Columbus monument fountain pool in front of the Union station he was told by his captain that he had no authority to do so. Result—boys by the hundred enjoying the cooling waters.

Common Cold Is in for Big Battle

Joint Action of Many Sciences Proposed to War on Disease.

New York.—Medical men and fundamental scientists are asked to co-operate in a determined effort to conquer the common cold, which is said to be the most persistent and harmful enemy of mankind, causing more deaths and greater economic waste than any other disease.

The joint attack was suggested by Francis P. Garvan, president of the Chemical Foundation, in a recent address before the American Drug Manufacturers' association, in which he urged that body to bring together physician, pharmacologist, chemist, bacteriologist and pathologist for the purpose of making a co-ordinated study of the common cold and formulating a cure for it. The Drug Manufacturers' association has appointed a committee to co-operate with the Chemical Foundation in instituting the work of research planned.

As in the days of war, scientists in all fields will be asked to pool their knowledge and resources in an exhaustive investigation of the evil to be fought. Each will contribute his share in close co-ordination with the others. In this way all the aspects of the disease will be covered and what is now a scourge may yield to the common attack of experts and cease to be a blight on human health and happiness.

Colleges Will Help.

The 7,000 hospitals and the 400 universities in this country will be asked to become partners in the undertaking. They will become Pasteur Institutes to study the nature of the cold and to use the facilities of their laboratories in such a way as to make each supplement the work of the others. Hospital and laboratory work of this kind will be supported from a common fund to be created for that purpose.

There will be no difficulty in raising the fund, Mr. Garvin thinks. The main task, according to him, is to lead the public to see the stupendous waste in physical energy and economic productiveness which the common cold causes, and induce organizations already existing and amply equipped to merge themselves in a collective endeavor.

In Mr. Garvin's opinion the resources of the whole domain of fundamental sciences are needed to achieve victory. As all sciences overlap, the task of conquering disease is no longer that of the physician alone, but of the chemist, the physiologist, the pharmacologist and the bacteriologist as well. The common cold is a disease that demands the co-operation of all these scientists. It challenges, likewise, the employer, the business man and the parent.

Other Ills Have Yielded.

The pooling of the resources of all the sciences involved, Mr. Garvin believes, can be depended on to accomplish against colds what smaller cooperation has accomplished against other diseases. Scarlet fever, smallpox, tuberculosis, hookworm, yellow fever, diphtheria, typhoid fever and diabetes have thus been subdued. Intelligent interest on the part of the public in any struggle of this sort for human well-being is a requisite of success.

The whole human race is weakened by the common cold. The expectant mother is affected by it and transmits its influence to the child. Because the common cold is regarded as an unavoidable disease, people are inclined to pay little attention to it, though the need to fight it is as urgent as if it were a disease with a terrifying name.

More than half of the expenditure of the hospitals of the country goes toward combating the effects of the common cold. From 60 to 80 per cent of the physician's practice deals with ailments attributable to the same cause. The lion's share of the nation's $500,000,000 drug bill is spent for cold remedies. "Of this amount three-fifths is paid for patent medicines alone, most of which are sold as cold alleviatives."

There are said to be 45,000 drug

items on the market, most of them supposed remedies against the common cold or its effects. Thirty years ago there were 2,700 items on the drug list, all told. The fact that there are so many "remedies" against the cold would seem to indicate that some of them are not remedies at all.

An Enemy of Health.

According to figures available, the ravages of the common cold are far beyond anything imagined, by those who suffer from the disease without paying much attention to it. It compels every man, woman and child to abstain from work for several days every year—some estimates run as high as seven days. It paves the way for other diseases. It imperils and causes the postponement of surgical operations.

During the influenza epidemic all such operations, except in emergency, were delayed two weeks in all the hospitals in the city. This was due to the fear of post-operative pneumonia, which develops after an operation and spreads through a ward rapidly. Ninety per cent of child mortality is due to colds.

The waste caused by common colds in the basically important industries is enormous. Besides suffering direct loss in productivity, these industries are obliged to maintain expensive medical departments, employ large staffs of health workers and engage safety directors to attend to cases that are the outgrowth of colds. They could afford to pay large sums to eliminate or reduce the loss thus entailed.

Considerable work has been done toward ascertaining the nature of the disease. The bacteriologists have spent years in laborious investigation. The medical profession made an exhaustive study of respiratory diseases during the war. The United States public health service, numerous health committees and local health departments as well as insurance companies have contributed to the purely statistical presentation of the problem.

Cause Still a Mystery.

In spite of all attempts to determine the specific cause of the common cold, the cause remains unknown. A cold, as the doctors explain it, is a catarrhal inflammation of the lining of the nose, mouth and throat. It is held by some to be due to infection with some peculiar germ which, as yet has not been found. Some think that this micro-organism is so small that it cannot be detected even by the most delicate instrument. At various times various bacteria have been thought to be the cause of colds, but no definite organism has yet been chosen to bear the blame. Medical authorities generally are not quite agreed as to the bacterial origin of the disease. Evidence is still being collected and weighed.

Others think that the cold is due to chilling, wet feet, wet clothing, exposure, drafts, etc. But people who live in the colder regions of the earth seldom suffer from colds. Eskimos are not subject to coughs and colds, even when exposed to dampness and drafts. They often fall ill, however, after visiting a ship.

Colds are most common in the temperate zone. In this country few persons are immune from them. Not more than fifteen out of every hundred are lucky enough to escape with only one cold a year. The ailment is most frequent in early childhood and least frequent after middle life.

According to Dr. A. R. Dochez of the Presbyterian hospital, who is doing special research in the field, the cold, in itself, is of comparatively little importance. Its chief harm lies in the fact that it predisposes the patient to more serious diseases, such as measles, typhoid fever, scarlet fever and later pneumonia.

How Chemists Can Help.

Chemistry, Doctor Dochez said, can contribute to the fight against the common cold by inventing some antiseptic to be used locally to shorten the life of the bacteria or stop the development of the induced disease.

The aid which chemistry is in a position to lend the physicist grows in scope almost daily. In many instances it has made the very progress of medicine possible. Ether, discovered in the Thirteenth century, began to be utilized as an unesthetic five centuries later. Magnesium sulphate, used for relieving lockjaw, burns, strychnine poisoning, etc., was recognized by medicine only after two centuries. The medicinal properties of angel silfrite became known to the physician 23 years after its discovery by the chemist.

Thus, humanity has continued to suffer unnecessarily because physician, chemist and pharmacologist were not brought together to work out a problem none of them could solve separately.

The complex ailments of the body cannot now be treated by one class of scientists alone. Other groups must take a hand in the work, the labors of all to be co-ordinated and unified.

It will be the duty of the new body sponsored by Mr. Garvin to create the conditions necessary for co-operative research into the nature and the cure of the common cold and other ailments.

Men Without a Country Total 1,000,000 in U. S.

Washington.—The "man without a country" of book fame would have plenty of company were he to get foot on American shores.

More than 1,000,000 persons in the United States, or approximately 1 per cent of the total population, are in the same fix and most of them don't know it.

This revelation is made by Harry E. Hull, commissioner of immigration. The commissioner explains that this total of "nonents" has been created largely by aliens who have overstayed their temporary entries and by tourists who, en route to some other country, stopped off here, found a job and settled down. Many also came over the borders when restrictions were less rigid, lost their original citizenship by remaining here too long and then forgot or ignored American citizenship requirements.

Pray for Rain

Louisville, Ky.—Mark Twain said a lot of people complain about the weather, but he never heard of anybody doing anything about it. They do in Kentucky. Mayor Will of Louisville issued a proclamation and citizens prayed for rain.

Farm Hints

The loss to farmers from infertile eggs is more than $15,000,000 each summer.

* * *

Sudan grass is an excellent hay crop and a few acres should be planted on every farm.

* * *

Horses aren't human but they get thirsty and overheated in hot weather just the same.

* * *

A cow cannot eat enough pasture grass to supply nutriments for 25 pounds of milk.

* * *

At this time of the year some of the dairy feeds can be bought very reasonably. It might be wise to make a dairy budget.

* * *

Cattle on pasture need to be salted regularly.

* * *

Cost accounts point the way to the most profitable results and throw the spotlight on the doubtful ones.

* * *

Dairy farming conserves fertility as about three-fourths of the fertilizing elements found in a dairy cow's feed are voided in the solid and liquid manure.

* * *

This is the proper time of the year for all shepherds to dip their flocks for ticks or lice. If sheep are not dipped it is the feeding of high-priced grain to ticks.

* * *

Do not feed poultry sour milk or buttermilk in metal containers, as the acid in the milk acts on them to form a poison, fatal to chicks. New galvanized iron utensils are particularly bad.

* * *

The New York state college of agriculture at Ithaca, has a new bulletin on the Bang abortion disease in cattle. It is of interest to every dairyman, and anyone can have a copy who will ask for E 137.

PROOF OF OLD TESTAMENT ACCURACY FOUND IN RUINS

Story of Joshua Supported by Excavations in Biblical City of Kirjath-Sepher.

New York.—Science has unearthed new evidence in support of the Old Testament, and has under scrutiny possible new evidence corroborating the New Testament.

Melvin G. Kyle, president of the Xenia Theological seminary in St. Louis, arrived here from an archeological inspection of the excavated ruins of the Biblical city of Kirjath-Sepher (founded by the Ommonites in 2000 B. C. and finally destroyed by Nebuchednezzar, the Chaldean king, in 600 B. C.

Doctor Kyle declared that successive ages of the city, mentioned in the book of Joshua, and now called Tell-Beit-Mirsam by the Arabs, were traced by layers of ashes from the five times it was burned; and by kitchen utensils and rope-worn well stones, placed one upon another.

The city, which Doctor Kyle estimated to have had a peace time population of 5,000 and a war time population of perhaps 15,000, had underneath it rock-hewn rooms for water, food and war supplies. He estimated that the ruins provided a complete account, in agreement with the Bible, of the Canaanites from 2000 B. C. until the exodus and the city's destruction in 600 B. C. The expedition led by Doctor Kyle, which has employed from sixty-five to eighty-five laborers since excavation began, cost but $2,500.

Possible scientific confirmation of the existence of Jesus is sought by Prof. Solomon Zeitlin, It is said in dispatches from Paris, as an incident to examination of a manuscript recently found in Russia. He will go to Russia to study a document said to be a copy in Slavonic of Josephus' "Jewish Wars," presumably written in 80 A. D., in Aramaic.

Extant Slavonic versions of Josephus contain references to Jesus, but their authenticity is questioned by some scientists who believe them to have been inserted by translators.

Scholars hold that if Professor Zeitlin establishes the authenticity of the Russian document, and finds in it a reference to Jesus it will amount to a refutation of claims made in 1835 by the German, Doctor Strauss, that the whole story of Jesus was a myth, as well as claims that the early historians, Josephus, had ignored the existence of Jesus.

THE FEATHERHEADS

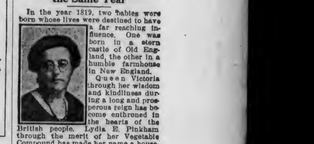
Speaking Frankly



QUEEN VICTORIA LYDIA E. PINKHAM

Two Famous Women Born the Same Year

In the year 1819, two babies were born whose lives were destined to have far reaching influence. One was born in a stern castle of Old England, the other in a humble farmhouse in New England.

Queen Victoria through her wisdom and kindliness during a long and prosperous reign has become enthroned in the hearts of the British people. Lydia E. Pinkham through the merit of her Vegetable Compound has made her name a household word in many American homes.

One of the many women who praise Lydia E. Pinkham's Vegetable Compound is Mrs. Adolph Bratke of 4216 South 13th St., South Omaha, Nebr., who was in a rundown condition for four years before she tried the Compound. "I began to take Lydia E. Pinkham's Vegetable Compound," she writes, "and I have felt my health steadily improving." Mrs. Bratke continued to take the Compound for a year and a half and at the end of that time she found herself in excellent health. "I am feeling fine now and do all my work myself," she wrote in her most recent letter. "I am the mother of six and manage an eight-room house without anybody to help."

KICKING OUTSIDE

Friend—You don't seem to object to your wife attending so many dances away from home.

Hubby—No—it gives her a chance to do her kicking outside.

Wise Little Angler

Jack—Won't you write me when I return home?

Jill—Hardly. You see I have accepted another fellow.

Jack—But even if you are engaged you can drop me a line.

Jill—No; when I catch a fish I stop dropping lines.

BUSINESS WITH A KICK

Johnson—He said he wouldn't be in a business that hadn't any kick.

Smith—What did he take up?

Johnson—Roofscraping.

Easy

"How do you trace a fleeting suspect?"

"Aw, the fastest can't resist the temptation to send back postcards."

True Enough

"I saved myself from a bad accident yesterday."

"You'll never get a medal for that."

SHOWERS BEFORE RA'N

"I never knew a girl to have so many showers before she married."

"Didn't she, though—and she still rejoices."

Passed On

Wife—Some awful swindler gave me a bad half dollar in my change today.

Husband—Pooh! I'll pass it off.

Wife—I paid the milkman with it.

Ten miles an hour was about the best sustained speed that could be made in the first automobile race in the United States.

Political Fidelity

Owen Wister, novelist, was talking about a political fight in Pennsylvania.

"Well, you know," he said, "the average politician's idea of fidelity reminds me of a dog story.

"A fat man dining in a restaurant went out to speak to a friend and on his return gewaiter said to him:

"'That's a very faithful dog you've got there, sir. While you were outside another dog tried to sneak your lobster, but your own dog seared him off with a nip in the leg and ate it himself.'"

Most excuses are lies wrapped in tissue paper.

Example to Parishioners

Sparrows have invaded the parish church at Great Hardfield, Essex, England, and the vicar, Rev. K. E. Cartwright, hopes in the parish magazine "that all other parishioners will be as regular at the services and make their voices heard as clearly."

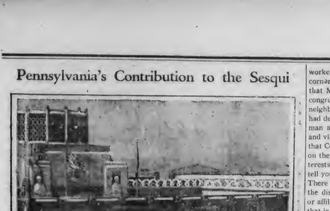
Pennsylvania's Contribution to the Sesqui



Here is the Keystone State's building at the great Sesqui-Centennial International Exposition at Philadelphia, celebrating 150 years of American Independence. In this huge structure Pennsylvania is displaying her progress from the arrival of Penn to the present day. The building is one of the handsomest on the big exposition grounds and has proved a rendezvous for hundreds of thousands of people who have come from near and far to see the magnificent exhibits established by forty-three of the leading nations of the world. The Exposition continues until December 1.

Point of View of Sexes

Three great women, George Eliot, Emily Bronteng and George Sand, studied the psychical genius of woman-like in the depth of her affection. A woman is no more superior to a man than A man is to a woman, says the lecturer, Miss Slime. What is strong in man is weak in woman and vice versa, but in Miss Slime's opinion civilization had and was undergoing three phases. The first, before feminism came in, was the age of chivalry when men treated women as spiritual beings and desired to shield and protect them. The second was an appreciation of women and her desire for equality. The third would be the chivalry of women toward men in an attempt to understand his point of view. . . . Perhaps that will have to be the way of it. Man hasn't been able to get hers.—Cupper's Weekly.

Muffling Oars

Oars are muffled by wrapping something around them where they come in contact with the oarlocks. This is to deaden the noise. When Paul Revere started on his famous midnight ride to Lexington a petticoat was used to muffle the oars of the boat in which he crossed the Charles river. It is referred to in the following unique sentence in "The Battle of April 19, 1775," written by Frank Coburn: "Fear that the noise of the oars in the oarlocks might alarm the sentry, Revere dispatched one of his companions for something to muffle them with, who soon returned with a petticoat, yet warm from the body of a fair daughter of liberty."—Pathfinder 31, xvine.

Link Faith With Charity

Shut not thy purse against always against pointed distress. Act a charity sometimes. When a poor creature (unworthy and visibly such) comes before thee, do not stay to inquire whether the "sense smart cutting" in whose mouth he implores thy assistance have a veritable existence. Make not into the bowels of unwelcome truth, to save a halfpenny. It is good to believe him. If he is not that he pretendeth, give, and under a persuasion that of a family think ((if thou pleasest) that thou hast relieved an indigent bachelor.—Charles Lamb.

Accepting Apology

A lively discussion between two men led to a row whom one told the other he lied. The offended one rushed forward and they clinched. The other man exclaimed: "I reiterate that you're a liar!"

To the astonishment of those around, the aggrieved man let go his hold. "Oh, well," he said, "I accept the apology. If a man says he rutter, says that's all a gentleman can ask."

He did not understand why the bystanders laughed, but the fight was off.—Boston Transcript.

NO. MICHIGAN NEEDS MAN LIKE CAL CAMPBELL

Has Interest of Entire District at Heart and Has No Axes to Grind or Pojects to Father

Stands Fair and Square in Interests for 48 Years as a Resident, of the People Just as he has of Northern Michigan

In seeking the office of State Senator from this district, Cal Campbell, former railroad man and now owner of the Campbell Stone Company at Afton, Mich., has no idea to grind. He has no moral schools to locate, and no pet projects to latuer. He does however, have the utmost faith in the great north country and if nominated and elected will devote his best efforts in its development.

Mr. Campbell, prior to the time he started in the stone business, was a conductor on the Michigan Central Railroad and for years, ran trains into that great wilderness. Gradually it become settled and began to develop. Since the first time Mr. Campbell came into the north (that was back when he was twelve years of age) he has been a lover of this north country and wants to see it made into the great playground that it should be.

It was 48 years ago that Mr. Campbell, then a boy of 12, landed at Gaylord. His family took up residence there and each of the children are now well known throughout the entire north. Mr. Campbell has had ideas about the development of the north. He has watched the progress made by the individual localities. He has watched the growth and has helped in it, but the efforts must be co-ordinated and to this end, Mr. Campbell has pledged himself. The resort property around the great lakes in this region is one of the biggest assets. To get this resort property opened up, the state must take an active interest.

Along the east side of the State from Alpena to Mackinaw City, the State should begin at once to open up a shore line road that will place upon the tax rolls of the counties, hundreds of thousands of dollars worth of taxable property and at the same time will open up to development miles and miles of beautiful shore line property.

The road along Lake Michigan shore from Mackinaw City to Harbor Springs should be built at once.

These are things that Cal Campbell stands for and there are more, but they are not of a selfish nature. He believes that the whole northern section of the State should unite for the common good of the people and the region. He believes that co-operation among the counties of the north, should and will, if properly directed, do more to develop this section of the state, than any other one thing.

Cal Campbell is not a politician. He is not an office holder. He has never before let his name appear as a candidate for anything. He has never asked favors of the Republican party either he has been an active worker in the organization all his life. Mr. Campbell entered the race, not through choice, but because the people of the district urged him to. They wanted a fair and square big, two fisted man to represent them in the legislature. A man whom they could put their faith in and vow that Northern Michigan had a champion from the ground up. Such a man is Cal Campbell and because he is, he agreed after friends had asked him for months to let his name appear on the ballots.

The legislature needs such men as Cal Campbell who will stand squarely for the things Northern Michigan needs, and Northern Michigan needs such a man in the legislature.

The people of this district can therefore work to their own interest and the interests of the entire north, if they will but stand together and elect a man as senator who will represent the entire district. Such a man is Cal Campbell of Indian Rister. In the 48 years he has lived in Northern Michigan, no man has ever said he was not fair, square and above board. Can the people of this great playground ask for more in a man who is to represent them? Let's forget personal prejudices and elect a man who will do something for Northern Michigan in the next two years.

Golf Widow's Refuge

An Atchison woman sees so little of her husband, who is a golf player, that she will become a foreign missionary.—Atchison Globe.

Newspaper Gets New Ideas About Culture

Most of us have been a bit hazy as to just what culture is. We have perhaps generally taken our cue from Matthew Arnold, who had a notion that culture involved knowing the best that had been thought and known, that it was the pursuit of sweetness and light, and that its motto should be to make the rough and stiff of today smooth. But the address of Mr. John Cowper Powys on the subject expands our ideas, the Kansas City Times comments. We are informed that the cultured person is detached and sophisticated, that he defends himself from boredom by saying "really! Indeed! How interesting!" That he is capable of pronouncing friends, finally, church, that he escapes from the world by reading the classic authors. Finally, we infer that a touch of indigestion is desirable in order to keep the cultured one at the proper pitch of dissatisfaction with the world. Otherwise he might get to enjoying life as Robert Browning did. Well, we always are glad to enlarge our experience and whittle down the edges of our ignorance. Especially are we consoled to learn that when we feel most like the human ewe, when we are unusually disagreeable, and fail of spleen, then are we most cultured.

These Might Be Heard if Optimism Prevailed

"Fire? Fiddlesticks, young man, booklet says this hotel is absolutely fireproof. Go away and let me sleep."

"What's this—from the income tax bureau? Good! They probably are sending me a refund."

"I don't seem to be able to get central, Mary, but I'm sure those burglars won't be through in the cellar for some time yet."

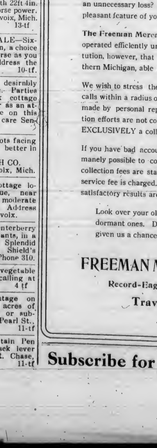
"It's a good thing Jack has gone over to Gretna. He'll appreciate me all the more after he's tired of her."

"Lots of time, George dear. Just try again and give her a little more gas. I'll at tight will stop rather than hit us."

"I feel I'm going to lose my petticoat before mother block, but I'll probably look simply stunning without it."

"Ten years in Sing Sing? Thank you, judge. You always wanted to wear a light suit, but I never had the courage."

"Triplets? Hot dog! That just completes the children's baseball nine!"—Exchange.



THE THEATRE

When father starts "stepping" does he ever stay at home by the fireside? That's the question answered in "Dancing Mothers," the new Paramount picture which comes to the Palace theatre Tuesday and Wednesday, Aug. 24-25. And the answer would seem to be, that, although this may have been the correct thing to do years ago when driving a horse and buggy was considered the height of fashion, No sir, in the words of the song, "Mama goes where papa goes, or papa don't go out to night!" So—we have the situation of a dancing mother who falls in love with her daughter's bachelor friend. And then—but you'd better see the picture in order to find out what happens.

A thrilling story of the Kentucky mountains with a little New York movie actress hiding from justice and causing a tremendous conflict between two powerful clans—such is "The Runaway," a Paramount production which comes to the Majestic theatre, Tuesday and Wednesday, Aug. 24-25.

The mysterious shooting of a wealthy young New Yorker in a Tennessee city, a girl's flight from the scene of the tragedy, her plea to a young mountaineer to shelter her and the drama that results when the "dead" man appears in the mountain settlement seeking vengeance, lend suspense to the story.

Paulette Duval, Paris dance star, will be seen in support of Corinne Griffith in her latest 1st National feature, "Mile. Modiste," at Palace theatre, Thursday and Friday, Aug. 26-27.

The dancer has been seen in a number of American pictures here. One of her recent being "Spangles" of Norma Talmadge in "The Lady."

An unusually popular group of screen players will be seen in support of Buck Jones when his latest Wm. Fox production, "A Man From Square," comes to the Majestic Theatre, Saturday and Sunday, August 21-22.

Vilna Banky, the Hungarian Rhapsody of the screen, is once more appearing opposite Rudolph Valentino in "The Son of the Sheik," his new scarring photoplay which comes to the Palace theatre next Sunday and Monday, Aug. 23-23.

By Any Other Name

A collector of antiques was taking a valuable Queen Anne mirror to his home in Texas.

"You can't take that into the customs with you, sir," said an official. "It must go in the guard's van."

"But it is very valuable, and may get smashed. Can't you let me take it in?" asked the collector.

"You afraid not," came the inexorable reply, "unless, of course, you take a dog ticket for it."

So the mirror duly traveled as a dog.

Variation in Heart Beats

The average rate of heart beat in an adult man is about 72 a minute and is somewhat faster in women, it varies, however, so that in some individuals it may go as low as 100 a minute. Shortly before and after birth it averages from 120 to 140. During extreme age its frequency is increased. It is influenced by many conditions of body, health and environment, such as sleep, position, temperature, meals and emotions. Exercise may increase it to 200 or more.

Diogenes and Alexander

The interview between Diogenes and Alexander the Great is supposed to have occurred at Corinth. The monarch asked the cynic philosopher whether there was anything he could do for him. Diogenes replied that the only favor he had to ask of the prince was that he would not stand between him and the sun. To reply Alexander exclaimed: "If I were not Alexander, I would be Diogenes!"

BOYNE CITY BELLAIRE

Mr. Business Man!

What About Your Profits?

Are many of them represented on your books as dormant or dead accounts? Are you usually charging off these bad accounts as uncollectable? If so, are you not causing yourself an unnecessary loss? Isn't it after all, the one and only unpleasant feature of your business?

The Freeman Mercantile Agency is a bonded establishment, operated efficiently under the laws of the state. It is an institution, however, that has representatives scattered over Northern Michigan, able to give personal service to every call.

We wish to stress the "personal" element of our service. All calls within a radius of a hundred miles of Traverse City are made by personal representatives of this agency. Our collection efforts are not confined to letter writing. Our business is EXCLUSIVELY a collection business.

If you have bad accounts, turn them over to us. It it is humanely possible to collect these accounts, we will do it. Our collection fees are standard. Where no collection is made, no service fee is charged. Our commission is exacted only where satisfactory results are obtained

Look over your old accounts. List the questionable, or dormant ones. Do not charge them off until you have given us a chance to prove what can be done with them

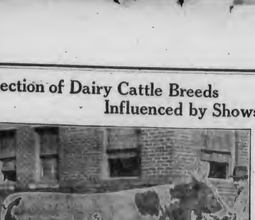
Selection of Dairy Cattle Breeds Influenced by Shows



A good typical Ayrshire sire *Putting on the finishing touches*

Many a man who is undecided as to the breed of dairy cattle that he will select has been influenced in making his decision by the animals of a particular breed that he has seen in public.

The individual breeder secures a great deal of advertising as the result of exhibiting at fairs, or in offering good animals at public sales. It gives people a chance to see and know the kind of stock that a man is breeding and paves the way for future business.

It is essential that special care and attention be given dairy animals fair to be exhibited or sold. Exhibiting and selling animals publicly in their every day clothes is poor advertising and puts them at a disadvantage. When the competition is keen, it is the last few weeks to put a dairy animal in good show condition and what applies to fitting for show applies as well to fitting for sale.

It is important that the dairy animal to be exhibited or sold be in good flesh. A good coat of hair is desirable to also. Extremes must be avoided and indicates that the animal is thrifty and in good health. Dairy animals being fitted need extra feed.

Stalling and blanketing are great aids in putting the hair and hide in condition. By stalling in comfort the animal is protected from the hot sun which makes the hide harsh and stiff to the touch. A roomy box stall that is kept clean and well bedded provides desirable quarters. Continuous blanketing helps keep the animal clean, evens up the hide, thus improving its handling qualities and makes the hair lay in the direction the blanket need not be expensive it must be tied on securely.

Every dairy animal that is to be exhibited should have the hair clipped from the entire body about fifteen weeks previous to the date of the show or sale. This will get rid of the old hair and allow a new, even growth to develop which will greatly improve the appearance and increase the selling value of the animal.

A point often overlooked in the preparation of a dairy animal for show or sale is that of training to lead properly and stand right. An untrained animal simply cannot be shown to good advantage if it comes into the hands of the attendant to exhibit it properly. A little time and patience spent in training to handle properly will save effort and embarrassment at the show or sale and increase the financial return.

While in the show or sale ring, the man in charge of an animal should have only such things in mind, namely that of showing the animal to advantage. By this is meant that when it stands, its feet are properly placed, the head straight and head erect. The movement of the feet of the attendant with animal should be as graceful as possible. Until the ribbons are placed or the auctioneer's hammer falls, take no chances.

A Lecture on

CHRISTIAN SCIENCE

Entitled

Christian Science: The Eternal Law of Love

by

John J. Flinn, C. S. B.
of Evanston, Illinois

Member of the Board of Lectureship of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

is basic to Jewish and Christian theology alike that God is the primal and governing Cause; that He, and He alone, holds in hand the destinies of men, of peoples, and of nations; that with Him and in Him exists the definite and final settlement of every question that affects the welfare of humanity; that His wisdom is sufficiently ample, His power sufficiently far-reaching, and His love sufficiently broad and deep to meet every demand that may be made upon Him looking to the protection, comfort, and happiness of His obedient children. While holding to all this, or theoretically holding to all this, modern, spenking generally, with the single exception of Christian Science, stop short at more relief in or assertion of these truths and go outside of God for help when faced by difficulty or threatened with anger. Relying as it does upon His allness, no one can reasonably question the logic of the Christian Science position that God's children require no other help than He is able and willing to render them at all times and in all their difficulties and troubles.

AN INVARIABLE FAITH

Christian Science casts aside the theoretical and adopts and clings steadfastly to the practical and the proved in its entire utilizing power, the omnipresence, omniscience, and omnipotence of God. It finds no place and no excuse for modifications, exceptions, or compromises in its estimate of God's infinite nature; it accepts Him without limitation; it takes Him at His word; and it has proved and is proving, through this attitude toward the creator, and through the understanding and demonstration which accompany it, that His boundless love not only can but actually does meet every human need, when faithfully sought, scientifically found, and unconditionally accepted.

Now an ever, perhaps now more than ever, is man's extremity God's opportunity. In affirmation of the many assurances which revealed religion has held out, and still holds out, to the doubting and disturbed, Mary Baker Eddy strikes the very highest note of positive faith when she declares in our textbook, "Science and Health with Key to the Scriptures," that "divine Love always has met and always will meet every human need" (Science and Health, p. 494). This crystalized epitome of her entire philosophy embodies the greatest fact discoverable in ancient or in modern theology. In to twelve words is here condensed all that is revealed in the Old and New Testaments; all that is preached, promised, and taught by God's prophets, by Christ Jesus, by the disciples and the apostles of the Master, by all the spiritually-inspired men and women of all the ages. Those of us who have long studied and practiced Christian Science, who have time and again benefited by its teachings and demonstrated its truths, are so convinced of its efficacy as to hold, without limitation or reservation, that every question of human concern, in the settlement of which parliaments, congresses, conventions, and conferences are usually, conspicuously, and sadly failed, can be solved by the scientific application of spiritual law, the eternal law of Love.

THE ALL-SUFFICIENCY OF GOD

It has always been, and is to-day, a professed fundamental of monotheistic religious creeds, sects, and denominations that there is but one God and that He is omnipresent, omniscient, and omnipotent—all-presence, all-intelligence, all-power. It provides desirable quarters. Continuous blanketing helps keep the animal clean, evens up the hide, thus improving its handling qualities and makes the hair lay in the direction the blanket need not be expensive it must be tied on securely.

Every dairy animal that is to be exhibited should have the hair clipped from the entire body about fifteen weeks previous to the date of the show or sale. This will get rid of the old hair and allow a new, even growth to develop which will greatly improve the appearance and increase the selling value of the animal.

A point often overlooked in the preparation of a dairy animal for show or sale is that of training to lead properly and stand right. An untrained animal simply cannot be shown to good pobints to advantage if it comes into the hands of the attendant to exhibit it properly. A little time and patience spent in training to handle properly will save effort and embarrassment at the show or sale and increase the financial return.

While in the show or sale ring, the man in charge of an animal should have only such things in mind, namely that of showing the animal to advantage. By this is meant that when it stands, its feet are properly placed, the head straight and head erect. The movement of the feet of the attendant with animal should be as graceful as possible. Until the ribbons are placed or the auctioneer's hammer falls, take no chances.

Not What It Used to Be

When it comes to the game of marbles we elders have a right to talk about the "good old days," with regret," said the man who used to dream of cornering the marble output. "We used to have a dozen different varieties of the game, and all of them took more skill than the games kids play now. 'Aggies' and 'alleys' between the thumb and finger is a lost art; today the players toss them. Another thing, there are only two kinds of marbles for modern youngsters to buy, but we used to have 'agates,' 'stonies,' 'crockies,' 'milk agates,' 'steys,' 'chinas,' and a half dozen other kinds. Now a boy can only hope to amass numbers; then he could use discrimination in keeping the ones he admired and using the others for play."—Detroit News.

SUICIDE EPIDEMIC SWEEPING GERMANY

Economic Depression Given as the Cause.

Berlin.—A grim and mysterious epidemic of suicides is sweeping Germany. Many of the leading dailies now carry a regular section tucked away in an obscure corner of the paper and bearing the caption: "Die Selbstmord-Epidemie"—the epidemic of self-destruction. In this the daily list of suicides is given, many of them receiving only a line. The more sensational cases get a short notice of ten to twenty lines. One has the impression that many cases are not reported at all, or, at least, not published. Epidemics grow through imitation, and this the authorities wish to avoid.

The causes of the abnormal rate of suicides in present-day Germany are, no doubt, the widespread economic depression, the increased tempo of modern life, the depletion of nerve force through the war and the tremendous financial and personal losses the war brought about, the shaken condition of the social structure, and a general fear of life which has overtaken thousands. All these factors are augmented, in the case of the German, by his tendency to brood, to ponder the riddles of existence, to regard life and its trials and problems from the angle of some particular philosophy of Weltanschauung.

Where Pessimism Lingers.

Suicide has a distinct vogue in places upon the rocks of experience, the man himself often goes to places where, and at a time when, suicide literature is driven to the last positive set of which he can think in terms of self-annihilation. It is also often in the nature of a "grand gesture"—as when he decides upon the whole life and palpable world—for himself.

Suicide has at times even a symbolic tinge in Germany—sentimental remnants from the days of Goethe's "Sorrows of Young Werther," of philosophical pessimism from the works of Schopenhauer or Von Hartmann. In no other country are young lovers so prone to end their lives if parental permission to marry is not forthcoming. In no other country is the proportion of child suicides so great. These cases of juvenile self-destruction usually naturally arise from fear of punishment at home or at school, fear of disgrace, or morbid conceptions of honor connected with failure to pass examinations at school.

But it is not only the poor, the disappointed, the lovelorn or the bereaved who lay violent hands upon themselves in the German republic. The list of prominent, well-to-do, apparently happy people who have recently ended their lives in Germany is appalling. To mention but a few cases: there is Paul Cassirer, the art dealer, brother of the famous German actress Tilla Durieux, who shot himself in the lawyer's office, whither he had gone with his wife and daughter to arrange a famous settlement. Within a few hours he was found lying after he had vainshed, under pleas to the peace of mind denied.

Plunged into Ice Cavern.

There is also the mystery of the death of Jarkovska, a beautiful and celebrated star of the National opera at Berlin, in private life Frau Brauner, who went to Zermatt, in Switzerland, some months ago and threw herself into the ice-bound ravine under the Matterhorn. Even the mountaineers, not the slightest cause, her body coming to light a few weeks ago after the melting of the ice. There is the case of Carl Hau, once a well-known lawyer, who had been accused of murdering his mother-in-law and sentenced to life imprisonment twenty years ago. He was recently pardoned and began writing and publishing his prison memoirs in a big Berlin daily. The state attorney of Wurttemberg reopened prosecution against him. He fled the country to Italy and threw himself into the sea from a train.

Strange inquiries are of daily occurrence. Day after day the newspaper reader is confronted with such little notices as this: "Suicide of an Aged Married Couple." And then the world, heedless details—the cause for the grim act, often described by the word "unbrauchbesorgen," food worries.

Cards Amundsen Mailed 13 Years Ago, Delivered

Chicago.—As Capt. Roald Amundsen swept over the northern roof of the earth recently a scrap of mail, from Flidnut reached Chicago, bearing postcards mailed on his polar ship, the Fram, thirteen years ago.

Stanley G. Swanberg, Wilmette, received one of the cards. It was sent to him by a friend, who has since died eight years, and started on its journey to Vadsoe harbor in the Coast zone. December 4, 1913. Swanberg explained that the card was one of a number Amundsen gave visitors to his ship. It bore the printed note: "Will be carried across the polar area and afterward conveyed by post to the address."

The cards bore two postal stamps marked in polar latitude, but nothing further to indicate their history.

Movies Help

Paris.—Movies are keeping French women away from the saloons. The pictures and improved housing, thinks Professor Labbe of the Academy of Medicine, are doing more than anything else to decrease alcoholism in the country.

Hardly Worth While

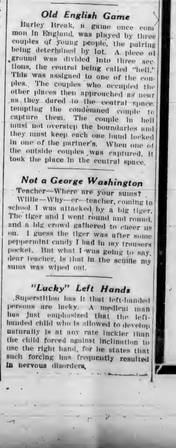
When John L. Green fell twenty feet from a gas plant under construction at Harrison, N. J., his fellow-workers believed him seriously injured and had him rushed to the hospital. Physicians there took thirty minutes to undress him, for Green wore five sweaters, two suits of underwear, two coats, three pairs of trousers, and two pairs of socks. After the excavation they found only a sprained ankle.—Indianapolis News.

Why I'm going to the Greater MICHIGAN STATE FAIR

By Uncle Joe

HOW FAIRS GOT STARTED.

The other day I got curious about fairs, so I got reading about them. Fairs are pretty old. Princes and magistrates used to encourage Fairs in Europe so people could trade goods at them. Stourbrook Fair was started by King John in 1204. The first agricultural fair in this country was started by Elkanah Watson, of Albany, New York, in 1810. The Michigan State Fair was founded in 1849 at Detroit. It moved later to Adrian, then to Lansing, and then back to Detroit again. Its primary purpose is educational. You can learn a lot at the State Fair. You can get a picture of what the farmers of the state are accomplishing and a lot of new ideas and inspiration for the coming year. That's why I'm going to it in September.



PROGRESS OF THE GREATER MICHIGAN STATE FAIR

The Agricultural Fair is the outstanding feature of the Fair in this country. The Greater Michigan State Fair is primarily a Farmer's Fair but it is of equal interest to the city man. Every citizen of Michigan should be proud of the wonderful resources of this state. Although the agricultural prospects, its rich natural resources, and vast future possibilities. The thousands who attend the Fair in September will learn a great deal about their state as well as enjoy a very good time.

"Barefoot Boy" Still Lives

The original "Barefoot Boy," referred to by John Greenleaf Whittier in his immortal poem, still has his "cheek of tan." He is Francis D. Morrison, a boy who was employed by the [illegible] after seeing about the Whittier home in Danvers, Massachusetts.

Many years ago, when little Franklin Marston picked blueberries and gathered up the fallen leaves about Whittier's farm, Oak Knoll, his poet friend was inspired by the youngster's bare feet, his turned-up trousers, his cheek of tan and his merry whistle tunes.

Though Marston now has aged and wears a tuil beard he still enjoys taking off his shoes and going barefooted when he journeys through the most unexpected woodlands. Throughout his life he has lived in the open and beneath his beard still may be seen the "cheek of tan" which helped inspire Whittier.

The Commander

It was early in the morning. The lumber camp the massive portals, sweeping the interior with a piercing glance. Ten men sprang to their places and came to a swift attention, before his severe scrutiny. There was a tense silence—no word was uttered. He calmly passed down the row of motionless men standing at attention.

Then, with a sudden energy, he flung off his hat, threw off his coat, and cast off his collar. He swung around, he faced the waiting line. His face was dark, and his glance was keen and stern. He picked his man. He advanced with a firm but cautious tread. He stepped two feet away. In a low voice, full of meaning, he said: "I want a shave and a haircut."—Michigan Gargoyle.

Old English Game

Barley Break, a game once common in England, was played by three couples of young people, the pairing being determined by lot. A piece of ground was divided into three sections, the central being called "hell." This was assigned to one of the couples. The couples who occupied the other places then approached as near as they dared to the central space, tempting the condemned couple to capture them. The couple in hell must not overstep the boundaries and they must keep each one hand locked in one of the partner's. When one of the outside couples was captured, it took the place in the central space.

Not a George Washington

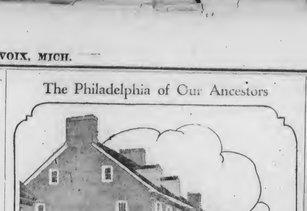
Teacher—Where are your sums?

Willie—Why—er—teacher, coming to school I was attacked by a big tiger. The tiger and I went round and round, and a big crowd gathered to cheer us on. I guess the tiger was after some peppermint candy I had in my trousers pocket. But what I was going to say, dear teacher, is that in the scuffle my sums was wiped out.

"Lucky" Left Hands

Superstition has it that left-handed persons are lucky. A medical man but just emphasized that the left-handed child who is allowed to develop naturally is at any rate luckier than the child forced against inclination to use the right hand, for he states that such forcing has frequently resulted in nervous disorders.

The Philadelphia of Our Ancestors



Here is shown a section of "High Street," a reproduction of Philadelphia's famous Market street in the days of 1776. It is one of the outstanding features of the Sesqui-Centennial International Exposition now being held in Philadelphia to commemorate the 150th anniversary of the signing of the Declaration of Independence. Every building has been built to actual size and in actual architectural detail. The furnishings of each building are exact reproductions of those used in the Revolutionary days. Many of the pieces on display are the originals and today are worth thousands of dollars because of their historic value. The Exposition continues until December 1.

Needle Long in Body

Mrs. John H. Osborn of Delevan Dam, Pa., was only a child when she left a needle in the side of her dress and later, when leaning against a banister, pulled the piece of steel into her side. Doctors were unable to get it and it gave her pain at long while, but then she forgot all about it. Recently, thirty-one years later, she felt an itching on the side of one leg and with tweezers pulled out the long lost needle.

Average Fleece Weight

The fashion of national industry says that the average fleece weight for the United States is approximately seven and a half pounds. There is a great difference between the Southdown and the Rambouillet breeds, the wool production varying in Southdowns from six to seven pounds; in well-bred and well-fed Rambouillet, from twelve to fifteen pounds.

For Sleeplessness

Sleeplessness can be cured by putting large imaginary figure 3s on a large imagined black wall with imaginary brush and can of white paint, says Doctor Farrow in the Journal of Neurology and Psychology. It is almost impossible to remain awake, he says, after three figures have been painted. He usually falls asleep after he has finished painting only one or two figures; but if not, almost invariably after the third one.

Slightly Late

A nervous young gentleman, all a-flutter over the prospect of attending a party in a nearby city, rushed breathlessly into the railroad station at Rang Center.

"When does the first train leave for Galesburg?" he asked of the white haired station agent who was perched on a truck in the baggage room.

"Son," replied the agent, "the first train left for Galesburg in 1871."—exchange.

Apple Tree's Productivity

The apple tree is the longest lived and one of the largest and most productive of all American common fruit trees. A large apple tree often produces from ten to twenty barrels of fruit a season.

Pennsylvania's Contribution to the Sesqui

Here is the Keystone State's building at the great Sesqui-Centennial International Exposition at Philadelphia, celebrating 150 years of American Independence. In this huge structure Pennsylvania is displaying her progress from the arrival of Penn to the present day. The building is one of the handsomest on the big exposition grounds and has proved a rendezvous for hundreds of thousands of people who have come from near and far to see the magnificent exhibits established by forty-three of the leading nations of the world. The Exposition continues until December 1.

Point of View of Sexes

Three great women, George Eliot, Emily Browning and George Sand, said the principal genius of woman lies in the depth of her affection. A woman is no more superior to a man than a man is to a wonsgp, says the lecturer, Miss Slime. What is strong in man is weak in woman and vice versa, but in Miss Slime's opinion civilization had and was undergoing three phases. The first, before feminism came in, was the age of chivalry when men treated women as spiritual beings and desired to shield and protect them. The second was an appreciation of woman and her desire for equality. The third would be the chivalry of women toward man in an attempt to understand his point of view. . . . Perhaps that will have to be the way of it. Man hasn't been able to get hers.—Clipper's Weekly.

Muffling Oars

Oars are muffled by wrapping something around them where they come in contact with the oarlocks. This is to deaden the noise. When Paul Revere started on his famous midnight ride to Lexington a petticoat was used to muffle the oars of the boat in which he crossed the Charles river. It is referred to in the following unique sentence in "The Battle of April 19, 1775," written by Frank Coburn: "Near that the noise of the oars in the oarlocks might alarm the sentry, Revere dispatched one of his companions for something to muffle them with, who soon returned with a petticoat, got warm from the body of a fair daughter of liberty."—Pathfinder Magazine.

Link Faith With Charity

Shut not thy purse-strings always against painted distress. Act a charity sometimes. When a poor creature (outwardly and visibly such) comes before thee, do not stay to inquire whether the "sweep small children" whose cause he implores thy assistance have a veritable existence. Hake not into the bowels of unwelcome truth, to save a halfpenny. It is good to believe him. If he is not that he pretended, give, and under a persuasion father of a family think (if thou pleasest) that thou hast relieved an indigent bachelor.—Charles Lamb.

Accepting Apology

A lively discussion between two men led to a row when one told the other he lied. The offended one rushed forward and they clinched. The other man exclaimed: "I reiterate that you're a liar!"

To the astonishment of those around, the aggrieved man let go his hold. "Oh, well," he said, "I accept the apology. If a man says he reiterates that's all a gentleman can ask."

He did not understand why the bystanders laughed, but the fight was off.—Boston Transcript.

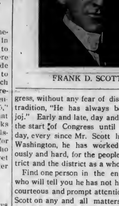
FRANK D. SCOTT ALWAYS ON THE JOB IN WASHINGTON

Every Request From District Had Immediate Personal Attention of Congressman.

Results of Efforts are Reflected In All Parts of District.

When the voters of this district sent Frank D. Scott to Congress to represent their interests in Washington, they had above all others, one outstanding hope: that he would be on the job at all times to look after the needs of the district.

The question of whether or not their hope in this regard has been realized finds a ready answer in every nook and corner of the district. If Congressman Scott has accomplished nothing more, one thing can be said of his efforts in Congress, without any fear of dispute or contradiction, "He has always been on the job." Early and late, day and night, from the start of Congress until the closing day, every since Mr. Scott has been in Washington, he has worked conscientiously and hard, for the people of his district and the district as a whole.



FRANK D. SCOTT

Find one person in the entire district who will tell you he has not had the most courteous and prompt attention from Mr. Scott on any and all matters taken up with him in Washington. Find, if you can, one person or group of persons who can truthfully say, Mr. Scott has neglected or slighted any of their requests, no matter how small or trivial. It can be emphatically stated, that not one person in the entire district, regardless of political affiliations, has ever been ignored or slighted in any request.

Congressman Scott has always had at heart, the interest of his constituents and the district as a whole. Every hour of every day and night, Mr. Scott has been ready and willing to serve the district and its people. Every ounce of energy he possesses has been actively put forth in behalf of the district.

Those people who may not have had occasion to ask Mr. Scott's aid, likely do not know how quickly and how earnestly he responds to their requests, but there are in this district, thousands of people and many cities, towns and villages that have asked Mr. Scott's support. Ask any of these, whether or not Mr. Scott was on the job with his coat off or whether he ignored their requests. Ask them if he left any thing undone that could have worked in their behalf. Every nook and corner of the entire district reflects things that Mr. Scott has accomplished while congressman. There are right in your neighborhood, countless people who have had dealings with Mr. Scott as congressman and these people, the cities, towns and villages, all bear out the statement, that Congressman Scott has been active, on the job, working constantly in the interests of the district. And they will also tell you that he generally gets results. There is one thing which every voter in the district, regardless of political belief or affiliation, is willing to concede, and that is, Congressman Scott stands ready at all times to take off his coat and do any job the people of the district may request. What more could be asked of any congressman? If this is the kind of a Congressman you wish, you should do your part to help nominate him Sept. 14.

[Political Announcement]

NO. MICHIGAN NEEDS MAN LIKE CAL CAMPBELL

Has Interest of Entire District at Heart and Has No Axes to Grind or Pojects to Father

Stands Fair and Square in Interests for 48 Years as a Resident of the People Just as he has of Northern Michigan

In seeking the office of State Senator from this district, Cal Campbell, former railroad man and now owner of the Campbell Stone Company at Afton, Mich., has no axes to grind. He has no normal schools to locate, and no pet projects to foster. He does however, have the utmost faith in the great north country and if nominated and elected will devote his best efforts in its development.

Mr. Campbell, prior to the time he started in the stone business, was a conductor on the Michigan Central Railroad and for years, ran trains into that great wilderness. Gradually it became settled and began to develop. Since the first time Mr. Campbell came into the north (that was back when he was twelve years of age) he has been a lover of this north country and wants to see it made, into the great playground that it should be.

It was48 years ago that Mr. Campbell, then a boy of 12, landed at Gaylord. His family took up residence there and each of the children are now well known throughout the entire north. Mr. Campbell has had ideas about the development of the north. He has watched the progress made by the individual localities. He has watched the growth and has helped in it, but the efforts must be co-ordinated 'and to this end, Mr. Campbell has pledged himself. The resort property around the great lakes in this region is one of the biggest assets. To get this resort property opened up, the state must take an active interest.

Along the east side of the State from Alpena to Mackinaw City, the State should begin at once to open up a shore line road that will place upon the tax rolls of the counties, hundreds of thousands of dollars worth of taxable property and at the same time will open up to development miles and miles of beautiful shore line property.

The road along Lake Michigan shore from Mackinaw City to Harbor Springs should be built at once.

These are things that Cal Campbell stands for and there are more, but they are not of a selfish nature. He believes that the whole northern section of the State should unite for the common good of the people and the region. He believes that co-operation among the counties of the north, should and will, if properly directed, do more to develop this section of the state, than any other one thing.

Cal Campbell is not a politician. He is not an office holder. He has never before let his name appear as a candidate for anything. He has never asked favors of the Republican party altho' he has been an active worker in the organization all his life. Mr. Campbell entered the race, not through choice, but because the people of the district urged him to. They wanted a fair and square big, two fisted man to represent them in the legislature. A man whom they could put their faith in and know that Northern Michigan had a champion from the ground up. Such a man is Cal Campbell and because he is, he agreed after friends had asked him for months, to let his name appear on the ballots.

The legislature needs such men as Cal Campbell who will stand squarely for the things Northern Michigan needs, and Northern Michigan needs such a man in the legislature.

The people of this district can therefore work to their own interest and the interests of the entire north, if they will but stand together and elect a man as senator who will represent the entire district. Such a man is Cal Campbell of Indian River. In the 48 years he has lived in Northern Michigan, no man has ever said he was not fair, square and above board. Can the people of this great playground ask for more in a man who is to represent them? Lee's forget personal prejudices and elect a man who will do something for Northern Michigan in the next two years.

Newspaper Gets New Ideas About Culture

Most of us have been a bit busy as he just what culture is. We hear perhaps generally taken our cue from Matthew Arnold, who had a notion that culture involved knowing the best that has been thought and known, that is to say the pursuit of sweetness and light, and that its motto should be to make the reason and will of God prevail. But the editor of Mr. Arnold's Prosser Powys on the subject expands our ideas. He knows Culture when he bumpers by saying, "Really! Indeed! How interesting!" That is capable of pronouncing friends, family, church, business. That he escapes from the world by reading the classic authors. Finally, we infer that a touch of indigestion is desirable in order to keep the cultured one at the proper pitch of dissatisfaction with the world. Otherwise he might get to enjoying life as Robert Browning did. Well, we always are glad to enlarge our experience and whittle down the edges of our ignorance. Especially are we consoled to learn that when we feel most like the human crab, when we are unusually disagreeable, and full of spleen, then are we most cultured.

These Might Be Heard

If Optimism Prevailed

"Pfire! Phillistikis, young man, the booklet says this hotel is absolutely fireproof. Go away and let me sleep."

"What's this—from the income tax bureau? Good! They probably are sending me a refund."

"I don't seem to be able to get central, Mary, but the operation must have won't be through in the cellar for some time yet."

"It's a good thing Jack has gone over to Gloria. He'll appreciate me all the more after he's tired of her."

"Lots of time, George dear. Just try again and give her a little more gas. I'll at truth will stop rather than hit me."

"I feel I'm going to lose my petticoat before another block, but I'll probably look snappier without it."

"Two years in Sing Sing?—Thank you, Judge. I've always wanted to wear a light suit, but I never had the courage."

"Triplets? Hot dog! That just completes the children's baseball nine!"—Exchange.

You Can Call MONROE by Long Distance

for 70c from CHARLEVOIX

AFTER 8:30 P. M.

Here are the rates:

THE THEATRE

When father starts "stepping" does mother stay at home by the fireside? That's the question answered in "Dancing Mothers," the new Paramount picture which comes to the Palace theatre Tuesday and Wednesday, Aug. 24-25. And the answer would seem to be, that, although this may have been the correct thing to do years ago when driving a horse and buggy was considered the height of fashion. No sir, in the words of the song, "Mama goes where papa goes, or papa don't go out tonight!" So—we have the situation of a dancing mother who falls in love with her daughter's bachelor friend. And then—but you'd better see the picture in order to find out what happens.

A thrilling story at the Kentucky mountains with a little New York movie actress hiding from justice and causing a tremendous conflict between two powerful clans—such is "The Runaway," a Paramount production which comes to the Majestic theatre, Tuesday and Wednesday, Aug. 24-25.

The mysterious shooting of a wealthy young New Yorker in a Tennessee city, a girl's flight from the scene of the tragedy, her plea to a young mountaineer to shelter her and the drama that results when the "dead" man appears in the mountain settlement rocking vengeance, lend suspense to the story.

Paulette Duval, Paris dance star, will be seen in support of Corinne Griffith in her latest First National feature, "Mlle. Modiste," at Palace theatre, Thursday and Friday, Aug. 26-27.

The dancer has been seen in a number of American pictures here. One of her recent being in support of Norma Talmadge in "The Lady."

An unusually popular group of screen players will be seen in support of Buck Jones when he appears in the Fox production, "A Man Four-Square," comes to the Majestic Theatre, Saturday and Sunday, August 21-22.

Vilna Blanky, the Hungarian Rhapsody of the screen, is once more appearing opposite Rudolph Valentino in "The Son of the Sheik," now starring photoplay which comes to the Palace theatre next Sunday and Monday, Aug. 23-23.

By Any Other Name

A collector of antiques says taking a valuable Queen Anne mirror to his house by train.

"You can't take that into the carriage with you, sir," said an official. "It must go in the guard's van."

"But it is very valuable, and may get smashed. Can't you let me take it in?" asked the collector.

"I'm afraid not," came the inexorable reply, "but of course, you take a dog ticket for it."

So the mirror duly traveled as a dog.

Variation in Heart Beats

The average rate of heart beat in an adult man is about 72 a minute and is somewhat faster in women. It varies, however, so that in some individuals it may be 40 to 100 a minute. Shortly before and after birth it averages from 120 to 140. During extreme age its frequency is increased. It is influenced by many conditions of bodily health and environment, such as fright, fighting, temperature, meals and emotions. Exercise may increase it to 200 or more.

Diogenes and Alexander

The interview between Diogenes and Alexander the Great is supposed to have occurred at Corinth. The conquerer asked the cynic philosopher whether there was anything he could do for him. Diogenes replied that the only favor he had to ask of the prince was that he would not stand between him and the sun. In reply Alexander exclaimed: "If I were not Alexander, I would be Diogenes!"

Mr. Business Man!

What About Your Profits?

Are many of them represented on your books as dormant or dead accounts? Are you usually charging off these bad accounts as uncollectable? If so, are you not causing yourself an unnecessary loss? Isn't it, after all, the one and only unpleasant feature of your business?

The Freeman Mercantile Agency is a bonded establishment, operated efficiently under the laws of the state. It is an institution, however, that has representatives scattered over Northern Michigan, able to give personal service to every call.

We wish to stress the "personal" element of our service. All calls within a radius of a hundred miles of Traverse City are made by personal representatives of this agency. Our collection efforts are not confined to letter writing. Our business is EXCLUSIVELY a collection business.

If you have bad accounts, turn them over to us. If it is humanely possible to collect these accounts, we will do it. Our collection fees are standard. Where no collection is made, no service fee is charged. Our commission is exacted only where satisfactory results are obtained

Look over your old accounts. List the questionable, or dormant ones. Do not charge them off until you have given us a chance to prove what can be done with them

Selection of Dairy Cattle Breeds Influenced by Shows

A good typical Ayrshire sire *Putting on the finishing touches*

Many a man who is undecided as to the breed of dairy cattle that he will select has been influenced in making this decision by the animals of a particular breed that he has seen in public.

The individual breeder secures a great deal of advertising as the result of exhibiting at fairs, or in offering his animals at public auction, he gives people a chance to see and know the kind of stock that a man is breeding and paves the way for future business.

It is essential that special care and attention be given dairy animals that is to advance at the time that they are to be exhibited or sold. Exhibiting or selling animals publicly in their every day clothes is poor advertising and puts them at a disadvantage when the competition is keen. It takes several weeks to put a dairy animal in good show condition and what applies to fitting for show applies as well to fitting for sale.

It is important that the dairy animal to be exhibited or sold be in good flesh. A good coverage of flesh adds to size, increases smoothness and indicates that the animal is thrifty and in good health. Dairy animals being fitted need extra feed.

Stanching and blanketing are great aids in giving the hair and hide a fine condition. By stabling in summer, the animal is protected from the hot sun which makes the hide harsh and stiff to the touch. A roomy box stall that is kept clean and well bedded provides desirable quarters. Continuous blanketing helps keep the animal clean, sweats the hide, thus improving its handling qualities and makes the hair lay to the body. The blanket need not be expensive but it must be tied on securely.

Every dairy animal that is to be exhibited should have the hair clipped from the entire body about three weeks previous to the date of the show or sale. This will get rid of the old hair and allow a new, even growth to develop which will greatly improve the appearance and increase the selling value of the animal.

A point often overlooked in the preparation of a dairy animal for show or sale is that of exercise. A well and stand properly. An untrained animal cannot display its best points to advantage if it opposes the efforts of the attendant to exhibit it properly. This will get rid of the old hair and allow a new, even growth to develop which will greatly improve the appearance and increase the selling value of the animal.

A point often overlooked in the preparation of a dairy animal for show or sale is that of exercise. A well and stand properly. An untrained animal cannot display its best points to advantage if it opposes the efforts of the attendant to exhibit it properly. This will get rid of the old hair and allow a new, even growth to develop which will greatly improve the appearance and increase the selling value of the animal.

While in the show or sale ring, the man in charge of an animal should have one main thought in mind, and that is that of showing the animal to advantage. This is meant that when it stands, its feet are properly placed, heel straight and head erect. Any movement on the part of the attendant or animal should be as graceful as possible. Until the ribbons are placed or the auctioneer's hammer falls, take no chances.

A Lecture on

CHRISTIAN SCIENCE

Entitled

Christian Science: The Eternal Law of Love

by

John J. Flinn, C. S. B.

Of Evanston, Illinois

Member of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

The lecturer was introduced by Mr. H. K. Allen who said:

In the Bible, book of Acts, we are told that Peter prayed to help others to know God.

It is easy for a Christian Scientist to believe this as when one has learned through the study of Christian Science to better know God, a desire comes to share with others this knowledge.

The Christian Science board of lectureship has provided a corps of lecturers who are qualified to present to the public the truths about Christian Science and we are to have the privilege today of listening to one of these lecturers.

I take pleasure in introducing to you, Mr. John J. Flinn, of Evanston, Illinois, who is a member of the Board of Lectureship of the Mother Church, The First Church of Christ Scientist, in Boston, Massachusetts.

Now as ever, perhaps now more than ever, is man's extremity God's opportunity. In affirmation of the many assurances which revealed religion has held out, and still holds out, to the doubting and disturbed, Mary Baker Eddy strikes the very highest note of positive faith when she declares in our textbook, "Science and Health with Key to the Scriptures," "divine Love always has met and always will meet every human need" (Science and Health, p. 494). This crystallized epitome of her entire philosophy embodies the greatest fact discoverable in ancient or in modern theology. Into twelve words is here condensed all that is revealed in the Old and New Testaments; all that is preached, promised, and taught by God's prophets, by Christ Jesus, by the disciples and the apostles of the Master, by all the spiritually-inspired men and women of all the ages. Those of us who have long studied and practiced Christian Science, who have time and again benefited by its teachings and demonstrated its truths, are so convinced of its efficacy as to hold, without limitation or reservation, that every question of human concern, in the settlement of which governments, congresses, conventions, and conferences have signally, conspicuously, and sadly failed, can be solved by the scientific application of spiritual law, the eternal law of Love.

THE ALL-SUFFICIENCY OF GOD

It has always been, and is to-day, a professed fundamental of monotheistic religious creeds, sects, and denominations that there is but one God and that He is omnipresent, omniscient, and omnipotent—all-present, all-intelligence, all-power. It is basic to Jewish and Christian theology alike that God is the primal and governing Cause; that He, and He alone, holds in hand the destines of men, of peoples, and of nations; that with Him and in Him rests the infinite and final settlement of every question that affects the welfare of humanity; that His wisdom is sufficiently ample, His power sufficiently far-reaching, and His love sufficiently broad and deep to meet every demand that may be made upon Him looking to the protection, comfort, and happiness of his obedient children. While holding to all this, with its wide and glorious all and this, whose of every faith ancient and modern, speaking generally, with the single exception of Christian Science, stop short at mere belief in or assertion of these truths and go outside of God for help when faced by difficulty or threatened with anger. Relying as it does upon His all-sufficiency, and upon reasonably question the logic of the Christian Science position that God's children require no other help than He is able and willing to give, Christian Science is unique in all their difficulties and troubles.

AN INVARIABLE FAITH

Christian Science casts aside the theoretical and adopts and clings steadfastly to the practical and the proved in its entire attitude toward the omnipresence, omniscience, and omnipotence of God. It finds no place and no excuse for manifold exceptions, exceptions, or compromises in its estimate of God's infinite nature; it accepts Him without limitation; it takes Him at His word; and it has proved and is proving, through this attitude toward God and man, and through the understanding and demonstration which accompany it, that His unqualified love not only can but actually does meet every human need, when faithfully sought, scientifically found, and unconditionally accepted.

Growing Scalp Skin

To grow new skin on a damaged scalp, an Illinois doctor has resurrected the method of boring slight holes into the skull with a bone drill. This method was used back in 1777 by a Philadelphia doctor named Vance who had a patient who had been scalped by Indians. His wound had all healed except the middle portion which was bare bone, and which showed no signs of improving. Vance took a shoemaker's awl and bored numerous holes through the outer table of the skull. He quit boring when a reddish fluid appeared. In his account of the case following operation, he said that "after a time pound flesh appeared to rise in those holes," and he further stated that the wound "skun over slow."—New York World.

Not What It Used to Be

"When it comes to the game of marbles we oldies have a right to talk about the 'good old days,' with regret," said the man who used to dream of cornering the marble output. "We used to have a dozen different varieties of the game, and all of them took more skill than the games kids play now. Ringtaw, agates between the thumb and finger is a lost art; today the players toss them. Another thing, there are only two kinds of marbles for modern youngsters to buy, but we used to have 'agates,' 'stonies,' 'crockies,' 'milk agates,' 'alleys,' 'chinas,' and a half dozen other kinds. Now a boy can only hope to amass numbers; then he could use discrimination in keeping the ones he admired and using the others for play."—Detroit News.

SUICIDE EPIDEMIC SWEEPING GERMANY

Economic Depression Given as the Cause.

Berlin.—A grim and mysterious epidemic of suicides is sweeping Germany. Many of the leading dailies now carry a regular section tucked away in an obscure corner of the paper and bearing the caption: "Die Selbstmord-Epidemie"—the epidemic of self-destruction. In this the daily list of suicides be given, many of them receiving only a line. The more sensational cases get a short notice of ten to twenty lines. One has the impression that many cases are not reported at all, or, at least, not published. Epidemics grow through imitation, and this the authorities wish to avoid.

The causes of the abnormal rate of suicides in present-day Germany are, no doubt, the widespread economic depression, the increased tempo of modern life, the depletion of nerve force through the war and the tremendous financial and personal losses the war brought about, the shaken condition of the social structure, and a general fear of life which has overtaken thousands. All these factors are augmented, in the case of the German, by his tendency to brood, to ponder the riddles of existence, to regard life and its trials and problems from the angle of some particular philosophy of Weltanschauung.

Where Pessimism Lingers.

When the man's philosophy goes to pieces upon the rocks of experience, the man himself often goes to pieces likewise, and the unfortunate human creature is driven to the last positive act of which he is capable—the act of self-annihilation. It is also often in the nature of a "grand gesture"—at one blow he destroys the whole visible and tangible universe for himself. Suicide has at times even a romantic tinge in Germany—sentimental romanza from the days of Goethe's "Sorrows of Werther," of philosophical meditations from the works of Schopenhauer or Von Hartmann. In no other country are young lovers so prone to suicide. Even if parental permission to marry is not forthcoming. In no other country is the propensity of child suicides so great. These cases of juvenile self-destruction stands usually arise from fear of punishment at home or at school, fear of disgrace, or morbid conception of honor connected with failure to pass examinations at school.

But it is not only the poor, the distraught, the lovelorn or the inexperienced who lay violent hands upon themselves in the German republic. The list of prominent, well-to-do, sprightly happy people who have recently ended their lives in Germany is appalling. To mention but a few cases: there is Paul Casatter, the art dealer, husband of the famous German actress Tilla Durieux, who shot himself in the lawyer's office, whither he had gone with his wife and daughter to arrange a divorce; there is Hinnerk Bottcher, a famous Bortist of Berlin, whose body was found long after he had vanished, under pious in the forest of Grunewald.

Plunged Into Ice Cavern.

There is also the mystery of the death of Jurkewicka, a beautiful and celebrated star of the National opera at Berlin, in private life Frau Bresiner, who went to Zermatt, in Switzerland, some months ago and threw herself from the lookout platform under the lofty "Devil's bridge," apparently without the slightest cause, her body coming to light a few weeks ago after the melting of the ice. There is the case of Carl Haa, once a well-known lawyer, who had been accused of murdering his mother-in-law and sentenced to life imprisonment twenty years ago. He was recently pardoned and began writing and publishing his prison memoirs in a big Berlin daily. The state attorney of Wurttemberg reopened prosecution against him. Haa fled the country to Italy and threw himself into the sea from a train.

Strange tragedies are of daily occurrence. Day after day the newspaper reels confronted with such little notices as this: "Suicide of an Aged Married Couple." And then the terrible, inevitable details—the cause, or the germ set, often described by one word "nahrungssorgen," food worries.

Cards Amundsen Mailed 13 Years Ago, Delivered

Chicago.—As Capt. Roald Amundsen swept over the northern roof of the earth recently a bank of mail, from Finland reached Chicago, bearing postcards mailed on his polar ship, the Fram, thirteen years ago.

Stanley G. Swanberg, Wilmette, received one of the cards. It was sent to him by a friend, who has been dead eight years, and started on its journey to Colon harbor in the Canal zone, December 4, 1913. Swanberg explained that Dilgard was one of a number Amundsen gave visitors to his ship. It bore the printed note: "Will be carried across the polar sea and afterward conveyed by post to the addressee."

The cards bore two postal stamps marked in polar latitude, but nothing further to indicate their history.

Movies Help

Paris.—Movies are keeping French women away from the saloons. The pictures and improved housing, thinks Professor Labbe of the Academy of Medicine, are doing more than anything else to decrease alcoholism in the country.

Hardly Worth While

When John L. Green fell twenty feet from a gas plant under construction at Harrison, N. J., his fellow-workers believed him seriously injured and had him rushed to the hospital. Physicians there took thirty minutes to undress him, for Green wore five sweaters, two suits of underwear, two coats, three pairs of trousers, and two pairs of socks. After the excavation they found only a sprained ankle.—Indianapolis News.

Why I'm going to the Greater MICHIGAN STATE FAIR

By Lefesin Joe

HOW FAIRS GOT STARTED.

The other day I got curious about fairs, so I got reading about them. Fairs are pretty old. Princes and magistrates used to encourage Fairs so Europe people could trade goods at them. Donnybrook Fair was started by King John in 1204. The first agricultural fair in this country was started by Elkanah Watson, of Albany, New York, in 1819. The Michigan State Fair was founded in 1849 at Detroit. It moved later to Adrian, then to Lansing, and then back to Detroit again. Its primary purpose is educational. You can learn a lot at the State Fair. You can get a picture of what the farmers of the state are accomplishing and a lot of new ideas and inventions for the coming year. That's why I'm going to it in September.

PROGRESS OF THE GREATER MICHIGAN STATE FAIR

The Agricultural Fair is the predominant type of fair in this industry. The Greater Michigan State Fair is primarily a Farmer's Fair but it is of equal interest to the city man. Every citizen of Michigan who takes pride in his state should know something about it. Here are pictured some of the educational features, and what future possibilities. The things who attend the Fair in September will learn a great deal about their state as well as enjoy a good time.

Photo shows International Champion Shropshire Ram.

Michigan Rural Year 1926

"Barefoot Boy" Still Lives

The original "Barefoot Boy," referred to by John Greenleaf Whittier in his immortal poem, still has his "cheek of tan." He is Henry B. Marston, who as a boy was employed by the poet and still works about the Whittier estate in Danvers, Mass.

Many years ago, when little Frankie Marston picked blueberries and gathered up the fallen leaves about Whittier's farm, Oak Knoll, his poet friend was inspired by the youth's bare feet, his turned-up trousers, his cheek of tan and his merry whistle tunes.

Though Marston now has aged and wears a full beard he still enjoys taking the "Whittier circle" in Danvers, Mass., and whistling the tunes that Whittier's poem inspired.

The Commander

It was early in the morning. He flung open the massive portals, sweeping the interior with a piercing glance. Ten men sprang to their places and came to a swift attention, before his severe scrutiny. There was a tense silence—no word was uttered. He calmly passed down the row of uniformed men standing at attention.

Then, with a sudden energy, he flung off his hat, threw off the coat, and—sat on his collar. He swung around, to heed the waiting line. His face was dark, and his glance was keen and stern. He picked his man. He advanced with a firm but cautious tread. He stopped two feet away. In a low voice, full of meaning, he said: "I want a shave and a haircut."—Michigan Gargoyle.

Old English Game

Barley Break, a game once common in England, was played by three couples of young people, the pairing being determined by lot. A piece of ground was divided into three sections, the central being called "hell." This was assigned to one of the couples. The couples who occupied the other places then approached as near as they dared to the central space, tempting the confirmed couple to capture them. The couple in hell must not overstep the boundaries and they must keep each one hand locked in one of the partner's. When one of the outside couples was captured, it took the place in the central space.

Not a George Washington

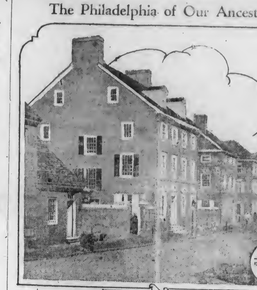
Teacher—Where are your boots?

Willie—Why—er—teacher, coming to school I was attacked by a big tiger. The tiger and I went round and round, and a big crowd gathered to cheer us on. I guess the tiger was after some peppermint candy I had in my trousers pocket. But what I was going to say, dear teacher, is that in the scuffle my suns was wiped out.

"Lucky" Left Hands

Superstition has it that left-handed persons are lucky. A medical man has just emphasized that the left-handed child who is allowed to develop naturally is at any rate luckier than the child forced against inclination to use the right hand, for he states that such forcing has frequently resulted in nervous disorders.

The Philadelphia of Our Ancestors



Here is shown a section of "High Street," a reproduction of Philadelphia's famous Market street in the days of 1776. It is one of the outstanding features of the Sesqui-Centennial International Exposition now being held in Philadelphia to commemorate the 150th anniversary of the signing of the Declaration of Independence. Every building has been built to actual size and in actual architectural detail. The furnishings of each building are exact reproductions of those used in the Revolutionary days. Many of the pieces on display are the originals and today are worth thousands of dollars because of their historic value. The Exposition continues until December 1.

Needle Long in Body

Mrs. John H. Cohoon of Hoyer Dale, Pa., was only a child when she left a needle in the side of her dress and later, when leaning against a banister, pushed the piece of steel into her side. Doctor were unable to get it and it gave her pain a long while, but then she forgot all about it. Recently, thirty-one years later, she felt an itching on the side of one toe and with tweezers pulled out the long lost needle.

For Sleeplessness

Sleeplessness can be cured by painting large lengthiny figure 8s on a large lengthened thick wall with imagnesy brush and can of white paint, says Doctor Farrow in the Journal of Neurology and Psychology. It is almost impossible to remain awake he says, after three figures have been painted. He usually fails asleep after he has finished painting only one or two figures; but if not, almost invariably after the third one.

Slightly Late

A nervous young gentleman, all a-flutter over the prospect of hearing a party in a nearby city, rushed breathlessly into the railroad station at Salem.

"When does the first train leave for Galesburg?" he asked of the white-haired station agent who was perched on a truck in the baggage room.

"Don't," replied the agent, "the fast train left for Galesburg in 1903."—Exchange.

Apple Tree's Productivity

The apple tree is the longest lived and one of the largest and most productive of all American common fruit trees. A large apple tree often produces from ten to twenty barrels of fruit a season.

Average Fleece Weight

The bureau of animal industry says that the average fleece weight for the United States is approximately seven and a half pounds. There is a great difference between the Southdown and the Rambouillet breeds, the wool production varying in Southdowns from six to seven pounds; in well-bred and well-fed Rambouillet, from twelve to fifteen pounds.

[Political Announcement]

CAMPBELS OUT TO BOOST NORTH MICH.

Indian River man, resident of region for 48 years, believes state should take immediate steps in development of Michigan's playgrounds.

Attractions for Coming Week

At New Palace Theatre

Sunday-Monday, Aug. 22-23—

Rudolph Valentino in his biggest and latest picture, the "Son of the Sheik," supported by Vilma Banky. Never since "The Sheik" has Rudolph Valentino had the dramatic opportunities offered him by the power and sweep of his new starring photo-play. Truly a big picture and we are showing it second in the state of Michigan. Extra—Educational comedy "Creeps."

Tuesday-Wednesday, August 24-25—

"Dancing Mothers," with Conway Tearle, Alice Joyce, Wm. Collier Jr. and Clara Bow. Flapper daughter, night-club father. What to do? So mother joins the Dancing Mothers. This picture sure does step. "All the dash and spice of a pretty wife's night out in New York. Extra—Educational comedy, "Mr. Stars." Wednesday only, Fox News Reel.

Thursday-Friday, Aug. 26-27—

Corrine Griffith in "Merle Modiste." You've never seen Corrine so wonderful before. Oh! What a Frenchy Miss! Girls to feast your eyes; gowns to dress 'em by; and all through that Frenchy spice that makes it one peach of a show.

Extra—Pathe comedy, "Isn't Love Cuckoo."

Thursday only, Fox News Reel.

—MAJESTIC THEATRE—

Saturday-Sunday, Aug. 21-22—

Buck Jones in "A Man Four Square." The human story of a Westerner who'd cut off an arm for a friend. Here's a picture you'll like; excitement enough for a half dozen western film dramas.

Extra—Pathe comedy, "The Caretaker's Daughter."

Tuesday-Wednesday, Aug. 24-25—

"The Runaway," with Clara Bow, Warner Baxter, Geo. Bancroft and Wm. Powell. A true-to-life romantic drama of a "bright-lights" Miss in the back-hill country of Kentucky and Tennessee.

Extra—Educational comedy, "Gimme Strength," and Felix the Cat in "Fans the Flames."

Frisco's Unique Colony of Italian Fishermen

On the San Francisco water front today you may find a fascinating bit of the picturesque Old world brought to America and made over into a thriving enterprise by the methods of science.

There, huddled along the Fisherman's wharf, you may see a nest of 60 boats owned by a colony of Italian fishermen. Transplanted bodily—language, customs and boats—from the Mediterranean to the Pacific, these hardy men are reaping a harvest of wealth in shining salmon from the deep sea outside the Golden gate.

In their little boats, says Popular Science Monthly, they have replaced with gas engines the lateen sails used for centuries by their forefathers. In place of old-time nets and hand lines, they have substituted long, sprung trolling rods with which four fishermen now can bring in a larger catch in one day than eight men formerly did in two.

By the use of modern appliances they have changed "fishermen's luck" into scientific skill that seldom fails. And as a result a single boat now averages $100 worth of fish at a trip—sometimes reaching as high as $200.

Motor Trips Over Sahara

Touring the Sahara is becoming as popular as any ordinary Algerian trip. The journey from Paris to Timbuctu can be accomplished in a few days. The Algerian branch of the powerful Paris-Lyon Mediterranee Railway company is planning touring trips by motor cars from Algiers to the Hoggar, the country of the newly exhumed queen, Tl-ah-Han. The first trip will be made next winter. During the present season several tourists have or are to cross the sandy plains of the desert, making their way to the Hoggar or Timbuctu or the Tchad region. Some time ago Lieutenant Estienne in a six-wheeled automobile completed a double crossing—from Colomb-Bechar in the south of the province of Oran-Bourem and back. The whole journey lasted 113 hours. The cars were fitted with all the modern comforts.

Mysteries Found in Dead Letter Office

No place in the world, perhaps, holds as many unsolved mysteries in as many odd forms as does Uncle Sam's dead letter office in Washington, says Popular Science Monthly.

Not only is this mail morgue the final resting place for letters and parcels that go astray because of faulty addresses, but it is also the repository for contraband goods, such as firearms, alcohol and narcotics, as well as deadly bombs and infernal machines. There an ordinary package has been found to conceal enough dynamite to wreck a building. There, too, innocent-looking parcels have given up everything from a live snake or a poisonous tarantula to a flock of flens.

More than 60,000 carelessly addressed letters arrive every day in this government morgue, which received 21,000,000 letters and 800,000 parcels last year. In this number are 100,000 letters which have been mailed in entirely blank envelopes, many containing large sums of money.

The cash found in misdirected mail amounts to about $25,000 annually.

Scarcity of Material Makes "Briars" Costly

It is said that French soil no longer yields the precious briar bush. Spain has but little, Italy has about run dry, and that it is in Corsica that the finest specimens are found. It is the root of the shrub that matters. In North Africa the light and sandy soil renders the texture of the woody root rather porous, and this "briar" is used for cheaper grades of pipe.

In Corsica the roots have a tough fight to gain hold in the rocky soil. A Corsican briar root may weigh 15 or 20 pounds when it is brought rough to the factory, but when cut down this will give no more than a dozen blocks for use. From these emerge, perhaps, two really tip-top, flawless "best English briars." And as such a pipe's beauty can be fashioned only from root which is in the region of a hundred years' growth, it is not to be wondered that a perfect briar pipe is costly.—Manchester Guardian.

—PERSONALS—

The road up North to Michigan,
Is lined with canny fishermen;
They know the spot where they can stop,
And catch the fish that fills the pot,
And eat their favorite dish again.

If I could have my wish again,
I'd love to hear the swish again,
Of the pointed steel, the singing reel,
And fight the king from stream to creel,
The way they do in Michigan.

If I could have my wish again,
I'd like to be in Michigan,
To eat the trout I'd tuckered out,
In old Pine Lake, or there-a-bout;
Twould give me more ambish again.

Oh, take me back to Michigan,
And let me hunt and fish again,
Where the air smells clean, and the forests gleam,
With the banded blue, and crystal stream;
There might I live in peace again.

Archie Lemieur, of Detroit, is spending a vacation with relatives and friends in this city.

Mr. James U. Weart, of Kansas City, special writer for industrial organizations, was a visitor here Monday.

Attorney E. N. Clink and Miss Belle Roy, of East Jordan, were business visitors in Charlevoix last Friday.

William Finucan, of Grand Rapids, is spending a two week's vacation with his sisters and friends in this city.

Captain John N. Chambers spent the week end with his family, other relatives and friends at Mackinac Island.

Mr. and Mrs. Charles D. Towne, of Elk Rapids, spent Tuesday with friends and on a sightseeing trip in this city.

Mr. and Mrs. L. D. Coulter, of Detroit, spent several days with friends here recently, returning to Detroit last Sunday.

Mr. Bert A. Dole, connected with the State Savings and Loan Association, of Lansing, was a business visitor here early this week.

Miss Arminie Shields, a friend of the Callen-Jackson families, is spending a vacation here, arriving from Columbus, Ohio, last Saturday.

Mrs. Anna Gutliff, a visitor at the home of her daughter, Mrs. Perry Smith, and other relatives here, returned to Kalamazoo last Monday.

The Ladies Aitar Society, St. Mary's Church, will hold a baked and fancy goods sale Saturday, August 21st at corner of Park av and Bridge street.

Misses Nellie Guild and Maxine Bodkin, for some weeks past guests at the farm home of Mr. and Mrs. J. R. Guild, returned to Flint, last Monday.

Uncle Louis Whitemitt spent a day or two in Chicago on business recently, returning to Charlevoix early this week to continue his regular season vacation.

Captain and Mrs. M. J. Bonner have as guests at their home Mrs. Peter Mander and daughter Miss Geneva, sister and niece respectively, of Milwaukee.

Roy Bailey, who has been spending his vacation with his family at the home of Mrs. Geneva Green, on Park Ave., returned to his home in Evanston last Monday.

Local B. P. O. E. members of Petoskey are staging a fair this week as per their annual custom. The fair started Wednesday and will continue through the week.

Mr. and Mrs. George W. Weaver are enjoying an extended visit with their daughters, Mrs. T. G. Finucan of Grand Rapids and Mrs. D. C. Gaffney, of of Charlotte.

Mr. and Mrs. William J. O'Regan, of Chicago, visited friends here a short time last week, later continuing their trip to St. James where they will spend their vacation.

Mr. and Mrs. James Sanford returned to their home, Rochester, Mich., early this week following an extended visit with August Cellnor and other friends in this section.

Mrs. George W. Priest has been seriously indisposed for some days, her illness dating from early this week with but little improvement in her condition at this writing.

Mrs. George Weaver, assisted by her daughters, Mrs. T. G. Finucan, of Grand Rapids, and Mrs. D. C. Gaffney, of Charlotte, entertained sixteen ladies at bridge Monday afternoon.

Archie McNeill is spending a short vacation by taking a motor trip to Manistique where he will visit his daughter for a few days. Mrs. McNeill accompanied him on the trip.

Mr. and Mrs. T. H. McInnerney spent the week end with friends here, motoring back to Winnetka, Illinois, early this week, making a short visit at Frankfort on their return trip.

The S. S. Manitou northbound last Tuesday entered this port with her largest passenger list thus far this season, there being two hundred and eighty-five passengers for Charlevoix and other northern points.

Myer Cohen, sons Goodman and Zelden and Max Bradie, are visitors in Charlevoix this week. Mr. Cohen formerly resided in this city where he conducted a mercantile business. Late years he has resided in Detroit.

Captain James Sanford was in command of the S. S. James E. Sanford, making the Charlevoix-St. James trip last Saturday, taking the place of Captain John N. Chambers who was taking a day or two off from his regular duties

Mrs. R. W. Paddock and Mrs. A. F. Bridge were called to Wisconsin last week by the serious illness of an aunt.

Raymond Faulkner, who has been taking special work at Harvard during the summer months, completed his course a few days ago and returned to his home here early this week where he will spend the remaining part of his vacation.

W. J. Gallagher came over from St. James Tuesday afternoon, later in the day he left for St. Paul in answer to a message announcing the death of a relative, Edward Sutherland, the trip being made for the purpose of being present at the funeral service.

Wells G. Brown and son Douglas, of Pontiac, have been at the tourist park for several days. After spending some time at various camps in this region they pronounce the Charlevoix camp the most ideal, best managed and sanitary of any camp visited by them during their entire trip.

Mrs. Anna Lobdell and Miss Cristine McLeod, of Detroit, drove up Tuesday and are visiting their old neighbors and friends for a week, with headquarters at the Fountain City House. They were accompanied by Mrs. Thomas LaLonde, who is visiting her mother, Mrs. Sarah Emrey.

D. C. Schweitzer, for the past two weeks a business visitor in Charlevoix, started on his return trip to his home, Long Beach, California, last Monday. Mr. Schweitzer will make short visits in Saginaw, Detroit and Chicago, after which he will make his return trip to the Pacific Coast.

Mr. F. E. Frazier, a former Charlevoix citizen and business man, is here spending a few days with friends. He is accompanied by his daughter, Mrs. C. L. Thomas and grandson "Bobby" Thomas. The members of the party are returning to their home, Sarasota, Florida, some time this week.

Malcolm Winnie, a pioneer citizen of northern Michigan, resident of long standing and prominent in this region, died in Traverse City last Monday, his death being due to injuries received a few days before when he was struck by an automobile. He was 83 years of age and one of the very few of earliest pioneers in this part of Michigan.

Mr. Wilbur Kirk Stevens, of Kalamazoo, and Miss Marguerite Cole, of St. James, were united in marriage at the Methodist Episcopal parsonage in this city Monday afternoon at three o'clock. Rev. C. E. Pollock performed the ceremony, using the ring service. The young people were attended by Miss Wilda L. Moon and Mr. Louis Bourisaw.

Mr. O. L. Smith, for several years past connected with the Attorney General's office as assistant State's Attorney, resigned from the department a few days ago to engage in business with an established legal firm in Detroit. Mr. Smith has appeared in the Charlevoix county courts several times in recent years, assisting in the prosecution of some legal cases, one in particular being the famous Gregg trial. Mr. Smith has many friends in Charlevoix who wish him success in his new field.

Weddings of particular interest to many western Michigan people is the announcement of the marriage of Mr. John T. Pollock, son of Rev. and Mrs. C. E. Pollock of Charlevoix and Miss Gladys Wason of Otsego, which occurred at the home of the groom's parents on August 16th in the presence of the immediate families, the ring service being spoken by the groom's father. The bride is a graduate of Western State Normal, 1925, and has taught school one year. She will resume her teaching at the opening of the school year, while the groom will return to the University of Michigan where he will complete a five year engineering course in June. Both of the young people are widely and favorably known and their many friends are extending them best wishes.

Bird Knows Its Business

The wings and tails of the Argus pheasants are studded with scores and scores of large and very perfectly marked "eyes," and it is from these that he has earned his name. He knows that it is useless to try to court his sweetheart while she can still see his hopelessly plain face. (His features suggest a small and degenerate cousin of a bald-headed vulture.) When, therefore, he goes a-wooing he displays his handsome clothes, and at the same time hides his face in his feathers, taking occasional peeps to see if he is making any progress, says the London Mail.

To Stop Turkeys Flying

A short piece of light board fastened across a turkey's back will prevent the bird from flying over a fence, says the United States Department of Agriculture. Cut notches or bore holes in the board and tie with a strip of cloth to each wing, further directs the bulletin. When the wings are raised they then strike against the board and flying is prevented. The length of the board, adds this authority should be about the same as the thickness of the turkey's body from side to side.

Proof Positive

Mr. Gatley, who was leaning back comfortably in the limousine, said to his wife:

"What's wrong, Marie? You look as if you were about to make a leap for life?"

Whereupon Mrs. Gatley leaned uncomfortably forward and replied: "It's that new chauffeur. He drives so carefully I just know he is inexperienced!"

Scientist Avers He Saw Luminous Spider

He's a long way from home and he cannot prove it, but we are going to take his word for it that he saw the only luminous spider that has ever been seen by humans. This is what Farnum Brown claims to have done some time ago when he was in central Borneo on a scientific expedition, of which he is an assistant curator.

He had been out on a long hunt for specimens and was endeavoring to make a short cut home, when he lost his way and had to spend the night in the jungle. He saw many luminous flies of one kind or another moving about, but as he sat there in the darkness he observed a very bright spot not very far from him which glowed steadily and brilliantly.

He approached as near as he could for the light seemed to be in the midst of a thicket, and then he struck a match and discovered that it was a luminous spider.

Knowing the danger of being poisoned by the bite of an insect of this character, he prepared to catch it in his handkerchief, but at a critical moment, just as he was in the act of seizing the specimen, his handkerchief caught on a twig and the spider vanished.

He never saw another one or ever heard of anyone else doing so, and since his arrival home has searched all the recognized books on the subject and failed to find any mention of a luminous spider. He says it is not remarkable that the native should never have seen such a spider, for they never venture away from their huts after dark for fear of disturbing the spirits which are supposed to be abroad after darkness has fallen.

Location of Airports

A report published by the air service on March 1, 1927, shows there are 2,858 airports located in 29 states and the District of Columbia. Eighty of these airports, located in the large cities, range in size from Taft airport in Seattle to 1,793 acres in Cleveland. The average distance from the center of the city is 5.5 miles, except that those rated as A1 fields are generally from four to fifteen miles from the downtown district which distance is probably due to the excessive cost of securing adequate space in the central business district.

Of the eighty-airports, forty-one are municipally controlled, one privately controlled, thirty-two controlled by commercial corporations, one jointly by the municipality and private interests and four by the municipality and commercial organizations. There are railroad facilities to eleven, rapid transit or street cars leading to nine and buses to one—Charles Whitnall, secretary of public land consolidation, Milwaukee, in the National Municipal Review.

Some Weather Signs.

It is not always easy to tell what the weather is going to be, but a few signs are very reliable. "When it is raining you will sometimes notice that the sky starts to clear in the form of an arch. Close to the horizon you can see the little half-circle which is the beginning of the arch that will sweep across the sky until there are no clouds left. Then you may be certain it is not going to rain again for some time. Look at the clouds at almost any time of the day, and if these get smaller or remain about the same size, rain is not likely. Should the clouds get bigger, expect showers soon. In fine weather the wind increases up to midday and then gradually dies down. If the wind does not get less after noon, and still more if it blows harder towards sunset, you may be almost sure bad weather is coming.

Imitative Japs.

From Japan comes a pleasing variation of our vivid slang "high hat" we have heard. "High pockets," of less easy connotation, has its clientele. In "An Immigrant in Japan," a book by an American girl who lives as a native, half has written of her experiences under the name of Theodate Geoffrey, the author tells of her shock on seeing her hitherto totally proper Japanese butler answer the door clad in undies only. To her remonstrances the butler showed an American ad of familiar shirt-gentlemen against a background of locker-room elegance, clad only in that easy dashable of primary and essential garment. Grinning, the Jap said, "Me new clothes all same us American boy. Very high kara." "High kara." It appears, is Japanese slang for "high collar."

Radio Possibilities

The unfathomable possibilities of radio are indicated by the fact that an amateur broadcasting station in Garden City, N. Y., station 2YY, recently carried on two-way communication with another amateur, 9CXQ at Braymer, Mo., using only 0.04 watts in the plate circuit of the transmitting tube. This feat represents 25,525 miles per watt. If radio messages could be radiated as efficiently as this through the universe, a station of 100 kilowatt rating could be heard more than two and a half billion miles away.

Caribou Attack Lighthouse

Wild caribou do not like the new lighthouse built at Dutch Harbor, Alaska. Night after night they come out of the timber and charge upon the structure until it is feared they will weaken if not demolish it, says Capper's Weekly. A heavy wire fence is to be built around it.

Vacation Given to Rites

In China and India many persons devote their vacation period to performing religious rites and are not reconciled to making their recreation season each year one of pleasure. The same holds true in a measure in Japan and to some extent in Germany. It is only the Occidental countries which plainly make vacation a period of pleasure.

Iced fruit drinks at Sveline Orchards' sales booth.—adv.

CHURCHES

Methodist Church.
C. E. Pollock, Pastor.

The Fourth Quarterly Conference of the church year will be held Friday evening at seven o'clock at the pastor's home. Every member of the Conference is urged to be present.

Sunday promises to be another great day in the church. The program for the day is as follows:

Sunday School 9:30 a. m.
Pastoral Sermon 10:30 a. m.
Feature Service 7:30 p. m.
Epworth League Young People 8:30.

The service of the evening will present a unique interpretation of oriental customs and costumes by a lady who was born and reared in the East and who is a direct decendent of an oriental King. Princess Rahme Raiffer, the Syrian, will give the inspiring presentation of "Under Syrian Skies." The public is invited.

"The Milestone Of The Ages", morning sermon subject next Sunday 10:30.

A good place to spend Thursday evening is at the mid-week service at 7:30.

Congregational Church
Rev. B.G. Mattson, D.D., Minister

Morning service is at 10:30 preceded by the Sunday School session at 9:30. The preacher for the morning will be Rev. Dr. H. H. Forsythe, pastor of King's Highway Presbyterian Church, St. Louis, Mo. There will be special music.

The evening service is at 7:30 under the direction of the pastor, with a varied program of an interesting character.

The Ironton church will hold a musical service at 2:30 at which the program of music will be in charge of Professor Bentley and a group of singers from the Sequanota Club. Charlevoix friends and the public generally are heartily invited.

The Drawbacks

The two great drawbacks to the happiness of the motor tourist are the billboard and the board bill.—The New Yorker.

Christian Science Society
Sunday service, 10:45 a.m., Subject, "Mind."
Sunday School 12 o'clock.
Wednesday evening service 7:45. Reading room, Tuesdays and Saturdays, 2 to 5 p. m.
The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church
Low Mass 8:45 a. m.
High Mass 9:00 a. m.
Saturday and Monday 7:00 a. m.
Rev. Knute Lowenski, Pastor.

Episcopal Church
The Rev. John K. Coolidge, of Glencoe, Ill., will hold services at 10:30 a.m. at the Episcopal church during the summer months.

Great Eastern's Whistle

The steam whistle of the Great Eastern was saved from destruction by a former officer of the ship, who bought it when the liner was broken up. It is 33 inches high and weighs 96 pounds.

Motor Across Sahara

A regular motor freight and passenger service has been established between the oases of South Tunis and the oases of South Algeria by six-wheeled automobiles.

Two Fire Causes

Electric light wires hung over walls and silly rags thrown into a corner are two of the things which give the newspapers stories about "fires of unknown origin."

CHAPTER X—Continued

—14—

Caleb distinguished Carmen at the piano, her olive skin and rich coloring resplendent in the glowing gas a California poppy in a daring gown of burnt orange, a red flower in her black hair.

She saw him standing there and called out a welcome across the room.

"There is my toreador," she cried and crashed into the first set prelude from Carmen. Caleb felt himself the focus of stares that were friendly enough, but embarrassing. A light laugh went round, though he sensed that it was not at his expense, and hands applauded. Mrs. Vedder waved a stage wait by cooing swiftly to him.

"You see, you are known already," she said. "Now I must talk to them known to you."

She led him round the room, introducing him. Everyone seemed to be a writer, a musician, an artist. Vedder greeted him at the pinch table.

"Better fortify yourself while it lasts," he said. "This is an anniversary, mine and Mrs. Vedder's, and we celebrate, but we are limited. Mesi Carquinez."

A short man with an enormous shock of straight black hair, a roughly modeled face in which black eyes twinkled genially, dark-skinned almost as an Indian, a mouth hands with Caleb. He spoke with a Spanish accent. To Caleb he seemed to have stepped directly across from the Quartier Latin.

His wife was in absolute contrast. She was an auburn blond, with great masses of hair braided above and partly about an oval face that had a perfect complexion, untouched by spilled aid.

She looked like a madonna, Caleb thought, until he noticed her eyes. They were Oriental in their pinpoint slant and they were the color of jade. He mentally docketed her as a woman of personality and unusual brains. Carquinez, it appeared, was an artist.

Caleb and his hostess wound up at the piano. Brompton was with Carmen. He had a stranded air, an appearance of having been left there by the tide of his own feelings, wishful to stay but conscious that he cut a figure out of poise, out of harmony. Carmen flashed eyes and teeth at Caleb as Mrs. Vedder fluttered away with a:

"And these, you know."

"That wasn't quite fair," said Caleb.

"Your bringing me into a strange company with an orchestral accompaniment. You mustn't expect me to live up to the role of Escamillo."

"I don't think you leave much to be desired on a matador. In so far as I have seen you in action."

"You forget the inspiration. Of such a Carmen."

"Why, you are a true caballero, I thought you must be like all the Spanish Englishmen. I never understood that they possessed any gallantry. If you keep that up all evening, you will do very nicely," she said. And began to sing very softly. Brompton was ignored. Caleb felt sorry for him, so evidently in love with the girl who made a mock of him, but he saw no way of relieving matters. He stood by the lamp and the girl sang up at him, her face full in glow, her lips shaping the syllables of Carmen's song witchingly.

Mais, si je t'aime, prenez vous gardes—

"It was the toreador whom Carmen warned," said Caleb.

"Perhaps she didn't need it. Brompmy—get us some punch before it's all gone."

Brompton departed obediently. Carmen made room for Caleb beside her on the piano bench.

"She hasn't come yet," she said as Caleb looked about the room.

"Now is expected, I understand," he countered coolly.

Carmen gave him a queer little smile, of approbation perhaps—or of challenge.

"You are very thanked you properly for saving her from the bull? I forgot. But I insist to."

Brompton came back with the punch and they sipped at it, listening to the talk.

But Caleb found his enjoyment marred by a creeping doubt of Betty Clinton's appearance. Carmen perhaps perceived it. At any rate she seemed to have definitely attached Caleb as her cavalier.

"Come on up into the conservatory," she said. "The room is getting hot. There is a wonderful view of the strait."

They mounted three steps together and went in among the palms and vines, leaving the door open behind them.

"This is better, isn't it?" she asked. She stood close beside him and Caleb was incredibly aware of the appeal of her. She spoke softly. The light subdued her vivid coloring, the flaring line of her gown, half accented and accented from her that made its pulses quicken. She put a hand on his arm, soft and clinging. Caleb could feel the warmth of her palm penetrating the light cloth of his sleeve.

"Now I can thank you for saving me," she said. "You should be rewarded, toreador. What do you want? You can have—anything."

She spoke so softly that he stopped to listen. Her breath was on his face, her eyes held little flames, her lips were parted. Her whole face was a challenge to desire.

Caleb was human. Yet he could not tell himself later who had given the kiss—or taken it. Her fragrance surrounded him, for a second her arm was about his neck, her body supple to his own, with their lips together. The passion of her clinging mouth burned, soft, yet fiery. They were one, welded with something more than merely physical ecstasy.

Then she stepped back with a little laugh, straightening the flower in her hair. Caleb saw that her eyes were looking beyond him. And she laughed again, an odd little murmur of content.

He wheeled. Standing on the threshold of the conservatory was Betty Clinton, at the head of the steps. Behind her was Baxter. Caleb stood as if suddenly frozen, while she passed as if she did not see him.

"It is a perfectly glorious night," she said to Baxter as she moved on. Carmen had vanished. Baxter gave him a malicious smile as he followed Betty to the end of the conservatory. Caleb stood irresolute and then went slowly down the steps into the big room.

The evening was utterly spoiled for him. Carmen rejoined him but he would not reaccept her challenge. He wanted to leave but he stuck it out, conscious that he had deliberately offended Carmen, hardly daring to imagine how Betty had construed the scene she had happened upon with Baxter as her partner. How had Baxter happened to be there on that of all evenings? Caleb remembered that he had said he was a friend of the Vedders but he fancied that, if he had been formally invited, Vedder would have said something about it. Yet Vedder did not necessarily know that Caleb Warner and Fred Baxter were intimates. And it was not a formal affair. Baxter might merely have expected his right of dropping in.

He found the jade eyes of Mrs. Carquinez regarding him with a sidelong glance of humor, of understanding, not lacking in sympathy. He became suddenly conscious that he had stopped listening to her, or talking to her, whichever it might have been, and that he was watching intently the group of which Betty was the hub. Even as he brooded under the scrutiny of his vis-a-vis, Betty nodded to him, pleasantly, as she might to an acquaintance. Not—Caleb decided—as she would have acted if the incident she had chosen to ignore had never occurred.

"You have met Miss Clinton?" asked the artist's wife. "She is a charming girl. She is different—and indifferent —to any the men. She and I are close friends."

"Yes?" Caleb could muster nothing better than the inane syllable.

He was grateful to Mrs. Carquinez. Did she mean him to be, he wondered. Had she seen what the rest had missed with those oblique green eyes of hers? And had she tried to help him?

The rest of the affair went on to Caleb as if he looked at it through a screen. Champagne was opened and he saw Baxter lift his brimming glass and rise in a clever speech to his host and hostess. Caleb recollected that doctor's mention of champagne and its effect on Baxter. He wondered if the latter would make an ass of himself.

As soon as the first couple gave an excuse Caleb found the Japanese and asked for his hat and coat. His hostess came up.

"You're not going? We're going to have some music. Don't say you have to get up in the morning! You are a stranger."

He stood at the end of the passage, looking into the street but seeing little. And he smiled grimly. "I'm not a stranger for nothing," he told himself. "They haven't got all the trumps."

(TO BE CONTINUED.)

These Might Be Heard if Optimism Prevailed

"Fire! Fiddlesticks, young man, booklet says this hotel is absolutely fireproof. Go away and let me sleep."

"What's this—from the income tax bureau? Good! They probably are sending me a refund."

"I don't seem to be able to get central, Mary, but I'm sure those burglars won't be through in the cellar for some time yet."

"It's a good thing Jack has gone over to Gloria. He'll appreciate it all the more after he's tired of her."

"Lots of time, George dear. Just try and get me a little more gas. That train will stop rather than hit other people."

"I feel I'm going to lose my petticoat before another block; but I'll probably look simpler without it."

"Ten years in Sing Sing? Thank you, judge. I've always wanted to ——————

Distinctive Trade Term

The term "razon" as a generic name to be applied to all artificial silks, has come into quite general use, having been indorsed by many trade associations and being applied by different producers to their products. The word is French, one of its meanings being a ray, as of light, and the thought in the minds of certain of those who sponsored it was that, being a term unknown to most of the English-speaking public, it would permit of no confusion in its use. It was believed that it could not be mistaken for anything else, and would still be applicable to the product as expressing its outstanding characteristic of luster

The Ruling Passion

A member of the Lambs' club tells of a comedian, who of late years had not had much luck, and who was distributing his notices of what his will should be. "What money I have, if any such as it is, or might be, that is to say—" he began.

"Wait a moment," said his lawyer, "I can put that in more legal language."

"I know," said the comedian, "but I want to get a laugh."

THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

(© by Dodd, Mead & Company.)

Nero

A RED-HEADED boy, scarcely more than a child in years, handsome and gorgeously clothed, stood receiving the humble salutations of the Roman senate one day in 51 A. D. Nearby, forgotten and unnoticed, stood a plainly attired lad. The red-headed youth was Nero, newly adopted son of his great-uncle, Claudius, emperor of Rome. The other boy was Britannicus, only son of Claudius and rightful heir to the throne. The strange muddling of the two lads' true positions was due to Nero's mother, Agrippina.

Nero was grandnephew of Claudius. He was brought up as a child in poverty and neglect. But when weak, vacillating old Claudius mounted the throne, Agrippina won the emperor's half-imbecile affections and persuaded him to divorce his first wife and marry her. She then promptly poisoned the deposed wife and concentrated all her wiles into cajoling Claudius to declare Nero his heir instead of Britannicus. Having induced the emperor to make such public pledge and to compel the senate to accept Nero as future emperor, Agrippina poisoned Claudius and declared the sixteen-year-old Nero emperor. Later Britannicus was also killed to make the new ruler's claims more secure.

The first five years of the young monarch's reign were ideal. Guided by his mother, he made kind and righteous laws, conciliating the people and the army, and giving promise of a golden era for Rome. Nero, schooled cleverly by his crafty old tutor, Seneca, showed forth only the lovable, kindly side of his nature; his violent temper, selfishness and evil propensities being widely curbed. He was looked on as a model sovereign. But as time passed, he grew impatient at his mother's stern rule and longed to be absolute master. Her guidance irritated him. The two clashed repeatedly, and at last Nero proved himself Agrippina's true son as well as an instrument of "poetic justice" by having his mother assassinated.

Now, freed from all restraint, the man's true character asserted itself. He plunged into wild excesses, performing in the arena as a common charioteer, declaring himself the foremost singer and poet of the world, and treating the populace to original songs and plays. When any sought to check his mad whims he wasted little time over empire-building horrors. A sick girl picturing herself well and strong again, is helped by her fancy, but sometimes a girl who is perfectly well begins to fancy that there is something queer about her heart action, and the next thing anyone knows, she is really ill. You may use your imagination to help yourself or to harm yourself.—Chicago News.

Orchard Information

HINTS ON PRIZE-WINNING APPLES

The winning of prizes on apple exhibits in agricultural shows depends largely on the judgment of the man who selects the specimens. Attention to a few cardinal rules in choosing the exhibit, says the New Jersey state extension specialist in fruit growing, will result in winning a larger number of blue ribbons. Color, size, uniformity, condition, and freedom from blemishes are the five main points considered by the judge in awarding premiums.

Freedom from blemishes is an indication of carefully grown and handled fruit. No specimen with a scale mark, wormhole, curculio sting or other defect should be exhibited, even though it has good size and color. Each apple should be perfect.

Specimens should be of good color for the variety. The color should be deep and unmarred by russetting, scalding or sunburn. Red varieties should be completely red, while green or yellow varieties should carry no red color or blush.

The size should be the most desirable for the variety. A very large or very small apple is usually undesirable in the eyes of the judge.

The term "uniformity" indicates that all specimens on a plate should be of even size, shape and color. When the five apples are on the plate, they should appear as nearly alike as possible.

The term "condition" refers to the maturity. Specimens should be ripe and firm, with no signs of shriveling or decay. A specimen which "rolls" slightly or wrinkles when squeezed with the hand, is too ripe for exhibit purposes.

Fruit exhibited in containers should be properly packed. The container should be clean and bright, and properly marked with the name of the variety, grade, size and quantity of the fruit.

Spray Young Trees When Any Emergency Arises

With many growers the spraying of young orchards often is an emergency measure. That is all right, provided the orchard is carefully watched and the emergency does not become too great.

With young, nonbearing trees it is unnecessary to follow a fixed spray schedule. Careful attention will result in the detection of pests almost as soon as they appear. Aphids and borers should be brought into play as soon as an infestation threatens to become serious. Aphids are the most prominent among the insects that frequently appear on young trees. Borers damage diseases and leaf-eating insects often give trouble.

During dormant seasons the young orchard will require more spraying than in others. Some nonbearing trees are more susceptible to certain diseases.

Fire blight can be controlled. When this disease gets started in the farm orchard many people believe that it is the result of a visitation of providence and that the best plan is to let it run its course. Control measures consist of cutting out all blighted wood and cankerous spots and disinfection of all cut surfaces with formalin or corrosive sublimate. As an added precaution the tools used in cutting out the blighted wood should also be frequently disinfected.

Blight may be removed at any time it become noticeable with the possible exception of the months of June and July when it is spreading most rapidly. August is the very best time of the year to do this work. If the blight was not cut out last fall it should be cut out once and all prunings taken from the orchard and burned. If these ordinary precautions are taken to control blight the orchard can be kept fairly free from the disease.

When to Spray

The most important single operation in the orchard is spraying, for upon this work usually depends the marketable quality of the fruit. Not many years ago there was a decided prejudice against the spraying of trees lest the fruit be poisoned; just as a hundred years ago farmers feared that an iron plow would poison the soil. Now the question is what to apply and when to apply it, and strange as it may seem to the uninitiated, the experts are not yet in entire agreement on this matter.

Walnut Tree Poisoning

The reason tomato and other plants frequently wilt and die when planted near walnut trees is because the walnut roots give off a poisonous substance called Juglone, it is believed by A. A. Hansen of Purdue, who has been making investigations. This poison affects the plants that come in contact with it. Mr. Hansen advises that susceptible crops, such as tomatoes, potatoes, alfalfa, and apple trees, should not be planted in the vicinity of walnut or butternut trees.

Strawberry Runners

Strawberry runners are the natural means of reproduction. Naturally some of these will have to be allowed to remain or you will not find the plants perpetuating themselves for the second or third year. Also to get new plants for selling you will have to allow the runner to remain. Generally speaking, however, only three to four runners are allowed to continue growing from the parent plant. Excess runners are cut off to keep the plants within bounds.

New Style

In the old-fashioned revels the hero used to turn pale and bite his lips when he was agitated. In current magazine fiction he turns red and bites the heroine's lips.—Don Marquis in Collier's Magazine.

Has Many Fine Meanings

The Hawaiian "aloha" may be translated in many ways, as welcome, greeting, friendship, love, brotherhood, mutual understanding and good-by until we meet again.

HOW TO KEEP WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

LEPROSY IN THE UNITED STATES

LEPROSY is an ancient disease. It was evidently known and dreaded in Egypt before the time of the Exodus, as shown by the minute and stringent laws that Moses, the world's first great health officer, enforced on the Children of Israel. Readers of the Bible know how frequently the Bible writers refer to the disease and how much it was dreaded. Whether what was called leprosy in biblical days was exactly what we now recognize as leprosy or was a combination of several different diseases is a question over which experts are still arguing. Whatever it was, it was evidently much commoner and more contagious than it is today. Judging from the large number of leper hospitals and colonies in Europe during the Middle Ages, leprosy was apparently a commoner disease during that period. Today, in most civilized countries, it is rare.

It still exists in this country, although so uncommon that the great majority of physicians have never seen a case. Only occasionally, when a case is discovered and announced in the newspapers, does the average person know of its existence. The popular fear of the disease is far out of proportion to the dangers.

The United States public health service estimates that there are about twelve hundred lepers in this country, most of them in the Gulf states and elsewhere else. The disease has been known in the Gulf states, especially in Louisiana, probably through contact with the tropical countries of Central and South America through commerce; the lepers have been brought in one hundred years ago through the African slave trade and possibly through the settling of Louisiana by the Acadians.

None of our states has any hospital or facilities for treating these unfortunates, so the national government has taken over their care. No state wanted to have a leper hospital located in its borders. Louisiana had already established a leper hospital, so in 1921 the federal government purchased the hospital and enlarged it. It now has room for 425 persons and the United States public health service has the responsibility to take charge of any leper in any state and transport him to Carville, La., where he is cared for at public expense until he dies or recovers.

Most authorities now agree that leprosy is a dangerous contagious disease and that the best method of controlling it is to keep each leper separated from healthy persons so long as the disease is active.

VARICOSE VEINS AND ULCERS

VARICOSE veins form one of the most common and disagreeable affections of middle and old age. In former years, varicose veins and ulcers were far more common than they are today, when modern surgery offers an easy, safe and effective method of treatment and cure.

A varicose vein is one in which, on account of sluggish circulation, the vein is stretched by the venous blood behind it, so that the valves in the veins no longer work and as a result the full weight of the blood column in the vein, stretching it still more and causing a hardening and thickening of the walls of the vein, similar to the changes caused by arteriosclerosis in the arteries.

The principal vein which is affected is what anatomists call the long saphenous vein, the vein which carries back the venous blood from the foot and leg. Starting on the inside of the ankle, it runs up the inside of the leg just under the skin, receiving branches from the leg and thigh and getting larger as it ascends. Extending as it does from the foot to the upper part of the thigh, it is the longest vein in the body. In normal conditions, this vein, like all the other veins, is provided on its inside with valves like little cups, which hold up the weight of the blood column and so prevent the blood from settling in the foot and the lower legs, as it would naturally tend to do. But if the vein is stretched, these valves are pulled apart and no longer close. Then the whole weight of the blood above is exerted on the lower part of the vein and stretches it still more. The blood stagnates, the watery part oozes through the walls and the skin on the foot and leg up to the calf become blue, boggy and swollen.

A slight bruise or scratch on the unhealthy skin will start an ulcer, which once started is very slow to heal. These ulcers are usually on the inside of the leg just above the ankle.

Rest, elevation of the legs, elastic stockings and bandages, poultices, salves are and have all been used on these cases, but unless the weak or old or who will not consent to an operation. They all help but they do not cure. The only treatment that will permanently cure a varicose vein or a varicose ulcer is an operation by which the long vein is cut through and tied or a piece cut out so as to destroy the vein and relieve the unnatural blood pressure.

(©, 1926, Western Newspaper Union.)

"BAYER ASPIRIN" PROVED SAFE

Take without Fear as Told in "Bayer" Package

BAYER

Does not affect the Heart

Unless you see the "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over twenty-five years for

Colds	Headache
Neuritis	Lumbago
Toothache	Rheumatism
Neuralgia	Pain, Pain

Each unbroken "Bayer" package contains proven directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100.

Postage Stamps Give Lessons in History

"Everybody who posts or receives a communication through the United States mail receives solemn volens, a treasury lesson in the history of the nation," says Harry S. New, postmaster general, in an article in School Life, a publication of the interior department.

"In general the designs upon the regular issues have included the representation of the head of one of the Presidents, but in the past 50 years the custom has grown of commemorating important historical events by special issues," states the postmaster general. "The novel appearance of the new stamps immediately arrests the attention of the user, and inquiry into its meaning naturally follows. The result is a valuable lesson in history which few escape, even those of limited education.

"Thirteen special series of adhesive stamps have been employed to impress historical occasions upon the popular mind."

Possibly Not

In a theological argument a man said: "Why, you took your Ten Commandments from the Egyptians."

"Possibly," remarked the other; "but you can't accuse us of keeping them."—London Tit-Bits.

Nurses, nearly 'specials,' Ladies' and Gents' Hairdressers, Barbers, Chauffeurs, Canvassed sun-scarcely, non-irritable.

VOGUE FOR THE TWO-PIECE SUIT; PARIS ACCLAIMS CLOTH COATS

ANY woman may justly take pride in having her costume described as strictly tailored, for it is indeed very complimentary to her appearance. A strictly tailored ensemble assures a certain perfection not only in the finesse and classic simplicity of the suit or costume itself, but in every accessory detail as well. The shoes, hosiery, hat, scarf, hand bag and of course the blouse which completes the two-piece suit must perforce evidence a discriminating knowledge of correct dress if she be strictly tailored.

The reward of exercising this careful judgment justifies the effort, for in the presence of the garishness of this season's wildly bepatterned silks and general flamboyant color there reigns supreme the smartness of quiet and general flamboyant color there reigns supreme the smartness of quiet and restful tailored suits. Paris acclaims cloth coats and the two-piece suit as the correct thing. Whatever it was, it was evidently much commoner and more contagious than it is today. Judging from the large number of leper hospitals and colonies in Europe during the Middle Ages, leprosy was apparently a commoner disease during that period. Today, in most civilized countries, it is rare.

The Tailored Suit.

Metal monograms on strap buckles hold slimline smart new styles in gloves.

As to the smartly tailored blouse, fabrics of self-fabric and set in tucked or pleated vestee effects prevail of crepe de chine.

Cloth coats of quiet elegance worn over frocks of entrancing loveliness are very much in evidence this summer. Verily, it is a season of coats and dresses—a fact attested by smart gatherings at the French re-

Show Quiet Elegance.

also brought out. Tawny rose-beige and subdued wine shades still blended and related are accented. Harmonizing hats and footwear will enhance the autumn lailleur.

The new felt hats to be worn with the smart tailored suit are very slow dented and creased crowns and rolling brims of which feminine fancy is made darker than the hat. Coron kid pumps with beige hose or strapped pumps of patterned suede are noted among newest daytime footwear. In hand bags, soft effects in pouches vie with novel envelopes. It is said that underarm bags will be fashionable.

THE KITCHEN CABINET

(©, 1926, Western Newspaper Union.)

All day to watch the blue wave curl and break,
All night to hear it plunging on the shore—
In this sea-dream such drafts of life I take
I cannot ask for more.
—Thomas Bailey Aldrich.

LAMB AND MUTTON

Mutton is so well liked in England and used so freely that it seems strange that we in America cannot serve it oftener and more freely.

When mutton is properly killed and cared for there is no objectionable woody flavor. The meat should never be touched with the hands after handling the wool, as the wool grows on the skin and the oil from it flavors the meat. Remove the skin carefully before cooking.

Roast Leg of Lamb.—Rub salt, pepper and onion with any sweet fat all over the meat. Place in a roasting pan and sear it well in a hot oven. Now add one-half cupful each of water and sliced onion, one cupful of sliced tomatoes, eight peeled potatoes around the leg of lamb. Roast in a hot oven and serve very hot with a gravy made from the liquor in the pan. Mint sauce may be served with the lamb. To prepare it, mince a half cupful of mint and pour over it a tablespoonful of boiling water, cover and let stand, adding a tablespoonful of vinegar and a little sugar to serve.

Mutton Stew.—Put a neck piece of mutton on to stew in boiling water with a small onion. Simmer until tender, then add a can of peas, thicken the gravy and serve with the peas poured around the roast. Add dumplings of suit and pepper after the meat is partly cooked.

Mutton en Casserole.—Brown a pound or less of mutton cut from the shoulder and in serving-sized pieces. When well-browned season well and dredge with flour. Add one cupful or more of carrots, a cupful of peas, one onion to the meat, cover and bake in a casserole for two to three hours. Serve from the casserole.

Barbecued Lamb.—Cut cold roast lamb into slices and reheat them in the following sauce: Two tablespoonfuls of butter, one-half tablespoonful of vinegar, one-third cupful of currant jelly and one-fourth teaspoonful of mustard. Cook until the lamb is well-heated and flavored.

DESSERT FOR EVERY DAY

On the busiest day when time is very precious, you can make

Fifteen - Minute Pudding.—To a scant one teaspoonful of baking powder, a pinch of salt and enough good milk or fresh buttermilk to make a drop batter. Butter custard cups, put in a tablespoonful of batter then a tablespoonful of canned cherries and another spoonful of batter, and put to cook in a pan of boiling water well covered for 15 minutes. Serve with whipped cream.

Edinburgh Pudding.—Take one-half pound of oatmeal, one cupful of thick custard made with milk, one cupful of one-half pints of water, one-fourth of a cupful of milk, one-half teaspoonful of salt, and two ounces of coconut. Cook the oatmeal in the water with the salt and milk, and then turn into the custard, pour into molds and serve, when molded, with coconut sugar and cream.

Lemon Meringue.—Take one pint of milk, three ounces of sugar, three pints of fine bread crumbs, two eggs, the juice and rind of a lemon. Mix all ingredients and cook slowly until well set, baking in a deep pie plate. Set away to cool, cover with a meringue and brown. Serve cold.

Snow Jelly.—Prepare any desired flavor of jelly powder. Beat until it is thickening whip it until foamy. Chill and pile on top of any molded gelatin or other flavor, using pineapple for one and raspberry for the other. Serve with whipped cream.

Spiced Tea Cakes.—Mix and sift one and one-half cupfuls of flour with two teaspoonfuls of baking powder, one-eighth teaspoonful of nutmeg and one-fourth teaspoonful of mace. Cream one-fourth of a cupful of shortening, add one cupful of sugar, two well-beaten eggs, one-half cupful of milk added alternately with the flour. Add a few raisins and bake in greased muffin tins. Cover with maple frosting and sprinkle with chopped filberts.

Egg Rolls.—Scald and cool one-fourth of a cupful of milk, add one yeast cake, mix well and add one cupful of scalded milk, cooled. Stir in two cupfuls of flour, beat well and set away in a warm place until light. Add the yolks of two eggs, half a teaspoonful of salt, half a teaspoonful of sugar, one-fourth of a cupful of butter and flour enough to knead. Knead until smooth. Shape into small balls; when it has become light once more roll with the thumb and set into this half a teaspoonful of jelly, work the dough over the opening, leaving the jelly in the top crust. Let rise to double its bulk and bake twenty minutes in a hot oven.

Nellie Maxwell

(©, 1926, Western Newspaper Union.)

Fringed Frocks

Many of the newest evening frocks are fringed from waist to hem, others have a single deep fringe reaching from the knees to the bottom of the skirt. In each case, however, the fringe constitutes the only trimming.

Plain Backgrounds

Plaid chiffon and plaid taffetas are very smart this year, particularly for afternoon frocks. Usually the combination is high color on a dark, conservative ground.

Rough Silks

The rougher silks such as rajah and shantung make the most fetching sleeveless costumes for sport, and take as naturally to colorful scarfs and fancy kerchiefs as the well-known duck does to water.

Smart Overblouse

Plaid taffeta in green and blue makes a very smart blouse to wear with a blue suit. The fabric is fringed to form the finish on the cape of the peplum and at the collar.

Sweden's Forests

Of Sweden's land area of 158,500 square miles, about 52 per cent is forested. Two-thirds of the productive area is north of the Dal river, while the southern part of the country has to a great extent been cleared for cultivation.

Cheerfulness Tells Story

Cheerfulness is full of significance; it suggests good health, a clear conscience and a soul at peace with all human nature.—Charles Kingsley.

FISHER BODIES

GENERAL MOTORS

THE NEW CARS—THE NEW BEAUTY

Body by Fisher is the outstanding charm of the new General Motors cars now commanding public attention.

Into the new models, Fisher has introduced new standards of beauty to match the highest standards of safety, comfort and convenience.

As the new cars are announced, Fisher leadership becomes inescapable.

Look at the names—Cadillac, Buick, Chevrolet, Oakland, Oldsmobile, Pontiac—the greatest cars on the market in their respective classes—and attached to them the magic symbol—Body by Fisher.

Magic because Body by Fisher is the buyer's greatest assurance that here is supreme quality and value.

Glaciers Receding

The Manchester Guardian Commercial Reconstruction Survey, in the Manchester Guardian Weekly, London Eng., says: "Glaciers are receding in the Alps, in the Himalayas, in Alaska, in Greenland, in Iceland, in Norway, in Switzerland, and in the Caucasus. Only in the Andes are they advancing. Their retreat is not a matter of a few years, but of centuries. Thus the Rhone glacier has retreated 1,200 yards since 1856, and the Aletsch glacier 1,000 yards since 1880. The Grindelwald glacier has retreated 1,000 yards since 1850. The Mer de Glace has retreated 1,000 yards since 1820. The Argentiere glacier has retreated 1,000 yards since 1879. The Forno glacier has retreated 1,000 yards since 1860. The Gorner glacier has retreated 1,000 yards since 1870. The Fee glacier has retreated 1,000 yards since 1880. The Miage glacier has retreated 1,000 yards since 1860. The Brenva glacier has retreated 1,000 yards since 1870. The Zmutt glacier has retreated 1,000 yards since 1880. The Allalin glacier has retreated 1,000 yards since 1860. The Saas

RROPOSED SCHOOL FOR CHARLEVOIX

TO CHARLEVOIX VOTERS:—

Repeated requests have come to the Board of Education to plan for the erection of a modern High School building to meet the needs of our boys and girls.

Charlevoix has not been slow to improve streets, to build beautiful homes, to provide water and light facilities and to make the most of the natural resources that attract visitors the world over, but its school buildings have not kept pace with other improvements. All our buildings lack modern equipment and our high school is overcrowded.

The Board has studied the question for some time and from all angles. It has acquainted itself with school building progress in neighboring cities. It has consulted architects and obtained estimates of cost both for remodeling the old buildings and erecting new ones. As a result of that study, it is unanimous in recommending the erection of a modern Junior and Senior High School building that will cost $200,000 to build and equip.

The proposed building will take care of all grades above the sixth. It will contain necessary class rooms, office, study halls and library. Also a combination gymnasium and auditorium with stage and adjoining rooms well equipped with showers and lockers.

The building program also contemplates the remodeling at some future time of the two old buildings into modern school buildings for grade purposes, at an additional cost of $50,000.

The Board recommends that the bonds be retired over a period of thirty years, which on the present valuation means that taxes will be increased for both principal and interest about $3.35 per thousand dollars. Increased operating expenses will perhaps be $1.75 per thousand dollars more. The present school tax rate is $12.00, making a total of $17.00 per thousand. These estimates are based on the sale of the bonds at 4½ per cent retired over a period of thirty years and spread over an assessed valuation of $3,600,000.

By comparison the present school tax rate in the following towns it can readily be seen that the proposed building will not make our school taxes excessive:

Traverse City	$16.21
Cadillac	16.45
Big Rapids	18.56
Petoskey	14.31
Cheboygan	15.50
Ludington	16.01
Boyne City	28.01
Escanaba	17.01
East Jordan	24.00

Good schools are the community's most important asset and the Board of Education solicits constructive suggestion from interested citizens.

At a special meeting in the High School building of the district to be held on Monday, August 30 at 7:30 p.m., the qualified voters, who also must be tax payers, are invited to participate in the opportunity to discuss the proposal and to register their decision. Polls open from 8:30 p.m., until 10:30 p.m. central standard time.

ORIENTAL PRINCESS IN CHARLEVOIX

(Continued from page One)

as it did some 2000 years ago. Her clever and forceful delineation of the manners and customs of her people, which is embraced in this lecture, has proven one of the most interesting subjects discussed in America in connection with the Orient in many years.

Monday evening at 8 p.m. at the same church, she will present her own dramatization of the beautiful idylic love story, "Ruth and Naomi," preceded by a part of her famous Chatauqua recital, "Damascus, the Pearl of the East."

At the foot of Mt. Lebanon, 40 miles

PRINCESS RAHME

from the ancient city of Damascus, lies the Princess Rahme's birthplace—Baalbek. Her early education was received at the American schools and colleges in Syria and later she completed the idea of coming to the United States to complete her educational training, and has since obtained her degrees from several of the leading universities in this country. But while she has enjoyed the higher education for women in America she remains intensely Oriental and has won her way by her charming gifts of intellect and culture.

In her appearance, the Princess wears the robes of her own house, which are fashioned by hand by girls of Damascus. She is accompanied on her American tour by her secretary, Miss Lucile Burgess, a college friend, who has made a close study of the weird Palestinian folk songs and presents the musical setting for this Princess' message.

Notice to Charlevoix Co. Teachers:
Applicants for teachers certificates should file their credits with the Commissioner of Schools, Charlevoix, Michigan at once. Only those possessing the credits allowed by the department of Public Instruction will be granted certificates.

Millions in Pearls

This pagoda, a part of the Japanese exhibit at the Sesqui-Centennial international Exposition in Philadelphia, celebrating the 150th anniversary of the signing of the Declaration of Independence, is made entirely of pearls and its value exceeds $1,000,000. The exposition continues until December 1.

Great Eastern Ruler

Saladin (1137-1193) was a powerful sultan of Egypt and Syria, who rose from a soldier of the shepherd tribe of the Koords to be vizier to the caliph. On the caliph's death he usurped the throne and greatly extended his territory by wars. His capture of Jerusalem, in 1187, caused consternation throughout the Christian world, giving rise to the Third crusade. Saladin was compelled to surrender the stronghold of Acre to the crusading armies in 1191. Four years they contended with him for the tomb of Jesus, but without further success than the securing of a truce of three years, during which time pilgrims should be allowed to enter Jerusalem. The armies then withdrew. The next year Saladin died, and his empire rapidly dwindled under the rule of his followers.—Kansas City Star.

Bacteria Survive Cold

Continued freezing apparently cannot kill the bacteria that cause typhoid. Profs. M. J. Prucha and J. M. Brunner of the department of bacteriology of the University of Illinois, kept a colony of typhoid germs in a sample of ice cream at a temperature averaging four degrees below zero for two years. From time to time samples were taken out, from all of which positive cultures were obtained. The number of bacteria decreased gradually, it is true, but as many as 11,000 living typhoid bacteria survived in the final sample at the end of two years.

BIRTHDAY PARTY AT ST. JAMES

One of the most beautiful affairs of the summer was the birthday party Saturday afternoon, Aug. 21, of Elizabeth Teresa Maloney, 12-year old daughter of Mr. and Mrs. J. P. Maloney of Forest Park, Ill. Covers were laid for fifteen, at a table beautifully decorated in pink and white, with flowers and maiden hair fern as a background. Each little guest was presented with, favors of pink dolls and roses filled with assorted candies. Refreshments consisting of sandwiches, lemonade, ice cream and cake, was enjoyed by all present.

Games were played, the winners being Betty Cull, Edith Gallagher and Louisa O'Donnell.

Music and dancing played an important part of the entertainment, and good-bys were regretfully said by each young one until the opening date of the season on large and small mouth bass A. D. 1927, under penalties provided by Section 5 of Act 230 of the Public Acts of 1925.

Signed, sealed and ordered published this fourth day of August 1926.

Everybody Loses When Timber Burns

Six Rules For Preventing Fire In The Forests

1. *Matches*—Be sure your match is out. Break it in two before you throw it away.
2. *Tobacco*—Be sure that pipe ashes and cigar or cigarette stubs are dead before throwing them away. Never throw them into brush, leaves, or needles.
3. *Making Camp*—Before building a fire scrape away all inflammable material from a spot at least 10 feet in diameter. Dig down to the mineral soil. Make your camp fire. Keep your fire small. Never build it against trees or logs or near brush.
4. *Breaking Camp*—Never break camp until your fire is out—dead out.
5. *Brush Burning*—Never burn brush except during a heavy weather and then there is the slightest danger that the fire will get away.
6. *How to Put Out a Camp Fire*—Stir the coals while soaking them with water. Turn small sticks and embers that may be on the ground around the fire. If you can't get water stir in dirt and tread it down until packed tight over and around the fire. Be sure the last spark is dead.

Michigan is the nation's playground. Last year 2,500,000 vacationists enjoyed Michigan's natural beauty. And summer visitors spent $200,000,000 last year in Michigan.

For here are giant forests . . . wooded wilderness rich in primitive attraction . . . wild life . . . an ideal vacation land.

It is the duty of each resident of Michigan to preserve this natural beauty. For each resident benefits by Michigan's resources.

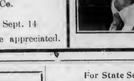
Last year forest fires burned over 725,928 acres. These fires in addition destroyed a proportionate amount of property and the cost to suppress them alone amounted to $125,042.88.

Extinguish camp fires . . . break your match . . . "Heel In" your lighted cigar, cigarette or pipe ashes. Don't scatter refuse. For EVERYBODY loses—when timber burns.

Michigan Press Ass'n.

COMPETING FOR A REAL PRIZE!

Effie Martin and Minnie Kirk 's been running a neck and neck race for young Bill Carter, the catch of Lapeer County. Effie expects to win out on hes lemon meringue pies and Minnie's depending on her coconut cream cake. Last night they were both at our house together and I says: "Girls, going to the State Fair? I hear you can learn something new down there about baking in September. And young Bill Carter was telling me he's getting mighty tired of lemon pie and cream cake. Seems to me you ought to brush up a bit!" So I made two customers for the Fair right there.



PROGRESS OF THE GREATER MICHIGAN STATE FAIR

This beautiful and splendid colonial mansion, formerly the Governor's Residence, is now the Administration Building of the greater Michigan State Fair. It has been entirely renovated and is ideal for its purpose with most beautiful grounds surrounding it. Michigan State Fair 1926

Why I'm going to the Greater MICHIGAN STATE FAIR

By Lorenzo Joe

Copper 5,000 Years Old

Copper vanity cases, a copper hand mirror, copper razors, tools, fish hooks and hairpins have just been found in Mesopotamia by scientists excavating the five thousand-year-old palace of the kings of Kush. Copper is truly the everlasting metal.

Considerate

"Why is it that confounded new maid never answers when we ring the bell?" "I don't think we'd better be too exacting at first, Horace. The girl tells me she used to be employed at a telephone exchange."

An Example

A philosopher says he never heard a generalization about women that was not a lie. How about this one?—Providence Journal.

EIGHTEEN CLUB MEMBERS ATTEND CAMP

Conducted August 17-20, at Gaylord Fair Grounds

The first annual Boys' and Girls' Club Camp for Northern Michigan was conducted August 17-20 inclusive at the Gaylord Fair Grounds, with eleven counties represented.

For several years we have hopefully anticipated the time when the several hundred boys and girls in Northern Michigan could get acquainted and receive instruction in the various farm subjects and play and work together and many thanks are due to Gaylord and the Michigan Central Railroad and many other organizations that made the camp possible.

During the week all the demonstration teams competed against each other for the championship of Northern Michigan and the first group was selected and sent at the State Fair at Detroit, with traveling expenses paid.

The young club members were all fed in one large dining room in regular army style, including regular kitchen police duty and were housed in the various Fair buildings. Nine-thirty p. m. was go to sleep time and shut up and six wrs to get up and hurry out for setting up exercises.

The result of the demonstration teams and judging teams were not announced, but Charlevoix county expects to win one or more trips to the State Fair. Charles and Lewis Kleinhans, of Clarion, gave a very creditable handicraft demonstration, while the calf club members also gave their best to win the high honors.

The following boys and girls from Charlevoix county were included in the 175 attendance: Eddie Ostland, Alfred Larsen, Clarence Trojanek, Lucille Severance, Bruce Sanderson, Arnold Smith, Lewis McPherson, Frank Severance, Oswold Hosegood, W. F. Wurn, East Jordan; Mary Bellamy, Boyne City; Lewis Kleinhans, Charles Kleinhans, Clarion; Albert Elliott, Richard Straw, Rex. Supernaw, Arthur Elliott, Charlevoix; Gertraine Yell, Boyne Falls.

POTATO GROWERS VISIT CITY ON TUESDAY

Members of the Michigan Potato Growers Association were Charlevoix visitors last Tuesday and with the members were parties from Illinois, Indiana and Ohio, all making a tour of inspection of various fields of tubers growing certified seed.

Twenty automobiles loaded to capacity were used to convey the party on their annual tour which started from Mancelona at 6 o'clock and going as far east as Gaylord, north to Levering and south to Bellaire, winding up at Fisherman's Paradise where they held their annual meeting and enjoyed one of the evening banquets for which this resort is famous.

Conclusive

"My client is not mentally normal. The fact that he murdered his wife is partly a proof of that, but the fact that he married again is conclusive."—Dorfbuebler, Berlin.

SUNDAY MUSICAL

By Miss Morris at the Oldham Club, August Fifteenth

A very delightful musical took place Sunday evening, August 15, at the Oldham club, when Miss Helen Morris appeared, assisted by Mary Jane Doherty, dancer.

Miss Morris captivated her listeners at once by her musicianly interpretations. Her program, a well chosen one, included in the first group, numbers by Mozart, Gluck, Saint Saëns and Dohnanyi, and these were given with a brilliant facile technic, matured interpretation and poetic charm.

The Chopin numbers, particularly the Ballade in A flat were played with charm and delicacy, and the Winter Wind study given in brilliant fashion. To this group was added for an encore The Procession of Gnomes.

The closing numbers were the Caprice Espagnol of Moszkowski, a prelude of Rachmaninoff, which had to be repeated. The program ended with Hungarian Rhapsody No. 12 of Liszt, played with authority and vigor, and gave ample evidence of the fact that Miss Morris is an astonishingly well developed musician.

Mary Jane Doherty danced two numbers, and was recalled both times by the charm and beauty of her performance.

Remarkable Linguist

Sir William Erwin Hamilton, the celebrated English mathematician, who died in 1865, had an extraordinary facility for learning languages, and is said at the age of twelve to have mastered 13 languages, besides English.

Friends and Enemies

Whatever the number of a man's friends, there will be times in his life when he has one too few, but if he has only one enemy, he is lucky. Indeed if he has not one too many.—Bulwer-Lytton.

Swallowed Itself!

Recently one of the bon-vonstricters in the Hamburg zoological gardens swallowed so much of its own body that it became tied up in the form of a ring and was suffocated.

DR. HUGH W. DICKEN

HEARTY APPROVAL

From all Parts of the 29th State Senatorial District

With the date for filing petitions in the September primary closed and the contest for various offices now in full swing, the electorate of the 29th State Senatorial district are giving careful consideration as to who will represent them in the State Legislative body.

And Charlevoix County's candidate—Dr. Hugh W. Dicken of East Jordan, is receiving mighty favorable endorsement from citizens in all walks of life and from all parts of the district. That Doc Dicken is receiving this hearty support is not wondered by those of this part of the district where he is best known.

For nearly thirty years Dr. Dicken has been among the leading practicing physicians in this part of the state, and his work has brought him into daily personal contact with the people. He has visited their homes and firsides, exchanged opinions as to matters pertaining to their welfare, and the communities. Through this daily intercourse for over a quarter of a century he has obtained a thorough knowledge of their needs—a heart to heart understanding that is beyond valuation to any public official.

And Dr. Dicker is a doer of things. The people of East Jordan know this theory, and, realizing it, have kept him in office as mayor of the little city for many years. His administration of civic affairs has always been progressive. Through his untiring efforts in mapping out and carrying through various developments, East Jordan is now considered one of the freshest and most progressive small cities in Michigan. And being a doer of things, he placed his physician's office in this city and east his lot with Uncle Sam's army during the World War, returning from overseas with the rank of Major, 337th Engineers.

In his campaign for the Republican nomination, Dr. Dicken is making no rash pre-primary promises. Should the people of this Senatorial district select him as their choice, those who know Dr. Dicken, know well that he will be loyal to all the interests of the State of Michigan, and that he will work untiringly for the welfare of the people of the 29th Senatorial district in particular.

Giovanni di Silvestro has recently been re-elected commander of the Sons of Italy in America.

THREE BANDS HERE

Next Sunday—East Jordan, Boyne City and Charlevoix

Plenty of band music is promised for Sunday afternoon, Aug. 20th, for the entertainment of Charlevoix citizens and visitors.

With this object in view arrangements have been made with members of the East Jordan and Boyne City bands to join the Charlevoix city band at the local tourist camp Sunday at 3 o'clock, and entertain with a grand concert, something out of the ordinary in this region, as a band of sixty pieces will be used in the rendition of the several musical numbers that have been selected for the program.

WORKERS HELP CAL CAMPBELL

Former Michigan Conductor KnowsWorkers Side of Life

Development in Northern Michigan in the next two years should be rapid, especially in the counties comprising the 29th Senatorial district, which contain hundreds of thousands of acres of Michigan's most beautiful resort land.

Realizing this and believing this district should send to the State Senate, a man who is enthusiastically anxious about this development, Cal Campbell of Indian River, has been given strong endorsement all over the district.

He is now campaigning for the Republican nomination. He believes the great state of Michigan should act immediately to help develop this great north country. He believes the state should build new roads into the hundreds of thousands of acres of beautiful wild land along the Lake Huron and Lake Michigan shores. He believes this should be done without further delay. He believes that this great state should appropriate money to advertise to the world, the beauties contained in the northern part.

Cal Campbell has lived in Northern Michigan 48 years, coming to Gaylord when only 12 years old, later he worked on the Michigan Central railroad and step by step rose to the position of conductor. He held this job for 25 years and then opened up a stonequarry at Afton, known as the Campbell Stone Co. This plant employs a large number of men. Practically all of them have worked for Mr. Campbell for years because he is a friend to them. He knows the working man's side of life and has always done everything in his power to further their interests. Even back in the days when he first started railroading he took an active interest in his fellow man and worked out the first railroad man's organization on the Michigan Central. It was known then as the Brotherhood of Railroad Trainmen. In the capacity of chairman of the grievance committee, Mr. Campbell drew up the first pay schedule ever submitted to the Michigan Central and still has the original copy. He still retains his membership in this brotherhood.

So Cal Campbell knows the workers' side of life. He is interested in their welfare, as all his employees and friends will testify. On top of this, he is true to Northern Michigan. He is a firm believer in this great resort country. He is anxious to see it develop, and wants the state to do its part. He has no axes to grind. No Normal schools to fight for, no pet projects to further but he does believe that the entire state should help develop Northern Michigan and should do it now.

Cal Campbell is one of Michigan's foremost business men and has the ability to help North Michigan in its development. If the people of this great resort country want to help to develop their own town, village, community or city, and believe as Cal Campbell does, that the state should do its part, then a vote for Cal Campbell for State Senator on Sept. 14, will be a vote in this direction.

No Place in Society for Fijian Bachelor

The Fiji Islands are now civilized, and civilization has brought many changes. Especially is this so in the way the native women are now treated. Some fifty years ago the women there were mere slaves of the men. Now they are their equals and companions.

Modern Fijian women dress well, beautify their homes and bring up their children in a healthy way. Yet they are not losing their Fijian individuality. They still retain many of their charming manners and customs, says the Pathfinder Magazine.

One of the most amusing customs still retained is that bachelors are not tolerated. None of the excuses offered for being bachelors in other countries, such as small income, dislike for women, etc., are accepted there. Every man must get married. In every native town there is a woman's vigilance committee.

According to one authority this committee might be appropriately called a "Make 'Em Get Married" society. For when a young lady reaches the marriageable age and has no lover seven or more curls are arranged at the back of her head. She is then dressed in her very best to scatter about town making eyes at all the eligible bachelors.

If no offer of marriage comes within a few days the mother of the young "debutante" puts some white pigment over the curls to make them look gray. This is supposed to indicate that the "sweet young thing" is growing gray with worry and regret. It is also a sort of indication that the bachelors are not so gallant as they might be. However, this camouflage usually produces the desired effect, and the young lady is besieged with matrimonial offers. The successful suitor then calls at her house and leaves his "card," a small whisk's tooth.

PICNIC AT NORWOOD LAST WEDNESDAY

A picnic at Norwood yesterday attracted Mrs. Sybil Gurney and "Uncle" George H. VanPelt to the town where for years they resided in earlier days thereby giving an opportunity to meet friends and old time acquaintainces.

They are spending today in the same location celebrating the anniversary of the Farmers Friendly picnic, an annual event of a quarter of a century ago—one of Uncle George's hobbies, and let it be said that as sponsor for such events and as promoter Uncle George was a decided success as was evidenced by the number of people—upwards of four thousand—in attendance, with such coming from as far south as Traverse City and north from Harbor Springs, and this, too, when the method of transportation was either by steamship or horse drawn vehicles, the latter making the trip three long stretches of forest and over a trail far different from our present highways.

ST. JAMES CLINIC

To be Held Friday and Saturday, August 27 and 28th

The date on which the free chest clinic which is to be held in Beaver Island will occur has been announced for Friday and Saturday, August 27 and 28th in the Parish hall at St. James. At this time an opportunity is given wholly without cost to the patient, to have a thorough chest examination by a man who has long specialized in chest work. The clinic is for diagnostic purposes only, the clinic examiner does not treat, but patients are referred to their family physician for treatment.

To cure tuberculosis, according to Miss Hazel, the disease must be found in its early stage—hence the importance of frequent chest examinations. A visit to the clinic is urged on the part of all apparently well members of families which have had tuberculosis, and families which have been exposed to the infection through tuberculosis reactors among their farm animals and any others who may have the early symptoms of tuberculosis, a tired feeling all of the time, loss of weight, a persistent cough, and a daily afternoon temperature.

Fable

One upon a time there was a moving picture which portrayed a youthful bachelor's dinner party without introducing a serpentine pool, buckets of champagne, bathing girls, toy balloons, silken streamers, half a dozen jazz bands, hundred-dollar bills (concealed beneath the ladies' plates).

Considerate

"Why is it that confounded new maid never answers when we ring the bell?" "I don't think we'd better be too exacting at first, Horace. The girl tells me she used to be employed at a telephone exchange."

Rough Guess

"What is the occupation of that gentleman who seeks so hard to entertain?" "Judging from the stories he tells," answered Miss Cayenne, "I should say he is an interlocutor."—Washington Star.

PRINCESS RAHME

Delights Large Audiences Methodist Episcopal Church

Inspired with a longing for her native land and fired with the hope that some day its ancient glories may be revived, Princess Rahme, of the Syrian House of Haiden, in an eloquent and forceful address delighted a large audience Sunday evening at the Methodist church, choosing for her subject, "Under Syrian Stars."

She painted a graphic picture of the Holy Land and corrected numerous, false impressions that are current as to the Syria of today: "My motive in touring this great western continent," the Princess said, "is to give the people of America and Canada a clearer and better understanding of my unique country and its interesting people. I find so many has such a hazy idea of my country, confusing my people with the Assyrians, Armenians and Turks, when in reality they are the direct decendants of the people who spoke the ancient Syriac of biblical days."

Princess Rahme gave a comprehensive survey of Palestine, dwelling upon its scenery, climate, productiveness and people, bringing out many of the interesting manners and customs of her people, her message closing with a beautifully worded tribute to the little land across the sea—a land flowing with milk and honey.

Monday evening the Princess, assisted by her secretary, Miss Lucile Burgess, presented her own dramatization of the beautiful idylic love story, "Ruth and Naomi" in a most charming manner and in such a way that that story the gem in ancient history, will not soon be forgotten. The Princess portrayed the parts of Hasmi and Orpah, and Miss Burgess the role of Ruth.

Sunday Princess Rahme was entertained at a sumptuous Syrian dinner given by Mr. and Mrs. A. Saleem Musleam, who have been very close friends for a number of years.

TAG DAY RESULTS

$153.70 Was Realized for the Star Commonwealth for Boys

The Starr Commonwealth for Boys, Albion, represented by Miss Florence Willson, desires to thank the citizens and residents of Charlevoix for their loyal support on the tag day held here last Saturday. Due to the inclemency of the weather not as large an amount was realized as last year, $153.70 was collected however, and this result was made possible by the faithful work of the young tag sellers to whom a great deal of credit is due.

The prize winners were: Lucile Magness who led with $18.74, Robert Reis $14.15, Marc Hugl $10.10, Junior Schlesinger $8.84, Helen Block $8.35, Robert Geiger $8.14, Jane Mooentelder $7.94, Phillip Magnus $6.56, Joe Summer $6.44, Marguerite Hull $5.75.

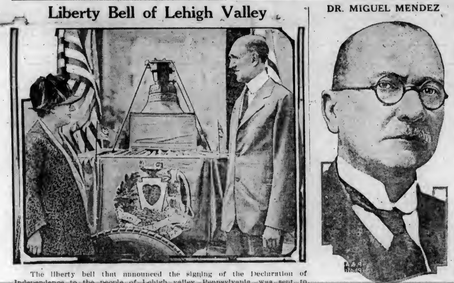
Preparing for a Big Exposition in St. Louis

St. Louis, Mo., is making elaborate preparations for the Greater St. Louis exposition, which will be held September 4 to 16. Above is shown one day's output of sculptoradas for the adornment of the buildings.

Liberty Bell of Lehigh Valley



The liberty bell that announced the signing of the Declaration of Independence to the people of Lehigh valley, Pennsylvania, was sent to the Sesquicentennial exposition from Allentown, where it was hidden during the Revolutionary war. It was accompanied on its trip by more than 150 automobiles and 500 citizens of that section. Photograph shows Miss Thomas of the Pennsylvania State building and Mayor Gross of Allentown with the bell.

Only Public Bee Market in World

The only public bee market in the world is held annually in the little village of Vennendaal, Holland. From all sections of the country the bee farmers arrive, carrying their hives with their thousands upon thousands of bees.

SHORT ITEMS of INTEREST

Aluminum is the most abundant of all metals.

A serum for treating erysipelas has been reported.

Dates, figs, prunes and raisins are rich in iron.

One-man racing automobiles weigh less than 1,500 pounds.

The gibbon is the only ape that habitually walks in an upright position.

The average life of an automobile is seven years.

Trees in thick woods grow taller in their efforts to get sunlight.

Rats can live in any climate from the Arctic regions to the tropics.

Excessive smoking is hard on the eyes, a California scientist declares.

The majority of blind people in Spanish-American countries are beggars.

Yankee Beggars Raise Standards

Native Wit Makes Mooching a Science as Other Countries Bar It.

New York.—"Alms, alms, for the love of Allah!" has resounded throughout Palestine since Mohammed first went to Mecca; but if the authorities in Jerusalem have anything to do with it, it will no longer din in the ears of the tourist. For Jerusalem has turned thumbs down on begging and the picturesque and nondescript loafers who heretofore importuned the faithful and the unfaithful alike must seek other fields where their solicitations have not aroused the authorities against them.

Spain has also notified the beggars that, starting immediately, they are to become useful citizens. A round-up is now in progress and those of the aristocracy of alms who are too proud to work will be sent to the workhouses. The rest will be given opportunities to learn trades, and the inborn will be taught to read and write.

Hamburg, so the authorities say, has solved its problem. When a "schnorrer," "moocher" or "panhandler" accosts the stranger on the street, he is handed a ticket which permits him to have his case investigated by a welfare society. If he is found worthy, he is taken care of. If the society decides against him, he is advised to hustle for a job or leave town.

In Hull, England, the city corporation has taken somewhat novel steps to eliminate blind beggars from the streets. It has decided to pension them. Those who now enjoy a pension will have it increased to 25 shillings a week, while those who have no allowance whatsoever will find themselves on the city's pay roll for a like amount. The city estimates that this scheme will cost in the neighborhood of $30,000 a year.

Age-Old Problem.

Begging is coeval with history, and every nation and people has had this age-old problem to solve. When corn and wine were plentiful in the land, the gates of Rome were lined with the indigent and shiftless, who called on all the gods to witness their shameful and collective ailments and misfortunes as they asked the stranger approaching the City of the Seven Hills for a few spare coppers.

When famine swept through the provinces, recruits flocked to the thinning army at the gates and dwelled its ranks. Their argument was that if there be plenty in the land, those who have should give from their abundance to those who have not; and if there be famine, those who have should give all the more to those who have not. Rome, drawing on the riches of the conquered territories, opened its coffers and handed out doles to the city's hams, and more hung flocked to the city.

Jerusalem, in the days of the kings and the prophets, had its lepers and its loafers stretched out in the sun at the walls of the city. There they begged and blessed and cursed the opulent traders coming in from Egypt, Syria and other points, in successive breaths, according as they gave or did not give.

Begging thrived in the Middle ages. There was no deficiency of loafers whose fathers before them for generations had been loafers. They raised large families in rags and squalor to the glory of beggardom, and the mendicants went begging down through the ages in sunshine and storm, in summer's heat and winter's cold, at palace door and prison gate. Pugis, the home of social graces, had its hordes of unwashed unfortunates, London had its quota of loafers, Berlin had its army of bums and Petrograd had its percentage of paupers.

Scarce in Colonial Days.

Just when the advance guard of this ancient army established itself in America is uncertain. During Colonial times begging was practically unheard of. Even after the Revolutionary war there is little or no mention of mendicancy. There were abolitionists and whisky rebels, but no bums, as such. In 1923 it was estimated that there were 12,000 beggars in New York city. In 1926 this number, it has been said, was reduced to 4,000.

This latter number, however, seems to be a snap estimate, or else there are times when the entire corps is working one particular section at the same hour. Many of these are crippled; but a fair proportion of them are able, although not willing, to go out on the argumentative end of a pick or shovel.

The American beggar has raised the art of mooching to the science of "screaming" and he is constantly improving on his practice in the most effective way of separating a few coins from the pockets of the sympathetic. The novice starts in on the less frequented streets. There he approaches each and every person that comes within his range. As he becomes more proficient in his work, he sizes up his prospects, rejecting this one, classing that one as doubtful and putting the label "sucker, good for five cents up" on still another.

He Avoids the Police.

As he becomes more capable in wringing coins from reluctant pocket books, he moves up toward the more frequented districts. During his apprenticeship he learns to smell a "bull" a block away. This is the distinguishing mark of a good professional and a cheap panhandler. The good professional will go out day after day, or rather night after night, and collect from five to ten dollars in two or three hours streaming without coming into contact with the blunt-toed shoes of the detective bureau. The cheap panhandler, on the other hand, will frequently find himself answering embarrassing questions asked by a desk lieutenant through his sheer inability to weed out the "dicks" that wander up and down the streets.

One of the favorite shyrackets used by the professional beggar who is just below the top of his class is to prey on the sympathies of the populace with a hard-luck story. Some of these are masterpieces that would bring their authors a fat check from a number of the cheaper magazines if the raconteurs could but find time to write them down. If there is a flood in Ohio, the beggar is one of the unfortunate he took out of the bank, in crisp new hundred-dollar bills, to buy a little home was turned to ashes. Broken-hearted, penniless and without a friend in the world, he faces the bleak future to build up from the ashes a new life, etc. It is heartrending, even though it is not true, and only the ultra-hardened can listen through it all without digging down to relieve this unfortunate victim.

Earthquakes Help Some.

Earthquakes, wrecks at sea, railroad accidents, every disaster that visits the land, creates its hundreds of victims who were from several hundred to several thousand miles away from the catastrophe at the time it happened. As long as the story holds a good position in the newspapers, the vicarious victim laments in the ears of the hard-working citizenry. When the story passes from a half-column to a half-stick, the beggar begins to cast about for some other disaster on which to fasten himself.

If it happens to be a time when current events are particularly free from holocausts and calamities, he will go back to his old familiar stand of "Mister, could you spare me a few cents for a cup of coffee? I ain't any beggar; but I'm broke, hungry, and I can't get a job."

Some of the more enterprising, in lieu of a better plea, will mention that they have just been turned loose from a hospital and haven't been able to find a job that they are physically fit to take. Such a one played West Twelfth street, near the Seventh avenue subway station steps, for the better part of a month. He approached one prospect four times in one week and became so well acquainted with him that he remarked on the pleasantness or unpleasantness of the weather whenever he saw the prospect coming up the subway stairs.

One of the favorite methods of approach for the professional beggar is the young man walking with the young girl. The moocher slows them up at a distance. If they seem to be studying each other's society, he feels another twenty-five-cent piece jingling among the nickels and dimes in his pocket. If, on the other hand, they appear to be bored with each other, he realizes that his possibilities have been reduced to a dime and that his probabilities are not worth more than five cents.

Elderly persons, both male and female, are also made to order for the experienced stemmer. The middle-aged enjoy a rather high immunity. The beggar knows that these are a sale are hard "to make" and that less than one out of twenty will "come through," so he devotes his time and energy to the old and to the young, especially when the young are in love.

Seek Spanish History in Nebraska Fields

Monroe, Neb.—New light is expected to be thrown on early history of the West through excavations being made in the corn fields along Looking-Glass creek north of here by E. E. Blackman, curator of the Nebraska State Historical society.

The curator expects to discover relics and evidence which will establish the site of the massacre by Indians in 1720 of a Spanish caravan under the command of Colonel Villasur. The massacre, long a matter of dispute among historians of the West, marked the halt of Spanish conquests to the North during the Eighteenth century.

Recently discovered documents, located in Spain and France by A. B. Thomas of the University of California, and the discovery of bits of chain armor and ancient coins rosetted in the present search for evidence to establish the exact location of the massacre.

Contact Sprays Destroy Lice on Cucumber Plant

It is not usually very satisfactory to do anything to combat the lice which work on cucumbers and many other plants, when they become very numerous. About all that can be done is to spray with some of the contact poisons, such as insect powder, nicotine sulphate, Black Leaf 40, etc., which can be obtained at a drug store.

As a general thing the insects called lady bugs, of which there are several kinds, keep the lice down to small numbers, but once in a while the lice become very abundant. If you use a spray it must be done very thoroughly and probably quite often, and even then you may not save the plants before they are so much injured as to be unable to produce a crop.

Good Care of Cream

Good cream is clean cream, cooled. Place the freshly skimmed cream in the cooling tank. Immediately see that the tank is filled with fresh cold water. Do not mix cooled cream with fresh warm cream. Stir the cream several times a day to prevent it from sticking to the sides of the can. Stirring the cream not only facilitates the cooling, but tends to improve the quality to a considerable extent.

Farm Hints

When all of the wheat is in all of the bread, all of the world will be better fed.

* * *

Waste oil from the tractor, car, or truck engine crank case works fine in your hog other.

* * *

It costs just as much to raise a 40-bushel crop as one that yields 50 bushels so why not plant your farm to adapted varieties?

* * *

Tests performed on the electric test line at Hensler, S. D., show that a cream separator used only 10 kw. hours of energy in skimming the milk from eight cows for a six-months' period.

* * *

Putting the heifer in with the milking herd, feeding and handling her for a month or six weeks before freshening, will pay well in greater ease in milking and caring for her when she does freshen.

Skim Milk Made Use of as Feed

Large Quantities Formerly Wasted Now Converted Into Nutriment.

(Prepared by the United States Department of Agriculture.)

Large quantities of skim milk formerly wasted or inefficiently used are being converted into a marketable product by a number of companies utilizing a process recently perfected by the bureau of dairying, United States Department of Agriculture. One company has sold more than a million pounds during the last year for poultry and hog feed. At Grove City, Pa., this manufactured product—concentrated sour skim milk—is made under the direction of department dairying and sells at 4 cents a pound, netting 62 cents a hundred pounds of skim milk.

Briefly, the process consists of the use of a culture containing a mycoderma, which is a yeastlike, organism, and an active culture of the bulgaricus type. When used in combination they are able to develop more than double the amount of acidity in the skim milk produced by ordinary lactic cultures alone. The use of this mixed culture has made it possible to create an acidity of 2 per cent in skim milk which when concentrated at the rate of 2 to 1 gives the finished product an acidity of 6 per cent. An acidity of 2 per cent removes the difficulties formerly experienced in concentrating skim milk in the vacuum pan, and 6 per cent acidity in the finished product prevents spoiling. The product has been kept in good condition for more than a year.

Concentrated sour milk is a pasty, semifluid product. As poultry feed it is mixed with water or dry mash. Good results are obtained with the product when fed to baby chicks in a dilution of 1 to 8; when fed to laying hens either in paste form or in a mixture of 1 pound of paste to 1 pound of dry mash; and when fed for crate fattening at the rate of 40 pounds of the paste to 100 pounds of mash.

The utilization of surplus skim milk in manufacturing this concentrated product promises a greater outlet to the dairyman for his products and assures the poultryman of a uniform supply of a good feed that has excellent keeping qualities.

Sparrows and Pigeons Disease Germ Carriers

Recent investigations have determined that sparrows and pigeons may carry the avian or chicken type of tuberculosis from chickens to pigs or hogs and from an infected flock of chickens to a noninfected flock. The sparrow or pigeon flies from infected pens or flocks to a healthy flock and contaminates the feed. There is also strong circumstantial evidence that sparrows and pigeons can transmit fowl cholera from infected to healthy flocks of chickens. It is also possible that they may transmit roup, sore-head and the larvae of different kinds of worm parasites. It is also said that sparrows and pigeons carry or transmit the virus of hog cholera on their feet.

No doubt chicken lice and mites are transmitted from farm to farm by pigeons and sparrows.

Possibly pigeons cover greater areas than sparrows, hence are more dangerous.

When possible prevent sparrows and pigeons from feeding with farm animals. Some one must discover a method of eradicating sparrows; and when pigeons are raised, bred and fed on farms they should be kept to themselves.

Boys Learn Loyalty at Y. M. C. A. Summer Camps

At all the summer camps of the Y. M. C. A. every boy learns loyalty to his country. This photograph, made at Camp Dupeau, Troy, Ill., shows the ceremony in which the boys salute the flag and pledge allegiance "to our country for which it stands, one nation, indivisible, with liberty and justice for all."

OCEAN VAST "FISHIN' HOLE" FOR NEW YORK'S MILLIONS

Hundreds of Large, Speedy Craft Cater to Angling Urge of City's Nimrods.

New York.—New York, like every small town, has its "fishin' hole." Here it is the Atlantic ocean, and good fishing may be enjoyed in a score of charted locations.

There always has been fishing, but until recently the nimrods had to organize small groups, charter an old boat and get their enjoyment in the face of discomfort and, sometimes, danger.

Now, going fishing is as simple as taking the ferry.

Large, speedy craft cater to this one trade, and regardless of the time of day the fisherman likes to drop his rod in the water, he can be accommodated.

The larger boats carry several score of men and on Sundays usually are crowded to the full limit of rating.

The boats as a rule are in charge of veteran fishermen, who gauge the tide, wind and weather, and can pick unfailingly the place where they are biting. Bass, fresh fluke and blackfish are among the leading catches.

The boats, however, would bring a smile to the face of a veteran off the Grand banks. There is little roughing it. Instead, the tired sportsman may sink into a heavily upholstered chair. The larger boats even have lounging rooms and dining rooms.

Neither is it necessary to worry about tackle, for along that section of the docks from which the boats depart are shops selling not only the gayorebid "hook, line and sinker" but all other equipment.

It is not even necessary to dig for worms, if that bait is used, for there are any number of shops dealing in grubs and angleworms.

There is one item of the old pond, however, that cannot be duplicated. That is the tree on the money bank where one can stick the pole in the ground and doze off while the fish play around with the bait.

"Skeeters" With 4-Inch Wings Found Petrified

Washington.—The days when mosquitoes were mosquitoes and prehistoric man probably fought them with clubs were enviboned in an announcement that Prof. Charles Gilmore of the Smithsonian institution had found the imprint of a four-inch bug wing in a rock layer in Grand canyon.

While Professor Gilmore estimated the print to be 25,000,000 years old, other scientists believed it was made some 300,000,000 years ago.

Quite Impartial

New York.—The police at Coney Island are quite impartial. If girls in bathing cannot wear one-piece suits, those in cabarets must be careful as to wearing less than that.

DR. MIGUEL MENDEZ

Dr. Miguel Mendez has just been inaugurated as President of the republic of Colombia. He was elected last February by the Conservatives and will hold the office for four years.

L. J. PETTIJOHN

An especially posed portrait of L. J. Pettijohn, member of the federal farm loan board.

Consolation

After striving vainly to hold his frisky team to turning a straight furrow in a ten-acre lot, the green young farmer finally said philosophically: "Well, go where you like. It's all got to be plowed."

Make Goodness Attractive

If good people would but make their goodness agreeable, and smile instead of frowning in their virtue, how many would they win to the good cause!—Archbishop Usher.

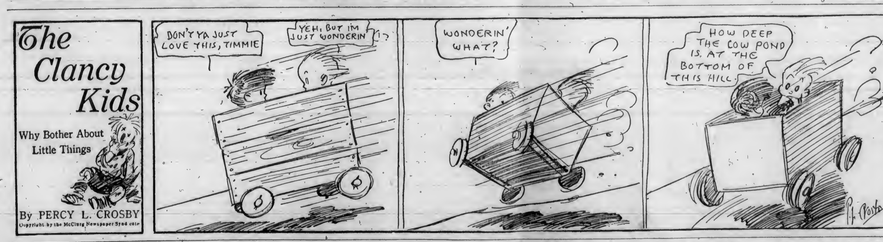
Why Bother About Little Things

By PERCY L. CROSBY



ON WAY THROUGH

First Sausage—"The boss says we're going to be the best sausages he's ever made!" Second Sausage—"Oh, get out! He's stuffing you!"

Handwork

"Look at that beautiful embroidery on her dress—It's marvelous—at least sixty years old."

"Did she do it herself?"

Wise

Kid—I wanna buy a book.
Clerk—Fairy tales?
Kid—Aw, shut up; fairies don't have tails.

A Suggestion

"No, I fear there is no chance of a reconciliation. My wife says I've been weighed in the balance and found wanting."

"Oh, persuade her that the scales were out of order."

The Reason

That's a handsome cigar case you have.

"Yes, got it with soap wrappers."

"Must have taken a long time, didn't it?"

"Oh, no, you see my wife takes in washings."

BIG RASCAL NO MORE

Johnson—"He isn't anything like as big a rascal as he used to be." Williams—"What's happened?" Johnson—Gotten terribly thin."

The Spy Evil

Surgeon General Hugh Cummings was talking on the George Washington about the spy evil.

"Of course," he said, "European countries can't trust one another when they are continually arresting one another's spies in their airplane plants and shipyards.

"They tell a story in Paris about a munition factory hand who said to one of his sorcerettes:

"'Look out. That new clerk with the German accent has sharp ears.'

"'Yes, sir,' said the secretary. 'I've noticed that the doors are getting all scratched up around the keyholes.'"

Work of Saint Patrick

The appellation "the Apostle of Ireland" is sometimes given to Saint Patrick, who is supposed to have introduced Christianity into Ireland. He labored for 30 years among the Irish people, and, according to some of his biographers, founded 365 churches, baptized with his own hands 12,000 persons, and consecrated 450 bishops. The Irish, and English-speaking generally, observed March 17 as Saint Patrick's day.

It Keeps Her

The way today: "Madam, do you keep this boarding house?" "I am the hostess."—Louisville Courier-Journal.

When?

Ward T. Van Orman, winner of the Gordon Bennett cup in the international balloon race, was the guest of honor at a dinner on the President Harding, and in a witty speech about sport he said:

"When is a man old? A man is old, some claim, when he can no longer make a woman jealous.

"A lady doctor is authority for the statement that a man is old when he will no longer kneel down and tie a beautiful woman's shoe.

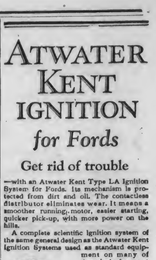
"But perhaps the best definition is a divorce court judge's, namely, that a man is old one week after marriage."

ATWATER KENT IGNITION for Fords

Get rid of trouble

—with an Atwater Kent Type LA Ignition System for Fords. Its mechanism is protected from dirt and oil. The consecluse distributor eliminates wear. It means a smoother running, motor, easier starting, quicker pick-up, with more power on the hills.

A complete scientific ignition system of the same general design as the Atwater Kent Ignition Systems used as standard equipment on many of America's foremost cars. Twenty-six years in making scientific ignition systems back of it.



Installed in less than an hour. Everlastingly dependable.

Type LA Price $10.80 Including Cable and Fittings

ACTIONS NOT WORDS.

Completion of the Grand River highway or "M-16" as it is designated with unimaginative precision, is the beginning of an interesting epoch in Michigan road building.

As it stands, it is an achievement and to Governor Grosbeck must be given credit for its construction in a manner that affords the people of the state the greatest measure of service. Had the governor been inclined to play politics with this important highway it would have continued its meandering course thru the city of Ionia instead of merely touching a corner of the county. The Governor was interested in the most direct route and he insisted on building the road from Lansing to Grand Rapids in the shortest possible course.

The people of Ionia were up in arms against such a program which would leave their town off the main road. In spite of the fact that the highway as it finally has been built is ten or twelve miles shorter than the old highway of the Prison City, certain Ionia interest with amazing selfishness clung tenaciously to the old route and insisted that the road be built by way of their town.

If the course of least resistence had been followed, every person using this great thoroughfare across the state would have been required to drive miles out of his way every time he drove from Grand Rapids to Lansing or vice versa.

Powerful political interests were determined to have the road built to Ionia. Colonel Fred Green was among those who did not propose to be sidetracked, no matter what the distance from Detroit to Grand Rapids might show on the speedometer.

It is quite obvious that the ordinary traveler, the busses, the trucks and all those that use the highway day by day could not in fairness be asked to drive substantially out of their way merely to pass through Ionia City. The reduction in mileage between Lansing and Grand Rapids will save the motorists of this state millions upon millions of dollars in gasoline and wear and tear as the years pass.

A man in the office of the chief executive considering his personal fortunes as paramount would not have been inclined to lock horns with so wealthy and influential a citizen as Col. Fred Green and thus incur the ill-will and resentment of certain influential men in the Republican party. The governor is being charged in vague and sweeping terms by his opponents in the primary with being a politician. Here is a definite case where he deliberately placed the interests of Michigan residents above personal consideration. He built M-16 where it ought to be built even though it incurred enmities that may have been in a measure responsible for the candidacy of the Ionia manufacturer.

At a time when so much in the way of acrimonious criticism is being heaped on the governor's head by those who are determined to prevent his renomination, it is well to inventory the facts relating to the splendid highway that has just been completed.

A man of less resolute mind, a man less willing to pursue the right course, no matter whom it displeased, a man less inclined to a serious consideration of the state's road building program, a man less disposed to take into consideration only the larger aspects of the public need would have capitulated to the dogged and determined demands from Ionia. Had that happened every one of the thousands of persons who drive over the road daily would have been obliged to go miles out of their way to please a tiny fraction of the population insistent that all motorists from Lansing to Grand Rapids be routed through their little town to satisfy their civic pride and contribute something to the coffers of their merchants.

By this logical and fair attitude in this matter Governor Groesbeck has demonstrated a willingness to sacrifice his personal fortunes in the public service. The unprejudiced voter will not be slow to grasp the deep significance of this action.

Long after Groesbeck and Green have passed from the scene, the great stream of traffic will continue winding its way from Eastern Michigan to Western Michigan day by day, and it will proceed by the shortest route only because a square-jawed man who can't be bluffed sat in the Governor's chair and protected the public interests.
—Pontiac Daily Press.

Half the World Away!

Over the road to the country—not many motor miles from home—you will find a new world. A world of sparkling sunlight, clean winds and far horizons. A world of beauty and adventure and dreams come true. The joy of living will get into your blood. You will glory in the strangeness of new roads, the freedom of wide, sunny fields, the mystery and magic of nights beneath the stars.

Any road around you will take you "half the world away." Discover the wonder and the rich romance of Middle West! Here is a list of pleasure places. See what you can add to it!

1—The Homestake Mine, largest gold mine in the United States, at Lead, South Dakota. The average annual output is over $6,000,000. Total depth of the Ellison shaft is 2,620 feet. Over $700 is spent for explosives every day of the year. State Highway No. 30.

2—Marbled Caves, Wisconsin. Curious caves in limestone formations near State Highway No. 16 between Manitowoc and Green Bay.

3—Clifty Falls State Park, Indiana. Rugged, thickly wooded, with many deep gorges. Contains Clifty Falls, ninety feet in height, and a series of many smaller cascades. Near Madison, State Highways Nos. 50, No. 29 and No. 6.

4—Old Fort Larned, six miles west of Larned, Kansas. On an island in the Arkansas River, a battle occurred in 1870 between the Cheyennes and Arapahoes. National Old Trails Road.

5—The Cornish Humps, a ten-crested battle near the town of Sentinel Butte, North Dakota. State Highway No. 3.

6—Pilot Knob, Missouri, a shaggy peak rising 1,600 feet above sea level, named by Mississippi River pilots when river travel was in its heyday from the fact that its sharp summit was a guide spot on clear days. North of Ironton, State Highway No. 21.

7—Piasa Bluffs, Illinois, where Father Marquette in 1673 found the famous Piasa Bird and other weird monsters painted. Piasa Bird has been restored. Wonderfully picturesque district. North of Alton, State Highway No. 3.

8—Pine Lake, Iowa, a pleasure resort of surpassing beauty. Artificial lake fringed with white pine and filled with rainbow trout, bass, and other game fish. Indian grounds nearby. Near Eldora, State Highway No. 58.

9—Kitch-iti-kip-pi, the Big Spring, in the virgin forest near Manistique, Michigan. Sixty feet deep, four hundred feet across. The water is so clear you can march a coin ball until it rests on the bottom, just so cold that no animal life can exist in it. About four miles off State Highway No. 12.

10—The Gunflint Trail, in Minnesota, a unique thirty-mile road built for the use of the Forestry Service and blazing up the most beautiful part of the Superior National Forest, hitherto practically inaccessible.—From Grand Marais on State Highway No. 1 into the wilderness.

You can be sure of carefree motoring in the Middle West because you can always get Red Crown Gasoline. Service Stations are scattered at convenient intervals along all the roads of this great section. Get out your car tomorrow and travel "half the world away!"

FARM RELIEF

Republican leaders announce that farm relief will be the principal issue to be stressed in this year's state campaign. But, before these men and their friends start out upon their speaking campaign they would do well to consult the farmers themselves as to just what relief is being sought. It might be surprising to those in charge of the state's politics to discover that a very large number of farmers at least, certainly they are numerous in this part of Indiana, are not seeking guaranteed prices for their products nor are they asking the government to adopt any policy supposedly in their behalf that is economically unsound.

The average intelligent farmer who is making a business of farming just as others are making a business of operating clothing stores and factories, is relying far more upon his cooperative societies and farm bureaus for aid than he is upon the government, and very generally he is saying that provided the Congress will see to it that the tariff schedules are arranged for his protection he will not ask much more from that source.

The farmers have been experiencing a rather hard time in the last few years, but they are coming out of it and it is doubtful if many of them believe political candidates have any panacea for their ills.—Muncie Evening Press.

Who was the hard-hearted creditor a quartar of a century ago, when the foreign Powers presented China with a bill for suppressing the anti-foreign outbreak of 1900? Was it Uncle Sam? The bill he put in was so moderate that his European associates called him not a Shylock but a silly old sentimentalist. When he subsequently returned a large portion of this indemnity to China he was severely criticised in Great Britain and on the Continent for setting an example which other countries could not follow without giving up money they needed in their business. Some of this money went into armaments that figured in the war for which Europe is now so reluctant to pay. The Powers which "squeezed" China in 1901 and which now protest against paying the United States a moiety of what they borrowed from it must have short memories.—St. Paul Pioneer Press.

(Political Advertisement)

To the Electors of Charlevoix County:

In response to inquiries from various parts of the county, I am taking this means of advising you that I have decided to be a candidate for another term as your Prosecuting Attorney. I have never been in favor of continued office holding, although it is a fact that too frequent changes are detrimental to the public service and expensive to the taxpayers. It happens to be the case at this time that the only other candidate for the office would be a third term holder, if elected, so both stand on the same footing in that respect.

Another thing that prompted me to be a candidate is that I wish to see the successful completion of important changes and improvements in the methods of handling county business. The records will convince you that during the past three and one-half years considerable has been accomplished of a constructive character that has saved the taxpayers of the county many thousands of dollars. But the time has been altogether too short to do what I believe should be done. There is a lot more to this office than the mere enforcement of the criminal laws. During my term I have tried to keep in touch with the county business with the object in view of co-operating with other county officials and with the city, village and township authorities, to provide better service and cut down county expenses.

I am told by friends that I owe it to you and also to myself to publish a full statement of the facts, but I don't believe this is the proper time to do it for the reason that it could be considered as a political move on my part and that I was "tooting my own horn". The records are public records and show for themselves. Besides I haven't sufficient space here to do it. However, here are a few things which the records show:

1. A large reduction in the expenses of the office, the total being less than one-half of the expenses of former years, all in spite of an increased volume of work.

2. A close supervision over the item of costs in criminal cases to re-imburse the general fund. To date close to $8000 have been paid into the county treasury in fines and costs, a sum more than three times that of any like previous period. I do not claim all of the credit for this result, but I do claim that I was instrumental in correcting a former loose condition of affairs.

3: Putting into effect a uniform system of accounts of Justices of the Peace whereby all accounts are passed through the county auditing committee. The County Treasurer's books show that up to April 1st, 1926. The Justices of the county turned into the county treasury the tidy sum of $1314.46.

4. In connection with the County Clerk putting into effect a system of probation and alimony records whereby all money payments are handled through the county clerk's office.

5. Advice and assistance to township and school officers without charge.

6. A careful avoidance of petty prosecutions, thorough investigations before authorizing warrants, and few acquittals by a jury.

7. Not a dollar of county money paid out for the assistance of other attorneys in the trial of cases.

I shall not make an active campaign for the nomination, but will leave the choice entirely to you without any solicitation on my part If selected by you, I shall give the office the best I have and improve the service wherever possible. I have made mistakes, I know, but they were not wilful nor intentional. I have also made enemies because of the nature of my duties, but I have persecuted no one.

This is a longer statement than I intended to make, but I hope it shows you just where I stand, and exactly how I feel. Whatever your decision may be, I shall always be an earnest candidate for the friendship and good-will of the people of Charlevoix county.

Sincerely yours,
A. L. FITCH.

THE THEATRE

Blanche King, famous musical comedy star, made her debut in motion pictures by falling over backwards on a railroad station platform at Ocala Fla. Edward Sutherland, director, liked it so well he asked her to repeat the performance.

The scene was made during the filming of W. C. Fields' first starring picture for Paramount, "It's the Old Army Game," (Meaning, "Never give a sucker an even break") which comes to the Palace theatre on Saturday and Sunday.

Tom Mix fans will have something new to discuss after witnessing "The Yankee Senor," a William Fox production showing at the Majestic theatre next Saturday although it is a fact that too frequent changes are detrimental to the public service and expensive to the taxpayers. It happens to be the case at this time that the only other candidate for the office would be a third term holder, if elected, so both stand on the same footing in that respect.

"Pals First," the new First National comedy-drama which comes next Monday to the Palace theatre here, chronicles the strange situation that three tramps find themselves enmeshed in when they were mistaken for the owner and his guests of a fine old Southern mansion.

Dolores Del Rio, beautiful Mexican heiress, is featured opposite Lloyd Hughes in "Pals First." Although they run a terrible risk in masquerading as aristocracy, the three tramps continue the deception until a sudden turn of events threatens to precipitate them into the hands of the police.

"Pals First" has a surprise ending, however, and the tables are reversed in a most unusual manner. The story is taken from the celebrated novel by Francis Elliott and play by Lee Wilson Dodd.

As a salesman, he was a smashing success. He thought himself so good that if he'd taken fans to Iceland, they'd have disappeared, as fast as ice cream on a sunny day. And so—going to see his first prospect, in order to sell her some hymn books, he equipped himself with tickets for a concert.

But—she wasn't that kind of a girl! No sir, J. W. wanted to see a bit of New York night life. Richard saw all the rope, and he showed them to her. With the result that instead of selling her a big order, he got in a free-for-all, and ended up going to jail. So that while he tried to sell hymnals, the only things he got were bans, (and not the musical variety either.) All this which gives one some slight idea of what is in store when "Lets Get Married," Richard Dix's latest Paramount farce arrives at the Palace theatre on Sept. 3. Lois Wilson is featured.

WANT COLUMN

LOST! One Eastman Kodak near P. M. Depot. Liberal reward if returned to this office.

FOR SALE! A Guernsey bull three years old. Enquire of W. F. Smith, Boal Farm. Phone 7001 F-21.

Mr. Business Man!

What About Your Profits?

Are many of them represented on your books as dormant or dead accounts? Are you usually charging off these bad accounts as uncollectable? If so, are you not causing yourself an unnecessary loss? Isn't it, after all, the one and only unpleasant feature of your business?

The Freeman Mercantile Agency is a bonded establishment, operated efficiently under the laws of the state. It is an institution, however, that has representatives scattered over Northern Michigan, able to give personal service to every call.

We wish to stress the "personal" element of our service. All calls within a radius of a hundred miles of Traverse City are made by personal representatives of this agency. Our collection efforts are not confined to letter writing. Our business is EXCLUSIVELY a collection business.

If you have bad accounts, turn them over to us. If it is humanely possible to collect these accounts, we will do it. Our collection fees are standard. Where no collection is made, no service fee is charged. Our commission is exacted only where satisfactory results are obtained

Look over your old accounts. List the questionable, or dormant ones. Do not charge them off until you have given us a chance to prove what can be done with them

FREEMAN MERCANTILE AGENCY

Attractions for Coming Week

At New Palace Theatre

Saturday-Sunday, Aug. 28-29—
W. C. Fields in "Its the Old Army Game," with Louise Brooks. The comedy genius of stage and screen in his first starring motion picture. A special de luxe laugh film. Something new. Something different.
Extra—Educational comedy, "Raisin Cain."

Monday-Tuesday, August 24-25—
"Pals First," with Lloyd Hughes and Dolores Del Rio. Just like meeting an old friend you've been wanting to see for a long, long time. The drama of the boy who risked a million to find out who his friends were.
Extra—Pathe comedy, "Wilde Open Faces" and Felix the Cat in "Laughs it Off."

Wednesday-Thursday, Sept. 1-2—
Colleen Moore in "It Must be Love," with Jean Hersholt. This is Colleen's latest picture and needless to say her best, with plenty of pep and love to go around for all. Extra—Fox News Reel.

Friday: September 3rd—
Richard Dix in "Let's Get Married." Here's a film you will fall in love with right off the bat. A rollicking romance made right. The opportunity of a lifetime to see Dix at his best.
Extra—Educational comedy, "Who Hit Me."

—MAJESTIC THEATRE—

Saturday-Sunday, Aug. 28-29—
Tom Mix in "The Yankee Senor." A drama of Conflict and romance in Old Mexico. A peppery romance of the Rio Grande.
Extra—Educational comedy, "His First Flivver Life."

MRS. D. W. DAVIS
SUNSET COTTAGE

WRIGHT RIPLEY DEAD

Funeral service was held at the residence of Lorenzo Compton in this city last Saturday afternoon for Mr. Wright Ripley, who passed away at the home of his daughter, Mrs. Harry Glusinger in Petoskey, during the early morning of August 20th. Rev. Henry Burns D. D. officiating at the service.

Mr. Ripley was born in Canada in 1855, the date of his birth being June 19th, therefore in the seventy-second year of life at the time of his death.

Early in life Mr. Ripley located at Port Austin, in this state, where he remained seven years, and while living at Port Austin he entered the government light house service, in which he continued until his retirement in 1922, having reached the age limit in that service.

He came to Charlevoix in 1885 and during the years of his service was a familiar figure, attentive to his duties and a good citizen.

His survivors are a daughter, Mrs. Henry Glossinger of Petoskey, three sons, Clarence Eugene of Holland, William of Benton Harbor and Roy L. of this city. A brother Byron Ripley of Iron River, Wis., and a sister Mrs. J. Menham, who resides in Ohio.

—) PERSONALS (—

James B. Parsons is at Saint James this week on business.

Hyatt A. Kenyon, of Mackinac Island is a business visitor here today.

Mr. and Mrs. Robert Craven of Bellaire, were visitors here early this week.

County Agent, B. C. Mellencamp, of Boyne City, was a business visitor here Tuesday.

Attorney E. N. Clink of East Jordan, spent some time here on professional business early this week.

Mr. and Mrs. C. C. Potter and a party of friends from Bellaire, were Charlevoix visitors yesterday.

Dr. Hugh W. Dicken, of East Jordan, candidate for State Senator from this Senatorial district, was a visitor here Wednesday.

Ira A. Adams spent three days last weeks at Mackinac Island where he attended a meeting of the Mackinac Island State Park Commission of which he is a member.

Dr. and Mrs. Herman Burns returned to Charlevoix late last week after spending two or three weeks on a motoring and visiting trip through the southern part of the state.

By a recent shift among employes at the Charlevoix postoffice Earl Miller becomes assistant postmaster, succeeding Orson Everts in that position and Prescott Adams enters the service as substitute carrier, while Mr. Everts becomes a rural carrier.

Allan Shapton spent the early part of this week in Detroit on business.

Mr. and Mrs. Frank Allison are entertaining Mr. and Mrs. Bert Henry of Detroit, this week.

Miss Mary O'Leary, of Detroit, is a Charlevoix visitor this week a guest of Mr. and Mrs. Louis Orlowski.

Mr. and Mrs. Fred D. Flye and Miss Melva Thompson of Bellaire, were visitors in Charlevoix last Sunday.

Mrs. William O'Neill returned to Benton Harbor last Monday following a business visit of several days in this city.

Charles T. McCutcheon, of Boyne City, representing the McCutcheon Real Estate service, spent Tuesday here on business.

Mrs. Cleveland Roe, for about three weeks with relatives and friends north of the straits, returned to Charlevoix last Saturday.

Mr. and Mrs. A. N. Cook, of Howard City, have been guests of Mrs. Cook's parents, Mr. and Mrs. Andrew Rose, for some days.

Mr. and Mrs. H. G. Tellman, of Detroit, are spending a short vacation here, guests at the homes of S. and Louis S. Orlowski.

Mason Rose, wife and family, left here Tuesday morning to return to their home in Sarasota, Fla., after a twenty-one day vacation.

Mr. H. F. Lenzner, publisher of the Cass City Chronicle, who is touring through the resort section of the state is a Charlevoix visitor today.

M. and Mrs. Joseph Hyland of Flint, are guests of the George W. Weaver home. Mr. Hyland is a brother of Mrs. Weaver, hence the family reunion.

Dr. and Mrs. A. Lawson Baxter and daughters Alice and Charlotte, of the Baxter Farm, in Antrim county, were Charlevoix visitors early this week.

Mrs. Thomas J. Barry Jr., and son "Tommy", guests at the home of their aunt, Mrs. John H. Keeh for several weeks, returned to their home, Toronto, Canada, last night.

R. C. Bennett and W. C. Wing, of Alba, made the Sentinel office headquarters for a short time last Tuesday afternoon, their visit being a source of pleasure to the publisher.

Miss Helen Armstrong is enjoying a visit with two of her Chicago friends this week, Misses Anna Shenewise and Lucy Courtney, both teachers in the Chicago school with which Miss Armstrong is connected.

Mr. and Mrs. F. R. Williams, of Elk Rapids, with their two sons, spent Monday of this week in this city. Mr. Williams on legal business in the interest of clients and the other family members on a pleasure trip.

Judge Louis H. Fead and Dr. H. E. Perry, the latter a member of the road commission of Lake county and Mr. Fead Judge of the 11th Judicial Circuit of which Lake county is a part, are visiting in this city today.

Mr. Frederick Moline who formerly resided in this city and for a term of years owner of the boulder farm, arrived in Charlevoix last Saturday and will remain here for some little time before returning to Grand Rapids, his present home address.

W. E. Scheville, who has been at Fort Ticonderoga and other eastern points during the summer, joined his parents at their summer home, 402 Dixon avenue, yesterday, and will continue with them through the remainder of the season.

The many friends of Mrs. Hewitt, wife of Dr. C. W. Hewitt, who has been under the care of a trained nurse for the past six weeks, will be glad to learn she is improving in health and they expect to be able to return to their Jackson home by first of September.

Mr. and Mrs. J. O. Bel Isle of Chicago, are at the Bartlett for a few weeks. For upwards of thirty years Mr. and Mrs. Bel-Isle have been annual visitors in this city where they are delighted with climatic conditions and pleased to renew associations and friendships formed in past years.

Mr. and Mrs. C. A. Palmer, of Detroit, are Charlevoix visitors today on a motoring tour through the resort section of the state. In earlier years Mr. Palmer made frequent visits here but close application to business prevents an extended stay at this time whereby he would be able to meet scores of old time friends.

Mr. and Mrs. T. L. Hilton and son T. L. Jr., of Detroit, were visitors here early this week. Mr. Hilton in earlier years was a frequent business visitor in Charlevoix and in fact throughout this entire region, but in recent years has confined his business activities to his home city. His recent visit here was a source of pleasure to himself, family and friends.

Dr. and Mrs. Frank H. Wilkinson returned to Charlevoix early this week after being absent on a motor trip spent in visiting points of interest in Ontario, Canada, the most prominent being Montreal, Quebec and Ottawa. During their trip they drove several hundred miles through virgin forests visiting scenic beauty spots and places of historic interest, all making for a most pleasant trip and enjoyable vacation.

For Homes on the Lake Michigan Shore

This wooded bluff at the City's edge magnificently commands the lakes beaches and gorgeous sunsets.

It has a curving sand beach with riparian rights. You may now acquire these last close-in, really choice residence sites for building to your ideal or for profitable resale.

EXCELLENT TERMS

LAWRENCE R. CHASE
REAL ESTATE
230 Bridge Street. Telephone 113

Mr. Albert Durgan of Columbiaville, Mich., a former business man in Charlevoix, is spending a vacation with friends here. He is accompanied by Mrs. Durgan on the trip and their visit is made after an absence of 15 years.

Members of the local order of L. O. O. M. will be entertained with a special feature at their hall Wednesday evening, September 1st. Arrangements have been made for Martha Hauser, a noted medium to appear at the meeting and give some demonstrations and address those interested.

Hereafter parties having business with the Probate court can reach Judge S. A. Correll by telephone by calling 55-M during office hours from 8 o'clock a.m to 5 o'clock p.m. Heretofore the Judge could be reached at his residence but due to the breaking up of his home the phone has been discontinued. Parties therefore who desire to communicate with the Judge in the future should call the office number as herein given.

The amusement features at the Charlevoix County Fair to be held at East Jordan September 14 15 16, 1926, will include a line up of some of the most thrilling and daring performers to be seen on the Fair circuits. Secretary Frank F. Bird informs us that great care has been given in the choice of grand stand attractions and will be under the direction of the Western Vaudeville Managers' Association. One of the acts to be featured this year is "The Marvelous Daro", this act is one of the most sensational performances to be given on the outdoor platform. Daro performs incredible feats on a pole eighty feet above the ground. Swift, sensational acrobatic stunts are performed at this dizzy height.

Drops Gather Weight

The weather bureau says that the chief reason why frozen raindrops are of so many different shapes is the fact that partially frozen drops often collide and stick together, giving shapes that vary with the number and size of the adhering drops, and the extent to which they were frozen when they collided. Entirely liquid drops on collision form, if they unite, only one larger but still spherical drop.

CHURCHES

Methodist Church.
C. E. Pollock, Pastor.

Methodist Business Matters.

Fourth Quarterly Conference of the Methodist Episcopal Church invites the pastor's return for another year.

At a meeting of the Fourth Quarterly Conference of the local Methodist Episcopal the following people were elected to official place in the church as follows:

Stewards:—Earl Shapton (reserve district steward) Olaf Nordrum, Charles Arnold, Mrs. Charles Arnold, Mrs. Lois Campbell, Mrs. Margaret Washburn, Mrs. Edward Steward, Mrs. Olaf Nordrum, (communion steward), William Black, Mrs. F. F. McMillan, Arthur Edwards (district steward) Frank Bird, Mrs. Laura Courier (recording steward) George Priest, Mrs. George Priest, William Poole, Orson Iserta, Laverne McGhan, Mrs. Arthur Edwards, Mrs. Geo. Gladon, Mrs. Frank Partridge, Mrs. Mazy Reimert, Mrs. Ethel Sands, Mrs. Jones Durance.

Trustees:—Edmond Shapton, Charles R. Bellinger, Edward Stewart, Albert Edwards, F. F. McMillan.

Committees:—Apportioned benevolences, Mrs. C. E. Pollock, Mrs. Arthur Edwards.

Christian Stewardship:—Charles R. Bellinger, Charles Arnold.

Home Missions:—Officers of missionary societies.

Religious Instruction: — Primary department of Sunday School.

Tracts:—Junior Church.

Temperance:—Mrs. James Simmons, Frank Bird, A. C. Belding, C. R. Bellinger.

Education:—Mrs. Edward Stewart, Vera Belding.

Hospitals:—Mrs. C. E. Pollock, Mrs. Mrs. St. B. Hooker.

Church Records and Auditing:—William Bellinger.

Parsonage and Furniture:—Officer of Ladies Aid Society.

Church Music:—Mrs. A. C. Belding, William Bellinger, Earl Shapton.

Estimating Pastor's Salary: — Olaf Nordrum, George Brown, Edward Shapton.

Examination Local Preachers: — Pastor.

Finance:—William Black, Olaf Nordrum, Charles Arnold.

Trier of Appeals—Charles R. Bellinger.

The District Superintendent, Rev. J. O. Randall, D. D., presided at the Conference, and gave a very interesting talk about the work of the church. [A unanimous invitation was extended the present pastor to return for another year. Reports that were given by the various officers of the church showed the church in a prosperous condition. Frank Bird was chosen as lay delegate to the laymans conference at Traverse City, September 10, with Earl Shapton as alternate.

"Crucial Enthusiasm", sermon subject next Sunday at 10:30 a. m.

Concert sermon 7:30 p. m. next Sunday.

Concert program at 7:00 p. m. next Sunday is as follows:

"Adoration", F. Magine.....Orchestra
"Evening Star", Wagner. . .Violin Solo
"Roses of Picardy".....Hayden Wood
Orchestra.
"Valse Llewelyn".....Wiedeeft
Saxophone Solo
"That's Why I Love You"....Orchestra
"Valse Arabesque",Lack. . . .Piano Solo
"America".....Orchestra

This concert program will be rendered by the Inn Orchestra, who so pleasingly entertained a large congregation once before this summer. These musicians are from the University of Michigan and are just about to return to their school duties. The public is invited to enjoy them once more in church in this musical prelude which precedes the evening sermon.

Prayer meeting Thursday evening at 7:30. A good place to spend an hour.

Sunday School meets at 9:30 a. m. during the summer. You will find a welcome.

Congregational Church
Rev. B.G. Mattson, D.D., Minister

The service of morning worship begins at 10:30. The preacher of the morning will be Dr. Selbie Vance, of Pittsburgh, Pa. Full audiences have always greeted Dr. Vance when he has preached previous summers. He has pleasing and helpful messages for everyone. Special music is also being planned for this service.

The Sunday School session precedes the morning service at 9:30.

At the evening service, 7:30, Dr. Jones will conduct a half hours hymn service such as we enjoyed a few weeks ago. And of great interest to our people is the announcement that Rev. C. B. Taggart, a former pastor, will be the preacher.

At the Ironton church both Sunday School and preaching service are held, beginning at 2:30.

Summer visitors and the general public are heartily invited to all services.

Baptist Church
Rev. Herman Burns, D. D.,
—) Pastor (—

The church will have the previlege of hearing Dr. John W. Hoag, of Detroit, in the morning service next Sunday morning. Dr. Hoag is pastor of the Woodward Ave., the largest Baptist church in Michigan, and has done, during a long pastorate a most remarkable work, keeping his church abreast of Detroit's wonderful growth. We are glad to have this privilege of entering into this great work.

All Michigan is on wheels these days, and very many of these are touring through our city. Charlevoix is surely on the map these days, and we hope in putting there something more than material pleasure—something that will point men and women to "a land that is fairer than day."

Our Bible School and other services are open to all, and a welcome will be given to all who worship with us.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Jesus Christ."
Sunday School 12 o'clock.
Wednesday evening service 7:45.
Reading room, Tuesdays and Saturdays, 3 to 5 p. m.
The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church
Low Mass 8:45 a. m.
High Mass 9:00 a. m.
Saturday and Monday 7:00 a. m.
Rev. Knute Lowenski, Pastor.

Episcopal Church

The Rev. John K. Coolidge, of Glencoe, ill., will hold services at 10:30 a.m. at the Episcopal church during the summer months.

TO CLOSE OUT BALANCE OF MEN'S SUITS

Prices will be offered Regardless of Cost.

Step in and see what we have. You might find a Suit at a big saving.

September 5-11— Which Days For You?

The State of Michigan invites you to the Annual Wonder Week it has prepared for you at its 1926 State Fair. There will be more interest—and more fun—for you, and yours, than ever before.

Just read the program:

SUNDAY, *September 5—Opening Day*—Exhibits on view in all departments—Final workouts by harness horses—Free concerts, afternoon and evening by Harold Bachman's world-famous band—Side shows closed.

MONDAY, *September 6—Labor Day*—Judging begins publicly in livestock, cat, poultry and baby departments—Harness racing 1:00 p. m. featuring Governor's Cup for 2:12 trotters; Fort Shelby cup for 2:17 trotters; The Tuller Stake for 2:06 pacers —Free horse show and vaudeville in front of grand stand between heats—Midway opens full blast—Evening Horse show opens in Coliseum—Free fireworks—Free band concerts.

TUESDAY, *September 7—Children's Day*—Boys' and Girls' clubs from all parts of Michigan in contests, demonstrations and exhibits—Girls' milking contests in Coliseum for state championship —Public judging continues in all departments—On race track, $5,000 Horse Review Futurity for 3-year old trotters, Stake for 2:11 pacers, and Book-Cadillac Stake for 2:14 trotters—Free afternoon horse show and vaudeville between heats—Parade of beef cattle—Night horse show continues—Free band concerts—Fireworks.

WEDNESDAY, *September 8—Fraternal Day*—Meetings of many fraternal bodies—Judging ends in many classes with awards of premiums—Free concerts in Agricultural Building—Racing features renewal of renowned Chamberlain Commerce Stake for 2:15 pacers, Merchants and Manufacturers stake for 2:08 trotters and Horse Review Futurity for 2-year-old-trotters—Free horse show and vaudeville—Boys' milking contest for state championship—Parade of dairy cattle—Evening Horse show in Coliseum—Gorgeous fireworks—Gay midway.

THURSDAY, *September 9—Farmer's Day*—Meetings of Farm, Grange and other Agricultural organizations — Racing includes Wolverine 2:20 trot with 41 horses entered, all Michigan owned; also Blue Ribbon 2:14 trot, and Oddfellows' free for all pace—Daily free horse show—5:30 p. m., 7 p.m. competitive-polo drill by 30 Michigan lodges of I. O. O. F.—Stake night at the Horse Show—Free vaudeville, concerts and extraordinary fireworks.

FRIDAY, *September 10—Detroit Day*—Judging completed permits full premium display in all classes—On the racetrack, Memory stake for 3-year-old trotters, Horse Review Futurity for 3-year-old pacers, and 2:09 pace—Free Horse Show and Vaudeville—Concerts—Parade of livestock—Night Horse show closes with eight splendid classes—Fireworks.

SATURDAY, *September 11—Automobile Day*—2 p.m. 100-mile auto race under A. A. A. sanction, with world-famous speed demons competing for $15,000 prize; field includes most modern race cars of Indianapolis class with motors of less than 1 cubic inch displacement per horsepower—Free Ford size and straightaway speeds of over 130 miles an hour—Vaudeville—Midway—Fireworks display most gorgeous of entire week.

A WEEK OF WONDERS

The 1926 event caps a climax of mor than 75 Michigan State Fairs, each bigger and better than the one that went before. You simply can't afford to miss it!

Follow the arrows around the thick Detroit traffic, if you prefer, or take advantage of the half fare rates offered by all Railroads.

CHAPTER X—Continued

—15—

His name was called. Cox's secretary had come after him.

"Your proposition, as we understand it," said Cox, "is that you should be paid one hundred thousand dollars for your project—after it has been approved by our engineers and declared practical—and that you are given our acknowledgment of yourself as originator of the project, with a position as consulting engineer during the completion of the work?"

Caleb nodded.

"That is it."

"It's a lot of money," said Marlin, apparently addressing the smoke of his cigar.

"It's a lot of water," replied Caleb good-humoredly.

"You'll turn over your invention to the company?" This was Marlin again.

"You mean the pipe junction? Ah, give the company free use of it. I am applying for patents. I shall hold those. I will allow the Crystal Springs corporation free use of it anywhere on the Pacific coast."

Marlin grunted.

"We'll agree to your terms, Warner," said Cox. "The engineer's salary will be ten thousand dollars per annum. We'll make contract with you for five years at that sum, if you wish?"

Caleb shook his head.

"For the duration of this work," he said, "I appreciate the honor but I should prefer to be foot-loose after that. Will you put the rest of your agreement in writing?"

A pair of steely eyes bored into him. They belonged to Morse of the Lumber Interests.

"We are going to make it a motion, young man. That should satisfy you."

"If I can have a copy of the 'minutes.'"

Cox laughed.

"Are you a lawyer as well as a civil engineer, Warner? You shall have a copy of the minutes—certified—if you wish. You Yankees!" he ended humorously.

Marlin walked over toward Caleb who had moved to the door. He tapped Warner's elbow familiarly.

"We're glad you came out here, Mr. Warner. You're the kind of man we want. We'll make a Westerner out of you in no time. Don't let the climate get you. It nonetheless affects our second generations. Good-by."

Caleb went out warm in his feeling toward these men. He had won. He was the Water-Bearer, on no small scale.

He left the elevator elated, his head up, turning to the entrance, when he felt a touch on his arm. It was the stenographer, Mary Morgan.

"Mr. Warner," she said hurriedly, "I want to see you alone. It is important. And it is your business, not mine. Though I am connected with it. Will you meet me at Haight's at a quarter after five, that will be as soon as I shall have time to get there after work this afternoon. In one of the upstairs compartments. The captain will tell you which one."

He looked at her uncertainly. Haight's was the fashionable restaurant. There was nothing disreputable about the place. Still the compartments—in the afternoon especially—were generally reserved for couples that had reason for seclusion, that were accepted as intimate and not always conventional.

"You will be sorry if you don't come," she said. "It is the best place."

Her eyes challenged his seriously. They held a portent that commanded itself.

"All right, I'll, be there," he said. And half regretted the determination before he reached the street.

He turned up Grant avenue towards his office. A landaulet braked at the curb. The door opened and Betty Clinton stepped out directly in front of him. Caleb took off his hat. His pulses had jumped. Then they stopped for an instant. She had cut him, bluntly, directly, coolly, looking at him as if he had been a stranger who had halted to let her, his superior, pass.

CHAPTER XI

At Haight's

Once again with Caleb the question of Betty Clinton became paramount. He had come out of the offices of the Water company a deserving conqueror, pardonably elated, a bright head stretching ahead of him. Now the vision of his life were drab. Inspiration, the desire for success, seemed to have flowed out of him like water out of a drain. The reason was plain enough, the fact one that he could not overcome nor set aside. Betty Clinton had gone out of his life and, without her, life hardly seemed worth bothering about.

She had given him less attention than one would have bestowed upon a street beggar. There at least some charity would have shown in her gaze. But for Caleb her eyes had held nothing—as if he had never existed.

Something had happened within the last forty odd hours. It was inconceivable that the affair at the Veldera was responsible for the deliberate slight she had put upon him. She had heard something, a slander, that had turned her utterly against him.

And that meant Baxter. No one else. The pointer of Circumstance infallibly swung toward him. He might still imagine that Caleb could have loaned him the money, had deliberately deserted him at the time when he must needed help. In revenge he had carried a tale to Betty Clinton. But what sort of tale was it that she had listened to upon so short acquaintance? She was not the type to listen readily, to pass a hasty judgment.

He paced up and down his little office, the sweets of victory turned bitter, trying to bring logic to bear upon the situation, without avail. "At five o'clock he started for the cafe to meet the stenographer, holding a vague idea that she might be able to throw some light upon the matter.

He entered the foyer of the restaurant, filled with people coming from the matinee, and mounted the stairs to meet the deferential captain of the waiters. Caleb gave him his card.

"A lady should be waiting for me," he said.

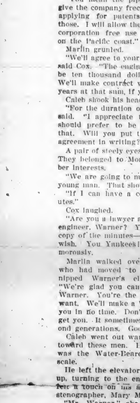
The man glanced at the card and returned it, receiving in exchange a crinkly bill that was deftly palmed and vanished. Tsing he led the way, outfitted, down a soft-carpeted corridor, stopping before a certain pair of drawn curtains and touching a bell in the partition frame.

"It is soundproof," he announced, withdrew and glided down the passage. Caleb entered the alcove.

It had no arched opening that looked out over the main floor of the cafe. The opening was partially blocked with artificial orange trees, the fruit represented by small electric bulbs. By the side of the opening, unseen from below, nestled in the corner behind the curtains sat the stenographer. The glow from the make oranges gave the oval of her face a weird quality.

It robbed her of all benefit from rouge and powder and turned her features to a tragic mask of weariness and strain. She was only a shadow of the blooming picture that had once held the "place of present honors" on Baxter's lurene.

"You will have to order something," said the girl. Her voice was tuneless. She had made no motion since he entered.



It Was the Stenographer, Mary Morgan.

He touched a bell and a sleek waiter almost instantly tapped and appeared.

"A sandwich," said the girl languidly, "chicken sandwich, Emile—Some ten—strong—in a cup. Kirsh cigarettes, straw tips."

"Just ice tea for me," said Caleb.

"Yes sir. In a cup, sir?"

"Of course."

It was plain that the girl had been in the balcony alcoves at Haight's before. The fact was more evident when the tea—"strong, in a cup," arrived. It was Scotch whisky. After she had sipped it down a little sparkle came to her eyes. She took a cigarette, tapped its end and lit it.

"If you don't mind I'll smoke before we talk?" she said and inhaled avidly. It seemed to restore her animation somewhat. She folded her long-fingered hands on the cloth and looked directly at Caleb.

"You haven't asked me why I'm your friend, I suppose?"

There was a sneering quality to her voice that made it harsh. The sparkle in her eyes had changed to a steely glitter.

"We have been friends for a great many years," Caleb answered.

She gave a low, short laugh. Evidently she knew about the quarrel.

"I have come here to sell you something," she said. "As I told you, it is your interest to listen to me. I know that you have enough to leave Golden, to go East for a while. You can imagine why. I'll take fifteen hundred dollars. My information should be worth many times that."

"Knowing I am a friend of Baxter's, why do you apply to me for the money? Isn't he the one to supply it for that purpose?" Doesn't he intend to?"

"I don't know whether he does or not? You know all about his mother and the stock deal? He's broke. Even if he puts over his land deal he'll need it all to square his debts—of honor."

Her voice was acid with satire. "Suppose we leave him out of this for a bit," she said almost fiercely. "This affair is between you and me."

"What is it?"

She eyed him narrowly, lighting another cigarette. With the curious calmness that of the mask orange globes on her face, the spark of the cigarette as she inhaled it, the glitter in her eyes, her attitude, she appeared jaded, over worldly, cynical, rapacious.

"If I should tell you that there are parties who plan to block your plans with the Water company, if I should tell you that they are, what knowledge they possess, how they expect to use it, will you give me the money?"

"It depends upon whether the information is valuable enough. Whether their plans are really dangerous to my interests—and to those of the company."

"I am dealing with you, Mr. Warner, I've made carbons of the minutes of the meeting. I want your word that you'll give me the money before I give away my information. I'll go further," she went on as she saw hesitancy in Caleb's eyes. "You have other interests, than just with the Crystal Springs crowd. This affects those as well."

"What do you mean?"

She lowered her voice. "You are interested in Miss Clinton."

Caleb harkened. But the girl was staring at him and he felt that somehow he had betrayed himself, for she gave a little satisfied smile.

"We'll leave her out of it," he said. She should be her bond.

"We can't. I'm another woman. Not a man. I'm not saying anything detrimental to her. But this touches her as well as you. Now will you give me your promise and listen?"

Caleb reflected rapidly. He could measure the fifteen hundred. It was a big sum. Even with his attained hundred thousand, with his promised salary, it still seemed large. He could not undo in a moment the instincts due to heredity and training. But the girl had struck the right note. He felt that she held the key to Betty Clinton's conduct towards him, and, as he realized that, the money

Little Hope for Universal Tongue

All hopes of a universal language have received a serious setback, if they have not been completely shattered. Once German, French and Russian represented such hegemony as existed in Europe. Today a hundred different languages demand recognition as the voices of nations.

"Official languages" now exist for Esthonia, Latvia, Lithuania, Finland, Iceland, Poland, the Ukraine, Georgia, Azerbaijan and Armenia. There is an attempt to revive Gaelic in Ireland, and in Spain the Catalonians are demanding the right to teach Catalonian in the schools. There is a struggle in Czechoslovakia. In Schleswig-Holstein and in the Balkans for supremacy or at least autonomy among Czech and German, Danish and German, Croatin, Hungarian, Serbian, Greek, Bulgarian; between the Latin and Cyrillian alphabets. In Palestine, where they are seeking a national language, there is contest among Yiddish, Hebrew and Judeo-Espanol, the latter much used by Spanish Jews of Constantinople and Salonikl.

Bird Knows Its Business

The wings and tails of the Argus pheasants are studded with scores and scores of large and very perfectly marked "eyes," and it is from these that he has earned his name. He knows that it is useless to try to court his sweetheart while she can still see his hopelessly plain face. (His features suggest a small and degenerate cousin of a bald-headed vulture.) When, therefore, he goes a-wooing, he displays his handsome ocelots, and at the same time bides his face in his feathers, taking occasional peeps to see if he is making any progress, says the London Mail.

Evil of Prejudice

It is no exaggeration to say that the greatest obstacle to human progress along every line is to be found in human prejudices. It is our prejudices that blind us to the truth, and it is truth alone that can ever make men free.—John Herman Randall.

THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

(© by Dodd, Mead & Company.)

The Fall of Rome

WHEN a lion on the prairies falls sick the birds of prey gather from all over the heavens, ready to attack and rend the helpless giant. When the world-power of Rome, after enduring for five hundred years, grew sick from its own vices and internal dissensions, the savage tribes that for centuries had cringed in awe of the Imperial City gathered to help on the work of destruction and tear asunder among themselves the vast territory that could no longer be held intact.

Power has always moved westward, in earlier times Persia ruled the civilized earth. Larger and bad government had so weakened the Persian dynasty that it had crumbled beneath the iron grip of the Greek Alexander. Greece, in turn, through internecine disputes, lack of union and departure from the old Spartan simplicity and probity, had fallen victim to Rome's onslaught.

Rome, as long as it was guided by democratic principles, governed by brave, honest and wise men and guarded by hardy legions, had risen until it had held the earth in its grasp. Then, with nothing left to conquer, with no further need for privation, struggle and armed defense, the mighty nation had gradually fallen prey to luxury and ease and to the vices that follow in their train. The once sturdy race grew effeminate; the once upright senate waxed corrupt. Rome was falling back. It ruled the world, but it ruled with a hand that yearly grew softer and feebler for lack of exercise.

As early as the middle of the Third century A. D. hordes of German and French barbarians took advantage of this weakness to swarm into Italy. From then the name of Rome's power was such a terror in their ears that they dared not attack the city itself. But they found that the once invincible Roman power could not punish an invasion of its farther provinces; and this emboldened them to new inroads. From friendly and contented Roman subjects, these tribes became sullen and watchful foes, awaiting only the right moment to spring at their former tyrant's throat.

Once only did Rome's old glory blaze up for a brief interval. In 272 A. D. the Emperor Constantine united the shattered empire under his wise rule and made Christianity its official religion. He also transferred the capital from Rome to Byzantium, which latter place took his name, becoming known in future years as Constantinople—"the city of Constantine." But soon after Constantine's death the empire began to fall to pieces hopelessly. It was formally divided in 364 into two practically separate powers—the Eastern empire, with Constantinople for its capital, and the Western empire, with the seat of government in the old city of Rome. The top-heavy state, not strong enough to support its own greatness, and with no vitality left enough to keep it intact, had split in two.

This was the chance for which the barbarians had waited.

Alaric, king of the Visigoths, led his tribesmen over the Alps into Italy. Rome, under three successive emperors would have swept him and his people off the map, now meekly bribed him to leave the country. Finding money so easy to earn, Alaric in 408 marched his army to the very walls of Rome. Again he was bought off. Two years later he returned, and, the terms offered being insufficient, he stormed and sacked the city. The Rome of Cicasar, of Antony, of Augustus thus fell into the hands of despised savages. It was the world empire's crowning degradation.

At about this time a short, squat man, with a big head, flat nose and beady little eyes, rose to power among the Danube tribes. He was Attila, king of the Huns, and nicknamed by his victims "the Scourge of God." He ruled a wild, almost limitless domain, stretching from the Rhine to China. Attila declared that he was destined to rule the world, and set about making good his boast by devastating the eastern empire and beating the eastern emperors' armies. He then turned his barbarians loose on the western empire. His hordes of Huns and Vandals ravaged France, but at Chalons were beaten in a great battle by the Roman general Aetius, aided by the Visigoth forces, under Theodoric. But a year later Attila conquered all northern Italy and was advancing to destroy Rome, when Pope Leo's plea induced him to withdraw.

In 453 the Visigoths turned against Rome and again sacked the city.

Meantime a Vandal chieftain named Odoacer had been impressed as a private soldier in Rome. He rose rapidly in rank, and in 476 A. D. overthrew the imperial power, announced to the world at large that there was no longer an emperor of the West, and calmly took command of the state as king of Italy.

Italy thus became a mere province, not Rome, once all-powerful, was nothing more than that province's capital. The world power was broken. An

[Political Announcement]

Announcement to the Voters of this Co.:

I have decided to become a candidate for the office of County Clerk of Charlevoix county, and solicit the support of the Republicans of the county at the September Primary.

I have been Clerk of the City of Boyne, for the past five years, and feel myself competent to perform the duties of County Clerk if elected.

GEORGE A. RODERICK.

Announcement

I wish to announce to the voters of Charlevoix county that I am a candidate for the office of County Clerk, on the Republican ticket, at the Primarien September 14, 1926. I believe I am fully qualified to perform the duties of this office, and if nominated and elected, I assure you I will give it my full time and best efforts. Your support and vote will be greatly appreciated. EARL J. SHAPTON. tf

For Prosecuting Attorney

To the Residents of Charlevoix county, I wish to announce, that at the September Primary, I will be a candidate, on the Republican ticket, for the important office of Prosecuting Attorney.

ROLLIE L. LEWIS.

Copper 5,000 Years Old

Copper vanity cases, a copper hand mirror, copper razors, tools, fishhooks and hairpins have just been found in Mesopotamia by scientists excavating the five thousand year-old palace of the kings of Kush. Copper is truly the everlasting metal.

IN HOTEL LOBBIES AND ON HOTEL PORCHES

Office of Uncle George H. Van Pelt.
Why Charlevoix County Grows!

We want the State and the United States to know why we grow, and we want our friends who have not assisted us to know that we are some of those who helped it grow. When asked to assist in any good work some folks say, some refuse, some do nothing, some say nothing. So it is with all things in the world, and so with it all we progress.

To all those who have helped, we say, thank you.

Detroit is looking ahead fifty or seventy-five years and will submit a plan for a subway to cost two hundred and eighty million dollars. While Detroit is 288 miles from Charlevoix county, that is only an eight or nine hour drive and by the time this is finished, undoubtedly there will be special wide concrete roads built and autos will also be built so that the trip from the busy City to the beauty land of Charlevoix County can be made in five or six hours. Is it not a fact that with everything all in our favor we should go ahead now and build a fine twenty foot wide concrete road around Lake Charlevoix, before some other neighboring county gets in ahead of us and opens up some of their best beauty spots, even if they are not as beautiful as our own, now-fast-growing-in-favor-county, we must look ahead and not behind. Every time I look at my card, the one which has the picture of the ox team and hay rack, it takes me back in memory seventy-five years when I had to break in a pair of steers every winter, (steers are built calves about eight or nine months old) and in three years they develop into oxen and are able to do a regular day's work. Even forty years ago they used them here for all farm work, and the time was not long from oxen to auto and tractor. I tell you my friends we can't afford to wait any longer for this long and much talked of concrete road (twenty foot wide for safety) around the beautiful Lake Charlevoix.

We waited and hung back in the "breechin" a dozen years ago, and by so doing we only got twelve and one-half miles of concrete road instead of getting twenty as we should have done. All new work should be and must be done by high class contractors. We want it up to standard specifications, by honest men. No one without a clear record should be allowed to make even a bed. We want it A-1, strictly first class or we don't want it all.

The devices used now for testing the thickness and the mix must be used all along the line in order to shut off any chance for anyone to fool away a dollar of our money. The construction of a concrete road around Lake Charlevoix will attract more than enough people in fifteen years to pay off the bonds, when they fall due. All roads from all directions will lead to the great Lake Charlevoix road when its construction is definitely decided upon and settlers will come in and settle anywhere and everywhere along its entire shore. The building of this great lake road will result in a direct promotion of construction of a large population, even before the road is finished. Now is the time to buy property around Lake Charlevoix and I haven't an acre to sell and no money to buy if I wished to. No favors to ask, no axe to grind, but I am grub staked for the balance of my life.

Now boys get out your bugles. Call loud and long for your friends to help us on in this good work.

Yours,
"Uncle" George.

Mirrors for Macaroni

By using mirrors to supplement the sun in drying macaroni, manufacturers of the product have found the color to be more satisfactorily preserved, since the deep yellow tint is not bleached so easily, and the flavor also is said to be improved. The process is quicker than sun blanching.

Order Appointing Time for Hearing Claims

STATE OF MICHIGAN — The Probate Court for the County of Charlevoix.

At a session of said court, held at the probate office in the City of Charlevoix, in said county, on the 21st day of August, A. D. 1926.

Present: Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Charles R. Talbot, deceased

The above estate having been admitted to probate and Virgina Belle Talbot appointed administratrix thereof.

It is ordered that four months from this date be allowed for creditors so present their claims against said estate, and that such claims will be heard by said court on Monday, the 27th day of December, A.D. 1926, at ten o'clock in the forenoon, at the Probate office in the City of Charlevoix.

It is further ordered, that public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
18-3t Judge of Probate.

Order Issued By Authority of Act 230 of the Public Acts of 1925 Prohibiting Fishing in Adams Lake, Marion township, Charlevoix county. 16-3t

STATE OF MICHIGAN—County of Ingham—ss.

The Director of Conservation having made a thorough investigation of fishing conditions in Adams Lake, Marion township, Charlevoix county recommend certain regulations:

Therefore, the Conservation Commission by authority of Act 230 of the Public Acts of '92' hereby orders that it shall be unlawful to take or attempt to take any kind of fish from the waters of Adams Lake, Marion Township, Charlevoix county until the opening date of the season on large and small mouth bass A. D. 1927, under penalties provided by Section 5 of Act 230 of the Public Acts of 1925.

Signed, sealed and ordered published this fourth day of August 1926.

ROAD BUILDING

POOR HIGHWAYS CALLED COSTLY

Government engineers are trying to dissipate three erroneous ideas about public highways to give the country a highly improved system of motor travel.

These ideas are:

1. That an improved road is a luxury, to be enjoyed only if it can be afforded and not essential to the economic health of the community.

2. That all roads, if improved, should be hard surfaced to make it worth while.

3. That funds be built for permanency.

These thoughts are attacked and broken down in a statement of members of the bureau of public roads to the secretary of agriculture.

The idea of good roads being luxuries, say the engineers, "had its origin in the early days of the automobile when the motor vehicle was thought to be merely a toy of the wealthy few, and road improvement was thought to be in the interest of only this special class."

Conditions are different now. Automobiles are necessities to a great degree, and roads are needed to accommodate them if only for transportation purposes.

"The first lie," reads the report, "we soon more by not improving the roads than it costs to improve them. So we may say that we pay for improved roads whether we have them or not, and we pay less if we have them than if we have not."

Hard-surfaced roads are not economical in every case, according to the bureau of public roads, the types of surfaces should be left to the discretion of those who actually use them.

"It has been shown that the maximum amount which it is proper to spend for the improvement of a given road is the sum of the individual savings accruing from the improvement to the owners of the vehicles driven over it," in the opinion of the government road officials.

"What we spend for the improvement of any given road should always be less than the sum total of savings from the improvement."

That the road should be made for permanency is looked upon as an absurd idea. There isn't such a thing as a permanent road, say the government men.

Still Large Amount of Work to Be Done in West

In spite of the progress being made in the construction of good roads, Secretary of Agriculture Jardine, after completing a trip through the western part of the country, said: "While splendid progress has been made in the past, there is still a very large amount of work to be accomplished. In my trip through the West I was impressed with the thought that no matter how fine a system of roads the Coast states may develop, they will still be dependent upon connection with the central and eastern sections of the country, upon highways which lead through long stretches of sparsely settled areas in which the federal government still holds title to a large percentage of the lands which these roads cross. High mountain passes and desert stretches must be crossed with seventy highways before we shall have that tie between the different sections of our country that will lead to a greater unity of purpose and broader understanding which are in themselves worthy objectives of the federal aid highway system."

Weedless Roadsides Can Be Achieved by Farmers

The magic of a practically weedless roadside can be achieved on most farms by the simple process of mowing during early June and again during early August. Under this treatment the weeds are gradually replaced by bluegrass, which grows naturally in every county in Indiana, according to A. A. Hansen of Purdue university.

By mowing twice instead of once every season few weeds go to seed, and without seed they cannot compete with bluegrass. Ordinarily three years of June and August mowing is sufficient to change a roadside weed patch into close bluegrass sod, thereby not only improving the appearance of the farm but in addition cutting down losses due to plant disease and insects harbored in the weeds. The seeds of many roadside weeds are also carried into neighboring fields by the wind and in mud that adheres to shoes, wagon wheels and other moving objects.

Magnet Picks Up Nails

The state highway department of Ohio is spending money to minimize the danger of tire puncture on the state roads. Several trucks are fitted out with an electro magnet, attached to the rear and close to the ground. These trucks are run over the highways and they pick up all the stray nails, scrap iron, etc. In a five-mile trip one of the trucks picked up 150 pounds of nails and iron and collected 003 pounds in the course of a day.

WIN AT GAYLORD

Charlevoix County Members to Attend Fair at Detroit

As a result of the contests held at the Northern Michigan Boys and Girls Club Camp at Gaylord, August 17-20, and at which 18 club members attended, five boys were awarded a trip to Detroit with all traveling expenses paid by the State Fair.

Three of the boys will represent the Calf club as a judging team, due to their efforts in giving Charlevoix county second place at Gaylord in competition with some twelve counties.

This is the big event that all members of Boys and Girls Clubs look forward to and comes as a reward for excelling in Club work, and the following three boys will make the trip, having scored highest in the order named:

Arnold Smith, Alfred Larsen, East Jordan; Hubert Straw, Charlevoix, with Frank Severance and Harvey McPherson as alternates.

In the handicraft demonstrations the team consisting of Charles and Lewis Kleinhans of Clarion won first place and also win a trip to Detroit.

Let's all congratulate these five boys and hopefully anticipate that they will win state honors and be awarded a trip to the Livestock Congress at Chicago in December.

DR. SELBIE VANCE SUNDAY MORNING

Church Was Filled and Sermon Appreciated

The sermon last Sunday morning by Dr. Selbie Vance, at the Congregational Church, was a powerful message which gripped the hearts of a large congregation. It was a remarkably original presentation of the Gospel of John. The congregation was taken by the preacher far from Charlevoix and found themselves sitting in a church in the ancient city of Ephesus while the people listened not to Dr. Vance but to the aged pastor of the Ephesus church as he told how he came to write different parts of the gospel as memoirs of his life and summaries of his twenty-five years as pastor of the Ephesus church. The core of it all was his intense loyalty to his Master Jesus. The story was told with the closest fidelity to the historical setting but with a dramatic power and directness of appeal which deeply moved all who heard it.

Dr. Vance is a great preacher as well as a scholarly and gifted teacher, occupying a chair in the Western Theological Seminary at Pittsburgh, Pa.

In closing the notable series of August Sunday morning sermons Dr. Matson expressed feelingly his own and the people's appreciation and gratitude for the services of the preachers, Dr. David Jones, Rev. Carl Glover, Dr. Wm. Lampe, Dr. H. H. Forsythe and Dr. Vance.

A time evening service last Sunday Rev. C. E. Taggart, former pastor of this church for seven years, preached again to his old congregation and was heard with much appreciation. Dr. David Jones conducted an inspiring song service in the devotional part of the service.

Auto Ferries Could Not Land in Late Storm

A terrific gale, unusual in its force for these parts laid up the state ferry boats three or four trips Friday afternoon and Saturday morning of last week. The congestion that followed became very great, swollen by two or three hundred cars from a Kiwanis gathering at the Soo.

Captain May kept the boats running in spite of the rough weather, as late as possible Friday, and it was the impossibility of landing at Mackinaw City, rather than the storm in the Straits, that compelled cessation. The time had not fully died down when traffic was resumed Saturday. The accumulation of cars were cleared off before Saturday midnight. But the storm set one thing at rest—the complete seaworthiness of the state ferry boats. They rode the storm bravely and justified the engineer's judgment in keeping them going as long as possible.—St. Ignace News.

REAL ESTATE BOARD

Tri - County Organization—Antrim, Charlevoix and Emmet

All preliminaries to the organization of the Tri-County Real Estate Board, were completed Tuesday night at a meeting held at the Wolverine hotel, Boyne City. This board is composed of real estate brokers from Antrim, Charlevoix and Emmet counties who have banded together to promote standardized real estate practice, a code of ethics, cooperation among themselves, and protection for the public against dishonesty and irregularity. It will apply for membership in the Michigan Real Estate Association and the National Association of Real Estate Boards, which will give local members the privilege of using the title "realtor" and enjoying the benefits that go with that title.

Constitution and By-Laws were adopted at this meeting; and the officers elected are: T. B. McCutcheon of Ilsalaire, president; E. C. Matthews of Harbor Springs, vice president; S. C. Smith of Petoskey, treasurer; and Charles Earey of Charlevoix, secretary. In all fourteen members were enrolled, and others who were unable to be present have signified their intention of joining later.

This board has the distinction of drawing upon larger territory for its membership than other boards of this kind; but it is felt by the founders that with the interests of the three counties being so nearly similar, their cooperation will be highly profitable.

Rough Guess

"What is the occupation of that gentleman who works so hard to entertain?"

"Judging from the stories he tells," answered Miss Cayenne, "I should say he is an archeologist."—Washington Star.

Swallowed Itself!

Recently one of the bus-constructors in the Hamburg municipal garbage swallowed so much of his own body that it became tied up in the form of a ring and was suffocated.

VOTE AGAINST NEW SCHOOL BUILDING

Freeholders Reject Proposition By a Decisive Vote

For days past one of the main topics of conversation between local citizens has been in connection with the proposed bonding project to raise funds to be used for school purposes, a sum indefinite and variously estimated at from $200,000 to $400,000 to be expended for a new high school building.

There has been more or less plain discussions, some acrimonious debate, while with others the matter was taken seriously as a business proposition, agreeing that a new modern building would prove a valuable asset to the city, with a majority taking the viewpoint that the project would create a heavy financial burden for the taxpayers if carried out.

In order to sound out the public and ostensibly at least, get a statement or expression from the freeholders relative to their position in the matter a meeting was called by members of the Board of Education for last Monday night at the school building. This meeting was largely attended and to state the matter correctly everyone was interested in the proceedings. Several persons made short talks favoring the project, pronouncing the same a desirable improvement. In fact this was the sentiment expressed by a majority of the speakers. One or two however failed to respond to the key note sounded, and stated plainly that their views were not in full accord with previous speakers, out of harmony with the proposition and against a long time heavy bonding proposition to carry out the proposed building project. Speakers in this class were sadly in the minority, in so far as speakers were concerned, but not so with those present and voting on the proposition as those voting in the affirmative were overwhelmingly defeated, this being the result when a tabulation of the votes was completed and announced.

There are but few if any persons in Charlevoix but who would like to see a nice modern school building erected in this city, provided promoters would get down to earth and submit a feasible working program that will not be burdensome to the point of bankruptcy, but the public are not in the most to accept a proposition that calls for an initial investment of $200,000 or $250,000 with the prospect of another possibly equal amount to be raised before the project is finished.

Taxes have reached a high point. For several years past taxes have grown higher and higher, creating a condition that to many taxpayers has been a burden, making for more or less complex embarrassment and strange as this may appear the local citizen is responsible for the situation. It is the local citizen who votes the burden upon himself and his fellow taxpayers. Perhaps he does this thoughtlessly, perhaps with good intention and in the belief that benefits accrue to the general public. This in some instances may be true, but in many cases after the fund has been exhausted the expected improvement and consequent benefit is negligable, some quite non-existant.

From observations made that extend over a period of years, we believe that but few taxpayers object to a high rate when they see their money spent economically, judiciously and to the point where tangible, visible public improvements are made that in intrinsic value reasonably approaches the fund expended. When it does not we believe the taxpayer is in a position to protest, that he has a legitimate kick and that he is entitled to express his opinion vigorously.

Eastern States Breaks Shaft in Late Storm

The D. & C. steamer Eastern States was caught in the wind storm of Friday and when opposite Sleeping Bear Islands, Lake Michigan, a crank shaft broke, leaving but one engine in commission.

A wireless was sent to the tug Favorite for assistance, and the tug left Tilds port at once in answer to the call. The tug with the steamer arrived at the Island at 10 o'clock and anchored on the west side until the wind abated to allow a landing at the dock. The larger number of passengers were transfered to Mackinac City on the Algomah, taking the train for their homes. She left the Island Saturday in tow of the Favorite.—Mackinac Island cor. in St. Ignace Enterprise.

Insurance Men Here--Convention at the Inn

Agents of the Pan-American Insurance Company, with home offices in New Orleans, attended a convention at The Inn, beginning last Thursday. These insurance men, 53 in number, brought their families from their homes in Illinois, Indiana, Missouri, Kentucky and Tennessee, and combined business with pleasure by enjoying the coolness and recreations of Charlevoix while they also met to discuss sales problems and plans.

Every event of this nature that can be attracted by Charlevoix is of great value in spreading the word of our attractions as a resort. They have a good time—they enjoy a coolness impossible under the blazing suns of their home states—and they will tell of these things.

Among other things planned for their entertainment was an automobile trip, arranged by the Association of Commerce. The visitors were taken around the town, out to Loeb farm, and then south on M-31 as far as the Hilton school.

REGIONAL FAIRS

Emmet County Fair Next Week—Beginning Tuesday

September 7th, 8th, 9th, 10th, Tuesday, Wednesday, Thursday and Friday of the coming week the Emmet County Fair will head forts at the county fair grounds and aside from exhibits the officials have provided a racing program consisting of trotting, pacing and running events; baseball games on each of the three last days; boxing events and various other forms of entertainment of interest to the general public.

Purses aggregating $1550 are offered to be divided amongst the winners in the racing events. The purses are freely made by officials that the display of farm products will be superior in quality and by far the largest showing ever exhibited at the Emmet County Fair.

TOURIST FLOOD SETS NEW RECORD

Michigan's New Industry Makes Record Growth Season 1926

Reports from state police, received by the state department of safety, clearly indicate that the annual flood of tourists into Michigan is greater this year than in any prior season. In addition to patrolling the state trunk lines, the police are instructed to keep careful comparative records of the number of cars entering from other states. These reports form the basis for the statement.

While the adjoining states of Indiana and Ohio lead in the steady procession which winds its daily way along the trunk lines toward the north, the parade also includes hundreds of cars from Pennsylvania, Kentucky, Illinois and the further southern states.

All along the route this procession pays tribute to the state of Michigan by buying something from some Michigan citizen. In the last analysis, this expense runs into the millions. The season of 1925 saw tourists leave an estimated $200,000,000 here. This year the total will run nearer $300,000,000. Along the trunk lines, and in the northern country, this huge expenditure is creating a prosperity which is positively record breaking.

The tourists are buying automobile supplies, food and often lodging. Many of them erect cottages. Even the campers rent boats and otherwise help to fill the cash registers of the farmers and resort enterprises.

Residents of Michigan may consider this influx of wealth as a lucky accident. Heads of state departments know that it is the result of careful planning and the direction of every line of state activity toward this definite end, all working under the direct inspiration of Governor Alex J. Groesbeck. To get the tourists, Michigan needed highways. The Governor pushed construction and put the concrete where it would do the most good, for Michigan and her visitors.

Many of the tourists wanted to camp. The Governor found the state with 22 parks available. It now has 53. In 1921 there were 250,000 park visitors (estimated) in state parks. Last year by careful count there were 2¼ millions.

The tourists wanted woods, good fishing and freedom from forest fires. The Conservation Dept. has set national records in the alacrity with which it is applying these needs. "It's a business," declared one state official. "The Governor saw it coming, sent the state to meet it."

CHARLEVOIX CO. BANK CHANGES

A. F. Bridge President and Robert Bridge the Cashier

Recent changes at the Charlevoix County Bank places Albert F. Bridge at the head of this local banking house as president, following a service of upwards of twenty years as vice president and cashier, Mr. Bridge succeeding to the position until recently held by the late Archibald Buttars, who passed away at San Diego, Calif., June 5th, 1926.

The Charlevoix County Bank came into existence in 1884 and has been a going financial institution throughout the intervening years. Commencing with but few patrons and small deposits the business has maintained a steady and continuous growth, each year showing an increased number of patrons while the amount of funds deposited has multiplied many times until at this time the bank shows the heaviest amount in the history of the organization.

The Charlevoix County Bank (incorganized) is a private institution, carried on as a copartnership which is composed of the following members: Albert F., Robert, Clarence N. and Celia N. Bridge, Mary N. Paddock and Elizabeth Mason, all with the single exception of Mrs. Mason, being residents of this city.

In a recent statement the bank shows resources and liabilities of $926,812.66 but beyond this there is a more valuable asset in the private fortunes of the individual members, their reputation as conservative business managers and above all honored names in the business world—all making for a most satisfactory pledge to the bank's clientele.

Wind Does Damage

The large plate glass in the front of S. M. Rose's barber shop and plate glass in the door were both wrecked last Saturday night when a gust of wind closed the door with sufficient force to cause the damage. New glass has been ordered to replace the damage wrought and will be placed in position as soon as it arrives. In the meantime the front of the shop is sadly at variance with its former tidy appearance. Mr. Rose figures his financial loss at upwards of $125.00.

Educated Dogs a Feature at the County Fair

Much interest is being shown by our readers in the Charlevoix County Fair which will be held Sept. 14-15-16, and particulary in the announcement that the committee in charge of the grand stand attractions have secured a wonderful line of spectacular and sensational performers.

In making the selection the committee made ample provision for the amusement needs of the children, for they have arranged for the appearance of "Betty's Pets," a very clever troupe of educated canines. Many dog acts have been seen from time to time but Betty's Pets will present a series of tricks which will show their superior talent as entertainers.

SATURDAY TRYOUT

Golfers are Enthusiastic Over Belvedere Golf Course

Members of the Belvedere Golf Club were given an opportunity for the first time to try out the New Belvedere golf course on Saturday, from expressions made by those who enjoyed the privelege extended is is apparent that the new 18-hole course measures fully up to expectations and when fully completed as it soon will be, the same will be a source of unending pleasure to both the promoters of the club and its enthusiastic patrons.

One of the players, a follower of the game from St. Louis, Mo., was most pronounced and expressive relative to the grounds, layout of the entire course, stating that the same was wholly meritorious and fully equal to the best in the vicinity of St. Louis while equal complimentary remarks poured forth from all other players making the round of the course.

There is a distinct charm in the new course from every point and at all angles and it is questionable whether or not there is another golf course in Michigan that equals in point of beauty, broad perspective, contour and satisfactory surroundings as does the Belvedere golf course. The grounds are already famous and with its formal opening in the early season of 1927 the grounds will be the mecca for golf enthusiasts throughout the entire resort region.

ST. JAMES CLINIC

Eighty-Nine Cases Examined During the 2-Day Session

That the free Chest Clinic held at St. James last Friday and Saturday under the direction of the Michigan Tuberculosis association, was a success is evidenced by the interest taken in the clinic by St. James and Beaver Island citizens.

It was conducted at the St. James Parish hall with Dr. J. W. Toan as diagnostician, who for eleven years acted as assistant superintendent of the state sanitorium, Howell, Mich., and who through many years has attained a high degree of proficiency in this type of clinical endeavor through years of practical research and laboratory work in connection with his duties as chief examining physician at the Howell sanatorium.

Dr. and Mrs. Russell Palmer and Rev. Fr. McMannon acted as a special local committee, perfected and rendered valuable assistance and it was through this hearty and active cooperation that definite, practical results and benefits were brought about in the work carried out which will prove beneficial to the physical welfare of the island citizens.

During the two day session 89 persons appeared for inspection or examination; of this number 22 were adults and 67 children and of the latter all were 16 years of age or under. Of the total number there were 14 cases of well defined or positive symptoms of tuberculosis, 4 of adults and ten of children according to report of diagnosticians.

The clinic organization was in charge of Miss Laura Ibach, director of clinics for the Michigan Tuberculosis association, and who had as assistants Mrs. Russell Palmer, graduate of Mercy's Training School, Toronto, Canada, and Miss Bell, director of the psychopatitic clinic, Detroit Board of Education, who is spending the summer season at St. James. Miss C. McCauley a teacher in the public schools of Detroit, and Miss Belfy, both residents of St. James.

Great Eastern's Whistle

The steam whistle of the Great Eastern was saved from destruction by a former officer of the ship, who bought it when the liner was broken up. It is 33 inches high and weighs 98 pounds.

Washington's "Mops" Find Many Big Stills There

This photograph shows Sergt. G. M. Little and Capt. Guy Hurlingame who command the "flying squad" of Washington police that has been very successful in raids on stills, together with some of the apparatus they have seized. The largest still shown had a capacity of 750 gallons.

Scene From the Passion Play in Los Angeles

The famous Pilgrimage play at Los Angeles, Calif., has been brought into the light again, with Reginald Pole playing the role of Christus. The American Passion play is run as a reverential, dignified and nonsectarian civic enterprise in an outdoor theater bequeathed by Mrs. C. W. Stevens of Philadelphia. This photograph shows "The Last Supper."

Mitchell Captures a Big Tuna

Col. William Mitchell is devoting much time to tuna fishing this summer, and is shown here with Mrs. Mitchell and the captain of their boat (kneeling) and an 800-pound fish the colonel landed after a two-hour battle. This was at York Harbor, Maine.

MRS. V. P. PARKHURST

Promising to finance her own campaign, Mrs. Virginia Peters Parkhurst of Bergen, Md., has announced her candidacy for the United States senate. She will run as a Democrat against Representative Millard Tydings, who is the choice of the regular Democratic organization.

TOBACCO QUEEN

Wreck of Millionaires' Special

Six persons were killed and scores injured when the "millionaires' special" on the Long Island railroad ran into an open switch at Calverton. Part of the wreck is here shown.

SHORT ITEMS OF INTEREST

Large areas in Alaska are suitable for grain cultivation.

As late as 1866 it was regarded as impossible to grow grain as far north as Alaska.

About 1,000 dyes have been made commercially from ten or twelve coal tar products.

Steel can now be made so thin that it is as transparent as the clearest glass.

Sheiks of Arabia are giving up camels for automobiles.

A portable water heater invented in England for household use goes denatured alcohol for fuel.

A baby carriage has been invented in which an infant can be locked securely without discomfort.

A novel rear light for automobiles is illuminated by reflection through a tube from a car's headlight.

Use Nature's Law to Save Clover

Develop Strains That Are Immune or Highly Resistant to Disease.

(Prepared by the United States Department of Agriculture.)

Farmers of Delaware, Maryland, Virginia, West Virginia, Kentucky and Tennessee have it in their own power to save the red clover crop from further decline and destruction in these states, says A. J. Pieters, agronomist of the United States Department of Agriculture. All that is necessary is to harness the old law—the survival of the fittest—and develop strains of red clover that are immune or highly resistant to the anthracnose disease.

Acreage Decreased.

The acreage in red clover in these states has not kept pace with the demands for hay and forage during the past 25 years. While there are many causes for clover failure, the one cause generally responsible in this area is anthracnose, as limed and fertile soils anthracnose-is almost surely the only cause of failure here.

There is only one remedy, says Doctor Pieters, and that is the use of anthracnose-resistant strains. Experiments by the department, as well as observations of work done by farmers, have shown that it is entirely feasible to develop such strains. However, they must be developed by selection of the resistant plants in fields where the disease is consistently very severe. At present there seems to be only one known resistant strain—the one developed by the Tennessee experiment station several years ago, but not much seed is yet available.

Save Resistant Seed.

There is reason to believe that some clover now growing in this infected area is resistant. It should be located and saved for future seeding. When a field is severly attacked the plants surviving will likely be somewhat resistant. In such cases it may seem that the field is worthless to cut for seed, but it is at just such times that nature has pointed out the resistant plants.

By following this practice year after year until all susceptible plants have been eliminated by the disease and only resistant ones remain, it will be possible to develop strains that are much superior for local needs than any now in existence.

Sulphur-Lime as Summer Fungicide for Peaches

The New Jersey Agricultural experiment station is still recommending dry-mix sulphur-lime as a summer fungicide for peaches for the control of scab and brown rot. Four pounds of high calcium lime should be added to every 50 gallons of 8-4-50 dry-mix used in combination with lead arsenate in order to avoid arsenical injury. Growers making their own dry-mix should use eight pounds of lime with every eight pounds of sulphur when preparing mixtures to be used in combination with lead arsenate. It is also recommended that the amount of lead arsenate be limited to one pound of the powdered form to 50 gallons of spray mixture. Special care should be exercised in measuring or weighing lead arsenate since more than the recommended amount may cause serious injury to twigs and foliage.

We have never had any serious difficulty with dry-mix so far as staining the fruit is concerned, says a writer in the Rural New Yorker. As a matter of fact, the fruit staining caused by dry-mix is much less than that caused by self-boiled lime-sulphur.

Copper Carbonate Found Not a Virulent Poison

An experiment was recently carried on at the South Dakota state agricultural station, to obtain direct evidence whether wheat and other grain treated with copper carbonate was poisonous or harmful to animals.

Laying hens were fed exclusively for two weeks on wheat which had previously been treated with copper carbonate, and these fowls were in as good condition throughout the period as similar birds fed exclusively on untreated wheat. The results may be regarded as a bit of direct evidence, indicating that copper carbonate is at least not a virulent poison.

FARM NOTES

Deep cultivation after the plants have become established injures the roots.

* * *

Dairy cows that have to run to get away from the flies have little time to do justice to the milk pail.

* * *

Sudan grass when sown in the bare yards about the poultry building makes a good summer and fall pasture. Hens must have succulent feeder green feed to maintain good health and high egg production.

* * *

Clover hay should be cured in the windrow or cock to save as many of the leaves as possible.

* * *

Success in the dairy business depends upon the cow and the man. If you are sure of yourself, then test the cows.

* * *

The one-crop wheat farm furnishes profitable employment only 60 to 100 days out of the year, or not more than one-third of the time.

* * *

Sheep frequently suffer for want of water. A sheep needs one to six quarts daily, depending on the feed received, the condition of the pasture, and the weather.

* * *

In order to save that hay rope, why not paint it with a mixture of beeswax, black lead and tallow? This will lengthen the life of good rope.

* * *

Screened and shaded stables will keep out the flies. Cow comfort and sanitation will be promoted by taking these precautions.

Santorini Volcano in Eruption After Long Rest

View of the volcano of Santorini in the Greek Cyclades which has come to life again after many years of inactivity. Since February the volcano has been in eruption, and many lives have been lost.

Totem Is Given to Macaw Clan

Bonita Indians Receive Highly Prized Gift From Explorer.

Washington.—Fulfilling a promise of a year's standing, Dr. Neil M. Judd, leader of the National Geographic society expeditions to Pueblo Bonito, N. M., recently presented to members of the Zuni tribe a gift for which they would gladly have paid in turquoise. It was a live, brilliant Mexican macaw, a bird full of meaning to certain of the Indians; yet only a few members of the tribe had ever before seen one of these brightly feathered parrots.

"Each of the dozen or more clans (individuals related through the maternal line) at Zuni has its own clan totem: The bear, badger, coyote, eagle, snake, corn—and mustard," Doctor Judd writes in a report to the National Geographic society. "Of all these clans none has a larger or more vigorous membership than the Macaw people. The Macaw clan has furnished a majority of the leading men at Zuni for several generations past. But these leaders knew the macaw, their clan totem, only through verbal description, handed down from one generation to another. Two years ago a small delegation went to Sun Dwellings, a Tewa pueblo near Albuquerque, there to trade turquoise ornaments for macaw feathers. There are two captive macaws at Sun Dwellings, obtained through exchange with Mexicans.

Recognize Pictures of Totem.

"During past years at Pueblo Bonito several of my Zuni excavation crew have been members of the Macaw clan. Pictures in our camp library verified descriptions of the people, to give the Zuni name of the macaw. These men were highly pleased last fall when I told them I should try to obtain for them a live bird, as a gift to the entire Macaw clan.

"But this spring when I arrived at Zuni I found that carefully laid plans were intended to divert my purpose and bring something of an individual reward. Two of the boys had made it known that the bird was to be a present to each, individually, and I suppose each of the pair had already taken orders for many feathers, indispensable articles of adornment in certain ceremonies and in the preparation of prayer plumes. But I insisted the macaw was a gift to the entire clan and not a personal remembrance to a single friend. It was my expressed opinion that the Sun Priest, as highest official of the clan, should receive the bird and act as its custodian. And right there I discovered some surprising information about the macaw and its habits.

Zuni Nature Fakers.

"Taking advantage of my limited Zuni vocabulary and still hoping to obtain the bird for himself, one of the two boys, in my presence, told the Sun Priest that in their native habitat the macaws gather in flocks of from 200 to 300 and, as they see a man passing through the forest, swoop down to attack him. The souls was credited with being especially fond of human flesh and extremely dangerous in rapidity. Previously, the Sun Priest had learned from the second hopeful lad that the macaw was apt to die if he did not get the kind of food to which he had grown accustomed. But after an hour's discussion the fears of the priest were eliminated and he consented to care for the macaw in behalf of his people. Word came to camp last week-end that the Sun Priest and the macaw had established friendly relations and that both were quite content.

"No one knows how long the Moqui people have been represented in Zuni. Tradition says they came up out of the fourth world with the other clans in that dim, distant past—from all the races of mankind, the birds, animals and trees, spoke a common language. Macaw clans are to be found in some of the other Pueblo villages of New Mexico and Arizona. But in no instance, so far as I am aware, can one learn definitely how long these clans have possessed the macaw as a totem or how they first became acquainted with the bird.

Ancient Bonitans Kept Captive Birds.

"During the course of the National Geographic society's explorations in Pueblo Bonito, we have found over thirty skeletons of the great macaw. And Pueblo Bonito, from archeological evidence, was abandoned approximately 1,000 years ago. It appears then that the inhabitants of this great prehistoric village must have obtained live macaws through barter with the tribes of central Mexico. The birds were kept here in captivity for we have found the perches on which they had been tethered and we have found the corn, pinon nuts and squash seeds on which they were fed. The Macaw clan doubtless wielded a considerable influence at Pueblo Bonito.

"One may imagine saunterer Mexican Indians carrying on their backs cages containing live macaws, captured in tropical forests, trudging across the hot sands of the Southwest in ancient times, bound for the famous terraced village of the Bonitans. Mules, horses and other beasts of burden were unknown in the Americas before the arrival of the Spaniards early in the Sixteenth century. Yet Fray Marco de Niza, as he journeyed northward out of Mexico in 1539 to the discovery of the 'Seven Cities of Cibola,' notes in his journal that he passed Mexican Indians returning with turquoise they had obtained in exchange for parrot feathers."

Auto Tourists to Spend Three Billion in Summer

Washington.—Nine million automobiles, carrying 36,000,000 passengers on vacation trips, are seeking the open road this year, the national touring board of the American Automobile association announced. This estimate was based on reports from the touring bureaus of 315 motor clubs.

"Of this total," the association's statement said, "3,000,000 cars will carry camping equipment and extend their outing to 33 days. Two-thirds of the caravan have not yielded to the canvas lure and will depend on hotels. The latter class will spend an average of ten days on tour."

While it is impossible to determine exactly how much money the motor tourists will spend, the touring board asserted that $3,000,000,000 is a conservative estimate, this being nearly $500,000,000 more than was spent during the 1925 touring season. The statement continued:

Ten dollars a day for each car is a fair estimate for the camping brigade. Three million of them out for 33 days will mean 99,000,000 day tours at a cost of $10 a day, or approximately $1,000,000,000. It is safe to assume that the other group, while on the road for only about one-third as long as the campers, will have about three times the daily expenses, so that $2,000,000,000 for the 6,000,000 cars is a conservative estimate. This would only allow $7.50 a day for each occupant of a car carrying four passengers, which is the average number carried while touring.

It is therefore safe to assume that the resorts, hotels, garages, filling stations and other agencies catering to motor travel will benefit to the extent of $2,000,000,000 for this year's crop of motor vacationists.

Locomotive Hits Tot and Blacks His Eye

South Bend, Ind.—A black eye was the extent of injuries received by Leonard Leif, twenty-one-month-old son of W. W. Leif of Niles, Mich., when a South Bend-Niles train on the Michigan Central struck the child, who was sitting on one of the rails. The engineer saw the youngster and blew the whistle, but the child refused to move and was carried under the wheels of the locomotive. "Providence saved my child," the mother told reporters.

"Kianager" Is Unique Hybrid

The "Kianager" or wild mule which was born at the home and New York, recently. Director Blair says it is unique. The father was a kiang or wild horse of Tibet and the mother an onager, the wild ass of western India. This is the first time such a cross has been effected and the result is what looks like a baby mule on stilts.

FREAK COAL MINE CLOSED BY FREQUENT GAS BLASTS

America's Best Engineers Are Baffled and Canadian Shaft Is Ordered Sealed.

Victoria, B. C.—Canada's freak coal mine, where continual explosions have baffled the oldest mining engineers in America, at last has been sealed up permanently to prevent further accidents in its 3½ mysterious depths. By an order passed here the British Columbia government forced the closing of a large section of the property owned by the Rich Granby Consolidated Mining and Smelting company at Cassidy, north of this city. This will prevent the mining of thousands of tons of coal known to exist in the mine and, according to the operators, will reduce the life of the entire property, one of the most valuable in Canada, to about three and a half years.

The history of the mine is said to be unique.—When strange blowouts of gas began to occur there with alarming frequency experts from Canada and the United States investigated and sought methods of preventing accidents. All their measures, however, failed. The explosions continued and recently, when two miners were killed by tons of falling coal and rock, the government decided that in spite of the huge economic loss entailed the mine must be closed for good.

The condition of the sealed mine is without parallel anywhere in the world, according to the provincial mines department experts here. They have made inquiries in all the important coal fields of America and Europe and failed to find any similar problem. Apparently the coal seams are interlarded with gas under terrific pressure, and when the rock lying on top of the coal is removed the imprisoned force bursts its way out, resulting hence in the mine shafts. No precautions are sufficient to insure safe mining.

British Organize to Capture the Tourist

London.—British merchants do not like the fact that far more American money is spent by tourists in France than in the British isles. Hotels, shopkeepers, ship owners and several organizations are forming a co-operative body to attract visitors. They have adopted the slogan "Come to Great Britain."

They assert that Great Britain is behind in letting the world know that it has as much to offer as a holiday resort as the Continent. They propose not only to tell the world, particularly the United States and the British Dominions, about the British isles, but to help the tourists in every way to enjoy their visits. They also will encourage reciprocal visits of Britishers to the United States.

Originality provokes originality.

MAGIC WORDS

First Married Man—And what you said to your wife caused her not to speak to you for days?

Second Married Man—Yes.

First Married Man—Say, old man, won't you tell me exactly what it was you said?

Delighted

"I beg your pardon," said the girl, timidly, "but would you care to help the Working Girls' home?"

"Certainly!" said the bright young man, briskly. "Where are they?"—Tit-Bits.

The Plot

Trump—Lady, will you please give me a cent?

Lady—I have only one, and I'm saving it for my husband.

Trump—I know. He said if I'd get it he'd give me a quarter.

Faith

Wife—Look out, John, here comes a train.

John—Oh, that's all right. The doctor said nothing could touch this car at the price.

AT A DISADVANTAGE

Nellie—If you thought it was a ghost you saw, why didn't you speak to it? Jack—I don't know a single one of the dead languages, you see."

Wise Husband

Mrs. Campbell—Dear, I saw the sweetest little hat downtown today.

Campbell—Try it on and let me see how you look in it.

What Did He Mean?

Old Lady—Doctor, don't you think that I should go to a warmer climate?

Doctor—Yes, madam; but I am doing all I can to save you from it.

Honeymooning

Dinah (to Mandy at the washtub) —Ain't you 'spicious 'bout you' hus band quittin' work soon as he done married you?

Mandy—You mis' yo' business! Dat man ain talkin' his honeymoon.

Looking for Easy Life

Myrtle—Why did Maud throw over the banker?

Gert—Said she wasn't going to be a drudge all her life and was going to marry a bricklayer or a plumber.

HUSBAND DID THE WASHING

His Wife Confined to Her Bed by Ill Health

Because of his wife's frequent ill health, Mr. J. F. Gage was obliged to do the washing and cooking for the family.

One day when Mrs. Gage was confined to her bed, he brought her the newspaper to read. Among the advertisements she noticed a letter from another sick woman telling of the help she had received from Lydia E. Pinkham's Vegetable Compound.

"I'll try it," she decided.

Her husband brought home a bottle and only a few days after she had begun to take it she felt well enough to be up around the home. Gradually her general health improved until she is now able to do her own work.

In a letter which Mrs. Gage recently wrote, she said, "I have taken twelve bottles and feel like a new woman." She has told many women about Lydia E. Pinkham's Vegetable Compound and one of her friends is now taking it. Her address is Mrs. J. F. Gage, House 6, Brownwood, Texas.

Lydia E. Pinkham's Vegetable Compound has been taken by women for more than half a century with very satisfactory results.

Northern Michigan Needs Men Like Cal Campbell

With the future of Northern Michigan considerably brighter than it has been for many years, in fact brighter than it has ever been, a great deal depends upon the action of the state this year. Much depends on the attitude of the state toward this great playground and therefore a great deal depends also on who the voters send to Lansing for the next two years to represent this district.

Northern Michigan needs big business men to handle its affairs. It needs men who are willing to sacrifice their own interests to some extent, in order that Northern Michigan may progress. It needs men with vision, men with brains and men with that spirit of aggressiveness that will cause the state to become active in this development now. Northern Michigan's development is just beginning. There are many things the state could and should do to help in this great undertaking. The matter of opening up resort, property

For State Senator
"CAL" CAMPBELL
of Indian River

by new roads, would have more to do with the progress of this section of the state in the next five years, than anything else so far proposed.

To what extent the state becomes interested in this development depends entirely upon the man who will represent this section in the senate. For 48 years Cal Campbell has lived in Northern Michigan. During all of these years he has watched, hoped and helped Northern Michigan advance. He has been an active worker. He has been a developer. Year after year he has given his best efforts to the progress of this section of the state. In addition he has developed from nothing but a hole in the ground, one of the most important business enterprises in this section of the state, the Campbell Stone Co. at Afton.

Cal Campbell is a big business man. He is therefore a man of keen judgment, a square shooter whose word is as good as his bond. Starting years ago as a young man on the Michigan Central railroad, Cal Campbell worked his way up to be a conductor, only because he was fair, square and honest.

Later, he started in the stone business in a limited way. While he was on the railroad, he was chosen by his fellow workmen to formulate an organization that would help them in their negotiations for wage increases. He did and the result was the formation of the Brotherhood of Railway Trainmen. This organization has continued through the years and has spread from division to division and from one railroad to another until today, it covers every railroad in the world.

Back at that time Cal Campbell was working in the interests of his fellow men. He was a keen thinker and a worker, as will be recognized when it is known that following the formation of the brotherhood, he was elected chairman of the grievance committee whose duties were many and varied. One of the most important tasks he had to perform was submitting to the railroad a request for more pay for the entire body of trainmen. This request resulted in the first pay schedule ever submitted. The practice has remained through the years. Cal Campbell still holds his membership in the Brotherhood.

As a railroad man all the men liked him and put their faith in him, for he was honest, friendly and square with all. When he started the stone business his workmen joined the organization and worked hard to help in his success. Has Mr. Campbell forgotten them? No sir! They swear by him at the plant and all over the north. Old, old men who have worked for years are still drawing their pay although their work produces considerably less than what younger men would produce, but they stay on with Cal Campbell, for he knows the workers side of life, and when they get too old to work they get pensioned.

But he also knows business. He has taken the stone quarry at Afton and from a mere hole in the ground has step by step, builded up one of the finest stone plants in this section of the state. During all this time, Mr. Campbell personally looked after the interests of the business. He took care of its progress. Notwithstanding this he had always time to do his part for his community and his friends. In making the race for the senatorship, Mr. Campbell has not done so out of his own ambitions. He had no thoughts of entering politics. He had no thoughts of becoming a candidate, but his friends throughout the district, realizing the opportunity of sending a big business man to Lansing, to represent this district, prevailed upon Mr. Campbell, after a time, to finally make the race.

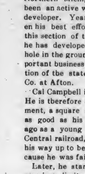
He did not then immediately enter the contest. There were other candidates who had been proposed and Mr. Campbell made a tour of the district on two or three occasions. On each, he was assured of hearty support from those who were interested in the development of this great north country and finally after careful study, and assurance from all over the district, he entered the campaign.

If elected to the office of State Senator, the people of this great playground will come to know more intimately, one of the squarest, most enterprising, and most likable men in this section of the state and they will come to know also, the value of sending to Lansing to represent this district, a man whose word has never been questioned. A man who will stand squarely in the middle of the road and fight for the things that will make northern Michigan blossom into the great playground that is beginning to develop at this time. A vote for Cal Campbell on Sept. 14, is a vote for the development of northern Michigan.

LABOR LEADERS ENDORSE FRANK SCOTT

Letter Showing How Congressman from This District Acted and Worked with Labor Leaders is Published Below.

That organized labor in this section of Michigan has a true friend in Washington in Congressman Frank D. Scott, is clearly evidenced in a personal letter direct from one of the greatest labor leaders in the United States, Andrew Furuseth, President of the International Seamen's Union of America. Mr. Furuseth without hesitation plainly states that Mr. Scott has given organized labor, every possible assistance and courtesy. He goes so far as to express



FRANK D. SCOTT

his appreciation to Mr. Scott for his efforts in behalf of organized labor.

The letter follows:

International Seamen's Union of America.
Andrew Furuseth, President,
Washington, D. C.

Cable Address:
Seamanship Washington.

Victor A. Olander, Sec.-Treas.
Chicago, Ill.

Cable Address:
Seamanship Chicago.

Washington, D. C., May 21, '26.

Hon. Frank D. Scott, Chairman,
Merchant Marine and Fisheries
Committees, House Office Building,
Washington, D. C.

Dear Mr. Congressman:

Replying to your letter asking for an expression from me as to the treatment accorded to seamen presenting their case before the committee on any question brought before it affecting them, I can say that we have been accorded every opportunity to present our side fully before your committee and we have been given courteous treatment in the presentation of our case.

I will further state that we have no possible complaint in any way of the manner in which you have conducted the committee during your term as Chairman.

Very Truly yours,
ANDREW FURUSETH.

Knowing that Frank D. Scott is friendly to labor and that he is lending every support to the organization leaders, as is clearly stated in the above letter, it would appear that the working people of this great district could not afford to take a chance in the election of its congressman. The public knows where Frank D. Scott stands. The workers know from the above letter how the labor leaders at Washington regard him and when an endorsement, such as is given above, coming directly from one of the greatest labor leaders in the country, it would appear a good, safe bet that Scott can be entrusted with the workingman's interests. Changes are not always beneficial and now that labor has a man in Washington who is friendly, one who is interested and one who has proven his support of their interests, it hardly would pay to take a chance. The change might be beneficial and then again, it might not, but with Frank D. Scott in Washington, the people know he has their interests at heart and that they have a friend. They are taking no chances therefore in returning him to congress and your vote on September 14 will help return Scott to congress.

SPECIAL DAYS MARK STATE FAIR PROGRAM

Special days, on each of which added attention will be given to the groups honored on that day, have been designated for the State Fair.

All of the entertainment and educational program of the big exposition will, of course, run right through the week, but extra features will be planned for the special days.

Monday, September 6, is to be Labor Day; Tuesday, Children's Day; Wednesday, Fraternal Day; Thursday, Farmers' Day; Friday, Detroit Day, and Saturday, Automobile Day.

Big time horse races are booked for afternoons from Monday through Friday, with brilliant A. A. A. automobile racing on Saturday afternoon, September 11, the last day of the Fair.

August 27, 1926.

To the Women of Charlevoix County:

Because Michigan is so largely Republican, the candidates for state offices who win out at the September primaries are practically sure to be elected in November. This is also true of county candidates in this county, so the primary election is very important here.

The best way to show approval of the Prohibition Amendment and its enforcement is to vote for dry candidates at the primaries. We can hardly expect those who are not in sympathy with the laws to enforce them wholeheartedly.

One of the oddities of American political life is the fact that millions of voters do not vote. Many organizations, in order to change this condition are working for a 100 per cent vote and are making it their business to interest the voters and get them to the polls.

What most women want is a 100 per cent dry vote, and to insure this we urge them in every locality to organize a house to house canvass and to talk everywhere the danger of a wet majority unless every dry vote is cast. Saturday, Sept. 4th, is the last day to register. The primary election is Tuesday, September 14th. Every patriotic citizen will vote!

Mrs. Josephine VanHorn, Mrs. T. J. Smith, Boyne City; Mrs. L. E. Cross, Mrs. B. Saltonstall, Charlevoix; Mrs. R. Gleason, Mrs. Ethel Clark, East Jordan, County Committee of the Women's Christian Temperance Union

[Political Advertising]

To the Citizens of Charlevoix County:

I wish to announce that I am a candidate for re-election to the office of County Treasurer on the Republican ticket at the Primary Election Sept. 14th, 1926, and wish to take this opportunity to thank you for the very generous support you gave me in 1924.

I am at your service and will always be found willing to work for the best interest of the county, to the best of my ability.

Yours very truly,
JOSEPH WM. FLANDERS.

THE THEATRE

If the term "all star" were not so often misused and abused, as that it has practically lost its pristine glory, it would be a temptation to apply it to the notable cast of screen and stage players assembled for the proper interpretation of "The Song and Dance Man," at Palace theatre on Sept. 4-5. Tom Moore, whose Irish smile and finished acting have won him an enviable following, portrays the title role of Happy Farrell, the generous, egotistical vaudevillian, whose trials, tribulations and triumphs provide most of the pathos and humor in this sentimental story of backstage life.

Bessie Love, the diminutive film favorite and exponent of the "Charleston," is happily cast as the small time performer who eventually wins fame in the musical comedy field. Harrison Ford, popular leading man, is the third member of the cast, as the likable and wealthy artist who falls in love with Miss Love.

"Early to Wed" the Fox film production coming to the Majestic theatre, Sept. 4-5, is a picture that will appeal to those who have been married so long they've forgotten about having anniversaries, to those who have just embarked on the matrimonial sea, to the ones who are just contemplating the voyage. Matt Moore, Marion Fairfax, Alma Bennett and Cullen Landis are featured.

It is the story of a young couple who lived beyond their means to impress the business friends. Both think they are pursuing the wisest course towards success and keep lapping that each day will bring the long awaited big money or things, young Carter is trying to meet and make an impression on one Caesius Hayden, known as the easy mark. Little Mrs. Carter knows Mrs. Hayden casually and the magtate's wife has promised to call. Things keep getting worse and worse until finally the furniture store from which they bought their things on credit sends to take back the furniture. Little Mrs. Carter manages to salvage one room, the living room. And, while she and her husband are seriously talking over ways and means, the Haydens call.

From then on the picture is filled with one embarrassing and elever situation after another, all of them ably handled.

Reality, meaning the facts of real life, provides the atmosphere in "Her Second Chance," which comes to the Palace theatre Thursday to the Palace theatre. Anna Q. Nilsson has the leading role, with Huntly Gordon playing opposite her.

In one of the scenes Miss Nilsson, enacting the character of a Kentucky mountain girl, is shown in a weird cave with an old negro witch. The old woman croons a spiritual, which the director

NEW FAIR BUILDING TELLS FARM STORY

A story of Michigan farm life, covered from all angles, will be told in the exhibits at the new agricultural building on the State Fair Grounds, September 5 to 11.

Final check of the organizations and groups which will exhibit in this newest unit of the State Fair equipment, shows that all leading farm interests of the state will be represented. The result, according to Prof. J. F. Cox of the Michigan State College, who is chairman of the agricultural committee of the fair board, will be the most complete story of Michigan farms ever told in exhibit form.

Among the groups which are completing their exhibits this week are: Michigan Farm Bureau, the Grange, the Gleaners, the Michigan State College, the State Department of Agriculture, the Upper Peninsula, the State Crop Improvement Association, the Canners Association, the Detroit Market Gardeners Association, the Michigan Florists Association, and the agricultural areas of the state.

Competitive exhibits in horticulture and crops will also be housed in this building, which is said to be the largest agricultural exhibit building in the world.

Accommodating Captain

A good story has been retailed by the passengers of a big ocean liner. It seems that the gigantic boat stopped at a small Southern port on a winter cruise, occasioning the usual appalling amount of excitement, among the natives, when it arrived. The first time it came near to pulling the passengers off almost burst with importance. He brought his boat alongside most ponderously, shouting orders in Italian, and doing everything wrong. Three times he tried to make connection with the liner's gangway, and three times failed. The first time the liner's engines smiled; the second time he looked serious, and the third time his face became contorted with fury. "Stand by," he bawled through the megaphone, "I'll make this ship stay alongside."—The New Yorker.

WANT COLUMN

LOST! One Eastman Kodak near P. M. Depot. Liberal reward if returned to this office.

FOR SALE—Household furniture, also fruit jars. Enquire of Mrs. O. D. Hammond, 208 Antrim-st.

Mr. Business Man!

What About Your Profits?

Are many of them reprcsented on your books as dormant or dead accounts? Are you usually charging off these bad accounts as uncollectable? If so, are you not causing yourself an unnecessary loss? Isn't it, after all, the one and only unpleasant feature of your business?

The Freeman Mercantile Agency is a bonded establishment, operated efficiently under the laws of the state. It is an institution, however, that has representatives scattered over Northern Michigan, able to give personal service to every call.

We wish to stress the "personal" element of our service. All calls within a radius of a hundred miles of Traverse City are made by personal representatives of this agency. Our collection efforts are not confined to letter writing. Our business is EXCLUSIVELY a collection business.

If you have bad accounts, turn them over to us. If it is humanly possible to collect these accounts, we will do it. Our collection fees are standard. Where no collection is made, no service fee is charged. Our commission is exacted only where satisfactory results are obtained

Look over your old accounts. List the questionable, or dormant ones. Do not charge them off until you have given us a chance to prove what can be done with them

FREEMAN MERCANTILE AGENCY
Record-Eagle Bldg. Phone 403
Traverse City, Mich.

Long Distance provides a satisfactory way of increasing sales with a lowered cost per sale. A salesman can speed his work by giving the Long Distance operator a list of calls and she will set them up one after the other. You can cover more territory more economically and make more sales per day by taking advantage of the opportunity Long Distance offers.

Attractions for Coming Week

At the Palace

Saturday-Sunday, Sept. 4-5

"The Song and Dance Man," with Tom Mogre, Bessie Love and Harrison Ford. The eternal story of the "hoofer," who longs to be a headliner. Gorgeous theatrical revue scenes; back-stage glamour. And don't miss seeing Bessie Love do a dashing Charleston.

Extra—Educational comedy, "Here Comes Charlie."

Monday-Tuesday, Sept. 6-7

Corrinne Griffith in "Into Her Kingdom." Miss Griffith never made a better picture than this one. After seeing it you will remember it for a long time, because Corrine is at her very best.

Extra—Pathe comedy, "Burried Treasure." Tuesday only, Felix the Cat in "Weathers the Weather."

Wednesday-Thursday, Sept. 8-9

Anna Q. Nilson in "Her Second Chance." Your best chance in months for a night of thrilling drama. The story of a woman who wanted her second chance for revenge, and found her first chance for love.

Extra—Fox News Reel. Wednesday only, Felix the Cat, "Weathers the Weather."

Friday, Sept. 10th

Our old friend, Lewis Stone, in "Old Loves and New." One of the fastest moving stories ever written; ever screened. You owe it to yourself to see this one of the biggest hits ever offered at regular prices at this theatre. Extra—Educational comedy, "Till We Eat Again."

At the Majestic

Saturday-Sunday, Sept. 4-5

"Early to Wed," with Matt Moore, Zasu Pitts and Kathryn Perry. Two newly-weds on a wild rainbow-chasing expedition. The tale of a modern married couple who tried to crash society's gate.

Extra—Pathe comedy, "A Sweet Pickle."

THE MICHIGAN ANNUAL CONFERENCE

The Michigan Annual Conference will meet in Traverse City September 1-8, eighth, which is next week. The session will last one week. It will be a very busy week of church activity for Western Michigan, at which time reports of their year's work will be received from all the churches, hundreds of thousands of dollars will be accounted for and the business affairs of a conference involving millions of dollars will all be audited for the year.

In addition the characters and labors of the four hundred Methodist Episcopal of the Michigan Conference will be investigated and passed upon, new ministers will be examined regarding their qualifications to preach and the new year's work will be outlined for the conference pastors.

The closing part of the session will be the appointment of the ministers to their fields of work for another year. Bishop Thomas Nicholson of Detroit, will be the presiding officer.

Frank Bird will represent the interests of the local church at the Layman's Conference which meets on Friday the tenth of September in conjunction with the Ministers Conference.

Not Explained

It is not revealed whether the Boston financier who left $1,000 to educate his son's fiancee in cookery was a victim of his own wife's biscuits or just the monotonous diet of codfish and Boston baked.—Louisville Courier-Journal

Cottage Rentals for the 1927 Season

This is a good time for summer visitors to arrange for Cottages for the Next Season; and by the same token it is the time for Owners who want tenants to list their cottages for next year.

LAWRENCE R. CHASE
REAL ESTATE
230 Bridge Street. Telephone 113

PERSONALS

W. S. Richardson was a business visitor in Central Lake yesterday.

George W. Hawthorne, of Bay City, was a business visitor here Tuesday.

Mrs. W. A. Cline will leave Sunday on the Manitou for her home in Chicago.

Postmaster George W. Weaver was a business visitor at St. James last Monday.

John L. A. Gaister of Petoskey, was a business visitor in Charlevoix last Saturday.

Mrs. L. C. Hannah and son "Billy" are spending a few days with friends at Norwood.

George Cook and Jim Ford of Chicago, are visiting Mrs. Harris at her summer cottage at Ironton.

Messrs. Geo. A. Burke and Charles Fehr of Grayling, visited Charlevoix friends early this week.

Al Carr, John Beers and Harley B. South, of Bellaire, were business visitors in Charlevoix yesterday.

Roy Goldsmith of River Forest, who has been visiting grandma and others at Ironton, has returned home.

Mr. Bernard Cruise, secretary of the Plumbers' Union, Chicago, is spending a vacation with friends in this city.

Mrs. F. W. Rockwell, for the season at the grounds of the Belvedere club, returned to her home, Chicago, last week

Miss Mabel Waites and daughter, Mary Lee of Highland Park, Mich., are guests of Mrs. Blanche Greenman this week.

Russell Blakeslee returned to Detroit last Tuesday night to take up his duties as an instructor in the Detroit public schools.

Mr. Berolzheimer, an instructor at N. W. U. is spending a vacation of one month here, a guest of Mr. and Mrs. James Gaskin.

Mesdames Joseph F. Sanford and Raymond Beardsley, of Muskegon, are guests at present of Captain and Mrs. James Sanford.

Mr. and Mrs. Harold S. Tiffany, of Ann Arbor, are spending a two week's vacation here the guests of Mr. and Mrs. R. W. Faulkner.

Mrs. Dall Quarton, of Boston, arrived in the city Saturday to visit her grandmother, Mrs. Margaret Washburn and her Uncle, Ralph Washburn.

Mr. Irving Leventon of Oak Park, Ill., spent the week end with his family at their summer cottage here. He returned to Chicago Sunday evening.

Miss Mary O'Leary, who has been a guest at Hallett's Inn for the past week left for Mackinac Island a few days ago, enroute to her home in Detroit.

Charles Noyes, a former Charlevoix citizen, but for several years past engaged in business in Columbus, Ohio, spent the latter part of last week with friends here.

Remember the dates, and watch for the big page ad. of the Charlevoix County Fair in next issue. Then come to the biggest and best Fair in the history of our county.

Misses Mary Dowling and Katherine Cullman, Timothy Cullman and Mrs. Margaret McDonald of Chicago, motored up Tuesday and will enjoy a short vacation visiting friends.

Mr. and Mrs. Hyron Cook and son Jack, motored in from Greenville early this week and are spending a short vacation with Mr. Cook's parents, Mr. and Mrs. John Cook, 307 Mason-st.

Mr., and Mrs. A. E. Hoffman and other family members from Muscatine, Iowa, were passengers for Charlevoix on the S. S. Manitou last Tuesday and will stop in this city for a few days.

H. J. Wright and family members are closing their cottage for the season and will motor back to their home, Marys-Tenn.; starting out on their return trip Friday morning, according to present plans.

Mr. and Mrs. John Narsen will soon occupy the residence at 208 Antrim-st. for a term of years owned and occupied by O. D. Hammond and family. Through a recent purchase the Nassens became owners of the residence property.

Mat Routely, Frank Rutherford and Ira A. Adams made a trip to Bellaire yesterday. Mr. Adams returned this morning. The two first named remained for a stay of some construction work that will occupy their time for several days.

Illness of a more or less serious nature prevents Wagner Myers from attending to his usual work at the S. M. Rose barber shop. Mr. Wagner has been confined to his bed for several days but at this writing is somewhat better.

A. L. Fitch and Colonel A. J. Hamilton went to Detroit last Sunday to attend a meeting of the Grand Lodge Knights of Pythias. Mr. Fitch is one of the grand lodge officers, Mr. Hamilton attending as local representative of Pine Lake Lodge No. 122 K. of P.

Go to the Fair and witness another potato race like the one which created so much excitement last year. You will also see the tandem drive with 12 horses, one person riding one horse and driving another, overall race and many other new stunts on horseback, all of which show skill and horsemanship.

Mr. and Mrs. Emery Pierce left for their home, Sault Ste. Marie, Tuesday where Mr. Pierce will resume his school duties.

Rev. C. E. Pollock, pastor of the local Methodist Episcopal church, will leave for the Michigan Annual Conference next Tuesday. He is a member of the Board of Ministerial Education for the Conference, whose duty it is to meet the the new ministers and pass upon their qualifications to preach in the Methodist Episcopal ministry.

Representative J. M. Harris of Boyne City was a Charlevoix visitor for a short time last Saturday. In-se-much as Mr. Harris is unopposed in the campaign he is not worrying about the outcome of primary election, therefore it can be taken for granted that his vote last Saturday was non-political in character.

Announcement of the sudden death of Mrs. C. W. Sidebotham of East Jordan was received here yesterday. She was the wife of Rev. C. W. Sidebotham, pastor of the local Presbyterian society and had visited in East Jordan several years. She was about 45 years of age, and is survived by her husband and two daughters, Mrs. W. W. Mitchell of this city is a sister of the deceased.

Messrs. Lawrence R. Chase, Earl A. Young and Charles H. Emrey, all local real estate dealers, attended a meeting held for the purpose of organizing a tri-county association, at Boyne City last Tuesday night. Antrim and Emmet counties were also represented at the meeting and reports at this time indicate that the association will soon be perfected and in operation.

We have with us on Sunday evening, September 5th, 1926, 8 p. m., in Moose Hall, a noted Spiritualist Medium, Martha Root of Chicago, who is not a stranger to the masses of people who have had her prove the continuity of life in the State of Michigan. She comes to our city highly recommended an accredited worker. All are welcome to come and hear her.

George Block has during the last few days, met with a heavy financial loss, due to some peculiar disease that has caused the death of forty hogs at his place about three miles out on the Norwood road. An effort is being made to determine the nature of the disease that has caused the death of about one-fifth of the total number of porkers that he is raising this summer.

Mr. Henry Touman, of Tacoma, Washington, arrived in this city last Saturday to visit his nephew, Frank E. Wood. The appearance of Mr. Touman at the home of his nephew was the occasion for surprise on the part of family members, in-as-much as Mr. Touman's arrival was unheralded and in view of the fact that relatives had neither seen each other nor carried on any correspondence for more than half century.

M. B. Hooker, of "Hooker's Riding Acadenyy" will be at the Charlevoix County Fair, September 14, 15, 16, and will give the people an unusual and exciting outlay of stunts on horseback. Mr. Hooker is not the oldest horse rider (but we are proud to say the youngest for his age) that our county has, and if you do not think so try him out on any horseback riding stunts you wish.

Prof. L. H. Rousseau, formerly of the Detroit Conservatory of Music and Detroit Orchestra, will meet the members of the City Band Monday evening at rehearsal. He comes here highly recommended from Indianapolis, Chicago and Detroit. Prof. Rousseau expects to direct a church choir, the school instrumental music and city band next year. All those wanting to make appointment with him can do so by phoning 253.

Parasitic Ivy

"At the moment when there is so much talk and action in the direction of affforesting," writes a correspondent of the London Times, "may I call attention to the awful destruction of many hundreds of thousands of trees, ruined by that terrible scourge, the parasitic, pernicious weed, ivy? As I drive through the country, I regret to say that it is the exception to see a tree which is not having its life's vigor sucked from it and its ultimate asphyxiation and strangulation brought about by this scourge."

China Wants "Loud" Garters

A sudden demand for gayly colored garters from the Chinese market recently caused considerable wonder among American garter manufacturers. The louder the color, the greater was the demand, and violent checks and plaids were particularly in favor.

The phenomenon is explained by Isaac F. Marcosson in the Saturday Evening Post. Inquiry developed that male students at Canton and elsewhere had adopted the style of wearing garters on the outside of their trousers.

Legendary Spanish Hero

Bernardo del Carpio was a celebrated semi-legendary Spanish hero of the Ninth century, who signalized himself by his deeds of daring in the wars against the Moors. He is a favorite hero in the old Spanish ballads and romances, and his exploits form the subject of several dramas by Lope de Vega. According to tradition, he defeated the famous Roland at Roncesvalles. Finding him invulnerable, Bernardo lifted him in his arms and squeezed him to death, as Hercules did the giant Antaeus.—Exchange.

NAME BEST ROUTES TO REACH DETROIT

GOOD ROADS AVAILABLE FOR MOTORISTS FROM ANY PART OF STATE

Best road routings to reach the State Fair at Detroit from any section of Michigan have been prepared by the state highway department.

By following these road directions to the point where the routes join the highway system in the Detroit area, motorists from any part of the state will have an easy, comfortable ride to the big exposition, from September 5 to 11.

Special State Fair markers have been installed on the highways to make it still easier for visitors to reach the fair grounds. Arrows have been painted on the pavement in the Detroit district, marking the turns to the fair grounds. Metal signs are also being posted at all turns where a doubt might arise as to the proper route.

Thousands of visitors from all over the state are expected to drive to Detroit for the Fair this year. Plans with which the motorist can avoid the heavy city traffic in getting to the fair grounds, and the generally good condition of state roads combine to make the trip an attractive one.

Definite routes are recommended by the Highway Department as follows:

Northwestern Michigan

From Elmira north follow M-32 to Gaylord; M-32 Elmira to Gaylord; M-14 Gaylord to Lansing; M-16 to Detroit.

From Beulah, Manistee, Ludington, Pentwater and Shelby, follow M-31 to Grand Haven; M-16 Grand Haven to Detroit.

From Traverse City, Cadillac, Reed City, Big Rapids, Howard City, Baldwin and Newaygo, connect with M-76 at Grand Rapids; follow M-16 to Detroit.

Northeastern Michigan

Connect with M-10 at Onaway, Rogers, Alpena, Tawas City, Standish and Bay City and follow through Saginaw, Flint and Pontiac to Detroit, or connect with M-14 at Cheboygan, Gaylord, Grayling, Roscommon and follow to Prudenville; follow M-18 from Prudenville through Gladwin to connect with M-24 west at Midland; follow M-24 through Midland to Saginaw; follow M-10 to Detroit.

Central Michigan

Connect with M-14 at Clare, Mt. Pleasant, Alma, Ithaca, St. Johns or Mason. Follow M-14 to Lansing; from Lansing follow M-16 to Detroit.

Southern Michigan

Connect with M-25 at White Pigeon, Sturgis, Coldwater, Jonesville, Clinton or Saline and follow to M-16 (Telegraph Road); follow M-10 north to Plymouth Road; follow Plymouth Road east to Emerson Road; follow Emerson Road north to Six Mile Road; follow Six Mile Road east to Woodward avenue, turn left (north) on Woodward Avenue to Fair Grounds.

Southwestern Michigan

Connect with M-17 at Watervliet, Paw Paw, Kalamazoo, Marshall or Albion, and follow to Ann Arbor, at Ann Arbor follow either of the routes to the Fair Grounds as shown on above map.

Western Michigan

Connect with M-16 at Grand Haven or Grand Rapids and follow to Detroit.

Thumb District

Connect with M-19 at Bad Axe Sandusky or Port Huron. Follow M-19 to Detroit.

Upper Peninsula

Connect with M-12 and follow to St. Ignace; Ferry from St. Ignace to Mackinaw City; follow M-10 to Cheboygan; M-14 to Prudenville; M-18 to M-24 west of Midland; M-24 through Midland to Saginaw; M-10 to Detroit.

Parasitic Ivy

"At the moment when there is so much talk and action in the direction of affforesting," writes a correspondent of the London Times, "may I call attention to the awful destruction of many hundreds of thousands of trees, ruined by that terrible scourge, the parasitic, pernicious weed, ivy? Poles Vary in Attraction

While the north magnetic pole attracts the north end of the needle and repels the south end, the south pole repels the north end and attracts the south end. This is true no matter in what part of the earth the needle is placed, and there is no reversal of the needle when the magnetic equator is crossed.

Gave Name to University

Brown university, founded in 1764 at Providence Rhode Island, was known as Rhode Island college until 1804, when its name was changed in honor of Nicholas Brown, American merchant, who had given it $100,000.

Needed Sport Apparel

And yet except bicycle horse become the national game if somebody had thought up a snappy costume for it.—Rochester Times-Union.

CHURCHES

Congregational Church
Rev. R.G. Mattson, D.D., Minister

Services at the Congregational church on Sunday, September 5, will continue on the summer schedule with Sunday School at 9:30 and morning worship at 10:30 and not 10:00. Dr. Mattson will preach, subject, "Religion's Near Neighbors; Labor, Wealth and Citizenship."

The evening service at 7:30 will be devoted to the further study of favorite hymns followed by an informal discussion of the topic, "The Mystery and Power of Religious Music."

The service at the Ironton church is at 2:30 with Sunday School session followed by brief sermon.

Church of God
Rev. Paul L. June, Pastor

Services held at the Church of God Chapel located on West Hurlbut-av., changes have been made in the time and schedule of the services.

Sunday School at 10 a. m.
Morning service, preaching 11 a.m.

Young People's meeting 6 p. m.

CHAPTER XI—Continued

16

Her face blazed dull crimson, the glitter in her eyes concentrated to flames of jealousy. Here was the real reason—aside from mercenary interest—for her revelation.

"I thought you know he is in love with her."

"How do I know?" She laughed scornfully. "Because I am a woman. Because I know Ted Baxter. Because I know that he never loved me, has never loved any girl. We've been amusements for him. But he's in love now. He didn't deny it when I taxed him with it.

"Jealous rotten, clean through. I'll tell you what your 'best friend' did. Not because you wouldn't lend him money—or couldn't. But because he saw a chance to do away with you as a rival and a chance to make more money at the same time. He couldn't resist that combination.

"So he had her and her father all about your schemes, that you had made friends with them to discover your prospecting, your surveys and your photographing. It seems that one of their men is Mexican, and was watching you. He saw you early one morning where you had been taking photos. He reported to Mr. Clinton and that made Clinton suspicious. The girl stuck up for you at first. But now—you know better than I do the kind of man Clinton is. But he was furious. He says you abused his hospitality, that you pretended to decorate the garden all his deed. He called you a Yankee spy. And he gave Ted Baxter the option of agreeing to his monstrous proposals. Privately, of course, as a protection for himself against contamination."

"Now Ted is laughing at you. The representative of the colony is in town. Ted takes him to Hermanos valley tomorrow. And you are the Judas, Dolores . . ."

"Chino wins!"

"Baxter thinks he is going to marry that girl. I don't know what kind of a girl she is. She may take him on over the mound. If she was in love with you. But she won't marry him. Baxter is going to marry me."

"I thought you were going away."

"After he marries me. After he makes our child honest." The flame leaped again in her eyes. "He dared me—dared me to prevent that he was not the father of my baby. And he knows—oh, he knows different. I was a little fool when I met him but—I was a good girl. I wanted fun—and I got the temper he held in uncertain leash.

"I have only one arm left, sir," went on Clinton. "But, if you have the impertinence to again salute me or my daughter, I shall find it sufficient to horsewhip you, you sneaking Yankee!"

Caleb did not flinch. His voice grittted.

"You will apologize to me some day, sir. I—"

"Pah!" Clinton wheeled his straight, spare form marching with military precision through the door. Caleb watched him, his blood seeming to boil. Before he could follow Mary Morgan touched him on the elbow. He whirled, in no mood for her.

"Don't snarl at me," she said. "Snarl at Ted Baxter. I want to tell you something. That girl doesn't quite believe all she has heard. And you know it, because she doesn't want to. Now go."

As Caleb crossed the street a car went by, Baxter driving. Clinton and his daughter were in the tonneau. Caleb's hands balled into fists, opened with clutching fingers. He inched to spring for the footboard and sling Baxter from behind the wheel. Hunter saw his standing to let them pass and encouraged his shoulders as he gave Caleb a short snuffle of gleeful malice. Caleb made the car, trembling with rage. He had shaken before like that, precisely as an abuser of horses—worse—to make him out a scoundrel in the eyes of the girl he loved—for Baxter to endeavor to gain for himself the love of that girl, was beyond all forgiveness. It clamored for punishment, physical, amply sufficient.

The recollection of many times when he had pulled Baxter out of a scrape, often to his own detriment, added fuel to the fire of his resentment. For the first time he saw his friend clearly—selfish, unprincipled, spoiled—to use Mary Morgan's strong ter term, "rotten."

Martha stopped opposite to him and broke into his musings.

"Hinckley wants to get in touch with you," he said. "Promised him I'd tell you if I run across you. He's probably ligure by now."

"All right." Caleb's answer was apathetic. For the moment business seemed a dead issue but he roused himself and went to the telephone booths. Hinckley's voice came to him, eager, stimulating.

"I want to go over the ground with you right away," he said. "Just a preliminary, personal survey. We haven't any time to lose. Will tomorrow morning be convenient?"

Caleb responded to the engineer's energy.

"Surely," he replied. "Make it noon."

"Then the Ferry building for the one o'clock broad Gauge boat. It connects with the Coyote Canyon train."

Caleb went back to his seat. The clubroom began to thin out and he ordered his dinner. There was no sign of Baxter. When the meal was announced he sulked the head boy.

"If Mr. Baxter comes in, let me know. I shall be at dinner."

He won't be in, sir. He telephoned a little while ago to tell Mr. Henley he'd meet him at ten o'clock. They have an appointment outside."

Henley was a man patterned to Baxter's caliber. Caleb had met him and never cared to press the acquaintance. Henley had been Baxter's companion on trips with Mary Morgan and Hensley's own special flume. Tonight meant some shifter expedition. It probably meant also that Baxter would get drunk.

He finished his dinner with a cigar and walked up to Semaphore hill. There were a few unimportant letters waiting for him, and a small package. He opened it. The jade pendant was inside, the sign of Pisco, returned from Betty Clinton without a word. He held it for a little in the palm of his hand, his thoughts bitter, before he put the trinket away in his desk drawer, which he locked.

Baxter did not materialize. Caleb was up before the night man went off and made certain of that fact. After he had taken his log to the office and added to it what he needed, he dropped in at the club before he went to the bank. And he met Doctor Fields coming up from the dining room. The physician stopped him.

"Suppose you know about Baxter?"

"No. What?"

"Nothing serious, though this night be a good chance to make him think so. You share a suite with him, don't you? And he didn't show up last night? Of course, Hinkley brought him home from the beach poisoned—straight rye and bubbly. By the way, he's getting the crudest kind of stuff out at the resort. It's got to be stopped. Another arrived literally blind drunk. Eighty-eight per cent crude alcohol and glycerin, a little carbolic acid to give it the title, burnt sugar for coloring.

"And I'm going to try and put the fear of God and whisky into his heart and his liver—while he's here in the club under my eye. Let Ted Baxter keep up this game and he'll practically lose his reason, be purely bestial, he might commit any crime—even murder. You're his friend. Do what you can. He'll be fairly fit by tomorrow. The stuff hasn't really got him yet. Well keep him quiet today with bromides, or something stiffer. You're closer to him than any one else just now, I fancy."

"I'm sorry, doctor," said Caleb, "but we've had a row. Pretty serious one. And I don't know. . . ."

"I've got to get out on urgent business for a day or two. . . ."

"Huh! Had a row? Then you can't do a thing. Just aggravate him. Confound him—he's rooming with all his best friends. Not quite responsible perhaps. Good-by, Warner."

The Waiter Came Promptly and He Paid the Bill and Started for the Street.

Form Your Own Idea of "Outstanding" Man

Somebody signing his name "Me" writes: "I frequently see the phrase 'an outstanding man.' So I went to Webster and found that 'outstanding' meant 'uncollected' (as of a debt). Now, uncollected rents not received, and if a man is not received, he is not accepted. So an outstanding man is an unaccepted man. Is that right?"

No. You have got sidetracked somewhere, the Cleveland Plain Dealer points out. Uncollected means scattered, dispersed. Dispersed means diversity. Diversity is divergence in variation, variation is dissimilarity, . . . man, who is not similar to other men is either superior or inferior. But his dissimilarity is marked only when he is superior—that is, when he stands out from the rest. Therefore, an outstanding man. Thus we come full-circle.

But an outstanding man is an egregious man (Latin, "e," out of; and "grex," a herd—one who stands out from the common herd). Anything that is egregious is eccentric, and therefore absurd. The absurd is despised and looked down upon; the despicable is small and insignificant. You can hardly notice what is significant. Therefore, an outstanding man is a nonentity.

You can prove anything by the dictionary.

Modern Dyestuffs

Modern dyestuffs can be just as fast and give just as beautiful colors as any used in past times, says the United States Department of Agriculture. It is sentiment chiefly that makes us cling to the idea that the natural dyes obtained from plants and animals are best. Many of them are lovely colors, it is true, and the time that has passed since the cloth was dipped in the dye pot has in many cases mellowed the tones and made them even lovelier. Many of the so-called artificial dyes used now are exactly the same from the chemical standpoint as those from berries and bark and other natural sources. In some cases the new dyes are better than the old. The modern manufacturer of dyestuffs knows exactly what is in them, and for that reason is surer of results.

Reindeer Characteristics

It may be said that reindeer have the sense of the characteristics of sheep, cattle and horses. They flock together like sheep, but graze more like cattle, and in intelligence and activity they more nearly resemble the horse. Reindeer are much more intelligent than cattle, but not so intelligent as the horse.

ROBINSON MAKES STAR OF HERMAN

Careful Handling Changes Temperamental One.

If anyone at this late date needs proof of Uncle Wilbert Robinson's rare ability to handle men and study their characters to the advantage of his team, they can have it in this year's Brooklyn team, says Murray Tynan in the New York Herald-Tribune. From this outfit, which, at the very best, is made up of castoffs, venerable gentlemen, commonly supposed to have seen their best years and younger ones that other managers found impossible to handle, Uncle Robbie had made a pennant contender. And he has done this chiefly through his uncanny ability to get the most out of his men.

The shining example is Babe Herman. There are others, of course, like Al Lopez, who was kicked from pillar to post before Robbie made him the great pitcher he is, but their cases are now baseball history. Herman presents a more sensational to Robbie's rare judgment.

The Robbie rideherm is the eighteenth manager Herman has played for in his checkered baseball career, and none of them could do anything with him. Under Robbie, however, he is the sensation of the league, a star who has jumped into overnight fame to become one of the leading hitters in the game at present. He may be a streak player or a flash in the pan—time alone will tell that—but if he be the latter it is the fruit of Robinson's.

No one ever denied Herman's ability at bat. He played in every game of consequence before he came to Brooklyn, and he knocked the ball all over the lot. But his judgment of baseball was his temperament that hindered him and prevented him from becoming the star he is now. He was up with Ty Cobb in 1921 with Detroit, but Ty couldn't handle him. Then he went to the Tigers he went to the Red Sox in the Hinkle' days, and to Cobb did more with him than Cobb. In two years, on and off, Bobo never broke into a game with the Sox.

All this might lead one to believe that Herman has sold us a good many summers in all his travels around the baseball world. But he didn't. At the age of twenty-five he has struck the right manager and the road to diamond fame.

Herman has unbounded confidence in himself, an invaluable asset to a ball player. He can't stand hitting, or even a solid reproof, if he has erred in some way. And, knowing this, Robbie doesn't even correct him. He suggests, and the Babe is wise enough to take hints from anyone they come if Herman falls to hit with men on base Robbie doesn't croak, though he may be doing that inwardly.

"Better luck next time, Babe," usually is his encouragement.

Robbie's careful handling has made Herman a star, as it did many others.

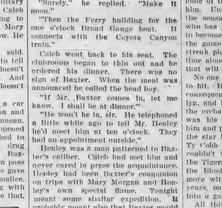
Organized Cheering Cut Out by Cornell Managers

There will be unorganized cheering at track meets this spring, if the Cornell track men's Managers of the baseball and track teams have recommended that action.

The organized cheering edict affects only these two sports. It is understood that cheering at football and basketball games, wrestling meets and boxing bouts will be allowed as usual.

W. W. Hinkley, manager of baseball, said that the cheering of the Pennsylvania mule, described as "poor," led to the decision to dispense with organized outbursts for the remainder of the spring. He asserted that the order was not an official act of the student council, but that it had been discussed at a recent meeting of that body and that the consensus was that baseball and outdoor track could get along without it.

Masters Fadeaway



E. Garland Braxton of the New York Yankees pitching staff recently said he had mastered the fadeaway delivery. The late Christopher Mathewson made famous, and that he intended using the fadeaway in the American league. Braxton said he "gave" the delivery five practicing for three years behind the barn on his father's farm with his brother, who caught him.

Eighteen for Johnson

"How many games are you going to win this year?" was the question put to Walter Johnson the other day. Before he had a chance to reply Manager Harris said:

"Why, the youngster will win 18 sure."

"Whatever the manager says goes," replied Walter.

There's nothing a lot of ball games from a fellow who has been pitching 20 years, but Johnson will deliver if anyone can.

ORCHARD GLEANINGS

ANTHRACNOSE IS SERIOUS DISEASE

The agricultural experiment station of the North Carolina State college has just issued Bulletin No. 286, "Anthracnose of Strawberries and Its Control," which gives the results of several years' investigation with this disease, which has seriously affected the berry growing in North Carolina. The bulletin is published as the result of work done by Prof. F. A. Wolf, formerly of the experiment station staff, and B. O. Dodge of the United States Department of Agriculture.

The symptoms state that anthracnose is the most serious disease affecting the berry crop and is due to a fungus which spreads most easily and rapidly in rainy weather. The anthracnose girdles the canes, causing them to die, and causes the berries to become scabby or brown, dry and woody. After several seasons of continuous work in fighting the disease, Doctor Wolf found that the best way to control it was to remove thoroughly and destroy all growth immediately after harvest, and to spray the new growth.

"There are three critical times when the application of spray is made," says the bulletin. "The first is during August when the new growth is just beginning to appear. The second is during the blossoming period. The third is after the tipping is done. The trouble with this operation is that there is no certainty of how much growth will be made after tipping. It has already been noted that giving a dormant season type of cutting in the summer time after nearly all the growth of the season is completed, leave the plant in a condition which is associated with blossoming. If the need of the tree seems clear, and the type of response can be somewhat clearly forecasted, try such summer pruning as fits the case. If it is to be used merely as an experiment, leave it alone, or at least be prepared to be satisfied with an experimenter's results.

Keep Abreast of Times

Since the fund of horticultural information is constantly changing, it behooves the wide-awake, successful apple-producer to keep abreast of the times by reading the publications of his agricultural experiment station, and the horticultural and other periodicals and farm papers and magazines. It is also important that he attend fruit growers' meetings and demonstrations, in order that he may obtain new ideas and suggestions from others.

Grape Leaf-Hopper

It is a good plan to spray for the grape leaf-hopper when the nymphs or young insects are present in the greatest numbers. Use 40 per cent nicotine sulphate at the rate of one-fourth pint to 50 gallons of soapy water. Add two pounds of soap to the 50 gallons of water, or if you wish to control fungus diseases at the same time use the fourth-pint of nicotine sulphate with 50 gallons of bordeaux mixture 4-4-50. In spraying, hit the lower sides of the leaves forcibly.

To Customers of General Motors

General Motors is unwilling to leave to chance anything involving your satisfaction with your purchase of a General Motors car.

This is why more than seven years ago the General Motors Acceptance Corporation was organized. It assures customers of General Motors who prefer to purchase out of income a sound credit service at low cost.

In the General Motors line there is a "car for every purse and purpose," and the GMAC Plan can be comfortably fitted to the individual circumstances of buyers of assured income.

The GMAC Plan is offered through General Motors dealers exclusively. Ask your nearest dealer to explain its advantages.

Royal Seeking Mates

White Ajing Boots of Bulgaria is seeking assiduously for a wife to grace his throne, his twenty-four-year-old sister, Kiodoxio, is seeking a husband. Callie Boris, she has no throne or royal estate to offer—only her royal lineage and her affections. She has by the use of ferrets, where they are doing damage to property.

The organized cheering edict affects only these two sports. It is understood that cheering at football and basketball games, wrestling meets and boxing bouts will be allowed as usual.

W. W. Hinkley, manager of baseball, said that the cheering of the Pennsylvania mule, described as "poor," led to the decision to dispense with organized outbursts for the remainder of the spring. He asserted that the order was not an official act of the student council, but that it had been discussed at a recent meeting of that body and that the consensus was that baseball and outdoor track could get along without it.

Remembering the Sabbath

Secretary Thomas Todd of the American Congregational association said in a Boston address:

"If some people could have their way the Sabbath would only be observed as the old salt observed it.

"'I'd like to hire a hoat,' a vacationist said to an old Gloucester salt one July Sunday. 'Any objections?'

"'Jumpin' Jonah, no!'

"'Well, I thought,' said the vacationist, 'today being Sunday—'

"'Holy mackerel!' said the old salt. 'So it is! I'd clean forgot. Of course, in that case, shipmate, I'll have to charge ye double rates.'"

Oh, Joy!

"You look radiant, old man. Starting off on your vacation, I suppose."

"No; just learned that the wife's relatives aren't coming here on theirs."—Boston Transcript.

It is in the power of man to make parasitic maladies disappear from the face of the globe.—Pasteur.

Dignity and pride are of too near relationship for intermarriage.—Madame Dolsey.

A spray a day - Keeps skeets away

DON'T let mosquitoes ruin your summer. Keep your living rooms free from all insects. Spray Flit.

Flit spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind, Flit has replaced the old methods because it kills all the insects—and does it quickly.

Get a Flit can and sprayer today. For sale everywhere.

The constant duty of every man is to live plainly and to ascertain his own powers and special gifts, and to labor chiefly in the field of his choice.—John Ruskin.

"I protest I do honor a cabbage best, I do reverence a leek of worth."

SEASONABLE SUGGESTIONS

To give variety and elegance to informal meals there is no better aid than a well-stocked fruit closet. This is the time of the year to fill the shelves with jams, jellies, preserves and conserves. The following suggestions may be worth while in regard to their use:

A cornstarch pudding topped with a spoonful of strawberry preserves or any other small fruit, makes a plain dish quite out of the ordinary.

Any pudding like rice, bread, left-over cake with plain custard is richer and more tasty with a spoonful of jelly or jam dotted over it.

Milk toast is delicious served with blueberry jelly, blackberry jelly or loganberry preserve.

A firm jelly may be cut into cubes to use in fruit salads, to garnish cocktails, cake frosting, as well as ice cream.

Jelly rolls, jelly tarts, jelly doughnuts and jelly omelet are all easy to make if one has plenty of jelly.

Jams or jellies are good to serve with wafers and grahams. An inexpensive dessert is to put some of any jam or jelly on each layer, they may be cut in pie and served as layer cake.

Very small baking powder biscuits, opened and spread with butter, then with jam or jelly are fine.

Apple sauce with a generous spoonful of strawberry jam added makes an entirely different sauce.

These are all causes which can easily be avoided or removed, if children's teeth are carefully cared for. While there is no positive proof that tobacco will cause cancer, the habit of smoking or chewing of tobacco is more apt to develop chronic patch of irritation on the lips, tongue or cheek than the nonsmoker. To avoid this danger every person who uses tobacco should take special pains to avoid burning the lips or tongue, to have the teeth kept in good order, to have decayed teeth filled or removed and to have any sharp or irritating points removed or smoothed down.

HOW TO KEEP WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

BACKACHE

PAIN in the back is popularly considered a symptom of kidney disease. How this belief arose is difficult to say. Patent medicine advertisements have, of course, strengthened the idea in the public mind. But there must have been a pre-existing belief or the claims of quack medicine promoters never would have taken it up.

The fact is that there is no connection at all between Bright's disease and pain in the back. Most persons with chronic kidney disease complain far more of indigestion and discomfort in the stomach than they do of backache. Of course, a person with Bright's disease may also have a pain in his back, but there is no connection between the two conditions.

Most cases of persistent and long-standing pain in the back are due to some kind of muscle or ligament tear or strain or to a dislocation, either complete or partial, of some one of the joints in the bones of the pelvis. These accidents, for they are just as much accidents as a broken arm or a dislocated knee, usually occur during heavy lifting or straining. An unusually severe exertion or a sudden strain here and there in the muscles or the ligaments in the back muscles. Little attention may be paid to it at the time but, in the course of a few days, the pain and tenderness increases, until any movement and especially any muscular effort becomes extremely painful.

Few persons understand that a sprain is really a fracture of the ligament, and that as far as function is a breaking of the bone. Torn muscles ordinarily heal slower than broken bones. If a man breaks a leg, he is willing to go to bed, have a cast or a splint put on his leg and stay there until the doctor says he can get up. But if he tears a muscle he generally says, "It's nothing but a sprain," never goes near a doctor, keeps on working and so never gives the torn muscle a chance to heal.

And it doesn't heal and he has a permanently disabled muscle that is weak and that causes pain whenever it is used.

A joint dislocation is due to the same cause; too heavy lifting. Only the muscle doesn't tear but the joint slips out of position.

Sprains, either of the muscles or the joints, always require a long time for recovery. The back should be strapped and held in position until well.

DISEASES OF THE MOUTH

IN a recent article in the New York Medical Journal, Dr. Joseph C. Bloodgood, the well-known surgeon of Johns Hopkins in Baltimore, talks about the mouth as a source of disease. The mouth, he says, has three distinguishing features, one for food, one as a source of infection, and one as a starting point for cancer. As it is easy to examine the mouth, the possibilities of detecting any disease confined to that area are good. So, much trouble can be prevented by frequent, careful examination of the mouth and teeth.

Diseases of the mouth may affect the mucous membrane lining the lips and mouth, the teeth, not only the part we can see but the larger and more important part which is buried in the bony sockets and the gums. In the mouth we have bacteria, either in the form of fungi, brain four pinnerous from the lungs in the form of germs, or diseases as rheumatism, inflammation of any of the joints, diseases of the heart, arteries or kidneys.

The mucous membrane covering the lips and tongue and lining the mouth is rarely, in an account of the delicate nature, especially subject to irritation. Almost any of the combined irritation is probably one of the exciting causes of cancer.

The lips are subject to several kinds of irritation. Cigarette burns often cause sore spots. Smokers of pipes, especially short clay pipes, may have burns on the lips, if the pipe is always held on the same spot. These tender spots may later lead to cracks in the lips which may be the starting point of cancer.

The tongue, in smokers who have decayed or broken teeth, may develop chronic sore spots on which cancer is apt to develop. A long sharp point on a teeth may cause a chronic irritation of the inside of the cheek, on which cancer may develop. The danger is greatly increased if the teeth are dirty and unbrushed.

Sprains, either of the muscles or the joints, always require a long time for recovery. The back should be strapped and held in position until well.

CHIC STYLES FOR SCHOOL; EARLY FALL MILLINERY

RIGHT in the midst of the long vacation outdoor season up on some placid summer morning with something weighing on her mind. It is the fact that Marguerite, Frances, Mary and the rest must soon be answering the roll call at school and thereby hangs a tale of new clothes for fast growing youngsters. Wherewithal shall they be clothed for the fall season? Is there anything new in fabrics that is worth considering? If not, which of the old reliables is favored? It goes without saying that sheviots, tweeds and the staples—but how shall they be varied and what

Ready for the School Bell.

little details of finish reveal their up-to-dateness?

Beginning with wool fabrics, jersey, woolen suiting and the like of a dependable class which includes twills, wool crepes and novelty weaves and weaves for dresses. In silks, crepe de chine, canton crepe and other wash silks are as practical as ever and in fashion for school frocks, while the smaller checks, stripes and plaids in all of sturdy cotton weaves. In spun and silk materials the favored colors are navy blue, brown, peony, deep green, brighter reds and some black, but beige, rose, brown and various

Distinctive Millinery.

blues are all represented. As for style points, tailored collars, detachable collars, jabots, plaits, bolero jackets, smocking and embroidery (in cross stitch or other simple effects) are approved and recurrent in the new models. Buttons are much in evidence, and buckles, metallic buttons and little buckles placed at the collar, all contribute decorative touches.

Coats include the straightline, flared and cape-oval varieties made of wool chevlot, velours, broadcloth and other coatings and velveteen may be considered in the list. High, snug collars and full sleeves with varied treatments of the shoulder line are liked for girls up to their middle teens.

In August fashion sounds the retreat of summer millinery from slopes and departments to make way for between-seasons and fall hats. Those begin to arrive in late July and soon replace their more frazile sisters, however lovely they are, with sturdier stuff. This year the advance guard of fall headwear was made up of light-colored felt and velours hats, many of them having medium wide brims and high dented crowns. They are soft and therefore supple and adjustable, with brims that may be turned up or down and crowns that may be dented to suit the wearer. These were soon followed by felt blocked shapes and draped hats of antelope and bonnard felts in darker colors. Hats of moire, satin, ribbon, velvet and combinations of fabrics are popular items for fall wear.

Judging from these early arrivals, styles are, on the whole, simple and content types for the matron and the miss. Large hats, bonnet shapes and flapperish hats, but will be smartly crowned with supple, intricately draped and very chic millinery, while the larger headwear will seem simpler.

A youthful bareness lends the group of hats chosen from current showings, and pictured here. It has drawing, satin-covered brim and soft crown of felt cloth, and bears a ribbonine ornament at the front. A wide brimmed, tailored hat, with draped and tucked crown, is finished with a ribbon ornament and a still wider hat, of the picturesque type, bears a cluster of velvet fruit on the right side. Summer lingers in the heavier straws like those pictured, which are trimmed in modified poke shape, faced with satin and adorned with handsome feather ornaments. Finally a black-and-white model makes a late summer appeal with soft, fuzzy brim, faced with velvet, crown covered with applique embroidery, a collar of fancy braid and a sparkling ornament at the front.

Reaches Below the Ankles

A rather different bouffant frock is of black satin with a high neckline at the front and reaching to below the ankles. The back has a deep decolletage outlined with a rebu of fine lace. It is very short in back.

The Double Neckline

A rather new note has been touched by the double neckline. The top one is of a transparent fabric cut close to the neck and the under one is extremely decollete.

Chiffon Pajamas

Lovely pajamas for summer wear feature a combination of plain chiffon with flower designs in attractive color effects. One of black chiffon has trousers of black bordered with huge roses.

Hats From Italy

To wear with the smocked and embroidered dresses made by Rumanian peasant women are hats of open-work straw trimmed with appliqued motifs of colored felt.

THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

(©, by Dodd, Mead & Company.)

Mahomet

IN THE early years of the Seventh century A. D., an Arabian peasant's epileptic son, Mahomet by name, announced that he was God's chosen mouthpiece to mankind and that he was also the promoter and high priest of a brand new religion. He backed these statements with a series of outlandish theories and a few neat, lucid-made miracles. Half-fanatic and half-charlatan, he succeeded in changing the map and history of the world.

Arabia and its surrounding countries, at the time of Mahomet's birth, were made up of small, comparatively unimportant states; some independent, some subject to Greece or Persia. They worshiped in an indifferent, half-hearted way a long list of gods, with Allah as the chief divinity. Mahomet within a brief lifetime converted the East to a religion known as Islam, plagiarized by him almost entirely from the Christian and Hebrew Scriptures. He had persuaded pirates to regard their subsidiary gods as demons (for he believed in the truth of their alleged deities' existence), and he recognized Allah as the one true God. Had he stopped there, no great harm would have been done. But unfortunately he presented to the world a "holy war's" as well as religion. The result was a mass of raiding hordes, who, inter-mittently from 622 to 1699, and a united horde of fanatics who for centuries threatened all Europe with pierce and progress.

Mahomet was born a penniless orphan when only three. He was reared in poverty, but in early manhood became a rich merchant's agent and married his employer's widow and became a power in his home city. He was afflicted with epileptic fits, which were followed by long swoons or trances. In these trances he claimed to hold communion with the Angel Gabriel and other divine messengers, who (like by little Dutch lads in a wood) might have to replace bonfiredom, and bade him proclaim the new meetings. These teachings, though declared wholly new, bore a startling resemblance to the middle-ages of other and older religions. But many Orientals—a race who still regard the personality and possessions. They even made Constantinople their capital and penetrated Spain, the Balkans and other parts of Europe.

A new world power had sprung up in a single generation with fanaticism as its keynote. It could not be overthrown by force, for by one swift death or defeat or by any orth ry of misfortune another Mahomet would arise.

It became a force to be reckoned with: a force where ferocity and zeal have faced the prowess of a thousand generals, from the earliest Crusaders down to Lord Kitchener; a force ever smoldering and awaiting only the opportunity to burst forth into fiercer, more destructive flame; a force that has ever been opposed to progress.

England's Debt to the Bee

"If it were not for the humble bee, England would not be "mistress of the seas," Prof. George H. Brambell told his class in historical geology at Will Hems college. He explained that "the strong men of England, who reign supreme on the seas," are beef eaters. The lowly humble bee, he added, fertilized the clover which was consumed by the cattle, which befriine English beef. His statement was made in the course of a discussion of the importance and influence of insects.

Camp Fire Girls

Inspector Found Beauty in British Factories

Britain's factories are beauty marts, if the opinion of Sir Thomas Legge, senior medical inspector of factories, is to be taken without question.

In the last factory he visited Sir Thomas says that 72 per cent of the damsels employed were good-looking—of the Rossetti, Burne-Jones, or Greek type—27 per cent were average-looking and none at all were bad-looking.

To top the home beyond doubt, Sir Thomas has alluded publicly that he takes a serious interest in the number of looks because it is an important asset for the welfare of the country. Twenty years ago, according to him, 30 to 35 per cent of the working girls of the country suffered from anaemia; today not more than 5 per cent suffer from it. Open-air life, exercise and high wages have, he says, been chief contributory causes toward making the average worker's lot Britain as regards of health as well as good looks.

Probably Tootin' Her Own

The young college girl, whose first hand knowledge of courtship and all things pertaining thereto was gained vicariously, visited a friend on the latter's farm.

Among the many things of interest to her was the cow and to her surprise she learned that the animal had horns. She stood watching the cow for a little, during which time a fresh feature of the animal's physiology, and then turned upon the cow herself.

"Oh, which one of her horns did she blow?" breathlessly demanded the collegiate, as she grasped her friend's arm.

He Had the "Dope"

From a school boy's essay on the race horse:

"The race horse is a noble animal used very much by gentlemen. Races are very bad places. Now but very few people know anything about races. The last derby was won by Sir Mordecai Mason, a beautiful bay colt by Dastardly, riding four. The odds were 4 to 1 against him, and he won 8 lengths. Good old Steve!"—London Daily Express.

Perfect Poise

A young man and a girl emerged from the marriage license office.

"Now," said the girl, "I suppose we'll have to go to a minister."

"Why?" asked the young man.

"Because," she replied, "there's nothing else left to sacrifice."

IN HOTEL LOBBIES AND ON HOTEL PORCHES

Office of Uncle George H. Van Pelt
Hotel Hallett.
Charlevoix, August 30, 1926.

A Letter on Truth and Fidelity
to our County:

The man who starts the day with a firm determination that "nothing but truth shall escape his lips this day," and who adheres strictly to his text, has nothing to fear from any combination of liars no matter how strong it may be. Truth is present at all time and in all places, and is always true. If people would only take time to learn and to understand the truth about things in which they are interested, instead of simply believing they would be a great deal better off. It must be apparent to all of us that we can progress only in the degree that we overcome the barrier between reason and truth on one side and instinct, doubt and fear on the other side.

It is a fact that today Charlevoix county needs the assistance of every law abiding citizen in order that we may take advantage of every opportunity to advance our interests, and it is time also, that we should know that he is not with us in our work for good, is against us. All we have to do to prove this, is to look back on the great mistake we made a dozen or fifteen years ago when we had raised the money to bond for the sum of $100,000.00 with which to build the twenty miles of concrete road on the Dixie Highway. We simply let it slip by not being on the job. No one man was to blame, but on the contrary, every man was to blame for we should have had the entire twenty miles built for less than the $100,000.00 if we had been on the job. I want to make this plain, so that if we get the opportunity to build the road around Pine Lake as Lake Charlevoix as it probably will be called, we won't set idly by and say, "Oh the boys will build it." John, Jim and George, all of them are working for it, and they'll see that it is built. Well its just such d—m fool talk as this that prevents many a good work from ever being commenced. This good concrete road around Pine Lake is an opportunity of a life time and should not be allowed to fail, and if it does fail you indifferent fellers will get the blame. Many of our people comfort themselves and try to comfort me because we did get (after a strenuous fight) 12½ miles. Well I'll tell you, it does not comfort me for we only got 62 percent of what we should have had. No man ever made a success business who followed it up on that basis. The true way to do is to acknowledge the mistake, rectify and straighten it out. Buck up and not let the same thing happen again.

Yours truly,
UNCLE GEORGE.

Too Much Sauce

"Don't get saucy with me, big boy!" retorted the woman as her husband threw a jar of apple-butter her way.—Denison Flamingo.

ROAD BUILDING GAINS ARE MADE IN ROAD BUILDING

Forty-eight states, in conjunction with the bureau of public roads, Department of Agriculture, are rounding out their first decade of modern road building with gratifying results, according to a statement issued by the American Association of State Highway Officials.

"The interstate system, however, on which state and federal governments have been working jointly, is but more than half complete, and suggestions of curtailment of the general program for the purpose of economy have served to arouse public interest in pushing on toward completion of the remaining half.

In some quarters the question of constitutionality of the present federal-aid road program has again been raised, which highway officials hold to be irrelevant in view of the exhaustive studies that were made before the program was put into effect.

In response to points raised, highway officials in their statement call public attention to the fact that "there were those in the beginning of our national life who had visions of interstate highways as nation developers, for as early as 1811 the Cumberland pike was planned by congress. Jefferson, Hamilton, Madison, Clay, Calhoun and Webster all maintained a constitutional authority, as well as the national need, for federal activities in highway improvements.

"But a short time after the construction of the Cumberland pike it was turned over to the states, which thereafter became neglectful, and in turn reasset it on to toll companies. And then for half a century the much vaunted power that was given a most excellent tryout. The result of all of which was that the only free public highways for years were those which were impossible during the unseasonable periods.

"It was not until 1891 that the states began a real program of road construction, and New Jersey has the honor of being the first state to create a state highway department. Two years afterward the federal government appropriated $10,000 to establish the office of road inquiry, and for eight years it kept on inquiring. At the end of that time the name of this office was changed to the office of public roads. The constant growth of state highway departments naturally gave a larger vision of the highway departments and in 1912 the congress created a commission to investigate the problem as to whether the federal government had a real duty in the matter.

"For three years this committee made a thorough investigation and finally gave a favorable report. In 1916 the congress made its first real appropriation for highways. Recent discussions on the floor of congress as well as certain public addresses and published articles would lead some to believe that the congress had not made a thorough investigation of this subject. The personnel of the congress has changed greatly since the report of the 1915 committee. There are now but four of this committee—two senators and two members of the house—in government service, who were members of that committee of ten. And so, it is necessary to recall some things which was supposed had been thoroughly established in the public mind."

Trees Along Highways Will Not Injure Paving

The planting of trees by state highway departments and by local governmental subdivisions is attracting much favorable attention. Experts declare that if the trees are set back sufficiently from the roots will not injure the pavement.

The trees recommended at one time that were close to the shade caused by trees is rapidly becoming a thing of the past, but experience in many states now shows highways have been built along beautiful tree-lined roads and considerately exploited this idea.

According to the A. A. A., however, judgment should be used in the planting of trees so that they will not act as wind breakers, particularly in the northern states in the snow belt.

Build Roads for Trucks

According to Mexican representatives the motor truck has awakened the necessity of improving roads in the vicinity of Sinola, which is considered one of the richest mining centers in the land of the Aztecs. Some time ago a road was completed between Dimas and Sinola. The construction of this road created unlimited enthusiasm and the outlook for the track as a real factor in road building is very evident.

Good Roads Facts

It needs small effort to persuade the salesman who travels the rural districts in an automobile that an improvement in the highways he traverses would result in greater earnings for himself. More calls per day, increased repair bills, greater demand due to easier trips by the farmer to the store, all these would swell his sales.

SHOCKLEY FAMILY REUNION HELD

Happy Event Took Place Labor Day at Family Home

A very happy reunion of the Shockley family was held at the home of Mrs. Ada M. Shockley, when all her children, grand children, and other members of the family assembled over the week end of Labor Day, for an old fashioned visit with their mother and sister's family, Mr. and Mrs. H. I. Ochs.

An extensive program had been prepared for the entertainment of the guests, but owing to the bad weather most of this had to be given up. Those from out of town were:

Mr. and Mrs. Saville and sons, Bobbie and Jack, of Menominee; Mr. and Mrs. Arthur Ladd and son, Edward, of Pontiac; Mr. and Mrs. M. V. Brotemoyer and son, William Frederick, of Jackson; Miss Grace Shockley of Segenola; Mr. and Mrs. W. B. Saville and Mr. and Mrs. Carl Johnson of Kalamazoo. One grandson, Harry Ladd, was not present.

Even Best Clock Varies

America's most timely clock elicits off the fleeting moments with a variation of only two-hundredths of a second a day.

Inclosed in an air-tight air chamber, especially constructed to keep outside influences away from the government's master timekeeper, the standard clock at the bureau of standards, Washington, which has this small variation in time, is used as a yardstick for measuring time intervals at the bureau. The clock is electrically wound twice a minute and has a contact by which it may send second signals to any part of the bureau.

Its time is checked each day by comparison with the noon signals from the naval observatory, which uses solar observations to set the nation's time.

Good Finders

"If my youngsters are as successful at other things in life as they are in finding things, some good luck is always going to be with them," said a mother as her boy handed her a small blacksmith hammer he had picked up on a country road. "They have brought me an ice pick, a jar of sticky candy, a half-pint bottle of cream, a gallon of maple syrup, a nail clipper, a pair of eyeglasses in a case which I've advertised for days without any response, a cuticle—indeed, if I'd kept a collection of all the things they've found it would resemble a rummage sale."—Springfield Union.

The Wreck

Pierre had been the sole witness of a wreck on one of the spur branches of a Canadian railway. He was asked by the attorney to take the witness stand and tell the story in his own way. To wit:

"Wal, sar, numbaire 2 she come down track lak she were all bender for 'lection—numbaire 3 she came same track other way n—boomp—both smash up all over. By gar, I t'ink dat's wan h—l of a way to run a railroad."

Mean Remark

Perhaps the meanest thing we ever heard one neighbor say about another was this, which we happened to hear yesterday: "She couldn't get through Ellis Island."—Ohio State Journal.

Two Charlevoix Boys on a Long Canoe Journey

Two Charlevoix boys, Gilbert Saltestall and Vincent Smith Mclean, are spending a few days vacation by taking a canoe and camping trip through the Intermediate Valley and Lakes region. They left Charlevoix early this week launching their canoe near Ellsworth with the intention of making the trip through the inland lakes and streams to Elk Rapids, returning via Grand Traverse bay and Lake Michigan. In making the trip to Elk Rapids from Ellsworth the boys will travel through the finest chain of inland lakes in the state. The entire trip from start to finish as planned covers a distance of about one hundred miles with but two short carries between Ellsworth and Lake Michigan the first at Bellaire and the other at Elk Rapids.

SCHOOL MONDAY

Public Schools to Open First of Week—List of Teachers

Charlevoix Public schools will open next Monday with the following corps of teachers in charge of the several educational departments under the direction of Superintendent Leonard H. Cooper.
